"(7) Section 375(a) of such Act is amended by striking out 'peanuts, or tobacco' and inserting in lieu thereof 'or peanuts'.

"(8) The following provisions of such Act are repealed:

"(A) section 301(b)(3)(C);

"(B) section 301(b)(10)(B);

"(C) section 301(b)(14)(B);

"(D) section 301(b)(15);

"(E) section 301(b)(16)(B);

"(F) sections 311 through 314 and 316 through 320; and

"(G) section 378(f).

"(c) The following provisions of law are repealed:

"(1) The Act entitled 'An Act relating to burley tobacco farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended', approved July 12, 1952.

"(2) Section 703 of the Food and Agriculture Act of 1965.

"(3) Section 4 of the Act entitled 'An Act to amend the Agricultural Adjustment Act of 1938, as amended, to provide for acreage-poundage marketing quotas for tobacco, to amend the tobacco price support provisions of the Agricultural Act of 1949, as amended, and for other purposes', approved April 16, 1965.

"(d) Section 5 of the Commodity Credit Corporation Charter Act is amended by adding the following undesignated paragraph at the end thereof:

"'Notwithstanding any other provision of law, the Corporation may not exercise any of the powers specified in this section or in any other provision of this Act with respect to tobacco.'.

"(e) Section 8c(2) of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, is amended—

"(1) by striking out 'tobacco,' in clause (A);

"(2) by inserting 'tobacco' after 'except honey,' in clause (B); and

"(3) by adding the following new sentence at the end thereof: 'Notwithstanding any other provision of law, no order concerning tobacco may be issued or enforced under this Act.'.

"(f) The amendments made by this section shall apply to the 1982 and subsequent crops of tobacco.

"WITHDRAWAL OF CONSENT RELATING TO COMPACTS AMONG STATES FOR REGULATING TOBACCO PRODUCTION AND COMMERCE

"SEC. 1113. Effective January 1, 1982—

"(1) the Act entitled 'An Act relating to compacts and agreements among States in which tobacco is produced providing for the control of production of, or commerce in, tobacco in such States, and for other purposes', approved April 25, 1936 is repealed; and

"(2) the Congress withdraws its consent to any compact or agreement entered into pursuant to the Act referred to in paragraph (1).

"TOBACCO INSPECTION AND RELATED SERVICES

"SEC. 1114. (a) Section 5 of the Tobacco Inspection Act is amended by striking out the last two sentences thereof and inserting in lieu thereof the following: 'The Secretary shall impose and collect fees and charges for inspection or certification and other services under this section at designated auction markets and for the establishment of standards under section 3 of this Act. The fees and charges authorized by this section shall, as nearly as practicable, cover the costs of the services, including administrative and supervisory costs. Such fees and charges, when collected, shall be credited to the current appropriation that incurs the costs and shall be available without fiscal year limitation for the expenses of the Secretary incident to providing services under this Act. Fees and charges assessed under the provisions of sections 5 and 6 of this Act shall be collected from warehouse operators or persons financially interested in the tobacco, except that fees and charges for inspecting or certifying tobacco and performing other services at auction warehouses in designated markets shall be assessed against warehouse operators irrespective of ownership or interest in the tobacco, and such inspection and related services shall be suspended or denied at any such warehouse if the warehouseman fails to pay fees and charges assessed. Tobacco inspection or certification services for tobacco sold at auction shall be provided only at markets designated pursuant to this section. Tobacco inspection or certification services provided to such auction markets shall take precedence over such services, other than reinspection, requested pursuant to the authority contained in section 6 of this Act or any other provision of law.'.

"(b) The first sentence of the second paragraph of section 6 of the Tobacco Inspection Act is amended to read as follows: 'The Secretary shall fix and collect such fees or charges as will cover, as nearly as practicable, the costs of the services provided under this section, including administrative and supervisory costs. Such fees and charges shall be credited to the account referred to in section 5.'.

"(c) The provisions of subsections (a) and (b) shall become effective July 1, 1981.

"WAREHOUSE EXAMINATION, INSPECTION, AND LICENSING

"SEC. 1115. (a) Section 10 of the United States Warehouse Act is amended to read as follows:

"'SEC. 10. (a) The Secretary of Agriculture, or his designated representative, shall charge, assess, and cause to be collected a reasonable fee for—

"'(1) each examination or inspection of a warehouse (including the physical facilities and records thereof and the agricultural products therein) under this Act.

"'(2) each license issued to any person to classify, inspect, grade, sample, or weigh, agricultural products stored or to be stored under this Act;

"'(3) each warehouse license issued to a warehouseman to conduct a warehouse under this Act; and

"'(4) each warehouse license amended, modified, extended, or reinstated under this Act.

"'(b) Fees under subsection (a)—

"'(1) shall cover, as nearly as practicable, the costs of providing the services described in such subsection, including the administrative and supervisory costs incident thereto; and

"'(2) shall be credited to the current appropriation made to pay for services provided under such subsection and shall be available without fiscal year limitation for the expenses of the Secretary incident to providing services under the Act.'.

"'(b) Section 31 of the United States Warehouse Act is amended to read as follows:

"'SEC. 31. There are thereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act. Such appropriated funds may be used by the Secretary to employ qualified persons not regularly in the service of the United States for temporary assistance in carrying out the provisions of this Act.'.

"(c) The provisions of subsections (a) and (b) shall become effective October 1, 1982."

Mr. HATFIELD. Mr. President, this is basically the amendment dealing with the tobacco subsidy. I am offering an amendment which would effectively remove Federal participation in tobacco price support activities. I urge my colleagues to support this legislation in an effort to increase our fiscal and social responsibility and to preserve our credibility with respect to budget reduction efforts of the administration and the Congress.

I think my record of voting today on the various and sundry subsidy programs would be consistent with what I am asking now to apply to the commodity of tobacco.

Since 1938, the Federal Government has been participating in support of tobacco while at the same time, because of the associated health problems to the consumer, spending millions of dollars to discourage the use of tobacco products, I find this to be an offensive paradox, a tragic comedy of moral and fiscal irresponsibility. It is time to reevaluate our policy toward this commodity.

My amendment would eliminate the feudalistic allotment system which requires the producer to have an acreage allotment before planting any tobacco. It would remove the Commodity Credit Corporation's participation from the loan program for tobacco. The tobacco lobby and my good friends from tobacco-growing States would say that there is no tobacco subsidy; however, any time a farmer receives a reduced interest rate or a direct payment to grow any commodity, it is indeed a subsidy. The tobacco loan program has cost the taxpayers $56 million in direct losses since its inception, along with $600 million in interest subsidies, not to mention other costs, including research, grading, marketing, and inspection. I quote from the Des Moines Register, August 24, 1981:

Studies by officials of the U.S. Department of Agriculture's Commodity Credit Corporation, the agency that funnels the federal money to tobacco producers, indicate that since the mid-1950's the program has cost the government almost $600 million. The entire cost of the program dating back to the early 1930's may be as high as $850 million, although this is an estimate because records date back only to 1953.

At the same time, the USDA officially lists the total cost of the tobacco program since 1933, the year of its inception, as $56.7 million.

This figure ignores the cost of interest that the CCC pays the U.S. Treasury for money it borrows to lend to commodity producers.

Much of this interest has been lost because the CCC has charged producers a lower rate than it has had to pay. Also, in selling the tobacco it gets as part of its price support program, the CCC seldom recovers interest cost.

For example, the CCC late in 1979 and early in 1980 sold some tobacco from its stocks, and reported that the government had just about broken even on the deal, recovering most of its costs. However, if the cost of interest had been included, those sales would have shown a loss of $11.6 million.

Some USDA analysts have reported privately that the program could cost up to another $1 billion through 1985.

No matter how the cost of the tobacco program is figured, it still represents only a small percentage of the federal government's total outlays for support of agricultural commodities.

I am aware, Mr. President, that the Secretary has directed CCC to charge the true cost of borrowing to the loan participant as of January 1981, but this does not mitigate continuing costs in other areas. Of even greater concern is the impact of imports on the tobacco industry. The USDA testified in hearings before the International Trade Commission that the CCC stood to lose at least $96 million for 1975–80, and $123 million for 1981–85 over the next 5 years. Imports have increased over 300 percent in the last 15 years, while our world market share of tobacco has dropped from 60 percent in the late 1950's to 2 percent today. The American cigarette in 1965 contained 11 percent imported tobacco; in 1981, a full 30 percent of our cigarette blend is foreign tobacco. Most experts agree that one of the major causes of this import/export imbalance is the artificially high fixed price of tobacco. The Secretary of Agriculture has virtually no discretion to adjust the tobacco program. His only authority under current law is to reduce the national quota for acreage. This is the only program that limtis this discretion so severely.

Mr. President, I understand that the tobacco price support system does not cost a great deal in relation to other loan and subsidy programs; however, the fact that we are spending any money on this nonedible commodity defies reason. I think it is important to point out at this juncture that the tobacco price support system is the only commodity program that guarantees a profit to the farmer. In a 1981 study by the Department of Agriculture, 1,033 tobacco farms were surveyed and it was found that the average cost to produce 1 pound of tobacco was $1.41. The average price support level for tobacco in this marketing year is $1.59, or a full 18 cents preferential in favor of the farmer. Any farmer in this country—wheat, corn, soybeans, dairy or feed grains—would love to have this assured return under their programs. This is not an income security program, but an outright guarantee of profit, Mr. President.

The Federal Government now restricts tobacco acreage through its allotment system. This system requires the farmer to hold an allotment before he can plant for harvest a crop of tobacco, and furthermore provides for criminal penalties for producing non-quota tobacco. The tremendous anomaly in this system is that you may be an allotment holder without actually being a farmer. The farmer may have to rent or lease the allotment from another individual, which raises the cost of production without increasing the return to the farmer, and the allotment holder receives an income from the land without turning a spade of soil. My office received a phone call on Monday from a family in Georgia who owns an allotment, and lease it each year. Even so, they felt that it was a wrong policy to continue this system, and offered their congratulations and assistance in my efforts.

This is a strong indication of the type of support this proposal generates. It is estimated that the current value of these allotments is close to $300 to $400 million per year, including at least $225 million for flue-cured tobacco. The average farmer has a farm of 130 acres, of which 7 is planted in tobacco. The allotments range in size from 1 to 3¼ acres, but the farmer, if he does not own his own allotments, must pay a cash rent of between $800 and $1,000 per acre for the right to grow. Only 16 percent of tobacco farmers farm only their allotment. Paying this monopoly rent adds to the cost of production and reduces net income to the small farmer.

Mr. President, this legislation is not intended to reduce the actual quantity of tobacco grown in this country, or to directly hurt the small farmer, but to reduce the Federal Government involvement in this process. Proponents of the support program are concerned that the price and supply will be set by the six largest manufacturers and the world export demand. They are worried that the farmer will not receive a fair price or will be pushed out of production. They believe the price support is the only way to avoid this eventuality, but this is not in keeping with the administration's philosophy of a free-market economy. The price for a nonfood commodity should be set by world demand for the product, not an artificial price set by the Secretary of Agriculture.

In discussions with the flue-cured stabilization representatives and members of the tobacco lobby in North Carolina—I might say I sent a staff person to the State of North Carolina to meet with these people on the scene. The question was asked, "Could tobacco production continue under private marketing and

financing?" The answer was a hesitant yes.

The multi-billion-dollar nature of this program clearly allows the industry to work within the financial community to obtain the financing necessary to assure continuing production at levels necessary to produce the quantity and quality of good tobacco products. In a recent meeting, the officials from the U.S. Department of Agriculture Agricultural Stabilization and Conservation Service made it quite clear that there would be some changes in the structure of tobacco farms in the United States. They felt this change in the program would likely displace some marginal producers, and that the trend would be toward larger, mechanized tobacco farms.

But tobacco is a strong cash crop, and most small producers should survive and actually prosper under this deregulation. After visiting with North Carolina tobacco producers, one of the major problems faced by all producers, large or small, was the lack of available labor.

With the trend toward larger tobacco farms, those marginal producers that are displaced from tobacco production could work at a substantial wage on these extended large farms. This does not take away those other crops they would continue to grow on their own land, or remove them from the farm sector. This change in labor pattern should assure a steady, decent income to the farmer, and produce a much more efficient and effective tobacco industry; hardly the "doomsday" predictions opponents of my amendment might suggest. There should not be any substantial loss of revenue with the adoption of this amendment, because the quantity of tobacco grown should continue to be relatively inelastic.

Beyond these monetary considerations are the social implications of the continued support of tobacco. The link between certain forms of cancer and lung disease and tobacco consumption is well-documented, with other problems currently under study, including birth defects, abortifaciency (which is spontaneous miscarriage), and other forms of cancer not previously associated with tobacco use. Research and education programs directly related to tobacco use cost between $5 billion and $8 billion each year, with federally supported smoking education totaling approximately $13 million per year, about equal to the administrative cost of the tobacco price support program. Despite attractive implications, this amendment is not specifically designed to reduce or discourage tobacco consumption, but to stop the support of a commodity that directly affects the health of Americans.

In this era of fiscal restraint, it is a travesty to slash away at food and social programs, while allowing the tobacco support activities to go not only untouched, but unevaluated because of the nonrecurring nature of the program. We have sustained significant cuts in nutrition, school lunch programs, and food stamps, and have entertained reductions in other human services without proper consideration toward reducing tobacco price supports. In the Reconciliation Act alone, we cut $13.4 billion in human service entitlement programs, including $1.7 billion in food stamps, $1.5 billion in child nutrition programs, $1.2 billion in aid to families with dependent children and child-support enforcement, among other cuts.

It is not that I disagree with attempts to cut Federal spending, especially considering the condition of the economy at this point. Indeed, I support it and worked toward passage of the Omnibus Reconciliation Act. I believe that it is time now to look to other areas for cuts to meet our goal of a balanced budget.

Mr. President, I have just come today from a meeting with the staff of the Appropriations Committee of the Senate, where I instructed them now to begin to pare and to cut away approximately another $9 billion in appropriated funds from fiscal year 1982 budgets.

We have called a halt to the whole appropriations process in the U.S. Senate, a process that was underway to meet the deadline of September 30, the end of the fiscal year, in order to make new adjustments for further reductions offered and asked for by the administration. These will have to be made in human programs. These will have to be made in natural resource programs that are multipliers. These will have to be made in housing, in transportation, in food nutrition, in water projects, in transportation projects, in space programs. In all the nondefense programs, we will have to make at least $7 billion more in outlay costs, and perhaps even more, in order to balance the budget.

Mr. President, as I said to those who came to us from the accountant's office in the OMB, "You are dealing with figures, and we are dealing with human lives." I wish that all those who find it so easy to recompute and to refigure the dollar sign and the dollars in these programs—those in the OMB and other offices—would come here to a markup session of the Appropriations Committee and would see, in the halls and the surrounding tables where these cuts are being made, the halt, the lame, the blind, the cancer victims, the children, and all the other people whose hopes are being cut down as we cut figures, and then ask the question, "Why would we then permit this kind of unconscionable investment in Federal tax dollars to continue for tobacco subsidy?"

Are we placing more importance on a product that destroys life than we are on a concern to support lives and the needs for nutrition and health? If we are not moved by a humanitarian call to duty in this matter, then, for goodness sake, let us be aware. The health of these people is as important a component of our national security as is our military hardware.

As the distinguished chairman of the Senate Agriculture Committee stated in his opening remarks on this bill, it is time to return to a market-oriented farm system. This is exactly what I am proposing with this amendment. If the market cannot effectively allocate resources for this commodity, why should we expect the Federal Government to do it. It is time this stopped.

It is time we got the Government off the back of the enterprise system of this Nation. It is time we reduce regulations and control. It is time we reduce the dependency cycle upon the Federal Government, which started under the philosophy of the New Deal, when it was expressed, "Let the Federal Government take care of the problems. Let the Federal Government provide the subsidy. Let the Federal Government provide the direction. Let the Federal Government provide the support."

It is time we let people stand on their own feet, recognizing the genius of the American public, as we have asked them to do in matters relating to food and nutrition and welfare and education and all the other programs that the Federal Government today is subsidizing, which somehow represents the wrong philosophy for building a new America, a strong America, where people stand on their own.

Let the tobacco farmer stand on his own feet, as we are asking the welfare recipients and the poor and the needy and the minorities and all the others in America because we are prone to cut the programs upon which they depend.

I suggest that many people, including myself, find it unconscionable to allow Americans to go hungry, while supporting an inedible and unhealthy crop like tobacco.

We can no longer substantiate the necessity of continuing this program. Any arguments based on the premise that this deregulation amendment would signal the demise of tobacco production in this country are absolutely erroneous and fallacious. Tobacco is a very lucrative cash crop, able to survive in the private market.

We spend billions to discourage smoking, and yet continue to assist the growing of tobacco. This must end. We let millions of Americans suffer nutritionally while exempting tobacco in the budget-cutting process. This is a grievous oversight.

Mr. President, this amendment has not gone unnoticed by the American Lung Association, the American Cancer Society, the National Taxpayers' Union, the American Medical Association, and millions of Americans looking for fiscal responsibility from its leaders. I certainly hope that it does not go unnoticed by the U.S. Senate.

Mr. President, I ask unanimous consent to have printed in the RECORD various documents in connection with this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

N.C. CENTER FOR PUBLIC POLICY RESEARCH

The North Carolina Center is an independent research and educational institution formed to study state government policies and practices without partisan bias or political intent. Its purpose is to enrich the dialogue between private citizens and public officials, and its constituency is the people of this state. The Center's broad institutional goal is the stimulation of greater interest in public affairs and a better understanding of the profound impact state government has each day on everyone in North Carolina.

A non-profit, non-partisan organization, the Center was formed in 1977 by a diverse group of private citizens "for the purposes of gathering, analyzing and disseminating information concerning North Carolina's institutions of government." It is guided by a self-electing Board of Directors, and has some 600 individual and corporate members across the state. The Center's staff of associate directors, fellows, and interns includes various scholars, students, journalists, and professionals from around the state. Several advisory boards provide members of the staff with expert guidance in specific fields such as education, publications, and fund raising. The Center is forbidden by law from lobbying or otherwise attempting to influence directly the passage of legislation.

Center projects include the issuance of special reports on major policy questions; the publication of a periodic magazine called N.C. Insight; the production of forums, seminars, and television documentaries; the maintenance of a speakers bureau; and the regular participation of members of the staff and the board in public affairs programs around the state. An attempt is made in the various projects undertaken by the Center to synthesize the integrity of scholarly research with the readability of good journalism. Each Center publication represents an effort to amplify conflicting views on the subject under study and to reach conclusions based on a sound rationalization of these competing ideas. Whenever possible, Center publications advance recommendations for changes in governmental policies and practices that would seem, based on our research, to hold promise for the improvement of government service to the people of North Carolina.

---

[From the N.C. Insight]

VEGETABLE AND FRUIT CROPS—VIABLE ALTERNATIVES FOR TOBACCO FARMERS

(By Frank Adams)

Hundreds of North Carolina's family farmers are quietly searching for profitable alternatives to tobacco, a crop many of them learned about at the knees of fathers or grandfathers, and a crop which is as much a way of life as a source of income. That way of life and of producing income has changed dramatically in recent decades. Tobacco operations have increased in size, requiring large capital investments. Bulk curing barns and mechanical harvesters are transforming tobacco production from a labor-intensive to a capital-intensive enterprise.

As a result, today fewer farmers than in years past can afford to grow tobacco. In 1972, according to the U.S. Department of Agriculture (USDA), there were about 40,500 flue-cured operations in the major growing regions of Virginia, North Carolina, South Carolina, and Georgia; by 1979 the number had fallen to 29,000 a 28 percent decline in seven years.[1]

The director of the N.C. Agricultural Extension Service, T. C. Blalock, sums it up: "Tobacco farmers are either going big and mechanized or they are leasing [their allotments]. . . . Thousands of farmers who used to be full time have now taken a job in industry." This is especially true for tobacco farmers who haven't the capital to invest in mechanized systems, for small allotment-holders who can make more money leasing than growing, and for sharecroppers who have had the allotments they used to grow leased away to large-scale operations.

[1] Grise, Verner N., "Flue-Cured Tobacco Farming: Structural Characteristics, Labor Use, and Mechanization," paper presented at the 29th Tobacco Workers Conference, Lexington, Ky., January 21, 1981, Economics and Statistics Service, USDA.

Farmers with small tobacco operations seem to have three options: (1) they can continue to borrow money and invest in their tobacco operations, hoping to be one of the shrinking number of survivors; (2) they can take an off-farm job (and perhaps grow a little corn, hay, or other pasture crop part-time); or (3) they can try to change to crops other than tobacco and remain on the farm. This article addresses prospects and problems of the third option.

Tobacco farmers have grown accustomed to guaranteed market outlets and sales price levels, both of which are assured through the federal support system. Coping with new crop systems can be a difficult challenge for a tobacco farmer, especially at the marketing end. "Yes, there are alternatives to tobacco," says J. E. Legate, dean of North Carolina State University's School of Agriculture. but he adds, "No other crop for which we have a stable market can provide the per-acre return that is realized from tobacco."

For those who determine agricultural policy in tobacco-belt states, the quest for suitable substitutes to tobacco and a regular market for those substitutes looms large in economic and political importance. Finding ways to keep people on their farms and out of unemployment lines and cities lowers the monetary and social costs of displacement out of tobacco. Keeping people on farms relieves the pressure that industrial recruiters face to provide jobs in rural areas for farmers forced off their land. Most importantly, alternative crops and new market mechanisms can help farmers continue what they want to do and know how to do: farm.

A LACK OF GOVERNMENT SUPPORT

Displaced tobacco farmers cannot make a transition to soybeans, corn, wheat, or some other grain. All these crops require large acreage units for a profit. In 1979, soybeans netted about $72 per acre in North Carolina; wheat, $33; corn, $106; and even fresh market corn, $250. Meanwhile, the state's flue cured tobacco crop brought about $1,200 profit per acre.

Various fruit and vegetable crops, however, are viable alternatives for tobacco farmers. Strawberries, for example, netted over $3,000 an acre in North Carolina in 1979. Trellis tomatoes, peaches, and apples also topped the per acre return of flue-cured tobacco; blueberries, cucumbers, and sweet potatoes weren't far behind. Moreover, all these crops can be grown on small acreage units, similar to the old-style, three-to-five acre tobacco farm.

To switch to these crops, tobacco farmers need a great deal of technical advice and support. They face large, sometimes insurmountable hurdles. Many of them have large investments in modern curing and harvesting equipment; some lack the practical skills needed for growing unfamiliar crops. And the biggest constraint is the lack of a guaranteed market.

If strawberries, trellis tomatoes, apples, and other high-income yielding crops had guaranteed markets and sales prices, many now reluctant farmers might see their way clear to diversifying their operations into vegetables or fruits. In a state like North Carolina, the agricultural support systems are geared to those crops—like tobacco—where federal programs are already functioning, rather than to crops for which backup systems have yet to be developed. Research in Washington and in field stations, farm bulletins and surveys, and extension projects all have the funding and momentum of the tobacco program behind them. Alternative crops do not receive the same research or attention from the government support systems, such as the land-grant universities and the farmer loan agencies, that tobacco gets.

The N.C. Agricultural Extension Service, for example, has assisted in seeking alternative crops for tobacco farmers in only isolated instances. In the western counties, the Extension Service did assist in expanding the trellis tomato industry, which has helped some burley farmers. But it has not mounted any type of intensive effort to help tobacco farmers throughout the state adapt their operations to other crops. Its research efforts have also been limited. In 1978, when the Governor's office expressed concern regarding possible modification or loss of the tobacco program, the state extension office at North Carolina State University made a study of alternative gross farm incomes that might be generated in case of some catastrophic drop in tobacco income. The study put far greater hopes in beef cattle, poultry, swine, dairying, and horticulture than in a minor category called agronomy (new crops).[2] In addition, any initiatives toward finding new ways to adapt tobacco farms to fruit and vegetable operations do not appear likely. "We have not done any overall study since that report," says Extension Director [illegible]lock.

The experiences of [illegible]hil Wood, a tobacco farmer in Fuquay-Varina, N.C., illustrate another limitation of government support for alternatives to tobacco. In 1980, Wood grew 55 acres of flue-cured tobacco, but even a farm that big wasn't enough. "Expenses were so high that I had to start borrowing for the winter," Wood says. "I just broke even, didn't make a thing." For the 1981 season, Wood wanted to grow 20 acres of peppers and 40 acres of cotton, but he ran into another kind of money problem. Farmers borrow large sums each year to get their crop in the ground, and Wood went to the usual lending source, Production Credit Association. But

[2] Letter from T. C. Blalock, director of the Agricultural Extension Service, to W. D. Lewis, agricultural policy advisor to North Carolina Governor James Hunt, July 7, 1978, which said, in part:

"In view of the apprehension from the Governor's office regarding the possible modification or loss of the tobacco support program, I have asked our commodity-oriented departments to estimate the additional annual gross cash farm income that might be generated through accelerated efforts on the part of producers and processors working with the Agricultural Extension Service if a substantial drop in tobacco income were to occur. A summary of these estimates is attached. . . .

| Commodity category | Present estimated annual gross farm income | Future estimated annual gross farm income |
|---|---|---|
| Christmas trees | $5,400,000 | $21,000,000 |
| Beef cattle | 94,600,000 | 253,900,000 |
| Horses | 110,000,000 | 300,000,000 |
| Dairying | 171,130,000 | 214,378,932 |
| Horticulture | 246,200,000 | 432,900,000 |
| Poultry | 606,205,000 | 893,471,743 |
| Swine | 314,000,000 | 450,000,000 |
| Agronomy (new crops) | 671,000 | 2,240,000 |

"These estimates are not considered additive because they were developed independently and do not reflect competition for the same resources of production. However, if all this expansion could occur under the most favorable circumstances, even so we could not replace all the income normally resulting from tobacco production. This optimistic pattern of increased production of alternatives to tobacco would require about as much land as is required for tobacco. Depending upon the degree of mechanization adopted, the alternatives to tobacco could require almost as much labor as for tobacco. Some of these enterprises would require substantial amounts of investment capital."

Production Credit, which was willing to lend Wood money to grow tobacco, would not take a risk on peppers or cotton. "I'm in a trap right now," Wood said in January, 1981, still deciding what to plant in the spring. "Production Credit won't loan me money so I can diversify and Farmers Home [Association] won't loan me any money unless Production Credit refuses [to give] me [money]." Since Production Credit is willing to loan Wood money for tobacco, he's stuck. "I can't diversify now because funds aren't available to me."

HOW TO SURVIVE THE CONSTRAINTS TO SWITCHING

In Wadesboro, N.C., a private, nonprofit research farm is working to provide models for small farmers to continue living and working on the land. A project of the 45-year-old National Sharecroppers Fund, the Frank Porter Graham Center has been training small farmers and conducting crop and livestock experimentation for almost 10 years. The bottom line for any commodity tested at the Graham Center is profits; the central concern is what the net income yield per acre will be. The farm's staff also examine closely possible constraints farmers face in growing particular crops, especially on three-to-five acre operations—the size of a small tobacco farm. The Graham Center has found that most of the crops listed on page 19 can be grown profitably on a small farm operation. Moreover, few carry with them technical or investment problems that cannot be overcome. Some possible constraints and ways to overcome them are:

Irrigation.—Vegetables and berry crops require more water than tobacco, and irrigation would be necessary during especially dry years. Graham Center staff member Mark Epp says the cost of an irrigation system is not insurmountable to small farmers. An irrigation system for a 10-to-15 acre vegetable operation can be installed for $10,000–$15,000 by using a pond dug on the farm, says Epp. And the Farmers Home Administration will loan money for irrigation systems. "Though it's expensive, it's no more expensive than a lot of machinery and energy used in grains and tobacco," Epp explains.

Start-up time.—Farmers interested in orchards as a livelihood are often deterred by the long wait for fruit trees to mature. Peach trees require a three-year start-up time; apple trees need five years before producing the first crop. The Graham Center suggests planting row-crops, such as sweet potatoes, sorghum cane, peanuts, or watermelons between the rows of young trees while they are maturing, thus alleviating an income dormancy during this period.

Machinery and Labor.—Many tobacco farmers have sizable investments in curing barns and other equipment associated exclusively with tobacco, and they naturally fear the loss of their investments if they switch to alternate crops. In addition, one initial reason for purchasing tobacco production technology was probably the farmer's difficulty in finding and affording seasonal labor. So, another obstacle to growing crops other than tobacco is the farmer's fear of a renewed, increased need for hand labor.

Farmers who own one-row planting and tilling equipment require little capital investment when starting alternative crop farming, aside from irrigation costs already mentioned. The tobacco transplanter can be used to set out sweet potatoes or tomato plants, and bulk barns might be used for sweet potato curing or peanut drying. Farmers might have to sell automatic tobacco harvesters since only one-row machinery transfers to vegetable crops, but many smaller tobacco farmers have not yet invested in that costly piece of machinery.

Labor used to produce flue-cured tobacco averaged about 172 hours per acre in 1979, with over two-thirds of that labor used to harvest and prepare the tobacco for market, according to the USDA. Most crops studied at the Graham Center to date require a similar amount of labor for production and harvest. If some alternate crops do require more hand labor than tobacco, the savings in capital costs and fuel bills may soften that particular blow.

Energy—Tobacco is an energy-intensive crop, particularly as the harvest and curing becomes more mechanized. Flue-cured tobacco accounts for over 60 percent of North Carolina's energy uses in agriculture. Approximately 316 gallons of fuel are needed on an average acre.[3] Nationally, tobacco grows on only 0.03 percent of the available cropland but consumes only 15 percent less energy than what is used to raise all the vegetables in the United States. Many farm chemicals are oil-based, and one USDA study found a higher percentage of tobacco acres sprayed with insecticides than any other major crop.[4] Alternative crops tested at the Graham Center pose no greater pest or disease threat than tobacco and historically have required less fuel and oil-based chemicals.

Soil and climate—There is nothing unique about the soil which supports the successful growth of tobacco. It can be raised on a great variety of soils in all climates from southern Canada to tropical areas. Tobacco production was frozen in its present location by the federal tobacco program enacted in 1933. Most crops tested at the Graham Center would grow well in all the major tobacco belts.

In sum, then, other than the cost of irrigation for berries and some vegetable crops, changing over to any of the alternatives as profitable as tobacco does not present multiple hurdles. None would require additional machinery or labor; dependency on fuel and pesticides would probably decrease for tobacco farmers who switch; and soil and climate conditions offer no obstacles. But alternative crops grown widely would require a dependable and accessible market, plus additional organizational means for distribution.

MARKETING—THE BIGGEST DETERRENT

The key deterrent to tobacco farmers interested in growing alternative crops is the lack of a stable market and distribution system. Only tobacco has a guaranteed market. Warehouses are located in dozens of hamlets, and, due to the support price and quota system, tobacco prices do not fluctuate according to supply and demand. Prices for many other crops do fluctuate, rendering growers' incomes uncertain from year to year.

It is ironic that North Carolina, with its bountiful fields and many miles of as yet undeveloped land, imports more than three-fourths of the vegetables its residents consume. In the central Piedmont alone, there are more than two million consumers who, conceivably, could buy local produce if farmers chose to grow it and if it were made accessible. But because of established marketing and distribution systems, getting large quantities of locally grown vegetables into consumers' grocery bags is no easy enterprise.

If enough vegetable-farmers pool their individual harvests into an adequate quantity, it is possible to make the links to establish bulk buyers—jobbers, wholesalers, and processors—who sell in large population centers and through supermarket chains. One such cooperative effort underway may handily serve Piedmont vegetable growers someday, and, if successful, will serve as a much needed marketing model for farmers in other areas.

In the Piedmont, where small-size tobacco operations are steadily dwindling in number, a group of farmers has been working to establish the Piedmont Vegetable Marketing Cooperative, Inc. The Co-op has its roots among a small group of Chatham County farmers who quickly discovered that a key step toward obtaining start-up capital from traditional lending institutions is a USDA feasibility study. The USDA ascertains the need for a marketing co-op, ensures that a sufficient number of farmers wish to take part, and finds the probable buyers for the co-op's supply of produce. In 1978, the farmers wrote USDA requesting the feasibility study, which USDA does for free. Two USDA agricultural economists surveyed 131 farmers in six Piedmont counties to learn about their current crop production and their interest in a vegetable co-op warehouse in their area. During this time, the North Carolina Land Trustees, a nonprofit group based in Durham, was providing technical assistance to the Co-op and holding meetings in the six counties to generate interest in the idea.

The economists found that 66 percent of those surveyed farmed full time, raising tobacco, soybeans, hogs, beef, and vegetables. They planted a total of 815 acres in vegetables, an average of about six acres each. (See table for a description of the types of vegetables grown and their yields). Twenty-two farmers sold their vegetables on consignment, and four sold on contract. Fifteen relied on door-to-door sales. The economists multiplied the farmers' reported yields by the 1978 N.C. average seasonal price and determined their total gross revenue was $858,857.97 (see table). Nearly to a man, the 131 farmers told the economists that if a market were established, they would be willing to expand their vegetable production.

The feasibility study sought to determine the demand for home-grown produce, the prices farmers could expect, the location of the markets, and any requisite quality standards. In gathering data the USDA contacted packing sheds, wholesale shippers, processors, retailers, and a few consumer food cooperatives. Each operation was questioned about grading and packing preferences, minimum volume requirements, contractual arrangements, and pricing patterns. The USDA report suggested three marketing strategies for the Piedmont vegetable growers: 1) that the farmers form a cooperative based initially on sweet potatoes, cucumbers, and green peppers; 2) that the co-op find a warehouse where produce could be assembled, cleaned, graded, and packed on a large-scale basis; and 3) that the co-op hire a full-time manager.

With this blueprint in mind, the fledgling Piedmont Co-op set out to gather the membership and raise the equity necessary to lease warehouse space, to furnish it with loading docks and refrigerated storage, and to hire a manager. On July 15, 1980, farmers from six Piedmont counties voted to create a co-op for shipping green peas, cucumbers, summer squash, okra, and sweet potatoes to local markets and to Washington and Baltimore. In September, the Co-op formally organized and incorporated itself with about 50 members. Next came the critical step: generating the start-up capital.

USDA FEASIBILITY SURVEY RESULTS FOR GROWERS IN 6 PIEDMONT COUNTIES

| Crop (unit) | Acres harvested | Yield per acre | Price per unit | Total yield | Total revenue |
|---|---|---|---|---|---|
| Cabbage (pounds) | 36.65 | 18,000 | $0.08 | 659,700 | $52,776.00 |
| Cucumbers (bushels) | 155.40 | 188 | 3.07 | 29,215 | 89,690.64 |
| Okra (pounds) | 15.20 | 9,800 | .20 | 148,960 | 29,792.00 |
| Peppers (bushels) | 57.50 | 338 | 6.09 | 19,435 | 118,359.15 |
| Pole beans (bushels) | 29.90 | 225 | 6.00 | 6,728 | 40,365.00 |
| Snap beans (pounds) | 37.15 | 3,000 | .07 | 111,450 | 7,801.50 |
| Summer squash (bushels) | 23.50 | 225 | 7.00 | 5,288 | 37,012.50 |
| Sweet corn (crates) | 135.45 | 187 | 3.50 | 29,329 | 88,652.03 |
| Sweet potatoes (bushels) | 86.20 | 337 | 3.50 | 29,049 | 101,672.90 |
| White potatoes (pounds) | 25.30 | 15,000 | .11 | 379,500 | 41,745.00 |
| Tomatoes (pounds) | 30.80 | 22,500 | .15 | 693,000 | 103,950.00 |
| Watermelons (pounds) | 64.95 | 16,875 | .04 | 1,096,031 | 43,841.25 |
| Cantaloupes (pounds) | 68.80 | 6,000 | .25 | 412,800 | 103,200.00 |
| Total [1] | 766.80 | | | | 858,857.97 |

[1] The figure for total acres harvested does not take into account that growers allocated 48.2 acres to the production of crops such as grapes, peas, collards, etc. The total acreage of all vegetables harvested thus becomes 815 acres.

Source: Preliminary Report, U.S. Department of Agriculture Economics, Statistics, and Cooperative Service, Washington, D.C. 20250. "Vegetable Growers Cooperative, Piedmont Area of North Carolina," n.d.

To be a member, a farmer has to buy one share in the Co-op ($30). The feasibility study indicated that at least 650 acres of produce were needed as commitment from members before the Co-op's success could be assured. Lending institutions look closely at the portion of start-up capital invested by the Co-op members. The Co-op board decided that for the project to be on solid footing, the members would have to contribute 30 to 50 percent of the start-up capital needed. Depending upon inflation, grant applications, and other factors, the board thinks each member might have to invest up to $300 per acre for each acre of vegetables he plans to sell through the warehouse. If this equity could be raised from members, the rest of the financing necessary—some $150,000 to $200,000—could be secured more easily than if adequate member equity is lacking.

While farmers can sometimes get low interest loans from Production Credit or Farmers Home Administration for investing in a co-op, making such an investment commitment has been difficult for many farmers, especially after a poor 1980 crop. Consequently, the Co-op did not reach its goal of a 650-acre commitment from members in time for the 1981 season. "It's a chicken and egg problem," says Arnie Katz, a Land Trustees staff member who works with the Co-op. "There's no doubt several hundred farmers would join in a year once they saw it going." Katz has talked to many tobacco farmers who either want to diversify or leave tobacco altogether. An uncertain market remains a severe initial deterrent. The Piedmont Co-op's board of directors is continuing efforts to build interest—and equity—in their venture, and will coordinate a smaller, pilot operation during the 1981 marketing season.

CONCLUSION

These private endeavors to rearrange economic relations on a small scale provide policymakers with valuable practical examples of how new economic institutions can be forged for the benefit of family farmers. The Graham Center's work reaffirms the viability of small farms; the efforts of farmers to establish their own marketing mechanism show that the will to continue their traditional way of making a living is as strong as ever. The problems enterprising small farmers face—and their reluctance to put their money and efforts into new ventures before they see some strong assurance of success—should point the way toward redirected government efforts as well, both in the administration of state-level agriculture programs and at the land-grant university centers such as North Carolina State University. Meaningful policies could result from public discussion about why family farmers are searching for alternatives to tobacco. Solid research and technical assistance is needed on ways to improve marketing and distribution systems for small farmers' potentially valuable contribution: food crops.

Tobacco farmers generally have had an edge over other kinds of farmers for many years because of their guaranteed market and support program. But small operators lack the capital to keep up with intensive mechanization trends. Tobacco farmers have to find new ways to survive on the land or join the hundreds of thousands who must search for non-farm employment. Tobacco farmers who wish to grow alternative crops, such as vegetables, have some advantages from the start: much of their equipment will transfer to their revamped operations; in most cases, they will save on energy costs; many of the alternative crops could provide them even better profits than does tobacco; and they can stay on the farm. In marketing their produce, though, they will need assistance, and that is the challenge that private and public interests must meet, cooperatively.

---

CONSEQUENCES OF ELIMINATING THE TOBACCO PROGRAM

If the current tobacco program were abolished and no government provisions were adopted to replace it, the following consequences could be expected:

(1) Total production would likely fluctuate from year to year but might increase moderately over the long run. Current producers who have been willing to pay substantial quota rents have, in effect, signaled a willingness to expand output. Also, farmers who previously were not allowed to produce because they did not own land with a quota would have freedom to try to produce tobacco.

(2) Leaf prices might generally drop by an amount equal to the average lease cost per pound now paid for quota. In addition, prices would likely be very unstable because of variations in production and the lack of assurance of minimum prices.

(3) The resale value of many farms now having quotas attached to the land would drop drastically. By rendering the quota worthless, the equity position of current allotment holders would be impaired unless there were some program to compensate for the loss of quota value.

(4) Income would be reduced for persons who have typically received rental income from tobacco quotas.

(5) Some geographical shift in production to more efficient areas would occur.

(6) The reduction in the number of farms would be accelerated. The smaller number of farmers who continue tobacco production might expand and mechanize their individual operations, since they would be no longer constrained by quotas. One factor which might slightly limit the degree of enlargement and consolidation of tobacco farms would be the increase in risk perceived from loss of the program. Other farmers might shift from tobacco to less labor-intensive enterprises by attempting to consolidate farms into larger acreages in order to earn a comparable income.

(7) With no program, the government would have no obligation to advance loan funds or to absorb losses on price support operations.

(8) The volume of U.S. exports could increase modestly with lower prices.

(9) Reduced tobacco prices at the farm level might result in a small decrease in consumer price for tobacco products. But the farm value of leaf is only eight percent of the average retail cost of a pack of cigarettes. A one-third reduction in farm price of raw tobacco would be required to reduce cigarette costs by one cent per pack. The level of cigarette taxes is a greater determinant of consumer costs than farm-level tobacco prices.

(10) Dropping government production controls and price supports would not within itself induce less smoking even though it is the smoking-and-health controversy that has prompted much of the discussion about less government involvement in the farm program for tobacco.

AMERICAN LUNG ASSOCIATION,
*Washington, D.C., September 11, 1981.*

DEAR SENATOR: The American Lung Association urges you to support the tobacco deregulation amendment that is being offered in the next few days by Senator Hatfield to the Omnibus Farm Bill. This amendment, number 524, would effectively remove federal participation in tobacco support activities and is also in bill form, S. 1515—the Tobacco Deregulation Act of 1981.

Our voluntary health association, which represents citizens concerned with the prevention of lung disease, believes that the action proposed by Senator Hatfield is long overdue. In May, the ALA Board of Directors unanimously reaffirmed its long-standing opposition to continuation of the federal subsidy for tobacco. The Board stated that there should be no tax subsidy for any phase of the tobacco industry and that it is totally inconsistent for one government agency to support the growth and manufacture of tobacco while other government agencies or programs pay for the deleterious health effects sustained by the smoker. While there may be justification for a gradual phaseout and assistance toward a change in crops grown by the tobacco farmer, federal government expenditures should be directed toward curtailing rather than maintaining the growth and production of tobacco.

Volunteers from all walks of life have written to ask why tobacco subsidies continue to enjoy immunity when other federal programs are being cut. They also want to know why federal excise taxes for cigarettes have not been raised since 1951 despite acute need for additional tax revenues. The Senate can provide a positive answer to these questions by adopting the Hatfield amendment.

Thank you for your interest.

Sincerely,

JAMES A. SWOMLEY,
*Managing Director.*

AMERICAN LUNG ASSOCIATION,
*New York, N.Y., August 12, 1981.*

Hon. MARK O. HATFIELD,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR HATFIELD: We wish to congratulate you on your introduction of S. 1515. Our organization believes that this may be a propitious time for such legislation to be considered.

In 1976, the Board of Directors of the American Lung Association went on record in opposition to continuation of the federal subsidy for tobacco, acknowledging that assistance to the tobacco farmer might be necessary in a gradual phase out of the subsidy. In May 1981, ALA reaffirmed its policy in opposition to the subsidy.

A large proportion of ALA's resources is devoted to helping people realize the health consequences of smoking and to helping them do something about it of their own volition. Our most recent effort, developed at considerable expense to our organization, is the enclosed self help program for persons who are trying to "kick the habit".

Mr. Robert Weymuller is director of the ALA Government Relations Office at 1629 K Street, N.W., Suite 401, Washington, D.C. 20006. He can be reached at 659-4940. Mr. Weymuller will be happy to work with your staff in any way possible in obtaining support for S. 1515 from lung associations.

Sincerely,

EDMUND C. CASEY, M.D.,
*President.*

---

AMERICAN CANCER SOCIETY, INC.,
*New York, N.Y., September 9, 1981.*

Hon. MARK O. HATFIELD,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR HATFIELD: The American Cancer Society supports the thrust of H.R. 3998, the Tobacco Deregulation Act of 1981, and is watching with interest the progress this bill makes.

We commend you for your foresight and initiative in introducing this important measure.

The Society has devoted its substance over the years exclusively to health measures and as a matter of policy does not analyze taxation legislation.

Regarding deregulation, there is every reason to believe that your measure arrives at a most propitious time. Our view of the mood of the Nation and the Nation's elected officials is that the time has come for definitive action in the area your bill addresses.

We think that some such legislation will pass in the foreseeable future.

In 1979, the American Cancer Society Board of Directors resolved, in part, "Continued Government support of tobacco cultivation poses a serious moral dilemma, especially in view of the commendable increases of anti-smoking activity proposed in the President's budget." The American Cancer Society will continue to advocate the gradual phasing out of tobacco production, seeking maximum protection for the economic interests of the farmers.

One thing which might improve the chances of enactment of H.R. 3998 is amending it to soften its immediate economic impact at the producer level.

I am sure that you will receive many responses and comments on your proposals and that you will be giving attention to many points of view as the bill moves through legislative channels. The American Cancer Society is looking forward to hearing from you as legislative developments occur.

Sincerely yours,

JOSEPH D. YOUNG,
*Co-Chairman, Public Issues Committee.*

[From the Des Moines Register, Aug. 24, 1981]

TOBACCO PROGRAM HAS COST $600 MILLION, STUDIES FIND

(By George Anthan)

WASHINGTON, D.C.—The federal government's controversial tobacco program, which has been defended as being virtually cost-free, has cost American taxpayers $600 million to $850 million and promises to cost millions more over the next few years.

Studies by officials of the U.S. Department of Agriculture's Commodity Credit Crop., the agency that funnels the federal money to tobacco producers, indicate that since the mid-1950s the program has cost the government almost $600 million. The entire cost of the program dating back to the early 1930s may be as high as $850 million, although this is an estimate because records date back only to about 1953.

At the same time, the USDA officially lists the total cost of the tobacco program since 1933, the year of its inception, as $56.7 million.

This figure ignores the cost of interest that the CCC pays the U.S. Treasury for money it borrows to lend to commodity producers.

LOWER RATE

Much of this interest has been lost because the CCC has charged producers a lower rate than it has had to pay. Also, in selling the tobacco it gets as part of its price support program, the CCC seldom recovers interest cost.

For example, the CCC late in 1979 and early in 1980 sold some tobacco from its stocks, and reported that the government had just about broken even on the deal, recovering most of its costs. However, if the cost of interest had been included, those sales would have shown a loss of $11.6 million.

Some USDA analysts have reported privately that the program could cost up to another $1 billion through 1985.

No matter how the cost of the tobacco program is figured, it still represents only a small percentage of the federal government's total outlays for support of agricultural commodities.

The big farm price support programs—wheat, corn, rice and cotton—annually account for expenditures of billions of dollars. The CCC officially disregards the cost of interest in reporting the net cost of these programs to the taxpayers, too.

THE DEBATE

However, the cost of these major farm support programs seldom has figured in the debate on whether they should be continued. There has been wide and bipartisan agreement over the last quarter-century that the United States must promote adequate production of basic supplies of food and fiber commodities considered essential to the nation's well being and even its survival.

Tobacco has become increasingly more controversial, especially since 1974 when the surgeon general officially linked cigarette smoking with health problems. Opponents of the government's tobacco subsidy program consistently have pointed to the fact that some federal agencies spend money to discourage tobacco use while others help finance its production.

However, influential members of Congress from tobacco-producing states and most secretaries of agriculture in recent decades have based much of their pro-tobacco arguments on the USDA's statistics showing the program costs relatively little.

LOBBYING

Earlier this year, when Reagan administration budget-cutters began indicating that there might be some cutbacks in the tobacco program, officials at Tobacco Inc., a Washington industry lobbying organization, noted that the program had lost only a total of about $50 million in 47 years and that in recent years it had broken even.

Agriculture Secretary John Block, an Illinois farmer, has used these figures to defend the tobacco program, but he also has raised serious questions about continuing the program in its present form, and quietly has been in favor of modifications that would greatly reduce the CCC's costs.

The tobacco program this year faces perhaps its most severe challenge, and the expected congressional battle over its continued existence even threatens to delay passage of the multibillion-dollar, four-year farm bill.

This is because some Southern legislators, including Senator Jesse Helms (Rep., N.C.), chairman of the Senate Agriculture Committee, have issued veiled threats that if there is even minor tampering with the tobacco program, the entire farm bill will be withdrawn from consideration by the full Senate and allowed to languish in his committee.

Actually, Helms himself has become a key issue in the tobacco controversy, with some of his political opponents in Congress focusing on moves against the support program as a way of retaliating against Helms for his conservative attacks on various social programs.

BACKLASH

The possibility of an anti-Helms backlash against tobacco has been raised by the Raleigh (N.C.) News and Observer, which recently quoted Representative Fred Richmond (Dem., N.Y.), chairman of the House nutrition subcommittee, as saying, "Helms has been so vicious and unbending toward social programs, and he has so antagonized members of Congress that they want to get back at him through the tobacco program." Richmond added, "Helms is the worst liability you have in the state of North Carolina."

The federal tobacco program is designed to provide a system for maintaining minimum prices through production controls and through government loans. The supply of domestic tobacco is controlled through marketing quotas, issued at the beginning of each year by the USDA. Each tobacco farmer is given a production allotment, and he can't exceed the limit. However, these allotments are handed out annually not only to actual producers, but to those who produced tobacco in the past and since have gotten out of the business.

Since farmers can't expand their production without additional allotments, these are considered valuable, and can be rented by non-producing holders to actual tobacco farmers.

The renting of these federal tobacco allotments has become big business in the Southeast, with total fees being paid by producers to non-farm holders last year totaling almost $280 million. Among the holders of these federal permits to grow tobacco is Dorothy Helms, wife of the senator.

Under the loan portion of the government's tobacco support program, the CCC lends money to producers, then takes the commodity as collateral. Eventually, this collateral tobacco is sold at auction, the CCC is reimbursed for its loan advances and any profits are distributed to farmers.

Supporters of the program have emphasized that it has been largely responsible for helping thousands of small Southeastern farmers stay on their land because the income from only a few acres of tobacco is enough to maintain a family.

USDA officials, including Block, have noted that abolishing the program would result in shifting most tobacco production from small

farms to much bigger operations. Block said studies indicate that the price of tobacco actually would fall without a federal support program and that the resulting cheaper cigarettes might promote more smoking. Also, he has acknowledged that the industry annually provides billions of dollars in tax payments to the state and federal governments, and that tobacco exports earn hundreds of millions of dollars in much-needed foreign exchange.

But several senators, including some Republicans, are pushing various bills that would modify the program by restricting tobacco allotments to actual producers and gradually reduce the federal price support level, making it less expensive and allowing American tobacco to be more competitive in world markets. This approach is supported by Block.

ABOLISH

Some other senators, including Republican Mark Hatfield of Oregon and Democrat Howard Metzenbaum of Ohio, are backing legislation that would abolish the program.

Helms and Senator John East (Rep., N.C.) have responded with a pointed letter to their colleagues. Destruction of the tobacco program, they stated, "would create chaos in a farming sector where stability has prevailed." They added, "The issue is really much broader than tobacco.... It goes to the heart of all commodity programs in your state as well."

[From the Washington Post, Apr. 3, 1980]

PRICE SUPPORT FOR TOBACCO FEEDS SACRED SENATE COW

(By Helen Dewar)

It bowed at the altar of austerity, but the Senate Budget Committee drew the line yesterday at sacrificing sacred cows.

High priest of the ceremony was Sen. Ernest F. Hollings (D-S.C.), whose zeal for domestic spending restraint, formidable as it may be, suddenly faded when it was suggested that tobacco price supports be scrapped in the cause of fighting inflation.

Eliminating the $200 million the government pays annually in tobacco price supports would "destroy the agricultural backbone of 16 states," claimed Hollings, who is up for reelection this year in one of them.

"The tobacco industry," he said with some passion, "is supporting the government."

Hollings' problem—and the committee's—started Tuesday when, largely at his behest, the senators voted to raise defense spending $5.8 billion more than President Carter has requested.

Then the committee added an extra $300 million for water projects, at the behest of various western senators, many of whom are counted among the committee's leading budget-cutters on other issues.

These two actions jeopardized Chairman Edmund S. Muskie's plan to balance the budget—even have a little surplus for the first time in 12 years—and still have some money left over for a tax cut next fiscal year.

As the committee worked late into last night, it began cutting into social programs, deepening Muskie's recommended cuts by $200 million for urban grants, $600 million for public-service jobs and $550 million for various income security programs. It also approved annual, rather than semi-annual, cost-of-living increases for federal retirees, which would save $500 million.

The committee also agreed to cut the $836 million Postal Service subsidy by $600 million, which could end Saturday mail delivery.

Tuesday's ride on the budget seesaw—upping the totals for defense and some projects—gave Muskie a jolt. At one point, he boiled over at Sen. Orrin Hatch (R-Utah), who very much likes to think of himself as a fiscal conservative, but is also prodefense.

Hatch accused Muskie's staff of incompetence in producing misleading charts on his relative strength of NATO and Warsaw Pact preparedness, and Muskie responded that Hatch was expressing a "paranoid, conspiratorial view." A committee staffer said the other members "just sat there and ducked."

By the time senators regrouped yesterday, Sen. Howard Metzenbaum (D-Ohio) sensed that it was going to be another pet-project day. So he facetiously proposed an increase in funds for urban parks, which is one of his pet projects, so he could demonstrate self-restraint by voting against the increase. The committee obliged by voting against the urban park money, prompting Metzenbaum to "thank the committee for [its] confidence."

With that out of the way, the committee got down to the business of scrutinizing money for environmental protection, a pet cause of Muskie.

At this point, Hollings pounced on $6 billion in unobligated grants for water cleanup projects as a worthy target for cuts—an idea that Muskie called "ridiculous" and "nuts."

Sen. Daniel P. Moynihan (D-N.Y.) chimed in, admonishing the committee to be "a little more mature" in carrying out its anti-pollution commitments.

Hollings complained that he was tired of being called "immature or nuts or ridiculous" for trying to hold the line on spending without jeopardizing national defense.

Muskie responded that Hollings was "dumping responsibility" on him to make up for the Pentagon budget overrun. "As he pursues his [causes], I pursue mine," said Muskie, insisting that he yields to no one in pushing for spending restraint.

Minutes after the committee rejected Hollings' proposed cutbacks in water and sewer grants, he found the budget battle erupting in his own backyard as Sen. Henry Bellmon (R-Okla.), later joined by Sen. Gary Hart (D-Colo.) and Metzenbaum, proposed terminating tobacco price supports.

Bellmon complained that the government was fighting lung cancer with one hand while encouraging tobacco production with the other. Hollings responded that "there was no conclusive proof" that the two are related.

What is important, he said, is that "146,000 small farms" depend on price supports to encourage production that returns much more to the government in taxes and other revenues than it takes out in subsidies. Price supports for farmers are preferable, he added, to having to "send them food stamps or build them an urban park."

Why, Hollings asserted, there is even talk around Congress of banning tobacco and legalizing marijuana. If there are any price supports for growing marijuana, Bellmon deadpanned, he would move to scrap them too.

Hollings eventually prevailed in a 5-to-9 vote against Bellmon's no-supports proposal, which Muskie quietly supported.

TOBACCO ALLOTMENT CLUB FEELING THE HEAT OF SUBSIDY OPPONENTS

(By Ward Sinclair)

Question from a smoke-filled room:

What does Dorothy Helms, the wife of the U.S. senator, have in common with Duke University, the North Carolina National Bank, the Roman Catholic diocese of Raleigh, Christ Unlimited of Apex, the Goodhope Baptist Church and the Southall Swim Club?

The answer is that they have a tobacco habit, of sorts.

They, along with thousands of other nonfarmers and institutions in North Carolina, have a vital financial stake in the federal tobacco price support program, the most controversial chunk of U.S. farm policy.

By inheritance, purchase or gift, they hold allotments—exclusive permits, in effect, granted in the 1930s to growers then—that allow them to grow tobacco and receive federal price supports. Or, as is increasingly the case in North Carolina, they rent their federally bestowed allotments to farmers who then grow the tobacco that is the main component of cigarettes.

The allotment, by most definitions, is a subsidy. Using U.S. Department of Agriculture production and price averages, one may calculate that farmers in the flue-cured tobacco belt of the Southeast last year paid allotment owners $279 million for the privilege of growing tobacco on their allotments.

The $279 million figured in the price of raw tobacco, the price of cigarettes and the cost of Uncle Sam's support program, which was set up in the 1930s to bolster farmers' incomes and regulate supply. The rental fees add to the farmers' production costs, which in turn pushes up the federal price support, which in turn pushes up market prices and which, most industry experts agree, is forcing the federal government deeper into hock as buyers turn to cheaper imported tobacco.

Again this year, as Congress considers a new farm bill and the Reagan administration presses its war against subsidies, tobacco is controversial—so much so that Mrs. Helms' husband, Senate Agriculture Committee Chairman Jesse A. Helms, is handing out information kits to callers who are confused about the federal subsidy to tobacco.

In his speeches and in his kit, Helms assures there is no federal tobacco subsidy and that of all the farm-support programs, tobacco comes closer to paying its own way and produces more tax revenue than any other major commodity.

That, however, is only part of the story.

Even though tobacco will not be a part of the 1981 farm bill (thanks to the power of past southern legislators, it has its own authorizing legislation), it is once more in the spotlight, and there are signs that the program may be in more trouble than its most zealous supporters realize.

The flap over the links between smoking and health continues, but there are new elements in the debate this year. Government stocks of tobacco are growing, with added costs to taxpayers. Cheaper imports are flooding into the country. Farmers, particularly in North Carolina, are openly questioning the system that adds to their costs and gives allotment holders a windfall. Burley tobacco, the milder type grown principally in Kentucky, is not experiencing problems of oversupply.

Despite their avowed animosity toward farm subsidy and their promotion of "free market" agriculture, Reagan and Agriculture Secretary John R. Block have carefully avoided singling out tobacco for reform. Block's view is that with the farm bill and other policy issues, the administration is dealing with all that it can handle for now.

But within the industry, there are growing signs that without some prompt and major changes tobacco is headed for hard times—increasing resistance on Capitol Hill to the support system and unacceptable new costs to the government.

Recent editorials and articles in The Flue-Cured Tobacco Farmer, a growers' publication in North Carolina, suggest that many of the state's quarter-million leaf producers are in near-revolt against the allotment leasing procedures that force up their costs.

"The benefits of the support program appear to be migrating largely into the bank accounts of the non-producing quota [allotment] owners, with you, the actual producer, profiting at approximately the level you could be expected to without any program at all," editor Chris Bickers wrote last month.

Various studies by industry officials and agriculture academicians concur. In a January speech to tobacco workers, USDA economist Robert H. Miller warned of major troubles ahead for the industry, attributing a large part of the problem to leasing costs.

Joseph A. Kinney, a tobacco expert at the National Governors Association, echoes three views: "Tobacco is a vital agricultural commodity in the southeastern United States. The original goal of the program was to keep the family on the farm and to keep supply in line with demand. People who represent growers at all levels of government should be concerned that the program is consistent with original goals and, if it is not, then we should reevaluate it."

Although it has avoided a sticky confrontation with tobacco-state legislators, the Reagan administration is on record against the allotment system. In its farm bill, the administration proposes ending peanut allotments, which are almost identical to tobacco allotments. At least 70 percent of peanut-allotment holders rent growing rights to farmers, which, of course, pushes up production costs.

Helms and other peanut-state legislators are not happy with that proposal. They are even less enamored of the idea of tampering with tobacco allotments. The most popular approach they talk about is further regulation of cheaper flue-cured imports, which increasingly go into American cigarettes. Fifteen years ago American cigarettes contained about 11 percent foreign leaf; today it's about 30 percent.

Just before he left office, President Carter, at the urging of North Carolina Gov. James B. Hunt Jr., directed the International Trade Commission to investigate the import situation to determine if the U.S. support program is in danger. Some high-level USDA officials warned against such a probe, saying that import limits might provoke retaliation against other U.S. farm products, but the ITC investigation has gone ahead.

On the other side, largely because of its higher price, American flue-cured tobacco's share of world markets is plummeting. Fifteen years ago, U.S. leaf had 60 percent of the world market; today it has 28 percent.

One result of these dramatic changes is that more and more U.S.-grown flue-cured tobacco goes into the stockpile operated for the government's Commodity Credit Corp. by a grower-owned Flue-Cured Tobacco Stabilization Cooperative based in Raleigh. CCC money, borrowed from the Treasury, provides the support loans received by farmers.

If farmers don't get at least a penny per pound more than the support price at market, their tobacco goes into the Stabilization on loan at the support price. The tobacco is sold later by Stabilization and profits, if any after the loan is repaid, go to the farmer.

Since 1975, the Stabilization's stocks have grown as poorer grades of U.S. tobacco fail to sell. Inventories are now around 600 million pounds, which represent principal, interest and insurance costs to the government of some $981 million—a potentially staggering loss if the tobacco can't be sold. Until recent years, the CCC has done relatively well in getting back its money, a point that Helms and others note repeatedly. Overall losses since the program began in the 1930s have been about $277 million, far less than any other major commodity supported by the government.

Those figures, however, do not reflect another government/taxpayer loss—or subsidy, if you will—to the tobacco interests. According to CCC comptroller Lester W. LeCompte, at least $591 million or as much as $845 million (no one knows for sure) has been lost to the Treasury over the life of the program.

Those amounts are the difference between the rate at which CCC has borrowed money from the United States and the rate at which it has made tobacco loans to farmers, money that will not be recovered. Under a new policy announced last month by Block, that subsidy will end. Farmers now will have to repay their loans at the true cost of CCC money.

"The new policy applies to all commodities, not just tobacco," LeCompte said. "The loan rates will be subject to readjustment on April 1 and Oct. 1, but we have no idea in this office what the change will mean in the way the tobacco program operates."

A growing thought among growers is that more costly government loans will mean higher prices and, in all likelihood, manufacturers turning to more imports and Stabilization stocks mounting. Because more than 80 percent of the flue-cured allotments used by farmers pay rentals that average about $1,000 per acre nationally, the permits are certain to get increasing attention.

The allotments—more than 500,000 of them—are regulated by poundage quotas established in the 1960s to put a rein on production. USDA says the average lease fee paid by farmers is 50 cents a pound.

Computer prints at USDA indicate that Mrs. Helms, for example, has a relatively small quota of 2,599 pounds. At average rates, she could lease her allotment to a farmer for $1,299.50 per year. How does she use it? The senator's aides said they were unaware that Mrs. Helms had an allotment, and the Helmses, on vacation, have been out of reach.

KICKING TOBACCO

Many critics have noted that the Reagan administration's planned budget cuts conspicuously omitted one indefensible federal subsidy—the tobacco price support program. The program's defenders, chiefly the Tobacco Institute, object to the characterization of the program as a subsidy. It is in fact a loan program, which in its 43 years of existence has cost the Agriculture Department only $54 million in unrepaid loans. The industry has a point: eliminating the few direct subsidies given to tobacco farmers would save little or no money from the 1982 budget. But the tobacco program would deserve abolition even if it were free.

For the record, the program is considerably more expensive than the tobacco industry acknowledges. The cost of defaulted loans is not the only expense incurred by the federal government. Just administering the program cost $13 million in fiscal year 1979, money which naturally would not be needed if there were no loan program to administer. If this were the only cost, the price supports would be too expensive.

But there are other costs as well. To understand them one has to understand how commodity loan programs work. The USDA sets a price support level. If the market price is higher, the farmer sells his product on the market. If the market price is lower, he puts his crop in a government storage silo and takes a loan equivalent to the support price. If the market price rises, he takes the crop out of storage sells it, and repays the loan with interest. If it stays down, he defaults and lets the government keep the crop.

As it happens, the market price has been higher than the support price for most of the time the tobacco program has existed. Consequently farmers can usually sell on the open market and repay any loans needed during periods of low prices. Hence, by the Tobacco Institute's reasoning, there is no subsidy.

But there are actually two subsidies involved in the tobacco program, though only one of them comes out of the federal budget. The first is the low interest rate paid by tobacco farmers on their loans—currently 11.5 per cent, with the prime rate set at 19.5. The expense to the federal government is the difference between what it gets on its commodity loans and what it pays to borrow the money. The subsidy to farmers is the difference between what they pay for USDA loans and what they would pay at a bank.

The second subsidy doesn't come out of the taxpayer's pocket, but it still imposes a burden on the economy. Thanks to the price supports and the acreage restrictions that go along with them, tobacco prices are higher than they otherwise would be. The subsidy here is paid by smokers, who may deserve little sympathy. But the higher prices still serve to enrich tobacco growers.

The federal government's help to the tobacco industry goes well beyond its efforts to prop up prices. It also provides a host of free services that most industries have to pay for. The Agriculture Department grades and inspects tobacco at no charge, though the President reportedly will propose making growers pay fees for these services. It does extensive research that benefits tobacco farmers and cigarette manufacturers. And it sometimes purchases tobacco for Food for Peace, a foreign aid program ostensibly intended to improve nutrition in poor countries. One anti-smoking group, Action on Smoking and Health, estimates that if all the favors were ended, the federal government would save from $60 to $80 million a year.

This help might be excused if the tobacco industry were providing a valuable product that somehow improves the quality of life. But all the tobacco industry does is provide a means for people to endanger their health, at great economic and social expense. If people want to continue buying tobacco, that's their right. But the survival of the industry should not depend on government help.

PROBE OF TOBACCO IMPORTS THREATENS TO RUN AWAY WITH ITS BACKERS

(By Ward Sinclair)

Two days before he left office, President Carter did a favor for a political friend from North Carolina who was having trouble with the state's Republican senator, Jesse Helms.

At the behest of his pay, Gov. James B. Hunt Jr., and against the advice of trade experts at the Department of Agriculture, Carter asked the International Trade Commission (ITC) to look at the tobacco import situation.

Six months later, the Hunt-Helms byplay has expanded into what no one on Tobacco Road apparently really wanted or counted on—a full-dress review by the ITC of the federal price support program for tobacco.

The ITC probe could tangle the Reagan administration in a sticky flap with nervous U.S. trading partners, who already are whispering of retaliation if the United States curbs tobacco imports.

Back in January, it seemed like a clever bit of political one-upmanship. Helms had been hacking away at Carter, Hunt and then-Sen. Robert Morgan, blaming them for what he regarded as improperly low tariffs placed on tobacco imports by the U.S. Customs Service.

Thus Carter's request for an ITC probe could somewhat dull the edge of Helms' complaints, and allow Democrat Hunt, regarded by many as a challenger to Helms in 1984, to score points with North Carolina tobacco growers disgruntled with imports.

North Carolina is the largest producer of flue-cured tobacco, the principal component of cigarettes. The state's crop produces cash receipts of more than $1 billion yearly.

Helms, now chairman of the Senate Agriculture Committee, has not let up the pressure. He reportedly has reiterated his views on tobacco tariffs to the administration and has left a clear impression that he will closely review names of Treasury appointees who will be in a position to make tariff decisions.

George Dunlop, the senator's chief tobacco adviser, said he has "visited" recently with possible Reagan nominees to head the Customs Service, seeking to push the case for higher duties on foreign leaf.

Key Treasury officials will be the customs commissioner—not yet named—and the as-

sistant secretary for enforcement. The White House choice for that job is New York attorney John M. Walker Jr., a first cousin of Vice President Bush.

Walker's selection was announced May 13 after weeks of delay resulting from questions raised by the National Rifle Association. Walker declined to discuss his nomination, but said no one had ever suggested he should have a predetermined position on the tobacco tariff question.

As this goes on, the ITC is preparing to begin hearings here June 24, as part of its Carter-requested investigation, to determine if imports are impairing the controversial price-support program.

The ITC could hold that there is no harm to the program. Or it could recommend limits on imports, a move that could put the free-trade politics of Reagan to a quick test. The president could support or reject the ITC findings.

The proceedings hold the potential for giving critics of the price-support program a rare chance to spotlight the system of federally backed acreage allotments and market controls they find so objectionable.

Agriculture Secretary John R. Block, in a February letter to Hunt, outlined the peril to tobacco advocates if they continued to push for the ITC investigation, asking if the governor was prepared to bear the possible consequences.

He noted that Helms, too, had supported an ITC probe of imports and had discussed the question "on many occasions" with Reagan.

"Are you confident that public hearings . . . would not result in legislative reaction that would be adverse to the interests of tobacco producers in your and other states?" Block asked Hunt. The governor never responded to Block's letter.

Helms, sensitive to a political ambush, now says he supports the ITC investigation only because his state's farmers, principally the North Carolina Farm Bureau, want it.

Helms and other tobacco-state legislators over the years have successfully thwarted challenges to the support program, although their strength may be waning. A recent effort by Sen. Howard M. Metzenbaum (D-Ohio) to cut federal tobacco outlays drew 42 supporters and could have succeeded with a change in eight votes.

So at a time when the critics seem to be picking up ground, the ITC forum gives them an unusual new opportunity. To determine the impact of imports, the ITC will have to examine closely the price-support program.

The program has had problems for a variety of reasons in the last several years, with increasing amounts of low-grade flue-cured tobacco finding their way into government warehouses because of poor marketability. Increasing government stocks have given rise to a fear that the program soon may find itself in serious economic difficulty.

The quick reaction among growers has been to blame lower-priced imports and tariffs—which Helms and others say are unreasonably low—for their problem.

But others in the industry contend that the problem is the price-support program itself, which automatically pushes up domestic prices and encourages farmers to grow poorer grades of tobacco that cannot compete with the imported leaf.

"The problem is not imports," said an official of the Leaf Exporters Association in Raleigh. "The major problem is that certain U.S. tobacco is overpriced and the quality is deteriorating."

U.S. farmers' costs are increased by a feature of the program that allows nonfarmers to hold tobacco-growing allotments, which they in turn lease to farmers at any average of about 50 cents a pound. Fewer than 20 percent of the allotment holders actually are growers, according to the Department of Agriculture. By some estimates, these lease fees add at least $279 million a year to farmers' production costs—forcing the federal price support to increase and making U.S. leaf less competitive.

Even in that situation, exports help keep the U.S. tobacco farmer afloat. Exports of leaf and cigarettes bring in about $2.5 billion a year; imports cost only $500 million.

"What's happening is that the politicians have miscalculated," said an industry official. "If the ITC vetoes a limit on imports, the administration and farmers are going to have to face up to changes in the support program because its problems are going to be in full public view."

AMA, IN REVERSAL, URGES HALT TO TOBACCO SUBSIDIES

(By Philip J. Hilts)

CHICAGO.—The American Medical Association passed a resolution today calling for a halt to federal subsidies to the tobacco industry, reversing an AMA policy going back about 15 years.

Delegates representing about 40 percent of the nation's doctors at the AMA's annual convention voted to "support the elimination of the federal price support program for tobacco." The action will pit the strong doctors' lobby in Washington against tobacco subsidies.

Though the AMA has declared smoking a health hazard and refused to accept tobacco advertising in its publications, in the past the association always refused to support an end to tobacco subsidies.

But today the 283 delegates went with a resolution pushed by medical students and young residents. They said smoking is the number one preventable cause of death in the country, costing the lives of 320,000 annually from smoking-related illnesses.

The students found today's vote somewhat contradictory to yesterday's action in which the AMA refused to divest itself of its stock in tobacco companies. AMA has $1.4 million in tobacco stocks out of $113 million in the retirement fund.

Objections to the vote on federal subsidies came from the Kentucky delegation. "The price support has no applicability to smoking," said Dr. Harold Haller of Kentucky. "It's a farm issue. . . . We hate smoking, too. But the AMA has no right to challenge the small farmer." He said the price support program limits the poundage of tobacco a farmer can produce and thus prevents large growers from crowding smaller farmers out of the market.

Ronald Davis, a third-year medical student from Chicago who introduced the resolution in the House of Delegates, said, "This is a significant action, let me tell you. We've tried to pass five resolutions like this in the past 14 years, but each time they've been watered down."

Davis said the price support program costs $60 million to $80 million a year. According to an aide to Sen. Walter H. Huddleston (D-Ky.), the cost is closer to $12 million annually.

In other action, the delegates rejected a committee recommendation supporting stronger federal gun control laws. With little debate, the doctors voted to table the issue indefinitely.

OREGON LUNG ASSOCIATION, INC.,
*Portland, Oreg., July 27, 1981.*

Hon. MARK HATFIELD,
*Russell Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR HATFIELD: I want you to know how much we at the Oregon Lung Association support your Bill S. 1515.

It is about time a strong stand was taken against this absurd situation where we spend millions of dollars supporting a crop whose economic consequences are disastrous.

Sincerely,

JOE WELLER,
*Regional Director.*

---

[From the Eugene (Oreg.) Register-Guard, Aug. 11, 1981]

IT'S HATFIELD VS. THE TOBACCO LOBBY

While one federal agency tries to keep people from smoking, another subsidizes the growing of tobacco. This is not the only contradiction in government policy. But it is one of the most embarrassing.

Oregon's Sen. Mark Hatfield has introduced legislation to eliminate the subsidy. Artfully borrowing a current buzzword, Hatfield calls his bill the "Tobacco Deregulation Act of 1981."

It would abolish both the price-support system—under which the government guarantees growers a base price and buys what can't be sold on the private market—and the acreage allotments that limit the amount of land that can be put into production.

An additional 2-cents-a-pack federal excise tax would be placed on cigarettes, with the estimated $700 million revenue used for research into smoking-related diseases.

The moral argument in Hatfield's favor is strong and obvious: The government shouldn't subsidize a product so destructive of good health.

The fiscal argument is not so strong now, but may become so. Over the 38 years that tobacco price supports have been in effect, the net cost to the government, after reselling its purchases, has come to only $56 million.

But cheaper tobacco product imports are on the rise as other nations develop their tobacco industries. So the price-support program could become much more expensive. Hatfield's office cites an International Trade Commission study predicting that costs will rise to between $96 million and $1 billion over the next four years.

That's a broad range, indicating uncertainty. But if experience runs toward the high figure there should be increased interest in freeing the government from this expense.

Eliminating the government program would probably lower the price of tobacco products. More acreage would be planted, with more competition among growers. This might be seen as encouraging smoking.

But cigarette purchases are not much affected by price changes. Smokers don't smoke less when prices go up or more when they go down. Any stimulus from lower prices could be more than offset anyway if the govenrment used some of its new cigarette-tax money to beef up the campaign to discourage smoking, especially among the young. The budget for that today is only about $13 million.

In urging governmental withdrawal from the tobacco fields, Hatfield is up against powerful political foes. Tobacco is important to the economies of several Southern states. The conservative politicians from those states exert power disproportionate to their numbers in Congress. Democrats and Republicans alike, they also are thick right now with the Reagan administration.

Yet Hatfield can use Reagan's own arguments in support of his bill. The administration wants to cut government spending; this program should not be sacrosanct. The administration wants to reduce government regulation of industry; much of the tobacco program is regulatory. The administration favors vigorous competition in a free market; the tobacco program is designed to suppress competition.

Hatfield's own interest in this subject undoubtedly stems from moral conviction and

his personal opposition to smoking. It is only fair to concede, of course, that Oregon is not a tobacco state.

There is an interesting theological sidelight in the potential conflict over Hatfield's bill. His most prominent opponent in the Senate probably will be Jesse Helms, that champion of the Moral Majority from North Carolina.

Although Hatfield is deeply religious, he has spoken out consistently against the kind of injection of religion into politics that Helms finds so appealing.

On both tobacco subsidies and the role of religion in politics, we vote with the senator from Oregon.

[Report No. 81-55 ENR]

TOBACCO PROGRAMS OF THE U.S. DEPARTMENT OF AGRICULTURE: THEIR OPERATION AND COST

(By Jasper Womach)

ABSTRACT

The U.S. Department of Agriculture administers several programs related to tobacco production and marketing. These programs are designed to stabilize the market and raise tobacco prices in order to increase producer income. The tobacco price support program is often singled out by critics as the "subsidy" to tobacco producers. The price support program operates through nonrecourse loans and marketing quotas.

Nonrecourse loans provide producers with operating funds and guarantee them a price at least equal to the support rate. Over $5 billion has been loaned to tobacco producers since the program was initiated in the late 1930's. Loan losses are created when tobacco being held as collateral is sold for less than the value of the loan. The cumulative loss on loans amounts to $56.7 million, 1 percent of the loan volume. In recent years, recoveries, in the form of loan service fees, have exceeded loan charge-offs. So, tobacco loan operations have shown net gains rather than losses. The exception is fiscal 1979 when a warehouse fire destroyed $5.4 million in collateral tobacco stocks. And in fiscal 1980 there was a nearly negligable net loss of $36,000 from price support loan operations.

The marketing quota provisions of the price support program create mandatory limits on production. It is through supply control that the long run price for tobacco is held above the loan rate so as to minimize losses to the Government. The cost of administering the price support program, including loans and marketing quotas, was $13.9 million in FY 1980.

Other programs that benefit tobacco producers, and their cost in 1980 include: (a) tobacco inspection and grading, $6.2 million; (b) market new services, $0.5 million; and (c) research and extension, $8.1 million. Tobacco exports are financed under two programs but outlays for credit sales are recovered as borrowers repay their debt. Long term credit sales through the P.L. 480 program amounted to $2.7 million in FY 1980. The extension of short term credit on commercial export sales amounted to $31.4 million in FY 1980.

INTRODUCTION

Since the 1930's the Federal Government has operated programs to support and stabilize tobacco prices. This has meant substantially higher incomes to allotment holders and growers than would otherwise have been the case. Prices are supported by means of Department of Agriculture (USDA) administered marketing quotas and nonrecourse loans to farmers. Additional tobacco production and marketing assistance is provided through USDA financed inspection and grading services, market news reporting, research and extension activities, and export promotion. Simultaneously, Federal funds are being spent to discourage smoking, to investigate the health effects of smoking, and to provide medical care for people suffering from smoking related illnesses. This apparent contradiction in Federal policies has caused conflict between executive agencies as well as debate within Congress over the possibility of eliminating programs that assist the production and marketing of tobacco.

One argument commonly used against the tobacco price support program is its cost to the government and taxpayers. This report explains the several tobacco related programs of the USDA and presents detailed expenditure data.

THE PRICE SUPPORT PROGRAM

*Legislative history*

Early efforts to stabilize and boost market prices for tobacco were attempted by producer associations. Failure was the common theme because the voluntary nature of the pooling and withholding efforts resulted in nonparticipants also receiving benefits from higher prices. This changed when the Federal Government authorized production controls for tobacco (and other specified basis commodities) during the depression of the 1930's. Penalties on nonparticipants assured full cooperation. Production restrictions and cash payments to participating producers were initially authorized in the Agricultural Adjustment Act of 1933. This legislation was supplemented by the Kerr-Smith Act in 1934. Complicated by constitutional difficulties, these earliest legal authorities were finally replaced by the Agriculture Adjustment Act of 1938, which, with subsequent amendments, provides the current authority for marketing quotas to control the production of tobacco. Justification for Federal assistance in controlling the production of tobacco is stated in the Act (Sec. 311.(a)):

"The farmers producing [tobacco] . . . are subject in their operations to uncontrollable natural causes, are widely scattered throughout the Nation, in many cases such farmers carry on their farming operations on borrowed money or leased land, and are not so situated as to be able to organize effectively, as can labor and industry through unions and corporations enjoying government protection and sanction. For these reasons, among others, the farmers are unable without Federal assistance to control effectively the orderly marketing of such commodity with the result that abnormally excessive supplies thereof are produced and dumped indiscriminately on the nationwide market."

Later, the Agricultural Act of 1949 made it mandatory for the Secretary of Agriculture to provide price support for tobacco if producers have not disapproved marketing quotas.

Financial resources for carrying out price support operations are provided through the Commodity Credit Corporation (CCC), with administrative support coming from the Agricultural Stabilization and Conservation Service (ASCS).

*Marketing quotas and nonrecourse loans*

The two techniques, supply control through marketing quotas and price support through nonrecourse loans, constitute the basic elements of the Federal price support program for tobacco. Marketing quotas are mandatory on the growers of each class or kind [1] of tobacco, but only after having been approved in a referendum vote by a two-thirds majority of the producers.

The exact level of the national marketing quota for each kind of tobacco is determined administratively, prior to each growing season. The national quota is a projection of the production needed to meet domestic and export demand (at or above the price support level) and to provide for reasonable carryover stocks. This national quota is the tool for supply control; it effectively functions as a price raising mechanism.

The marketing quota is translated into a national allotment. Except for flue-cured and burley tobacco, the quota is an acreage allotment. So, the farm marketing quota is the quantity produced on the acreage allotment of each farm. For flue-cured tobacco, an acreage-poundage program was initiated in 1965. Burley tobacco producers are under a poundage program that was authorized by legislation in 1971. Table 1 shows national tobacco allotments, by kind of tobacco, for 1980.

Each tobacco farm, based on its historical production, is given a pro rata share of the national allotment. The historical basis for allotments restricts the entry of new tobacco producers, unless they inherit or purchase land with an allotment. Existing allotment holders can only expand their tobacco acreage by the lease-and-transfer of quotas within the same county. A farm can market up to 10 percent more than its allotment, but the excess is deducted from next year's quota. If less than the quota is marketed in any year, the difference is added to the farm's quota for the following year. Marketings above the 10 percent allowable excess are subject to penalty charges. The penalty is equal to 75 percent of the average market price for the previous year, a rate which effectively discourages excess production.

TABLE 1.—NATIONAL TOBACCO ALLOTMENT AND AVERAGE PRICE SUPPORT LOAN RATE, BY KIND OF TOBACCO 1980

| Kind (types) [1] | Acreage allotment (acres) | Poundage allotment (pounds) | Price support level (cents per pound) |
|---|---|---|---|
| Flue-cured (11-14) [2] | 523,785 | 1,186,493,000 | 141.5 |
| Burley (31) | | 786,909,000 | 145.9 |
| Fire-cured (21) | 9,703 | | 98.9 |
| Fire-cured (22-23) | 27,793 | | 98.9 |
| Dark air-cured (35-36) | 13,344 | | 88.0 |
| Sun-cured (37) | 1,874 | | 88.0 |
| Cigar binder (51-52) | 3,657 | | 101.0 |
| Cigar filler and binder (42-44, 53-55) | 19,250 | | 72.9 |
| Puerto Rican (46) [3] | | | 75.7 |

[1] Producers have traditionally disapproved marketing quotas for Pennsylvania cigar filler (41) and Maryland tobacco (32). Other kinds and types of tobacco produced in small quantities n the United States are not included in the quota and price support program.

[2] The acreage poundage allotment assumes a national yield goal of 1,902 lb per acre.

[3] Quotas and allotments have hever been proclaimed for Puerto Rican filler (46) but price support is provided.

Source: U.S. Department of Agriculture, news releases.

If tobacco producers vote to adopt marketing quotas, then the government is required to provide price support. Conversely, if marketing quotas are not approved then price support is not provided. The national level of price support is calculated according to a formula specified in the law. Individual support rates are assigned to each grade of tobacco in order to reach the legal average price support level. Tobacco price support levels for 1980 are shown in Table 1. Each year the support level is adjusted to reflect

[1] Tobacco leaves have differing characteristics that are important in the manufacture of tobacco products. These differences have been systematically classified by the USDA. There are six major classes of tobacco produced in the U.S. with the differences arising from variations in soils and climate, in cultural practices, and in curing methods. The classes are flue-cured, fire-cured, air-cured, cigar-filler, cigar-binder, cigar-wrapper, and miscellaneous domestic. Classes are further divided into types, of which there are 26 different categories. The major tobacco produced in the U.S. is flue-cured, raised largely in North Carolina. Second in importance is burley (type 31 in the air-cured class), raised primarily in Kentucky.

recent changes in prices paid by farmers for production and living expenses. The 1980 support prices are about 9 percent higher than those of the previous year.

The method of price support is nonrecourse loans from CCC, with the tobacco held as collateral. There are no direct CCC payments to growers. Rather, CCC loans are made available through producer associations (cooperatives) that are under contract with CCC to handle all operations connected with making loan advances to producers, arranging for receiving, redrying, packing, storing, and eventually selling the tobacco under loan.

When tobacco is sold at auction, producers deliver tobacco to an auction warehouse where it is weighed and displayed on the auction floor. A government inspector grades the tobacco. Each lot is auctioned to the highest bidder, except that if the high bid does not exceed the support rate (and the tobacco complies with marketing quota requirements), it is consigned to the association. Producers are paid at the loan rate for tobacco consigned to the association. The association in turn has all the consigned tobacco redried and packaged for storage. Over time, the association sells the tobacco placed under loan at prices approved by CCC.

After the tobacco is sold by the producer association, proceeds are used to reimburse CCC, with interest, for its loan advances. All excess receipts are distributed to the producers and any losses are charged to CCC. Administrative expenses of the associations, to the extent service charges on producers are not adequate, are also financed by CCC.

*Loan volume and losses to CCC*

Tobacco quality and market conditions determine the annual quantity of tobacco placed under government loan. Use of the loan program varies greatly between years. The annual quantity of flue-cured placed under loan over the past ten years has ranged from 2 percent to 21 percent of total marketings. Burley loan placements have ranged from zero to 27 percent of annual marketings. Since 1933, CCC has loaned about $5 billion through producer associations. Annual loan activity is summarized in Table 2 for fiscal years 1960 through 1980. At the end of fiscal year 1980 outstanding loans totaled $814.9 million.

TABLE 2.—TOBACCO LOAN PROGRAM OPERATIONS, BY FISCAL YEAR, 1960–80

[Dollar amounts in millions]

| Fiscal year | New loans made | Repayments | Loans canceled | Loans charged off | Additions (deductions) | End of year: Value | End of year: Quantity (million pounds) |
|---|---|---|---|---|---|---|---|
| 1960 | $56.2 | $198.8 | $18.7 | $1.2 | $9162.5 | $417.7 | 668 |
| 1961 | 50.4 | 54.0 | 25.0 | 1.2 | (29.8) | 387.9 | 610 |
| 1962 | 70.2 | 102.3 | 41.5 | 9.7 | (83.2) | 304.7 | 451 |
| 1963 | 209.1 | 44.1 | 15.8 | 16.4 | 132.7 | 437.4 | 610 |
| 1964 | 304.9 | 52.4 | 10.8 | 12.2 | 229.5 | 669.9 | 942 |
| 1965 | 262.4 | 73.4 | 28.4 | 1.1 | 159.4 | 826.3 | 1,149 |
| 1966 | 96.9 | 92.1 | 68.6 | 1.3 | (65.1) | 761.1 | 1,018 |
| 1967 | 111.3 | 154.4 | 31.6 | 7.6 | (82.3) | 678.8 | 921 |
| 1968 | 246.1 | 158.8 | 8.3 | 1.8 | 77.2 | 756.0 | 1,035 |

Source: Compiled from Commodity Credit Corporation, Report of Financial Conditions and Operations, annual issues.

The cumulative loss on tobacco loans from 1933 through fiscal year 1980 amounts to $56,719,000. This loss is about 1 percent of the total tobacco loan volume. A detailed display of annual loan losses since 1960 is shown in Table 3. For purposes of comparison, the cumulative financial loss on the tobacco loan program represents 0.3 percent of CCC's total cumulative loss of $19.1 billion on all commodity loan inventory operations. The supply control feature of the tobacco program effectively helps maintain prices above the support level, thus minimizing loan charge-offs and losses for CCC. In recent years, service charges have actually exceeded loan charge-offs, so the cumulative loss figure decreased between 1972 and 1978. During fiscal year 1979, CCC suffered a large loan loss of $5.4 million due almost entirely to a fire which destroyed a warehouse in Kentucky. CCC self-insures the tobacco it holds as collateral so such fire losses are charged off against the loan program. The current cumulative loss of $56.7 million is a new peak level for the price support program.

EXPORT ASSISTANCE

Since the time of the earliest colonial settlements in Virginia through the present, tobacco has been an important export product. In recent years, tobacco leaf and product exports have taken about four-tenths of the U.S. tobacco crop. The value of tobacco and tobacco product exports in 1980 was about $2.4 billion. Exports were partially offset by $487 million in imports of primarily oriental tobacco, used in blends with domestic tobacco. So the tobacco trade picture for 1980 shows a favorable balance of about $1.9 billion.

TABLE 3.—TOBACCO PRICE-SUPPORT PROGRAM COST, BY FISCAL YEAR SINCE 1960 AND CUMULATIVE SINCE 1933

[Dollar amounts in thousands]

| Fiscal year | Loans charged off | Other costs [1] (recoveries) | Net loss (gain) on price-support activities | Cumulative loss on price-support activities (since 1933) |
|---|---|---|---|---|
| 1960 | $1,235 | ($1,409) | ($174) | $1,404 |
| 1961 | 1,239 | (597) | 643 | 2,047 |
| 1962 | 9,654 | (390) | 9,264 | 11,311 |
| 1963 | 16,404 | (334) | 16,070 | 27,381 |
| 1964 | 12,220 | (703) | 11,517 | 38,898 |
| 1965 | 1,133 | (760) | 373 | 39,271 |
| 1966 | 1,298 | (965) | 333 | 39,604 |
| 1967 | 7,630 | (2) | 7,630 | 47,234 |
| 1968 | 1,830 | 6 | 1,836 | 49,070 |
| 1969 | 4,929 | 2 | 4,932 | 54,002 |
| 1970 | 659 | 397 | 1,056 | 55,058 |
| 1971 | 103 | (3) | 100 | 55,158 |
| 1972 | 340 | (131) | 209 | 55,367 |
| 1973 | 145 | (360) | (216) | 55,151 |
| 1974 | 25 | 9 | 35 | 55,168 |
| 1975 | 170 | (1,316) | (1,146) | 54,040 |
| 1976 | 1 | (829) | (828) | 53,212 |
| Transition quarter | 1 | (807) | (806) | 52,407 |
| 1977 | 182 | (450) | (267) | 52,140 |
| 1978 | 11 | (837) | (827) | 51,313 |
| 1979 | [3] 5,362 | 8 | 5,370 | 56,683 |
| 1980 | 71 | (35) | 36 | 56,719 |

[1] Recoveries are primarily loan service charges or "collateral fees."
[2] Less than $500.
[3] The large charge-off is due primarily to the fire loss of $5,360,760 worth of 1976 and 1977 crop burley tobacco in a Springfield, Ky., warehouse. Only $1,048 was lost on the sale of tobacco out of loan stocks.

Source: Compiled from Commodity Credit Corporation, Report of Financial Conditions and Operations, annual issues.

The Federal Government has provided export assistance for tobacco much as it has for other agricultural commodities. Beginning in 1954, tobacco was eligible for sale under Title I of the Agricultural Trade, Development and Food Assistance Act (commonly referred to as P.L. 480 or Food for Peace). An export payments program was initiated in 1966 and lasted until 1973. Tobacco sales have been financed under the CCC short term credit program since 1967. Finally, the USDA supplemented advertising expenditures of trade associations in a cooperative program to encourage the use of U.S. tobacco in foreign manufacturers' blends. This effort was discontinued after 1975.

PUBLIC LAW 480

The Agricultural Trade Development and Food Assistance Act was passed to achieve the specific goals of developing new markets for farm products, disposing of surplus agricultural commodities, combating hunger and malnutrition, encouraging economic development in developing nations, and promoting the foreign policy of the United States. The original Act as passed in 1954 authorized the sale of agricultural commodities for local currency, the donation of surplus commodities, and the barter of agricultural commodities for strategic materials. In 1959, a new provision was added to authorize dollar sales under long-term credit.

In 1966, Congress revised and reorganized the Food for Peace legislation. The major emphasis of the program shifted from surplus disposal to market development and humanitarian assistance. Commodity sales activities were consolidated under Title I. Credit sales under Title I are referred to as concessional

sales because of the long payment period (up to 40 years) and the low interest charges (about 2 or 3 percent). Dollar credit sales have completely replaced sales for foreign currencies and barter transactions. Commodities purchased by developing countries are resold by the local government to generate public funds that can be used for development purposes. The recipient nation begins repaying the United States in dollars at the end of a specified grace period. In addition, up to 20 percent of the debt obligation may be forgiven if the recipient nation uses funds for approved development purposes. Table 4 shows annual data on the concessional sales and barter of tobacco under P.L. 480. Credit buyers are typically prompt in making payments under terms of the sales agreements and arrears are minimal. However, data are not available on a commodity basis to show the outstanding debt for tobacco sales.

Legislation passed in 1977 requires the Secretary of Agriculture to give priority to the programming of food and fiber commodities in Title I sales. This legislative restriction did not cause a change in the program since tobacco had never constituted a large share of the concessional sales. Typically, tobacco has amounted to about 2 percent of the total value of annual Title I shipments.

Even though P.L. 480 contains provisions for the donation of agricultural products (Title II), tobacco has never been included as a donated commodity. Prior to 1966 it was merely a USDA policy to exclude tobacco. Then, in the legislative revisions of 1966, tobacco was expressly prohibited from donation.

Through 1966, P.L. 480 shipments were an important share of total tobacco exports from the U.S. From 10 to 20 percent of total tobacco exports were accounted for by the concessional sales program. Since then the program has played a diminishing role in the export market. During the past ten years less than 5 percent of total tobacco exports have been financed through P.L. 480. Table 4 shows value of P.L. 480 sales by fiscal year. During fiscal 1980 long term dollar credit sales amounted to $2.7 million.

*Export payments*

Beginning in 1966, under CCC Charter Act authority, the USDA made export payments on tobacco. The oldest crops in storage qualified for a 10 cent per pound payment while the more recent crops qualified for 5 cents per pound. These payments to exporters were initiated in response to a decline in the U.S. share of the world market at the same time loan stocks were building to unacceptably high levels. The export payments program was intended to make U.S. tobacco more competitive with foreign grown tobacco sold at lower prices because of subsidies, preferential duties, bilateral trading arrangements, and cheaper foreign labor and land. Export subsidies were terminated for tobacco, as well as other agricultural commodities, after the 1972 crop. The termination came at a time when there was a general decrease in commodity stocks and farm prices were reaching record highs. Total cost to the Federal Government for seven years of export subsidies on tobacco was about $220 million. Table 5 shows export payments for tobacco by fiscal year.

*Short term export credit*

The CCC Export Credit Sales Program was established in 1966 as a method of encouraging private exporters to expand overseas markets for U.S. agricultural products as well as to maintain the U.S. in a competitive position among other sellers. Approved sales are financed by CCC for periods from 6 months to 36 months. The program is not intended to displace cash sales. Only selected commodities with supplies in excess of domestic and normal export requirements are eligible, and the sale must be to new markets or in excess of normal markets volume.

Each month the USDA announces the interest rate to be charged and the commodities eligible for credit sale to foreign buyers. Private exporters then apply for approval and registration of qualifying sales. After an acceptable letter of credit in favor of CCC has been received from an approved bank, and the exporter provides the needed documentation, CCC purchases the account receivable from the U.S. exporter. As payments fall due, the CCC draws under the letter of credit for the amount financed plus accrued interest.

Since initiation of Commercial Export Credit Sales in 1967, through fiscal year 1980, CCC has financed $9,296.1 million in agricultural product sales. Tobacco has been an important export item for the program, amounting to $634.6 million or 7 percent of total financing. Table 6 shows annual export credit financing for tobacco. Most tobacco sales are made under credit terms of 12 or 18 months, so CCC quickly recovers its outlays. Data are not available to show the exact amount of outstanding debt on tobacco credit sales, but it is approximately equal to the amount of sales during the previous 18 months.

OTHER TOBACCO RELATED ACTIVITIES

The focus upon tobacco programs and Federal expenditures has to this point been limited to data on financial transfers between the government and the private sector. Not discussed until now are services provided to the tobacco industry by the Federal Government. For example, there are the administrative services related to operating the price support program. Additional services that benefit the tobacco industry are the inspection and grading of tobacco at auction markets, reporting prices and volume during the trading season through a market news service, and conducting research and extension programs aimed at improving tobacco production and marketing techniques. The fiscal year cost, since 1977, of each of these service activities is shown in table 7.

*Administration of the price support program*

A portion of the office staff in some 600 Agricultural Stabilization and Conservation Service county offices, as well as part of the headquarters staff time, is devoted to administering the marketing quota and loan provisions of the tobacco price support program. In fiscal 1980, some $13.9 million was spent for salaries and related expenses of ASCS personnel working on the tobacco program.

*Tobacco inspection and grading and market news services*

The Tabocco Inspection Act of 1935 provides that the USDA will furnish, without charge, inspection and grading services at tobacco auction markets. The absence of fees for tobacco inspection and grading has been rationalized by the fact that the Federal government collects a great deal of revenue from tobacco excise taxes. Federal tobacco tax collections amounted to $2.6 billion in fiscal 1980. The establishment of uniform standards of quality, with grading by unbiased experts, assures that auction markets perform efficiently and fairly. Federal grading also provides an assurance of quality for tobacco held as collateral for CCC price support loans. In fiscal 1980, $6.2 million was spent for salaries, expenses, and support for seasonal tobacco inspectors employed by the USDA's Agricultural Marketing Service (AMS).

Along with inspection and grading, AMS provides a market news service for sellers and buyers of tobacco. Daily reports of grades, prices and sales volume at the auction markets are distributed throughout the tobacco industry. The cost of the tobacco news service in fiscal 1980 was $0.5 million. Similar market news services are provided for practically all agricultural commodities. Market news services are designed to provide farmers with timely, accurate, and unbiased information on market conditions. This enables the farmers to better make decisions on where and when to sell, and at what price.

*Tobacco research and extension*

The USDA has long funded production and economic research related to tobacco as well as other agricultural crops. Research results are disseminated to the industry through the Extension Service. Following the Surgeon General's report on "Smoking and Health" in 1964, the USDA initiated research to develop a tobacco that would be safer to the health of smokers. USDA expenditures on research and extension related to tobacco production and marketing amounted to $8.1 million in fiscal 1980. The health related portion of the research budget amounted to $3.7 million.

SUMMARY

Current U.S. Department of Agriculture programs related to tobacco production and marketing include: (1) a price support program utilizing marketing quotas and nonrecourse loans, (2) long term credit sales under P.L. 480, (3) short term export credit financing, (4) inspection and grading, (5) market news services, plus (6) research and extension.

Critics of tobacco and smoking often single out the price support program from the several tobacco related activities of the USDA and refer to it as the "government subsidy" for tobacco growers. There are two basic elements to the price support program, nonrecourse loans and marketing quotas. Under the loan provisions of the program, farmers are given advances on tobacco that is accepted as collateral by the Commodity Credit Corporation. This happens when tobacco does not sell at auction above the specified loan rate.

Producer associations act as agents for CCC by making advances to producers; redrying, packing and storing the tobacco held as collateral; and finally selling the tobacco and paying off the loans from CCC with interest. If tobacco is sold below the loan rate then CCC accepts the loss, known as a loan charge-off. On the other hand, proceeds from sales in excess of outstanding loans are distributed to producers. So the loan program guarantees tobacco producers a specified minimum price and provides them any benefit from higher market prices. In addition markets are stabilized by the presence of loan stocks that are available to private buyers.

CCC records show that since 1933 over $5 billion has been loaned to tobacco growers. The amount of loans outstanding at the end of fiscal 1980 was $815 million. While loan charge-offs have now reached a cumulative total of $56.7 million, the loss had diminished over the last few years because of annual recoveries in excess of charge-offs. The recoveries are actually service charges or collateral fees that accompany loan repayments. But, in fiscal 1979 there was a large net loss of $5.4 million on tobacco price support loan operations due primarily to a fire at a Kentucky warehouse holding collateral tobacco. In fiscal 1980 there was a small net loss of $36,000.

The other aspect of the price support program is marketing quotas. The national marketing quota is the amount of tobacco production (with allowance for stocks) needed to satisfy domestic and foreign demand at or above a loan rate price. The national quota is divided among tobacco producers who must then restrict production to a farm allotment level. So the marketing quota provisions of the price support program serve to limit supplies and thereby raise market prices above the loan rate. This supply control feature explains why the tobacco taken as loan collateral is eventually sold with little or no loss to the government. The only government cost associated with marketing quotas is the cost of administration. In fiscal 1980 the administrative cost of managing the entire price support program was $13.9 million.

Two different USDA programs provide credit to foreign buyers of U.S. tobacco. These indirectly benefit tobacco producers by helping to expand the export market. Under P.L. 480 (Food for Peace), long term dollar credit sales are made to developing nations. In fiscal 1980, long term credit sales of tobacco amounted amounted to $2.7 million. Short term credit financing from CCC for commercial sales is the more important market expansion activity. Short term credit tobacco sales amounted to $31.4 million in fiscal 1980. Both the long term and short term credit financing are recoverable outlays. Data are not available on the exact amount of outstanding debt owed the CCC for credit sales of tobacco.

Other tobacco related activities of the USDA include: (1) the inspection and grading of tobacco at auction markets with no charge to sellers or buyers, (2) market news reports on auction sales activity, and (3) research and extension on tobacco production and marketing. Table 8 shows annual costs for each of the separate USDA tobacco activities for the past four years and estimates for 1981. During fiscal 1980, nonrecoverable expenditures by the USDA for tobacco related activities amount to $29.3 million. Additional outlays were made under various loan programs but these will be recovered, with interest, as the borrowers repay their debts.

| Total | 30.2 | 24.2 | 32.8 | 29.3 | 32.6 |
| Recoverable loan outlays: | | | | | |
| Additions (deductions) to outstanding price support loans | 161.0 | 98.8 | 152.0 | (88.8) | 20.5 |
| Long-term credit sales | 55.6 | 1.1 | 7.1 | 2.7 | 0 |
| Short-term credit sales | 66.9 | 46.1 | 69.2 | 31.4 | [4] 0 |

[1] Estimated.
[2] The cumulative net loss on tobacco price support loan operations since 1933 is $56,700,000.
[3] Less than $50,000. These data are gross loan outlays with no adjustment for loan recoveries. Data are not available on a commodity basis for loan recoveries.
[4] All-risk loan guarantee provisions where introduced in fiscal 1981. The change from direct loans to loan guarantees eliminates all outlays except in the case of any default.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, I have had the pleasure of working with the distinguished Senator from Oregon on committees on which we have served. I know him to be a man of great sincerity, certainly of absolutely impeccable integrity, and dedicated to improving the lot of all Americans in his work in the U.S. Senate.

In this particular case, I must suggest to my distinguished colleague, in all deference, that he is not fully cognizant of what the effects would be of the amendment he is offering.

He and perhaps other Members of this body are not aware of the not only economic impact of the abolition of the tobacco program but also of the social impact, of what it really means to farming in those States, and they are indeed few in number in which tobacco has become known as the cash crop, the money crop.

I certainly agree with the Senator from Oregon that the abolition of this program, as his amendment suggests, would not decrease the amount of tobacco produced in the United States, but it would certainly rearrange in numbers and individuals who are now in the production of that valuable crop.

We have 124,000 farmers in Kentucky producing tobacco. We are the largest burley State. We are not the largest tobacco producing State. We will hear from that State, I am certain, as this discussion progresses. But as most Senators understand, there is a so-called flue-

cured area of tobacco production and a burley area of tobacco production. Kentucky leads in burley. There are 124,000-plus farmers. The average allotment to those farmers is about 1.3 acres. The average production is just over 2 acres.

What happens if this program is abolished?

Obviously the companies will want to continue to receive tobacco to produce their products. They will, in all likelihood, seek out those farmers who produce in large amounts and can produce in large acreage, contract for their production, get it at a lower rate, and thousands and thousands of farmers who are now able to stay on the farm just because of the cash income from that little plot of tobacco will not only be out of tobacco production but many of them without any question will be out of production, period, and will be off the farm and that land, some of it, will be diverted to other purposes.

So, we are not just talking about this crop. There is no doubt in my mind it would have an impact on the amount of other crops that are produced and that, in turn, could have an impact upon the supply of agricultural products in this land.

My colleague from Kentucky is going to have a great deal to say about individual families and how they deal with this question of tobacco.

We have initiated certain programs to help, for instance, youngsters go to college. I venture to say that more Kentuckians have received a college education because of the tobacco program and by no other reason than by all the Federal programs we have in the State to help educate young people, and it has not cost the Government a penny. It is that cash income that comes in Kentucky at the end of the year, November and December, and the beginning of the new year, January and February, that has been the mainstay of thousands and thousands of farms in our State.

Mr. President, for what purpose are we willing to eliminate this program? I am conscious of the difficulties we face. I serve on the Appropriations Committee with the distinguished Senator from Oregon. I have been through these agonizing sessions where we have cut back on child nutrition programs, help for the elderly, help for our cities and towns, employment programs, and whatever. I know what we are faced with. So if there were a great budget impact I would look with somewhat more favor upon this possibility. By the distinguished Senator's own figures, this program has cost $57 million, and that is in 48 years.

We think sometimes of a program in the $50 million category as not being too expensive nationwide. That is in the history of the program less than three-tenths of 1 percent of what the agricultural program has cost in this country has gone to this particular program.

We have been worried about the cost of the farm bill that we are dealing with now.

The Federal tax on tobacco, the Federal tax on this one product is more every year than the cost of this entire farm bill that we are trying to get passed right now to help the farmers of this country—one product. And that is just the Federal tax. If we add the local, if we add the State tax, we triple that, and the tax revenue off of tobacco is three times what the grower out there gets for growing the product. So it is a pretty good bargain.

For 276,000 farmers in 22 States tobacco is the principal cash crop.

The program just provides market stability. It is not a subsidy. The Government gets its money back. Some of these 43 years this program has been in effect the Government has made a profit and will in the future in some of the years.

The tobacco program benefits producers on small farms. The size of the average allotment for burley and flue-cured tobacco is 1 acre for burley and 3¼ acres for flue-cured, respectively.

The cash income that producers on small farms receive from tobacco allotments enables them to produce other commodities.

What happens if all of these small farmers or if very many of them have to leave the farm? Where is the city in the United States that has excess jobs available to take care of these farm families, the youngsters, the parents, who cannot stay on the farm and continue to make a living because all tobacco production goes to the bigger farms, and it is not scattered across these 22 States as it is now through the allotment system? There is no place for them to go.

There is the question, that is troublesome to me as an individual and it is troublesome to all those in the tobacco industry, and it has been alluded to by the distinguished Senator from Oregon, relating to smoking and health.

Those who have been most adamantly concerned about the smoking and health issue have concluded that the elimination of this program would not in any sense enhance the effort to discourage the use of tobacco products. Joseph Califano, former Secretary of Health, Education, and Welfare, and if there is a more vigorous antitobacco individual than he is I do not know who it would be, concluded that the issues are separate, that eliminating this program will not in any way advance the cause that he advocates.

And many others have come to the same conclusion. Some actually believe that it would do just the opposite. With production centered in the big producing areas, with the companies able to contract out for direct purchases, eliminating the whole warehouse industry, which is another industry that would be severely affected, tobacco would be cheaper, cigarettes may be cheaper, and young people may be more encouraged to smoke. So it could have the very opposite effect than of what those who have a great concern about that issue might expect.

The tobacco program is working well. There is no question. It is the best, most efficient, least costly program that has ever been devised to assist in the agricultural production of this country.

And one of the strengths of the program is that it has been flexible. It has been changed a number of times throughout the years to meet various situations that develop.

A few years ago we changed from the acreage allotment to the poundage allotment because farmers became so efficient they could produce so much on an acre that there was little control left. So they were willing to accept a poundage instead of an acreage allotment.

But numerous times down through the years changes have been made at the appropriate time to deal with situations that have developed. If we have a surplus in one particular grade, if there is a potential exposure to the Federal Treasury because of the way the program is working at one time, then changes have been made to correct those situations, and that is why it has not been costly.

Changes are still apt to be made. But the way to do it is through the hearing process, determining what the problem is and what the correct solutions are, and not to try to rewrite a program or eliminate it here on the Senate floor.

It should be pointed out there is no complaint that I am aware of, there is no complaint about the allotment system. We do not have people clamoring to grow tobacco who say they are closed out because of the allotment system in our State, because people understand that to make the system work there has to be a control of production.

What better way to establish the beginning except through the traditional growing patterns? That is the way the allotment system was set up in the beginning. There is each year some acreage, some poundage, available for new growers, and it is allotted. The growers themselves by referendum vote on what kind of a program they are going to have, and it has been democratic, it has been effective, and it has produced a steady supply of tobacco for domestic consumption and for export, and it has done so with virtually no cost to the Federal Government, and it has done so in such a way that it has kept income coming for thousands and thousands of smaller farmers who otherwise would be closed out from this particular source of income.

So, Mr. President, I urge that the Senate take into account this program as it is. We have faced this issue a number of times since I have been here. Tobacco has been controversial since the day Columbus approached the shores of this country, stopped on an island, and was presented certain dried leaves, as he reported, that they really did not know what to do with at the time, threw them away.

Later they learned what they were for, and we have been using them ever since. It was the first export crop from the United States.

Thomas Jefferson decided that the West ought to be settled, and sent Lewis and Clark out there, and he gave them instructions to seek out places where tobacco could be raised, to send back to the capital that crop.

Down through the years it has been

important. I know there are those who would say nobody ought to use it. There are people who do not eat meat, people who are vegetarians. But we believe in this society that a person ought to have the right to determine what his tastes are and how he discharges them, and until such time as we are ready to say that the product is totally banned and cannot be used, then we ought to continue to have an orderly system that benefits the most possible people, costs the Government the least possible cost. We have that kind of program now.

I urge that the Senate reject the amendment offered by the Senator from Oregon.

I yield to the Senator from North Carolina.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

Mr. President, sitting here trying to think of a Senator for whom I have greater respect or affection than my friend from Oregon, I fail to recall a name.

I wish he had not offered this amendment. I knew some weeks ago that he was contemplating it, and my opposition to his amendment certainly is not personal, as he knows.

Nonetheless, as I listen to my friend, it came to mind an observation by maybe it was Mr. Dooley and Will Rogers, who said that "the trouble with a lot of folks is that they know so much that ain't so."

I noticed my friend referred to the tobacco subsidy. There is no tobacco subsidy. I noticed my friend paralleled the tobacco program with the reductions in some of the welfare programs.

I will say to my friend that if he really wants to see a lollapalooza of a welfare program, let him be successful in destroying the program and then he will see people on welfare who are now making a living productively; he will see young people not going to college who are going to college now, thanks to the incomes of their parents who operate small family farms.

Senator HUDDLESTON is absolutely correct, the tobacco industry is America's oldest industry. It dates back to John Rolfe's first export crop from Jamestown in 1613.

You know, a strange thing, Mr. President, not until 1978, about 3 years ago, did anybody get around to examining the economic effects of the tobacco program. But one was made, a survey was made, of the direct and indirect contribution to the economy by the Wharton Applied Research Center of the University of Pennsylvania in 1978. Now that research center has extended its research to determine not only the economic effect of tobacco nationally in 1979 but its contributions as well.

Needless to say, I am interested in the contributions to my State of North Carolina, but I am also interested in the contributions of this program to the Nation as a whole.

Mr. President, do you realize that the tobacco industry provides 2 million jobs? The tobacco industry produces $30 billion in wages and earnings annually, $30 billion? Do you realize it represents $15.5 billion in capital investment?

Every year this much-maligned industry produces for this Government and for State governments and local governments $22 billion in taxes. So the simple arithmetic, Mr. President, is who is doing what to whom when efforts are made to destroy this program?

Fifty-eight billion dollars are added to America's GNP every year. That is 2.4 percent of the total. And yet I hear constantly "tobacco subsidies."

There is no such thing, Mr. President, as a tobacco subsidy. I wish we had a hundred programs like the tobacco program, because we would not have to collect any income tax from anyone.

There is no tobacco subsidy. It is the other way around. If you want to find a hard situation in terms of providing enough money for these entitlement programs, just kill this program, that tobacco program. You remove the billions of dollars that this program produces for this Federal Government which we so readily appropriate year after year.

Of every dollar's worth of goods and services rendered to and by Americans in 1979, 2½ cents were generated by tobacco; 2.4 percent of the gross national product was produced by this industry, which is maligned day after day, misrepresented day after day, not by people who are insincere but people who are sincerely wrong or people who are sincerely uninformed.

In North Carolina—and we are interested in the flue cured as well as the burley, I say to my friend from Kentucky—the Wharton Applied Research Center of the University of Pennsylvania estimates that cultivating 243,000 acres of leaf on 43,000 farms in 82 of our 100 counties, and these are figures for the year 1979, produced the equivalent of 36,900 year-round jobs.

Now do you wonder, Mr. President, why I am on my feet defending this program? I do not know how many of those 36,900 jobs would be transferred to the welfare rolls.

I was talking to a distinguished Congressman from a non-tobacco-producing State. He said, "You know, I used to be totally opposed to the tobacco program because I didn't know anything about it. Then my brother," he said, "who is the president of a large corporation with plants all over the country, straightened me out."

He said, "Don't you be against the tobacco program, because, in those plants in the tobacco producing States, we have the majority of employees who are able to send their children to college simply because they are able, on the side, to earn a little money on this cash crop."

In my State, the work force related to tobacco adds up to 224,210 people at harvest time. And that is the equivalent of the combined population of the cities of Raleigh and Durham.

There were 70,000 jobs, full time, in the industry involving people working between the seedbed and the sales counter and almost 2,600 more North Carolina jobs are in industries supporting the manufacture of tobacco; 72,300 jobs, or 3.3 percent of the State's private workers.

But let us go back to the taxes. Tobacco is already the most heavily taxed of any consumer product. Federal, State and local governments collected $6.3 billion in direct taxes on tobacco on products in the fiscal year 1979. Cigarette taxes alone represented 98.8 percent of that, or $6.2 billion.

As my friend from Kentucky has said, that is a contribution to the gross national product 2½ times the net U.S. spending.

Well, Mr. President, I have no intention of prolonging the debate, certainly none of monopolizing this floor because there are other Senators who want to discuss this matter.

But I just want to say, over and over again, there is no tobacco subsidy. The tobacco program does not detract or subtract from any entitlement program, whether it be food stamps or nutrition program or whatever. It is the other way around. We would really be having a tough time trying to make ends meet were it not for the tobacco program.

I yield to the majority leader.

Mr. BAKER. I thank the Senator from North Carolina for yielding.

TIME LIMITATION AGREEMENTS ON CERTAIN AMENDMENTS

Mr. BAKER. Mr. President, earlier I indicated that I would try a unanimous-consent agreement later in the day and also that the distinguished minority leader and I would try to work up a list of amendments that we know of that are to be offered by Members. I have such a list and I submitted the list to the minority leader and he has such a list and has submitted the list to me.

I would like to put the unanimous-consent request that I hope the Senate will consider. Once again, I have no real expectation that it will be agreed to, but let me put this request. Then I want to move on, if there is an objection, to the list of amendments that we have compiled.

Mr. President, first I ask unanimous consent that, at no later than 12 midnight this evening, the Senate proceed to vote on final passage of S. 884 and that debate on the bill be limited to 2 hours and the debate on any debatable motion, point of order, or appeal be limited to 10 minutes each and that the only amendments in order shall be those on the following list, with the specified restrictions as to time for debate as noted thereon.

I further ask unanimous consent that this agreement be in the usual form as to the allocation of division of time.

The list, Mr. President, consists of the following:

The Tower-Heflin amendment on cotton, with a 30-minute time limitation; a Grassley amendment on export embargo, No. 531, 30 minutes, equally divided; a Grassley amendment on a CCC loan interest reduction, amendment No. 533, 30 minutes, equally divided; a Grassley amendment on conservation tillage, amendment No. 539, 30 minutes, equally divided; a Grassley amendment for payments for farm lands conservation, amendment No. 532, 30 minutes, equally

divided; a Lugar amendment on target price package, 1 hour, equally divided; a Domenici amendment on agriculture export credit, 20 minutes, equally divided; a Durenberger amendment, loan marriage preference, 10 minutes, equally divided; a Hayakawa amendment, floral checkoff, 15 minutes, equally divided; a Hayakawa amendment, on plant pest, 15 minutes, equally divided; a Humphrey amendment, No. 550, on sugar, 30 minutes, equally divided; a Helms amendment on export subsidy, to delete GATT provisions, 10 minutes, equally divided; a Helms amendment on entitlements, 10 minutes, equally divided; a Helms technical amendment; a Gorton cigarette amendment, 30 minutes equally divided; a Zorinsky amendment on wheat, corn, cotton, rice, and milk target pricing, 1½ hours equally divided; a Levin amendment to reduce the amounts of deficiency payments from $50,000 to $25,000, 20 minutes equally divided; a Levin amendment to prevent State-owned farms from participating in efficiency programs, 20 minutes equally divided; two Eagleton amendments dealing with tobacco, one similar to amendment No. 528 and one similar to amendment No. 529, 30 minutes equally divided on each of the two amendments; a Baucus amendment on loan rates for wheat, 20 minutes equally divided; a Baucus amendment on study of meat imports, 10 minutes equally divided; a Baucus amendment on study of potential protein byproducts, 10 minutes equally divided; 10 minutes equally divided on a Melcher amendment dealing with casein; 10 minutes equally divided on a Melcher amendment dealing with agriculture experiment stations; 20 minutes equally divided on a Melcher amendment on distribution of surplus commodities with a Dole perfecting amendment; a Melcher amendment on interest rates, another Melcher amendment, and perhaps three other amendments as yet unspecified.

Mr. President, that is the list. The request that I now make I have just stated, that is, that no other amendments be in order; that the times noted on this list be the times allocated for debate, and that final passage on the bill occur not later than 12 midnight tonight.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Will the Chair recognize the Senator from Nebraska?

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, reserving my right to object, and I may object, I would like to ask the majority leader, under the time agreement he is seeking, what would be the time for amendments to any of the amendments listed, or is he precluding any amendments to these amendments?

Mr. BAKER. The order does not provide for second-degree amendments or a time for second-degree amendments, but I am prepared to include that if the Senator wishes.

Mr. EXON. I am sorry, I could not hear.

Mr. BAKER. Mr. President, I wish to say to the Senator from Nebraska that the unanimous-consent request I propounded would exclude second-degree amendments in that it makes no provision for such. But I am perfectly willing to amend the request for the agreement to include a reasonable time for debate on second-degree amendments.

Mr. EXON. On any of the amendments hereunder?

Mr. BAKER. Yes.

Mr. EXON. I am not sure at this time, I wish to advise the majority leader, that I will have an amendment, but as the distinguished majority leader knows, I am most upset about the overall procedures that led up to and the actions that have thus far been taken on the farm bill. Therefore, I must at this time object to any amendments that might be offered at a later time by the Senator from Nebraska.

Mr. BAKER. Mr. President, let me thank the Senator from Nebraska. I understand his concern. As I indicated earlier, I really had only the smallest hope that we could have a comprehensive agreement of this sort. I withdraw that request, Mr. President. Let me put another request.

Mr. President, I ask unanimous consent that on the following amendments there be time limitations on debate as follows, and I will take them one at a time so that if there is an objection, it may be dealt with individually.

The Tower-Heflin amendment on cotton, 30 minutes equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, there is one matter that I think should be resolved now. That is as to whether or not an amendment in the second degree will be permitted, and, if so, the time to be allotted thereto, and also if such other amendment has to be germane to the amendment in the first degree.

Mr. BAKER. Mr. President, I did not hear the Senator. Would he repeat his statement?

Mr. ROBERT C. BYRD. Yes; without specifying the time for a second-degree amendment, this would mean that the second-degree amendment could be offered and it would also mean that there would be no time for debate. It would also mean that it could be germane or not germane. I am just raising the question so that the distinguished majority leader can take whatever course he wishes to take as to whether or not such amendments should be excluded; whether or not there should be time on any such amendments, and whether or not they should be germane.

Mr. BAKER. Mr. President, my first inclination and, indeed, the way I put the request was that no second-degree amendments would be in order. But I think under the circumstances, based on the inquiry by the Senator from Nebraska and other Senators, it would be generally desirable to provide for second-degree amendments.

Mr. President, I ask unanimous consent that as and when times are provided for debate on amendments as they will follow in subsequent requests, that one-half of the time allotted may be available for debate on any second degree amendment; that a second-degree amendment must be germane, and that there be a time of 10 minutes equally divided on any point of order or appeal if the same is submitted. Now I renew the request, Mr. President, for the time limitation on the Tower-Heflin cotton amendment.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. BAKER. Mr. President, let me repeat the request I wish to put to the Senate, if I may have the attention of the Chair. I wish to include the so-called boilerplate language with respect to the time allocated for second degree amendments and the requirement for germaneness of second degree amendments, and, by the way, that it must be germane to the amendment, and the times for appeals and points of order submitted shall apply to each of the time requests I made in this list of amendments.

Again, Mr. President, I renew the request for 30 minutes equally divided on the Tower-Heflin amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent on the same basis for a Grassley amendment No. 531, 30 minutes equally divided, on export embargo.

The PRESIDING OFFICER. Is there obejction? Without objection, it is so ordered.

Mr. BAKER. On a Grassley amendment No. 533, the CCC loan interest reduction, 30 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. On a Grassley amendment, conservation tillage, amendment No. 539, 30 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. On a Grassley amendment, payments for farmland conversion, amendment No. 532, 30 minutes equally divided.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I do not have the time specified on my list.

Mr. BAKER. The request I had, Mr. President, is for 30 minutes equally divided. I shall be nappy to withhold that request if the minority leader wishes to check it.

Mr. ROBERT C. BYRD. Mr. President, the minority leader would.

Mr. BAKER. Mr. President, I withdraw that for the time being.

On the Lugar amendment, on the target price package, 1 hour equally divided.

Mr. DOLE. Mr. President, reserving the right to object, on that one, I think I must object.

Mr. BAKER. Mr. President, I understand there is an objection to the time limitation on the Lugar amendment.

The PRESIDING OFFICER. The objection is heard.

Mr. BAKER. Mr. President, the next amendment is the Domenici amendment,

agriculture export credit revolving fund; 20 minutes equally divided.

Mr. ROBERT C. BYRD. Mr. President, I shall have to ask the majority leader to withhold this request because there is no time limit indicated in this list.

Mr. BAKER. Mr. President, I withhold that one as well for the time being.

I now ask, Mr. President, for a time limitation of 10 minutes equally divided on the Durenberger amendment on the loan marriage preference.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. A Hayakawa amendment on the floral checkoff, 15 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. A Hayakawa amendment on plant pests, 15 minutes, equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. A Humphrey amendment No. 550 dealing with sugar, 30 minutes equally divided.

Mr. ROBERT C. BYRD. Mr. President, I am constrained to object on the part of other Senators.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. A Helms amendment on export subsidy program to delete GATT provisions. Ten minutes equally divided.

Mr. ROBERT C. BYRD. On both of the Helms amendments listed here, Mr. President, I have no time indicated, so I ask the majority leader to withhold.

Mr. BAKER. I withhold both Helms amendments for the time being, Mr. President.

On the Hatfield amendment dealing with the tobacco program repeal. I believe that is the amendment now pending, is it not, amendment No. 524?

The PRESIDING OFFICER. As modified, that is correct.

Mr. GOLDWATER. Mr. President, may I ask a question? I have no objection at all, but mentally, I am coming out with about 8 hours. I do not see how we can get out of here by midnight with that much time, especially if we are going to have rollcalls.

Mr. ROBERT C. BYRD. Mr. President, could the Senator be heard on this side of the aisle?

Mr. BAKER. Mr. President, the query put by the distinguished Senator from Arizona is how in the world are we going to fit in all these things between now and midnight? The answer is, as far as I am concerned, that hope springs eternal.

Mr. President, I should like to go ahead with these requests. I am afraid I must tell my friend from Arizona that even by our best efforts, I frankly doubt that we shall get a 12 o'clock completion time or agreement for time to complete consideration of this bill at midnight. But I think, notwithstanding, we are going to have to keep going tonight, perhaps until midnight, to burn up as much time as possible.

As I counted it, we have 8-plus hours of time allocated under this list of amendments and that does not count time for rollcall votes. If we do not finish tonight, we are going to have to work tomorrow. If we not finish tomorrow, we shall have to finish as best we can. But let me continue with the list. Then I shall address once more the question of the further schedule of the Senate.

Mr. President, on the amendment now pending, I inquire if there is agreement for a time limitation at this time? I am prepared to make one if the principals wish or to forgo that for the moment.

Mr. President, I shall temporarily withhold a request in respect to the amendment now pending.

Mr. President, the next one on my list is a Helms technical amendment. There is no time limitation involved. I shall not put a request in that respect, since we are not limiting amendments to only those on the list.

The next is a Gorton amendment on cigarettes, Mr. President, 30 minutes equally divided.

Mr. ROBERT C. BYRD. Mr. President, I shall have to object on behalf of a Senator.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. I thank the Senator.

Mr. President, I have a list now supplied me by the minority leader. I shall put that question now, if I may.

An hour and a half equally divided on a Zorinsky amendment on wheat, corn, cotton, rice, milk target prices.

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, a 20-minute time limitation on a Levin amendment to reduce the amount of deficiency payments from $50,000 to $25,000.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. A Levin amendment, 20 minutes equally divided, to prevent State-owned farms from participating in the deficiency program.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, two Eagleton amendments on tobacco similar to amendments No. 528 and No. 529, 30 minutes equally divided on each of those amendments.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. President, I withdraw my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, now, I am told there is a wish to consider that matter further. I temporarily withdraw my request for a time limitation on the two Eagleton amendments.

The PRESIDING OFFICER. The request is withdrawn.

Mr. BAKER. Twenty minutes, equally divided, on a Baucus amendment dealing with loan rates for wheat.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, 10 minutes equally divided on a Baucus amendment to study meat imports.

Mr. ROBERT C. BYRD. Mr. President, I am advised by Mr. BAUCUS that that amendment will probably not be offered.

Mr. BAKER. I thank the distinguished minority leader.

Mr. President, 10 minutes equally divided——

The PRESIDING OFFICER. Does the Senator withdraw the request?

Mr. BAKER. I withdraw the request, Mr. President.

Ten minutes equally divided on a Baucus amendment to study the potential of protein byproducts.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Ten minutes equally divided on a Melcher amendment dealing with casein.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. How much time?

Mr. BAKER. Ten minutes.

Mr. DOLE. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, 10 minutes equally divided on an amendment dealing with agricultural experiment stations by Mr. MELCHER.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. A Melcher amendment, 20 minutes equally divided, on distribution of surplus commodities with a Dole perfecting amendment.

Mr. MELCHER. Reserving the right to object, Mr. President, I do not think we have done enough groundwork and spadework on that amendment. I therefore object to a time limitation at this time.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. A Melcher amendment, Mr. President, with no time limitation. I shall not submit that at this time.

Mr. President, that completes my list of amendments on which Members have agreed to time limitations. I inquire of the minority leader if he has any further amendments that we might shop for time limitations.

Mr. ROBERT C. BYRD. Yes, Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. ROBERT C. BYRD. So that the record may be clear, Mr. President, as I understood the majority leader's request on the amendments that were enumerated and those with respect to which time limitations were agreed to, is it not correct, I ask the majority leader, that the agreement to the enumerated amendments does not preclude the offering of other amendments, either in the first degree or the second degree, to those amendments?

Let me say it a little differently: It does not preclude the offering of other amendments.

Mr. BAKER. The minority leader is correct. I have not now requested that the enumerated amendments be the only amendments in order. Any Member would have the right to offer other amendments.

The form of the request I made, however, does include that any second-degree-amendment to any amendment on which there is a time limitation must be germane to the first-degree amendment and that time for debate on that amendment will be one-half of the time on the first-degree amendment, to be equally divided, and 10 minutes equally divided on any point of order or appeal if the same is submitted.

Mr. ROBERT C. BYRD. Does not the majority leader also include in his request that as to the division and allocation of time on the second-degree amendments, such division and allocation would be in accordance with the usual form?

Mr. BAKER. Yes. Mr. President, that is part of the understanding, and I include that in the request.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

Mr. BAKER. Mr. President, I continue to hope that we can make better progress on this bill. Sometime around 8:30 or 9 o'clock, I am going to take stock again and see where we are on this list, and I hope that at that time we can get a better reading of where we are on final passage.

It may be only a glint in my eye, but I still hope we can finish this bill tonight. I still ask the Senate to stay in late tonight to try to do that.

Mr. DOLE. It is late now.

Mr. BAKER. The Senator from Kansas points out that it is late now, but it ain't nearly as late as it is going to get. [Laughter.]

However, if we do finish tonight—and I do not say this as an idle inducement—at whatever hour, it would not be my intention to ask the Senate to come in tomorrow, but to go over until Monday.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

UP AMENDMENT NO. 375

(Purpose: To impose a Federal tax on the sale of cigarettes in lieu of State taxes on such sales)

Mr. GORTON. Mr. President, I have a second-degree amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated:

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON) proposes an unprinted amendment numbered 375 to amendment 524, as modified.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the pending amendment (No. 524, as modified) insert the following:

FEDERAL CIGARETTE SALES TAX

SEC. . (a)(1) Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax) is amended to read as follows:

"(b) CIGARETTES.—

"(1) MANUFACTURE OR IMPORTATION.—On cigarettes, manufactured in or imported into the United States, there shall be imposed the following taxes:

"(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand.

"(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

"(2) RETAIL SALE.—On cigarettes sold by a cigarette retailer, there shall be imposed a tax of $10.50 per thousand.".

(2) Section 5702 of such Code (relating to definitions) is amended by adding at the end thereof the following new subsection:

"(n) CIGARETTE RETAILER.—'Cigarette retailer' means any person who sells cigarettes to another person for use or consumption by such other person.".

(3) Paragraph (1) of section 5703(a) of such code (relating to original liability) is amended to read as follows:

"(1) ORIGINAL LIABILITY.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the manufacturer or importer of tobacco products and cigarette papers and tubes shall be liable for the taxes imposed thereon by section 5701.

"(B) TAX ON RETAIL SALES.—The cigarette retailer shall be liable for the tax imposed by section 5701(b)(2) on any cigarette sold by such retailer.".

(4) Subsection (b) of section 5703 of such Code is amended—

(A) by striking out "section 5701" and inserting in lieu thereof "section 5701 (other than by section 5701(b)(2))", and

(B) by striking out "Such taxes" and inserting in lieu thereof "All taxes imposed by section 5701".

(5)(A) Subchapter B of chapter 52 of such Code (relating to qualification requirements for manufacturers of tobacco products, etc.) is amended—

(i) by adding at the end thereof the following new section:

"SEC. 5714. REGISTRATION OF CIGARETTE RETAILERS.

"Any person who is a cigarette retailer shall register with the Secretary before incurring any liability under section 5701(b)(2).", and

(ii) by striking out the heading thereof and inserting in lieu thereof:

"Subchapter B—Qualification Requirements".

(B) The table of sections of subchapter B of such chapter is amended by adding at the end thereof the following item:

"Sec. 5714. Registration of cigarette retailers.".

(C) The table of contents of chapter 52 of such Code is amended by striking out the item relating to subchapter B and inserting in lieu thereof the following:

"SUBCHAPTER B. QUALIFICATION REQUIREMENTS.".

(6) Section 5741 of such Code is amended by inserting "every cigarette retailer," after "every importer,".

(7) Subsection (a) of section 5702 of such Code (relating to definitions) is amended by striking out "subsection (b)(2)" and inserting in lieu thereof "subsection (b)(1)(B)".

(b)(1)(A) There is established in the Treasury of the United States a trust fund to be known as the "Cigarette Tax Trust Fund" (hereinafter in this subsection referred to as the "Trust Fund") consisting of such amounts as are transferred to the Trust Fund under paragraph (2). The Trust Fund shall remain available without fiscal year limitation and the amounts in the Trust Fund may be used only for payments to the States under paragraph (4).

(B) The Secretary of the Treasury shall be the trustee of the Trust Fund and shall report to the Congress not later than March 1 of each year on the operation and status of the Trust Fund during the preceding fiscal year.

(2) The Secretary of the Treasury shall transfer from the general fund of the Treasury to the Trust Fund all revenues from the tax imposed by section 5701(b)(2) of the Internal Revenue Code of 1954. Such revenues shall be so transferred at least quarterly on the basis of estimates made by the Secretary of the Treasury. Proper adjustments shall be made in any amounts subsequently transferred to the extent prior estimates were in excess of or less than the actual revenues from such tax for preceding quarters.

(3) The Secretary is authorized and directed to pay out of the Trust Fund to each State government for fiscal year 1984, and for each fiscal year thereafter, a total amount equal to the allocation of such State government under paragraph (4) for such fiscal year. Such payments shall be made in quarterly installments based on estimates. Proper adjustment shall be made in the amount of any payment to a State government to the extent that the payments previously made to such State government under this subsection were in excess of, or less than, the amount of the allocation to which such State government was entitled under paragraph (4).

(4) There shall be allocated to each State out of amounts transferred to the Trust Fund under paragraph (2) for a fiscal year, an amount which bears the same relationship to such amounts transferred as the amount of revenues from the tax imposed by section 5701(b)(2) of such Code with respect to sales of cigarettes occurring within such State during such fiscal year bears to the total revenues from the tax imposed by such section for such fiscal year.

(c)(1) The amendments made by subsection (a) shall apply to cigarettes sold by a cigarette retailer (within the meaning of section 5702(n) of such Code) after September 29, 1983.

(2) Subsection (b) shall take effect on October 1, 1983.

Mr. FORD. Mr. President, will the distinguished Senator from Washington yield to the Senator from Kentucky for a question?

Mr. GORTON. I yield.

Mr. FORD. Is this the 4- or 5-page unprinted amendment at the desk that relates to State taxes and taxing cigarettes based on length or weight?

Mr. GORTON. It is.

Mr. FORD. Do I correctly understand that the Senator wishes to discuss it on the floor and then intends to withdraw it?

Mr. GORTON. The Senator is correct.

Mr. FORD. I thank the Senator.

Mr. GORTON. Mr. President, the distinguished Senator from Oregon has offered an amendment with an importance which goes far beyond its fiscal impact. It does, of course, have economic consequences. It has various significant social consequences, and obviously it has a great impact on health consequences for the people of the United States.

The present system of marketing and taxing cigarettes in the United States has considerable fiscal consequences, as pointed out by persons on both sides of

this debate, and, at the same time, law enforcement consequences which have not been discussed to this point.

The proposal which is before the Senate at this point reflects upon the fact that tobacco products, especially cigarettes, have been treated as commodities for which considerable tax revenues are used for tax purposes by most of the States of the United States, but are used in a way which is so disproportionate between States as to have created a very serious problem of bootlegging which is taken advantage of by organized crime, causing great losses to those States which have particularly high taxes on cigarettes.

It is that problem and an attempt to improve not only the law enforcement climate of the United States but also the fiscal condition, not simply those States such as that of the President pro tempore of the Senate, which has very high cigarette taxes, but also those that have low cigarette taxes, at which this amendment is aimed.

Contrary to popular belief, cigarette bootlegging is not a minor or a victimless crime in a number of States. Cigarette smuggling is a major source of revenue for organized crime groups, and this revenue is used to finance a number of other illegal operations.

As recently as 5 or 6 years ago, the estimated loss to relatively high cigarette tax States was almost $400 million. Almost certainly, it is more than that at the present time. It is a serious problem in more than a dozen States in the United States and is a problem of some significance in a number of others as well.

The majority of States lose cigarette tax revenues because of bootlegging activities, and revenue losses in those States are considerably larger than revenue gains in States from which much of the bootlegging takes place. So that even when those gains are taken into account—5 or 6 years ago—net losses to the former States are well over $300 million per year.

It has often been suggested that this problem could be solved by a more uniform set of cigarette tax rates on the part of the States, but that is unlikely, if not impossible, of attainment without a very strong Federal encouragement in that area. The high-tax States have increased present revenue needs, and those States are unlikely to lower their cigarette tax rates. In fact, this year, a number of them have increased the tax, while the cigarette producing States do not have the same type of gains and are not favorably disposed to increasing the tax on the cigarettes they produce.

Although States attempt to curtail smuggling, by the very nature of the item, by the ease with which this smuggling can take place, those efforts simply are not effective and are unlikely to be effective in the future.

We simply are not likely to get the resources devoted to preventing this type of crime which are commensurate with the crime itself because of that difficulty and because of the use of cigarette taxes for revenue producing purposes.

Cigarette bootlegging has not only hurt State tax collections. It has hurt legitimate businesses in all high-tax States. Many jobs have been lost at both the wholesale and retail levels. Many others have been removed from the above-ground economy to the underground economy, into the hands of organized crime. Many people who would like to deal honestly in the cigarette businesses have been forced out of the business or into dealing with that type of crime itself.

The best example, of course, is the State of New York. In the decade between 1967 and 1977, the city and the State of New York lost more than $600 million in tax revenues due to cigarette bootlegging.

The cigarette industry itself, the legitimate industry, lost perhaps $2.5 billion in legitimate sales, and roughly half of the employees of wholesalers and vendors were thrown out of work.

Other States have suffered almost identical loss in revenue and loss in legitimate jobs—at least, on a per capita basis.

At the same time, in the same decade, bootleggers on the eastern seaboard alone made an untaxed profit of perhaps $750 million.

These figures are difficult to come by, but almost without exception they result in additional revenue losses not only to the States but also to the Federal Government in income taxes which would otherwise have been paid by legitimate businesses.

This proposal attempts to get at the heart of the matter by creating, in all probability, in place of legal and State cigarette taxes, a Federal tax at roughly the level of the highest State tax on cigarettes at the present time, 21 cents per pack at the retail level.

This, however, is not an attempt to balance the Federal budget. That tax would be rebated to each of the 50 States of the United States in proportion to their share of the sales of cigarettes within the boundaries of those States.

As a result, I believe that every single State in the United States of America would have a revenue gain, something which almost all of them need at the present time, simply because the low tax States obviously on the basis of their sales would receive more money from this tax distribution than they do at the present time. States like New York, Pennsylvania, and other relatively high tax States would receive more simply because they would receive a tax on all cigarettes sold and not the now relatively small percentage which are sold legitimately to which the State taxes attach.

The problem would be, of course, that we might well face the proposition that States would continue to impose taxes on top of this Federal tax and thus render it self-defeating.

This is prohibited effectively by the provisions of this amendment simply by saying that for every 1 cent per pack which a State attempts to tax over and above this Federal tax, it will lose an equal amount of money from the Federal tax distribution which would then remain in the Federal Treasury itself.

It would be impossible, it seems to me, under that set of circumstances that any State could even consider to continue the type of taxes which it has at the present time because they would simply be self-defeating. There is no way that a State could have a net gain as a result.

As a result there would be increased revenues for a large number if not all 50 States in the United States. There would be increased revenues to the Federal Government for all taxes which were not returned to the States and if any State were foolish enough to impose a tax thereafter and, in any event, a return to the Federal Government through more of the cigarette business being above ground and thus subject to normal business taxes and normal income taxes than is the case at the present time.

Most importantly, this would result in a totally uniform tax rate and thus would cut the ground out from under what has been described as perhaps the second most important source of income after narcotics for organized crime in large parts of this country. That result alone is the greatest single reason to adopt something which only the Federal Government can adopt, to cut out a source of income for organized crime which can only, as a practical matter, be accomplished by the Federal Government without the loss of revenues, in fact with a gain of revenues for State and for local governments.

Mr. President, I recognize at this point in some respects this may even be an inappropriate vehicle on which to attach an idea of this sort. I have in proposing it solicited the views on this approach from the distinguished Senator from North Carolina and the distinguished Senator from Kentucky, as I think it is important, and I have discussed the matter with the Senator from Kansas (Mr. DOLE) in connection with the Finance Committee's second proposed tax bill.

As the Senator from Kansas has indicated that any new tax cuts must, of course, be balanced by gains in revenue, it seems to me that, while this is not a primary aim at gaining more revenue for the Federal Government, it nonetheless is a very important subject for the Finance Committee and will do more to work effectively against organized crime than most of the approaches which have been presented in this body for some time.

When I have received a response from whichever Member of the body wishes to speak against this proposal on its merits or to raise whatever objections there are on its merits, as I said in my answer to the distinguished Senator from Kentucky, I intend at this point to withdraw the amendment with the firm hope that the Senator from Kansas will consider this or some similar proposal in connection with his future work on the second tax bill.

Mr. DOLE. Mr. President, will the Senator from Washington yield?

Mr. GORTON. I yield.

Mr. DOLE. Mr. President, let me state that the Senator from Washington is correct, that we certainly will consider this. In fact, the Senator from Washington handed me a copy of the amendment

I think a few days ago. I have already asked my staff to study it carefully.

Frankly, it is a novel idea as far as this Senator is concerned. I know what problem it seeks to address, and he may have mentioned in his statement, that I think there was a network program pointing up some of the abuses under the present system a year or two ago.

Mr. GORTON. There was.

Mr. DOLE. I believe it was on 60 Minutes.

In any event, we are still in the process of the second tax bill. I know no one has worked so hard as the distinguished Senator from South Carolina. We are thinking about the second tax bill. But we will be looking for some revenue raisers to take care of any revenue losers there will be in that bill.

We will study it carefully and look forward to working with the Senator from Washington.

Mr. GORTON. Mr. President, at this point I yield to whichever Senator wishes to speak.

Mr. HOLLINGS. Mr. President, I rise to say to the distinguished Senator from Washington that I prefer if he is going to withdraw the amendment that he go ahead so I can talk on Senator HATFIELD'S amendment. I would be delighted if he withdrew it.

Is the Senator from Washington prepared to withdraw the amendment?

Mr. GORTON. Mr. President, I understand that the distinguished Senator from South Carolina (Mr. THURMOND) is on his way to the body to speak on this issue and wishes to do so before it is withdrawn.

At this point, however, I am prepared to yield the floor to anyone else who wishes to speak on it.

Mr. HOLLINGS. Mr. President, I will not comment on the amendment of the distinguished Senator from Washington in that I understand he is prepared to withdraw it and the chairman of the Finance Committee is ready to try to work with him on the bootleg problem.

I hope that we do not set any kind of Federal policies that more or less preempt the States in their own taxing practices.

Here is an administration that is going to give block grants, going to give more authority, and everything else. I hate to see us go in the other direction with the little remaining tax authority left with the States, trying to take on these new responsibilities by preempting the States.

But enough said on that.

Mr. HOLLINGS. Mr. President, with regard to the amendment by the Senator from Oregon relative to the tobacco price support program, of course the rationale relative to cancer and advertising and everything else as that, were the Senator's amendment to be adopted immediately and unanimously there would not be one less cigarette smoked or one less case of cancer experienced. I am convinced of that. Anyone who has looked at the problem is convinced of it.

The price support program has nothing to do with increasing production or increasing cancer. We found tobacco when we first came here tens of years ago. The Indians were smoking it, and we are trying to sort of maintain its production and the livelihood it provides to thousands of Americans and their families.

We did not like the way people were getting liquor at one time, so Congress passed the Volstead Act and thought we could control it, but that did not work. It was a miserable failure. That did not stop people from drinking. And it undermined many of this Nation's institutions.

Just to stop the price support programs that go into the evils like sugar—we voted almost overwhelmingly a moment ago for a support program for sugar. That is a very terrible thing for diabetes and alcoholism. There is all the rye, the corn, and the barley support programs, and we go right ahead.

We should be commonsensible enough and mature enough at this particular point to realize there is no connection between the social practices and the actual diseases and ailments that are caused thereby.

The fact of the matter is if we could prove it, we would feel very good about it.

Hubie Blake, the noted and very gifted performer, the other day at 96 years of age fell out of bed and broke his hip, and they lifted him back up and put him in bed, and he reached for and lit up a cigarette and puffed away. He has been smoking since 8 years of age.

I hope I last to 96 like old Hubie so I can fall out of bed and break my hip and light up another one.

But I cannot control that, and we do have these small family farms over 276,000, with an average of 3 acres of tobacco. Senators have heard it and all, ad infinitum, the different statistical material. The facts are compeling and very persuasive.

What the Senator is going to break are the small family farms and the agribusiness. Six big companies will go in there and take over. This amendment is going to destroy the very valuable and beneficial tobacco export program, and we are going to get in all the stems and stalks and the cheaper tobaccos. There is political support for this particular commodity. We have a fine agricultural small family, and not rich family farms, in this particular program with around the average, as I say, of 3 acres. A family can provide for itself under this program. Termination of this program will seriously effect these farms and cause widespread economic problems not only to producers but to the small communities that dot the tobacco belt.

The amendment would destroy that $2 billion export program; it would destroy that family farm system by going after something under the emotion of cancer.

I have headed enough cancer drives, and the Senator from Oregon has headed enough cancer drives, and I have gone along with the Appropriations Committee to get it up to $1 billion in research. We have tried immunization, we have tried the singular approach, the general science approach, and I will try any approach you can think of to get some kind of cure for this dastardly disease.

But you are not helping yourself at all, and you are emotionally working people up on something that is fundamental to the economy and to the family life that was here long before this Nation was founded.

Again, Mr. President, we are confronted with an illogical and unwise attack on the tobacco price support program. The opponents of this program continue to erroneously label it as a subsidy for tobacco. We have debated the merits of this program many times in the Budget Committee and before the Senate. By now there should be a clear understanding of the program. Efforts to terminate it or seriously revise it are an indication that it is very misunderstood, and therefore, Mr. President, I would like to make some comments that will bring the tobacco price support program into focus.

The tobacco price support program, Mr. President, is the most effective and least expensive of all of our agriculture programs. I wish we had more of them. The program works very well and contributes much to the economies of many States and the Nation as well.

The attack on the program is based on a limited perspective that fails to recognize the very important contribution our tobacco producers make. I am confident, Mr. President, that the Senate will reject this attack handily, when the facts are presented and the case is made. Let me state that case and voice the concerns raised by this attack.

First, the long-term costs of the tobacco price support program are low since nearly all price support loans are repaid. Repaid with interest I might add. Based upon an administrative decision by the Secretary of Agriculture, the loan rate for the Commodity Credit Corporation (CCC) tobacco price support program was increased to 14.5 percent, April 1, 1981, and could be recalculated as high as 16.5 percent on October 1, 1981. Clearly, loans made at this rate cannot, cannot Mr. President, be called subsidies.

Since 1933, approximately $5 billion has been loaned under the tobacco price support program with a loss rate of only 1 percent, and CCC net realized losses due to the tobacco program are expected to average below $1 million per year for the next 5 years. A loss rate that I might emphasize, Mr. President, is the lowest of any major commodity. The tobacco program is successful, it works much better than the rest, but my colleagues inappropriately single it out for elimination or unwise and completely unnecessary revision.

At this point, Mr. President, I ask unanimous consent to include a table that further emphasizes the success of the tobacco price support program in comparison to all other commodity programs.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

NET BUDGET OUTLAYS 1970–80

[In millions of dollars; minus sign represents receipt]

| Year | Commodity | | | | | | |
|---|---|---|---|---|---|---|---|
| | Feed grains | Wheat | Rice | Wool and mohair | Dairy | Tobacco | Cotton |
| 1970 | 1,439.5 | 795.5 | 167.6 | 56.3 | 87.1 | 114.7 | 891.4 |
| 1971 | 1,069.3 | 467.6 | 41.6 | 75.4 | 217.5 | 68.6 | 603.2 |
| 1972 | 1,722.1 | 866.9 | 5.4 | 116.6 | 174.2 | −186.2 | 760.4 |
| 1973 | 1,215.9 | 73.0 | 21.6 | 74.0 | 116.6 | −162.9 | 824.0 |
| 1974 | 552.6 | 241.6 | 14.7 | 7.8 | 46.0 | −217.8 | 724.6 |
| 1975 | 200.3 | 21.7 | (1) | 18.9 | 424.4 | −129.2 | 232.8 |
| 1976 | 124.3 | 68.5 | 166.6 | 45.5 | 40.1 | 234.0 | 8.2 |
| 1977 | 659.2 | 1,899.3 | 144.6 | 10.4 | 469.1 | 160.9 | 104.3 |
| 1978 | 2,288.3 | 844.3 | −66.1 | 33.0 | 240.1 | 98.0 | 223.8 |
| 1979 | 1,143.8 | 308.4 | 49.5 | 39.4 | 23.8 | 157.3 | 141.2 |
| 1980 | 1,286.0 | 878.6 | −75.8 | 34.5 | 1,011.1 | −87.8 | 64.3 |
| Net total expenditure | 11,701.3 | 6,465.4 | 469.7 | 511.8 | 2,849.9 | 49.6 | 4,578.2 |

[1] Less than $50,000.

Mr. HOLLINGS. Based on U.S. Department of Agriculture statistics, the "Summary of Net Outlays, 1970–80, by Commodity" indicates that tobacco has cost far less than the other commodity programs. The cost for tobacco for this period is $49.6 million or 0.27 of 1 percent of the total for all commodities.

*Summary of net outlays, 1970–80, by commodity*

[In millions of dollars]

| | Total | Percent |
|---|---|---|
| Commodity: | | |
| Feed grains | 11,701.30 | 44 |
| Wheat | 6,465.40 | 24 |
| Cotton | 4,578.20 | 17 |
| Dairy | 2,849.90 | 11 |
| Wool and mohair | 511.80 | 2 |
| Rice | 470.00 | 2 |
| Tobacco | 49.60 | 0.27 |
| Total | 26,626.20 | *100 |

* Percentage totals slightly more than 100 due to rounding.

A second concern raised by this attack on the tobacco price support program, Mr. President, is the serious employment effects it would have if successful. Tobacco is by far the most labor intensive agricultural crop grown in the United States. Tobacco production uses about 250 hours of labor per harvested acre, compared to 21 hours for cotton and 3 hours for food and feed grains.

According to the Census of Agriculture, 50,000 tobacco farms reported employing an average 10 workers per farm, usually at harvest time. These seasonal workers have very few outside employment opportunities because of their low skill level, lack of proximity to urban employment, and the minimum wage requirements of off-farm work.

The production of tobacco, because of its labor intensity, offers many jobs to young people and makes a significant impact on the youth employment problem.

And, at this time of disgrace in high unemployment level among our young people, particularly blacks, it is truly ironic that some would terminate or greatly reduce the opportunity for young people in tobacco production or tobacco related jobs.

Mr. President, at this point I ask unanimous consent that an article printed in Parade Magazine entitled "Among America's Poor," that gives an excellent view of the life of a tobacco farmer be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AMONG AMERICA'S POOR

(NOTE.—Three years ago, a young economist at Stanford wrote a book entitled "Welfare" in which he declared: "The 'war on poverty' that began in 1964 has been won. The growth of jobs and income in the private economy, combined with an explosive increase in government spending for welfare and income transfer programs, has virtually eliminated poverty in the United States." Today, that young man—Martin Anderson—is President Reagon's principal adviser on domestic policy.

(Welfare statistics tell us one part of the present-day poverty picture. The nation is spending more for welfare than ever before in history. But what of the "poor" who are not a part of these dismal statistics?

(Parade asked John Ehrlichman—who held Anderson's job during the Nixon Administration and who himself later came to understand the sting of public embarrassment and extraordinary personal loss—to travel among America's poor, to discover the best qualities among those who seem to have the least. His odyssey took him to the homes of four families whose spirit believes the term "poor." Here is his account of his walk along the poverty line.)

THE PRICE FAMILY, BIG PINE, N.C.

To find Diane and Leonard Price, I drove far, far back into the Appalachian Mountains or North Carolina, across the French Broad River and up one of its tributaries called Big Pine—"not "Big Pine Creek" or "Big Pine Run," just Big Pine. It winds through the bottom of a lush and green hollow. Small frame houses and crossroads churches are separated by freshly plowed fields. In spite of a light rain, the people of this valley were in their fields, "setting out" tobacco seedlings in straight rows. It was the first week of the growing season.

At a small lumber mill, an angular woodsman pointed up a hillside to where the Prices were working in a field they sharecropped. When they came down the steep trail, Diane held an old brown coat over her head. The coat and the man's fedora hat she wore were soaked through, and she and her husband were streaked with the red mud of the field.

At first glance, Leonard Price looks short and thin, but after a few minutes of talk he reveals himself to be a man of great strength. Diane is a natural beauty. We drove up the valley together to a small house perched above the road and the Big Pine with a corn and vegetable garden out behind it.

Inside, we talked while they attended to their children: Christy, 7, Richie, 3, and Rebecca, 10 months. As they told me about their life—how it parallels the nine-month farming cycle that produces a crop of Burley tobacco—their children, their work, their two horses, such a joie de vivre illuminated their faces and animated their voices that I had to smile. I was in the presence of people who genuinely loved how they were living. In what sense are they "poor"?

All his life, Leonard Price has wanted to be a tobacco farmer. When he was 15, he traveled 20 miles every day to the high school in Marshall, N.C., the county seat. He grew his first tobacco crop on eight-tenths of an acre after school and on weekends. Nine months of hard work yielded enough money to buy his first car. Within a year, he had dropped out of high school to become a full-time farmer at 17.

When he turned 21, Leonard married Diana Roberts, 18, who was from across one of the Appalachian mountains. Diana—most folks call her Diane—dropped out of school in the 10th grade to marry Leonard and help him farm.

Leonard works one day a week in the stockyards in Asheville. He had tried a full-time job for wages, "but I just didn't like a boss-man over my head," he says.

Leonard and Diane have never had enough money to buy farm land, but around Big Pine a person can rent land "on shares." The Prices buy their own seed, fertilizer and pesticides, then plant, grow, harvest and cure the tobacco. They pay the landowner a third of the money they receive for their crop. In their best year, farming four fields, they grossed about $8,000—a sum that included Leonard's wages from the stockyards.

Like other Burley tobacco growers in Appalachia, the Prices have gone through two years of partial crop failure—the result of a blight—when their yearly gross income fell to about $5500. Several years ago, they tried to grow tomatoes, but that crop was blighted, too, and they lost their modest savings.

Diane miscarried twice, early in their marriage. Several years ago, the Prices opened their arms to foster children who needed a home. "I heard about those kids who had been throwed down by their parents," Diane says, "any that really hurt me."

The first foster child was a 12-year-old boy who was soon returned to his mother. "That hurt, too, when he left," Diane recalls, "but pretty soon the social worker sent us a little baby boy and his big sister—Richie and Christy—and it's been good ever since."

Last year, the Prices decided to adopt Richie and Christy. Soon after that, Diane had a successful pregnancy, and Rebecca was born.

Now the Prices subsist on about half the annual income designated by the government as "poverty" for a family of five ($9830).

Not long ago, Leonard bought a mobile home—$500 down—to house his growing family. He added on a storeroom in which to keep the vegetables and fruit he grew with his father. Both Leonard and Diane have kinfolk who live in the valley.

But one cold night last January, the Prices lost everything they had. A fire destroyed their home and the material accumulation of seven years of marriage—clothes, the children's toys, all of Diane's preserves

and canning—everything except three pieces of furniture.

Yet even as they stood with their children in the freezing night watching their home burn, their family and neighbors brought coats, boots and blankets. The next day, a neighbor went door-to-door up and down the valley collecting food. No one in the hollow has much, "but when one has a problem, everyone helps," Diane told me. When she was pregnant and dared not work in the fields, neighbors took her place helping Leonard. After the fire, a neighbor offered them a small house rent-free. A cousin brought them a wood stove. Others brought clothes, utensils and bedding.

Leonard hopes to have a good Burley crop this year. He's treated the fields with expensive pesticides to avoid blight. He manages the family money with a firm hand and intends to save enough to make a down payment on some land. Perhaps he can get some help from the Farm Home Administration—depending on what the federal government appropriates for loans to people like the Prices.

"When the fire wiped you out, did you ask the county for welfare or other help?" I asked.

"No, sir," Leonard said, "I think that kind of thing is meant for people who can't work. We could still work."

Diane manages to feed her husband and three children on less than $40 a week. On "grocery day," she takes the children to town for a treat, but she and Leonard seldom go to a restaurant. "That kind of thing doesn't make any difference to me," she says. "We have a horse we bought after we were married. Three years later, we got another. For fun, we'd rather go riding of an evening."

What do Leonard and Diane Price want for the future?

"I'd like for the kids to go to college, but already Richie says he wants to be a farmer like Leonard," Diane says.

"I want them to pick what they'll do," Leonard adds,

"It doesn't really matter," Diane says. "I grew up real poor, but I've been real happy. Being poor is a frame of mind, you know."

Some day, Leonard would like to own five or six horses, a few head of cattle and a farm of about 100 acres.

Diane has an unfulfilled desire, too. She gets serious when she talks about it. Her dark eyes widen. "I've always wanted to see the ocean," she says.

THE CERVANTES FAMILY WATSONVILLE, CALIF.

"I'm too old," Lorenzo Cervantes said to me solemnly, looking down at the floor. He is 66 years old—a tall, shambling, broad-shouldered man with the gnarled hands of a ranch worker. He had lived his whole life out of doors, working in apple orchards, but now they tell him he's too old to work full time. He spends most of his time in the small house he rents for his family in downtown Watsonville in northern California.

The house is spotless. When I was there, Lorenzo was repainting the kitchen and dining room. He and his wife, Guadalupe, have worked hard on their home, and he was proud of their accomplishment. He showed me the rooms his wife had fixed up for their young boys, Hector, 7, and Homero, 3.

The ranching years were good for Lorenzo. "But my shoulder and leg are hurt," he says, "and I can't work on the apples like I used to. I worked on one ranch for 26 years, but now I only work part-time for the California Fruit Company."

"He worked too hard all those years," Guadalupe adds. Lorenzo shrugged. When a man comes to the United States from Mexico, he expects to work hard.

Lorenzo first came to Watsonville as a bracero (a legally admitted contract worker) in 1945. The youngest in a family of 14 children, he had followed an older brother to the lush farms and ranches around Monterey, south of San Francisco, to work the lettuce and apples. When the bracero program ended in 1964, Lorenzo, at 49, went back to Mexico then came back illegally for six years. Finally, he was able to obtain a visa.

Illegal and legal, he worked on the same ranch for 26 years, tending the apple trees, foreman of as many as 40 other workers. In a good year, he could send as much as $2000 to his elderly parents in Mexico. As the youngest child, it was his duty to remain unmarried and support his mother and father until they died. At their deaths, his father was 90, his mother 96—and Lorenzo was 56.

He returned to the family village in Mexico to find a wife. There he courted Guadalupe, the daughter of a well-to-do farmer. She was 16 years younger than Lorenzo, but he persuaded her to emigrate with him to the United States.

Guadalupe was no provincial farm girl. She had attended schools in Mexico City and had won prizes for her stylized floral arrangements and dried flower displays. She is a handsome, smiling woman and a hard-working homemaker. "I married her twice," Lorenzo says proudly, "in the village, for the Church, and here, for the law."

Lorenzo and Guadalupe settled into his cabin on the ranch where he had worked since his bracero days. But in 1974—the year his first son, Hector, was born—Lorenzo Cervantes, at 59, found himself replaced by a younger foreman. Lorenzo concedes that his injuries had slowed him down some, but it was nevertheless a cruel realization that his old employer considered him unable to do his job. Lorenzo's pride would not permit him to stay on the ranch doing menial part-time work. So the Cervantes moved to town.

Guadalupe made floral arrangements to sell, and for three years she took care of other people's children to augment what Lorenzo earned in part-time ranch work. When their second son, Homero, was born, it was clear that Lorenzo's income would never be enough to support his family. He want to La Coalicion, a Hispanic community action agency, where they helped him to apply for Social Security. Soon he began receiving monthly checks for each member of his family. They total about $8000 a year—$500 below the government's poverty line for a family of four.

"It's not enough money for living," Lorenzo says. "Heat and light keep going up. To eat and pay the rent I have to work when I can, and so does the wife."

Just this spring, Guadalupe Cervantes finally found a job as a guaderia—a teacher's aide—in a day-care center. She earns $4 an hour helping a teacher to supervise 50 Spanish-speaking children from 11 a.m. to 7 p.m. "I work for the future for my sons," she says. "They will not be farmers. Maybe a doctor or a lawyer."

Lorenzo shakes his head. "Fathers and mothers can't choose what the children will be. But I am not worried so much about their futures. They will have easier jobs than me."

The Cervantes grow much of their food in a vegetable garden behind their house. They are saving money in every way they can to raise $600 for their eldest son's annual tuition at a parochial school. "The public school where he goes now is 99 percent Mexican, you see," Guadalupe says. "I want Hector to learn to speak good English."

Guadalupe will sell her floral arrangements and work in the day-care center. Lorenzo will work all he can in the orchards. "We pay our bills," he says. "We pay some of them ahead. We have a little saved. Hector will take his entrance examination soon. It will be done."

THE JENKINS FAMILY, HOTEVILLA, ARIZONA

The people of the Hopi tribe live on three mesas—great stone formations that rise steeply from the Arizona desert. The average per capita income of the Hopi—less than $2000 a year—is far below the poverty line. From 30 to nearly 50 percent of the Hopi who live on their reservation are unemployed and heavily dependent on federal largesse.

Marshall and Polly Jenkins live on Third Mesa, in the village of Hotevilla. They are better off than the average Hopi, although Marshall's disability pension and sporadic Social Security payments total substantially less than $600 a month.

Marshall—whose Hopi name means Rain Walking Across the Earth—is a short, grizzled man whose robust appearance masks the injury and illness he's suffered in the past 20 years. He believes he is 62 or 63 years old; his wife is 60. Though he limps, he does not advertise his infirmities. His nature is a mixture of the stoic Hopi way and a fundamental Christianity he learned from his mother and from the Mennonite missionaries who have been active on the Hopi reservation for years.

World War II took young Marshall off the reservation and the Army taught him that he could hold his own with the white man: "The 'outside' was opened up to me. White people were just like me! I got over the fear of white men."

After the war the GI Bill afforded Marshall a chance to learn heavy equipment operation. As a Veterans Administration trainee, he worked on a bulldozer for several years, building roads on the reservation and eventually landed a civil service job "outside," at a Flagstaff, Ariz., ordnance depot. He moved his family away from the reservation and soon won recognition as a valued employee. He began to contemplate working for a contractor—private-sector wages were better than civil service pay—but in 1958, before he could make his move, Marshall suffered a back injury and was retired on a $140-a-month pension.

During the years as a trainee and at Flagstaff, Marshall and Polly had put their extra money into building a house on tribal land in Hotevilla. That home, the pension and a car were their only major assets when they returned to the reservation. Marshall's two young sons helped him prepare a dry farm plot below the mesa to grow corn and beans.

Government doctors took a spinal tap and warned Marshall that a back operation might permanently paralyze him. That diagnostic tap has been the source of much of his subsequent illness, he says. "I could hardly walk, even with a cane," he recalls. "The nerves in my head bothered me. But I decided I would work my way out of the sickness."

Subsistence farming was his rehabilitation. Marshall believes, and it was a good thing for his sons too: "Today, young Hopi men don't take responsibility. They are in transition to the white man's way—only money is on their minds. Parents don't train their young boys. Why are Indians in poverty? Because it takes a punishing, learning experience for a young man to decide to fight this poverty and go ahead."

But his back still bothered him. "I wanted to challenge this ailment," Marshall says, so he became a sheepherder, walking after Polly's family flock. 'I did it so my legs would get stronger."

In 1968, Marshall felt he was well enough "for a new experience" as a school bus driver for the Hotevilla Head Start program. "Being a shepherd was preparation for caring for little children." Marshall says with a smile. "The sheep were always going astray. I soon learned that a shepherd can't be mean to his sheep: they respond to tender care."

Marshall showed me an engraved plaque the school awarded him when severe diabetes forced him to retire for good after six years with the children.

Like most Indians, Marshall Jenkins has had his troubles with the United States government over the years. The Civil Service Commission held up his small pension for a while because someone suspected he hadn't really hurt his back on the job at the depot,

and a small veteran's pension was revoked. His problems with Social Security remain unresolved.

Meanwhile, the civil service pension has increased somewhat. "It hasn't kept up with inflation," Marshall is certain, "but I have a partner—my wife—who is very wise. She doesn't spend money unless it is necessary. So our income is enough, whatever it is. We farm beans and corn, and that stretches our money."

Both their daughters are registered nurses, and one son is assistant director of the Hopi Health Department. Their other son is an executive with Hughes Aircraft Company. "Their mother talked to them when they were young," Marshall says. "She said: 'You can sit here and loaf, or you can become educated and be something. You choose.'"

Polly and Marshall are sustained by deeply rooted values. "My beliefs are the structure of my life," says Marshall, "the Hopi way and my belief in God. In Hopi we say tak-an-a-way." A man's heart can endure anything.' Now we are facing hard times here. The government is slashing fundings for the reservations. I know there is no use just sitting around here. The Hopi must get out and compete. I proved that an Indian can be just as capable as the next person. That recognition ignites something in you. You say: 'I'm as good as anyone else.' It's up to the individual then. You have it inside."

THE THOMPSON FAMILY, CHICAGO, ILLINOIS

About 150 blocks south of the Chicago Loop, the Dixie Highway cuts through the suburb of Harvey, Ill. As I crossed that busy street, a gang of young black people were gathered around a large cassette player in an empty parking lot, dipping and turning to the music.

The kids were a lively contrast to the vacant and boarded buildings behind them. A faded sign says "Dixie Center," recalling a shopping center that once boasted 20 or 30 businesses. Grass grows along the curbs and in front of the deteriorating facades. A Ford dealership across the highway is boarded up. "Too much vandalism and not enough business," my cabdriver explained.

Not far away is a block of shabby, brick-faced, two-story apartments. Patricia Thompson lives here with her two children, upstairs at the back. Mrs. Thompson, 29, is an intelligent and outspoken woman typical of the "working poor"—those who prefer work to welfare but don't make enough money to break through the government's poverty line. Patricia moved to this apartment because the rent is only $180 a month.

When your take-home pay is $580 a month, $180 for rent is 31 percent of your income. Add another $40 a week for food and $25 weekly for day-care for your two kids, and 76 percent of your paycheck is gone before you can even begin to think about the cost of utilities, medical care, clothes or other demands of urban life.

Technically, Patricia Thompson makes $61 a month too much to be classified as "poor" by the U.S. Department of Labor, but that technicality is very little solace. She works long hours in the accounting department of a bank—sometimes nine or 10 hours a day—to support her daughter Kenya, 7, and son Robert, 4.

Life has changed dramatically for Patricia since she was divorced last year. Her ex-husband—a man "who believes that when a marriage is over, it is over"—has refused to support his children, she says, in spite of a court order requiring him to provide $50 a week. "I'm bitter about that," she admits, "and I'm unhappy with lawyers and courts. My ex-husband makes good money as a machinist. He should help with the kids." But legal matters move slowly in and around Chicago, the lawyers tell Patricia. Meanwhile, she feels she has no choice but to work hard and "make do."

"My stepmother raised us—my brother and sister and me—to be independent," Patricia says. "The welfare would pay me more if I 'went on aid,' but I couldn't sit around all day watching soap operas on TV. That would slow me down so I wouldn't ever be good for anything again. I've had some education and some experience, so I'm out there to work."

Patricia was raised on the near-west side of Chicago in a racially mixed area. "I always wanted to better myself, so after junior college I worked for a while, then took courses at Illinois Medical Center. I was going to be a medical technician."

Then Kenya was born, and Patricia became a full-time homemaker. When her marriage failed, she found the accounting job at the bank, located daycare for Robert and went to work again. On her bank salary ($650 a month, gross), Patricia no longer could afford to operate an automobile. In addition, rents were too high in the mostly white neighborhood where the Thompsons had been living. Their present apartment is in the all-black part of Harvey, where the schools are also all-black.

"Kenya's new school is not the best, and it's not the worst," Patricia says. "She's doing pretty well, but she never brings homework. That worries me. I'd love to be able to put her in private school—that's my goal—but for now I'd like to get her back in a school that's about half-black and half-white. It affects the quality of the education when a school is predominantly black, you know. Kenya was learning more in the other school."

Patricia is determined to make it on her own, but she finds one federal aid program irresistible. "There is that [HUD] Section Eight rent subsidy that will pay half my rent," she says with animation, "and that would mean we could move into a house with a yard in a different neighborhood near the other school. I would do that. I would do anything to make life better for my children."

Patricia wondered if the Reagan Administration would cut out the rent-subsidy program: "I don't want to badmouth Reagan, but it's not good to cut some of those federal programs. There are a lot of people worse off than me who can't work or can't afford a babysitter. Poverty is the biggest problem we've got in this country today, I think. There are a lot of very poor people. I know plenty of them. I agree that everyone who can should work, but you've got to have enough jobs, and the job has to pay enough for a person to live. The government should help with that."

Patricia's take-home pay has not kept up with inflation. "I know I'm falling behind every month now," she says. "I shop for all the special sales, but even so, I have to rob Peter to pay Paul. I pay all my bills, but every month it's close. I have no charge accounts—I pay cash."

She believes life will be harder for her children than it has been for her, so she is determined to raise them in a good neighborhood with good schools. "The suburbs are best for them," she says. "I personally prefer the bright lights and the big city, but there are fewer riff-raff kids in the suburbs."

She'd like her daughter and son to be professional people, but "whatever makes them happy" will be all right with her. "I believe a person should be happy at her job," she says.

Patricia Thompson clearly feels the effects of long workdays, long evenings caring for her children and weekends spent doing housekeeping chores. But she has a determination, a street-tough drive that makes you believe that she and her kids are going to be all right.

"Things will get better," she says. "I know." She nods toward Robert, who has fallen asleep beside her. "There are these little kids, you see. Their lives are in my hands."

Mr. HOLLINGS. Third, tobacco production is stabilized through the price support program. This aspect of the program enhances U.S. tobacco exports by increasing the reliability of U.S. supplies.

Approximately $2.1 billion worth of tobacco products will be exported in fiscal year 1981. This ranks tobacco fifth among our agricultural exports, Mr. President.

Needless to say this has a tremendous and very beneficial impact on our balance of payments. These exports strengthen the value of the dollar abroad and fight inflation at home by reducing prices on imported products.

Fourth, Mr. President, termination or revision of the tobacco price support program would be particularly detrimental to small-scale family farms. Tobacco growers represent 276,000 farm families in 22 States who depend totally or in part upon tobacco for their livelihood. The average productive tobacco acreage per farm is only 3 acres. Tobacco is unique in that it allows small family farms to support themselves. It preserves the family farm. But, Mr. President, those who attack the program would call an end to this.

Fifth, smokers more than pay for the cost of the tobacco support program. The USDA program is estimated to cost about $200 million in fiscal year 1981—less than one penny for each pack of cigarettes sold.

Also, the Federal excise tax on cigarettes which is 8 cents per pack amounts to about $2.6 billion in revenue per year. State and local taxes in turn generate about $3.5 billion annually while other tax revenues, such as corporate income tax, account for an additional $3 billion.

Total estimated revenue for tax collections from the tobacco industry, therefore Mr. President, is in the vicinity of $9 billion annually. The tobacco program is the basis for this revenue base. The tobacco program is economically sound and a significant money maker that I, for one, Mr. President, wish we had a few more of around here.

With a few more contributors to our economic system along the lines of tobacco we would not have the economic problems that presently exist in our Nation. Success such as this should be promoted, not destroyed.

Finally, let me point out as strongly as I can, Mr. President, despite the critic's contention the tobacco price support program is a subsidy; it is nothing of the kind. Usually there is no expense with the support program and generally the program generates revenues for the Treasury.

I have placed in the RECORD a table which supports my contentions. It is interesting to point out, Mr. President, that in 5 out of the 11 years indicated on the chart tobacco returned money to the U.S. Treasury. That draws attention to the fact that by and large the program pays for itself.

The tobacco price support program does not encourage increased tobacco production or smoking. The program in-

sures orderly marketing and stabilizes tobacco production. It is a sound and strong contributor to the Nation's economy, Mr. President, and for the reasons I have outlined I urge that the attempts to terminate or revise the tobacco price support program be defeated.

In conclusion, Mr. President, since there seems to be so much confusion and false information about how the tobacco price support program works, I ask unanimous consent, Mr. President, to insert in the RECORD an article appearing in The Greensboro Record, Monday, February 23, 1981. It makes a clear and cogent statement on the workings of the program and the events expressed could apply to any portion of the tobacco belt.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Greensboro (S.C.) Record, Feb. 23, 1981]

TOBACCO RESALE SUPPORTS PROGRAM

(By Jim Schlosser)

With eyebrows lifted, network TV commentators told the nation last week that President Ronald Reagan had slashed price supports to dairy farmers but was leaving tobacco price supports untouched.

What the newsmen failed to point out was that there's nothing to cut from the tobacco price support program. The millions the government spends on the program each year—last year's amount was $182 million—are recouped through the eventual resale of surplus tobacco purchased from the farmers.

Every year since 1961, the program has either made a profit for the federal government or broken even, according to Fred Bond, executive director of the Raleigh-based Flue-Cured Tobacco Cooperative Stabilization Corp. It administers the program in five Southern states.

More than 3,000 farmers in Guilford County operate under the program.

Each year, a tobacco farmer hauls his harvest to a privately owned tobacco warehouse, such as the one on Old Burlington Road in Greensboro. There, buyers from the big tobacco companies—such as Reynolds, Lorillard, Phillip Morris, American—move along the rows of stacked leaf and give their bids to a fast-talking auctioneer.

When the farmer enters the warehouse he knows he is going to get a minimum price for his crop—the government guarantees it. Last year's average minimum was $1.41 cents a pound.

But the private buyers usually bid more than the minimum and the farmer returns home with a nice check.

However, if the private companies are not interested in the farmer's tobacco—perhaps the quality is not up to par—the government will step in and buy the leaf and store in warehouses like one in Fuquay-Varina.

Tobacco quality usually improves with age. After a stay in the warehouse, the government-bought tobacco is put back on the market. And this time, private companies usually buy it, often for prices higher than what the government paid for it.

From the sale proceeds, the government deducts administrative and storage costs. If any money is left over, it goes to the farmer from whom the tobacco was purchased in the first place.

"Many times a tobacco farmer ends up getting an extra check he didn't expect," says Max Sockwell of Greensboro, executive director of the Department of Agriculture's Stabilization and Conservation office here. The office administers the price support program locally.

Despite the program's profit through the years, Sockwell was worried whether the program would survive Reagan's war on federal programs.

"We had been a little concerned because of the unpopularity of tobacco in Washington," said Sockwell, referring to some representatives and Senators who argue that the government should not encourage the growing of a commodity that may cause cancer.

But the program may not be out of jeopardy. Budget Director David Stockman said Sunday that the program is still subject to review. However, Secretary of Agriculture John Block was quoted Friday as saying he favors a hands off approach to tobacco. Max Sockwell says the Reagan administration may have concluded that if the price support program were eliminated the result might be more tobacco on the market, not less. He explained that one of the main purposes of the program is to control leaf production. Before 1933, farmers were flooding the market with tobacco. Companies weren't buying it all; consequently, some farmers were losing money. It was that year the government came up with the idea of a price support program to help make supply equal demand.

The government promised farmers a minimum price for their crop if they would agree to limit annual production. Each farmer was assigned an acreage allotment.

The program was not shoved down the farmers' throats. They went to polls set up at country stores and other rural locations and voted to accept it. But the program was not an instant success, and in 1939 farmers voted to abolish it. Within a year, the market was overwhelmed with tobacco. Farmers suffered heavy losses. They then promptly voted the program back in, and have done so in elections held every three years since then. The next vote is scheduled in December 1982.

According to Fred Bond of the Flue Cured Tobacco Cooperative Stabilization Corp., in Raleigh, the program lost millions during the 1950s, but has been in the black for the past 20 years.

Sockwell says the market would be chaotic without the price support program, and would force some small farmers out of business. "This would really cost the government money because a lot of the tobacco farmers would be forced to go on welfare and receive food stamps."

Otis Green, who raises 150 acres of tobacco on his farm in the Brown Summit-Monticello area, said, "I couldn't survive without the price support program. The cost of producing tobacco is so high. I borrow $150,000 to $200,000 each year to get the crop going. Without the price support system we just wouldn't have the guarantee that we need before we can make such an investment."

He estimates that 95 percent of his crop usually is purchased by tobacco companies, with the rest bought by the government. The year before last he received an unexpected check for $1,500 from the co-op—profits from the resale of the small amount of his crop the government had purchased the year before.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. HOLLINGS. I will be happy to yield to the distinguished Senator from Arizona.

Mr. GOLDWATER. I want to speak for just a moment in support of the arguments my friend has been making.

I have listened to the arguments made by the distinguished Senator from Oregon, and I find myself in complete sympathy with him.

I have never smoked in my life. I nearly lost my wife from smoking. I have lost many friends from smoking, but I never considered myself a Carrie Nation as against the tobacco industry.

People have been smoking as long as men have been around, and women, too, and I agree with my friend from South Carolina that no matter what we do people will continue to smoke. They will grow the little patch out in the backyard and roll it up and smoke it.

I lived through prohibition, which was a wonderful idea, but that generation turned out more drunks than any generation in the history of the United States. Unfortunately, that was my generation.

I would hate to see the same efforts being made against the liquid we drink that cheers us up and saddens us and makes the world a worthy place to live in.

I am afraid it might succeed, and once again we will have to go back to the old days of the 1920's and 1930's.

So while I have, frankly, no use for tobacco, I think it is dangerous, I think the people of the United States know it is dangerous, and so is liquor, so is marihuana, but you are not going to stop people from doing what they want to do merely by passing laws.

So I am going to stick with my tobacco-growing friends even though I have a personal dislike for the practice. I have a regard for the great industry this has established in the South, an industry that I do not think has ever done a really good job in promoting or telling the American people how much it amounts to. So you can count on me.

Mr. HOLLINGS. The distinguished Senator from Arizona is so right.

I will conclude by saying that moneywise, budgetwise, this program is a very big winner where we have garnered some $9 billion annually at various governmental levels. It has only been a net cost to the Federal Government, from 1970 to 1980 for example, of $49 million, less than $5 million a year. Governments, municipalities, States, all levels of government rely upon taxes on tobacco products for essential revenues. New York City has a particularly high tax that contributes much to its revenue base. A tax base that will need much expansion, in every State, city, town, et cetera, with our Nation's newly enacted tax policies.

But, be that as it may, let us not talk about the tobacco price support program as an economic cost to Government. This Government is the biggest economic winner, and tobacco more than pays its way.

Mr. GORTON. Mr. President, will the Senator yield?

Mr. HOLLINGS. Yes.

Mr. GORTON. In just a moment the Senator from South Carolina wishes to speak on my amendment. I cannot remain on the floor. I ask unanimous consent after the remarks of the Senator from South Carolina (Mr. THURMOND) that the Senator from North Carolina be allowed to withdraw my amendment for me.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Is there objection? The Chair hears none, and it is so ordered.

Mr. HOLLINGS. I am glad to yield to the Senator from Oregon.

Mr. HATFIELD. Mr. President, I would be glad to clarify the record for

my good friend from South Carolina and my good friend from Arizona, because I think if they had listened very carefully to my remarks, I was very specific. I was in no way trying to diminish smoking by this amendment. That is not the intent of my amendment. I do not compare it to the Volstead Act, and I was against the Volstead Act, because I agree that you cannot legislate people's habits in this particular way.

This was simply an amendment in which I said we ought to be more consistent in our fiscal policy. We are spending over $13 billion of the taxpayers' money a year on an educational program to try to get people to stop smoking, while, at the same time, since the enactment of this act we have subsidized—and the word is "subsidized"—over $600 million of taxpayers' money in the matter of the difference paid for the money loaned to these people in this act.

So all I am saying is let us get out of the business of doing two things that are mutually contradictory, supporting a crop we are trying to get people through an educational program to stop using.

So it is not a question of whether we are going to regulate people's habits. It is purely a question of trying to get on to a logical budgetary position. That is the only purpose of the amendment.

Mr. HOLLINGS. I yield the floor.

Several Senators addressed the Chair.

Mr. FORD. Mr. President, I thank the Chair for the opportunity to take a moment. I do this with the deepest respect for my distinguished friend from the State of Oregon, but I want to bring a couple of points here to the attention of my colleagues. Most of them have been made, and I will not belabor the points because of the lateness of the hour.

Much has been said here about habits, passing legislation to prevent the smoking of cigarettes. If that is the intent of the distinguished Senator from Oregon to get out of the business, let me just say this to him: If the Senator's amendment is agreed to, it would be my judgment and the judgment of those from other tobacco States that the price of equipment will not come down, labor costs will not come down, the cost of fertilizers and so forth that are necessary to raise this crop will not be reduced. But the price of that product will.

So it behooves then that smaller farmer, if he can, to double up and raise more tobacco in order to reach that financial level or plateau to continue to pay for the machinery and labor within this industry. That creates a reduction in price, and the price of cigarettes is going to decline. When the price of cigarettes declines, you have got additional people buying cigarettes.

Today you have a decline in the number of smokers. That is a fact. If your associations that are supporting your position will look at the fact, I think they will substantiate that. So, in essence, in your amendment, if it passes, you will be flying in the face of what those associations that are supporting your position want to do. That is a fact. I do not believe that can be refuted.

We talk about freedom of choice, and the marketplace itself in the tobacco industry is adjusting to the desires of the marketplace. You can get anything you want today as it relates to low-tar nicotine to the harsh ones. The amendment that will be withdrawn in a few moments on taxes is based on length of cigarettes, weight of cigarettes, preemption of States getting back into the tobacco industry.

So what we are finding here now is that it does not make any difference if you have a low-tar and low-nicotine cigarette, you still want to tax it based on length; where it is short it is $3, where it is long, $4 per 100 cigarettes. So we get into the marketplace now offering what you want, and it gives you the freedom of choice.

I was amazed to remember—and I am getting a little older and my memory is not as good—but the distinguished Senator from South Carolina (Mr. HOLLINGS) was making a statement 2 or 3 years ago about what these folks are trying to do to the poor folks in this country. He said:

> Why, the rich folks have yachts and they can go out and remove the cares of the day. Why, they can have psychiatrists because they can afford to hire them or go visit one, lay on their couches because they have the money to do it. But the only thing the poor folks have are cigarettes and a rocking chair, and now they are trying to take the cigarettes away from them.

And I just do not believe that is the intent here.

Mr. President, if the amendment of the distinguished Senator from Oregon is approved by this body and ultimately becomes law, the State of Kentucky's economy would be demolished. You will be creating 105,000 farm families that will not have cash income that they now have—think about that—under a program that over the last 40 years has produced $100 billion in taxes at a cost of $57 million to the Federal Government. Now that is a figure that is going to be hard to refute because it is there and I have got it.

Now, there is a smoking problem. We are trying to answer that question in our own way without asking the Federal Government to do a thing, Kentucky.

We have taxed every pack of cigarettes sold in Kentucky and all that money goes into research. We are trying to answer all the problems. We are not asking the Federal Government to give us a handout. We are trying to solve it ourselves in our own way. And that is an industry; it is a way of life.

I want to show you what a way of life means, where sons come back and take their vacation. It was in the Sunday paper in my State. They take their vacations and come back and help dad harvest his crop. It is a way of life. It is all they have. It is a family. And so here it is, a small family coming together to harvest a crop, to have those things you and I have without raising tobacco. And I think that is important.

If you read the Washington magazine in the Washington Post this last Sunday and you read the stories on poverty, there is a family by the name of Price in there. They could not have children and went out and adopted two children. A family of four, they are $1,900 under the poverty level.

Do you know that man's source of income? Raising tobacco and one day in town working. And tobacco provides him with a living and keeps him off the dole of the Federal Government, hoping to lay aside some of that money to buy land in order that he might have something for himself. And tobacco is bringing him out of the poverty area.

More people, as Senator HUDDLESTON said, and young people in my State have gone to school because of tobacco than any other program, anything else. And if you read the hearings that I sent to you and you read on page 152 the statement there by a young college student that said if it had not been for tobacco he would not be at Western Kentucky University, he would not be there getting an education because his dad gave him a share of the allotment of tobacco on the farm and he was able to work through the season, a 13-month job, but he was able, because he had tobacco, to go to school.

What we are trying to do here is continue a system, continue a system that has been extremely good.

We are now in the other areas of research in tobacco. Fraction one, it is coming on. It is over at the University of Maryland. Protein is going to come from tobacco. It will be an important product.

Maybe one of these days you will find out that we want to raise more of it than less. And at that day, maybe we will have other ideas and we will have an ability to change because you let the farmer decide for himself what is in the best interest of the farming community rather than for us to come up here and pass laws and wipe him out. And that is exactly what is going to happen.

So I just say to the distinguished Senator and my distinguished colleagues, if you want to devastate the small farmer in 22 States, then I think you ought to vote for the amendment of the Senator from Oregon. But if you want to save that farm family, that small farm family, then you ought to oppose the amendment and let us save that 4 percent.

Just to give you an example: Does anybody in here believe tobacco is grown in Wisconsin? Think about that a minute. Twenty-five million pounds and about $35 million went to the State of Wisconsin last year. And in the State of Oregon, almost 3 percent of the total employment in the State of Oregon is a direct result of tobacco. Think about it.

Here we are saying to an industry that has developed from hard work and sweat, that has been a way of life, that we want to eliminate it. I just think that it is wrong. It is wrong for the people, and it is wrong for us to say to them that you no longer can be a family; no longer will your sons need to take a vacation in August or early September to come home and help dad harvest his crop, to help him make a living; no longer will the Price family living in poverty be able to have an opportunity through tobacco to make a living, and to pull themselves up to have those better things of life with two children they have adopted and to give them a life.

Mr. LONG. Will the Senator yield?

Mr. FORD. Yes, sir.

Mr. LONG. May I say to the Senator I personally quit smoking and I voted to say that you could not advertise cigarettes on television when I had the opportunity to do that and that is the law today. But as long as Americans are going to smoke, I do not see why people in Kentucky should not have the opportunity to produce some tobacco.

And it seems to me, I say to the Senator, that farmers are farmers. I do not want a farmer to lose everything he has in life in Kentucky just like I do not want to see one in Louisiana lose his station in life. And as long as people are going to smoke cigarettes—and they do whether you advertise it or you do not advertise it—it seems to me we ought to wish that all farmers would do well in this country. And if they are going to smoke it, why should not our farmers produce it rather than somebody else's farmers?

Mr. FORD. I thank the Senator for his remarks. And I make the point that it is a stable program. It is attempting to make adjustments in the marketplace. It is giving the individual, if he wants to smoke, a choice, giving that choice without bootlegging and going behind the barn and smoking, that sort of thing. And it does give the small farmer an opportunity.

I just hope that my colleagues will give us the opportunity to continue. And when people like Kentuckians are willing to say here—I think somewhere around $5 million to $6 million a year the State is putting into research as it relates to tobacco—that we are doing things that are necessary, to leave the program alone is in the best interest not only of the farming community but I think of the country as it relates to taxes.

Let me say this: If we continue on the route we are going, we are going to find in a very short period of time that we have devastated and demolished the farm program in the country. There is only 4 percent of those people out there feeding all Americans and most of the world. If we are going to make it harsh and hard on them, then we are not representing the people properly.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the distinguished President pro tempore of the Senate has informed me that he does not desire to speak on the pending amendment, that is to say the Gorton amendment. In view of that, pursuant to the unanimous-consent request agreed to, I withdraw the Gorton amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. HELMS. I yield to the distinguished Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise today in opposition to the amendment offered by Senator HATFIELD, which purports to abolish the Federal tobacco price support program. I firmly oppose any amendment that would eliminate or restrict this program, which has been a model of cost effectiveness and which has brought about economic stability in the tobacco agricultural sector.

Mr. President, for those who are not familiar with the tobacco program, I believe it would be useful to briefly clarify the mechanics of this price support and stabilization program. Fundamentally, it is essential to understand that there is no tobacco "subsidy" in the sense this word is loosely and incorrectly employed. There is, instead, a Government program to stabilize tobacco prices and to control production of this crop.

The tobacco program limits the amount of tobacco grown domestically, and insures farmers a fair return on their investments. Under this program, when prices offered for a particular grade and lot of tobacco are below the support price level, the Commodity Credit Corporation (CCC) purchases the tobacco at the support price, and advances loans to farmers through their cooperative associations, with the tobacco as collateral. The cooperatives process and store the tobacco until it is sold, repaying the loans with interest. For the 1980 crop, the interest rate on the loans from the CCC was 11.5 percent.

A quick review of the history of the tobacco support program proves that it is the most successful of all farm commodity programs. Since its inception in 1933, the program has incurred a net cost of only $56.7 million to the American taxpayer. This amounts to 0.1 percent of the total cost for all 13 farm commodity price support programs.

On the other hand, revenues collected by the Federal Government from the tobacco industry are substantial. During the life of the program, about $130 billion—I repeat, $130 billion—has been collected by Federal and State governments in cigarette excise taxes alone.

In 1980, the Federal Government received more than $2.6 billion, while State treasuries collected $3.8 billion in revenues from tobacco sales.

These figures alone, however, do not adequately describe the importance of the tobacco industry in the U.S. economy. Some 1.6 million persons are employed in all phases of this industry, generating substantial corporate and personal income tax, social security, and other tax revenue.

Additionally, the tobacco industry has contributed favorably to our international balance of trade. In the past fiscal year, $2.4 billion of U.S. tobacco was exported, while only $487 million of foreign tobacco was imported, netting the United States nearly $2 billion in foreign exchange for 1980 alone.

Mr. President, it should be apparent that the elimination of this successful program could have harsh economic reverberations on the entire Nation at a time when we are trying to revive a sagging economy. In my home State of South Carolina, where tobacco is the leading money crop, loss of this program would be devastating.

In terms of net farm income, tobacco has, year in and year out, been the lifeblood of the economy in the Pee Dee region of my State. The tobacco industry includes over 6,000 farmers in South Carolina, many of whom operate very small, family-type tobacco farms. These are the people who would suffer the most due to the termination of the program.

With regard to the issue of tobacco price supports and health, the foes of the tobacco program often assert that it is contradictory and wrong for the Federal Government, on the one hand, to support a campaign against cigarette smoking, and at the same time, encourage tobacco production with a support program. The fallacy in this argument is that the tobacco support program does not encourage increased production of this commodity; rather, it limits production. To qualify for participation in the program, a grower must agree not to produce more than specific acreage and poundage allotments which he owns or leases. Since the production of this commodity is limited, the price for the end product, usually cigarettes, is probably higher than it would be in a market without such grower restrictions.

Thus, Mr. President, as logic indicates, doing away with the price support program might well lead to greater domestic tobacco production, albeit by many fewer farmers, and/or increased tobacco imports. The result would be cheaper cigarettes and a probable increase in cigarette consumption. Regardless of the relationship between the tobacco price support program and the amount of cigarette smoking, it is my firm belief that it is not the responsibility of the Federal Government to forcefully dictate personal habits to our citizens. We need only to review the dark days of alcohol prohibition to realize what a grave mistake Government intervention can be.

In summary, Mr. President, I hope my colleagues in the Senate will stand firmly behind the Flue-Cured tobacco program—a program which makes a vital contribution to the economic health of our economy; a program that enables approximately 276,000 farmers in at least 20 States, involved in tobacco production, to continue their chosen lifestyle on a family farm at virtually no cost to other taxpayers. For these reasons, this amendment should be defeated.

Mr. President, the South Carolina State House of Representatives recently passed a resolution concerning Federal legislation that would jeopardize the continued success of the tobacco price support program. This resolution is both timely and appropriate, considering the current Senate debate. In order to share it with my Senate colleagues, and other readers of the CONGRESSIONAL RECORD, I ask unanimous consent that a copy of this resolution be placed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, there is now pending in the Congress legislation sponsored by Senator Mark Hatfield of Oregon and Congressman Thomas Petri of Wisconsin aimed at the destruction of the historically successful and cost effective tobacco loan and acreage allotment programs, coupled with a substantial retail tax

on cigarettes and perhaps other tobacco products; and

Whereas, the purpose of the loan program is to stabilize the tobacco economy which has worked extremely well for forty years to insure adequate prices to enable farmers to stay in business and provide an adequate supply of tobacco in bad crop years for domestic and foreign markets; and

Whereas, the acreage allotment program has further contributed to this stability by avoiding overproduction and requiring a quality product from the tobacco farmer who wishes to compete successfully in the marketplace; and

Whereas, the tobacco farmer and the tobacco industry rather than being subsidized return a substantial profit to government producing at least six billion dollars of revenue in return for the relatively modest costs of administering the above programs; and

Whereas, tobacco is the nation's fifth leading money crop and first in South Carolina where sixty thousand people find employment on the farm and in the industry and the importance of maintaining such an industry in a stable condition is obvious; and

Whereas, the well-intended comment of the sponsors of this destructive legislation which implies that the "deregulation" of tobacco would work an advantage to farmers was certainly not based on consultation with those farmers whose principal income is based on continued operation of the present system; and

Whereas, the tobacco farmers, industry and various local and national groups associated with the industry have worked diligently and effectively to "keep their house in order" and have substantially reduced their reliance on federal regulation and assistance; and

Whereas, it would indeed be tragic to destroy a program that has worked so well and so economically when such destruction would result in no benefit to and even possible chaos in the tobacco industry. Now, therefore, be it

*Resolved* by the House of Representatives of the State of South Carolina:

That by this resolution the Congress of the United States is memorialized to oppose pending legislation to destroy the federal tobacco loan and acreage allotment programs and the retail tax increase proposed as part of such legislation.

*Be it further resolved* that copies of this resolution be forwarded to the President of the United States, the Vice-President, Speaker of the House of Representatives, the Chairmen of the House and Senate Agriculture Committees, the Chairman of the Tobacco Advisory Commission and the members of the South Carolina Congressional Delegation, all in Washington, D.C.

Mr. THURMOND. Mr. President, Mr. Bill Davis, a member of the Flue-Cured Tobacco Stabilization Cooperative's board of directors, at a meeting sometime ago made this statement:

In 47 years only once has the program failed to make money for the federal government and before it came in there was chaos in the marketplace and on the farm. Every two years the farmers vote overwhelmingly to keep the program and the government quotas on just how much tobacco can be produced. The system works.

These do-gooders in Washington never have an answer for that.

Clemson agricultural economist, Dr. Max Loyd said that ending the price support system would create a "vicious cycle" of lean and good years with growers having to gamble on how much to grow and the buying companies in complete control of the marketplace.

In the long-run our situation would be one of instability and unreliable supply. That would lead to imports of tobacco much higher than it is now and very little exportation.

Mr. President, this is Dr. Loyd, a professor at Clemson University speaking. He has no interest in this program one way or the other. He is merely stating the facts. Mr. President, he goes on to say:

Our exports contribute heavily to our favorable balance of international payments . . . about $1.7 billion per year, he said.

Loyd supports Davis on the point that the program more than pays its way. The net loss in 47 years, he said, has been $56.7 million, which came from one bad year in the mid-1950's. However, the government has collected $72 billion from direct taxes on cigarettes alone.

A very strong free enterprise economist might see some good in dropping the program, he said. He would argue that the market would better direct production than the government.

But farming is a big enough gamble as it is. Unless the farmer got a guaranteed production contract from a buying company he wouldn't know how much to plant. And if production varied just 10 percent up or down the price would vary as much as 50 percent.

The consumer really wouldn't benefit because the farmer only gets about a nickle on a pack of cigarettes now. There's not much more to trim from that and still have the farmer earning any money, Loyd said.

He also noted that the loss of the tobacco allotments (which determine how much leaf can be planted) would cause a sizable loss of investment to the holders who paid for them.

More important is the fact that the farmer would be in a bind to get bank loans to plant his crop without a stabilized market, Loyd said. About 7,000 farmer firms of various sizes plant the flue-cured leaf in South Carolina. Some could get financing but many of the smaller family farms could not.

Mr. President, how are these farmers going to finance themselves? Those who want to repeal this program say we shall get along just as well without it.

Let me tell you what a banker said down in Horry County, a county that produces more tobacco than any county in my State.

Horry County banker Luke Benson said the cost of financing makes it vital that the program be continued.

"The farmer as well as us must have some assurance that there be a constant factor in the market. We just could not risk our depositors' money without such a system," he warned.

John Monroe Holliday of Pee Dee Farms in Galivants Ferry is said to have the largest tobacco producing farm in the world. He says the allotments are "just like having stock in General Motors. People paid for them and they help make the system work. Without the program half the farmers here would be broke in one season."

Mr. President, I want to repeat this: Here is a tobacco farmer saying that without the program, half the farmers would be bankrupt in one season.

The big corporations would take over tobacco growing and a fellow might, just might, get a chance once a year to help crop it on land he used to own. Land that had been in his family when South Carolina was still a Crown Colony, he said.

Mr. President, is that the situation we want to produce here? Do we want to put these small farmers in such a position that they will go out of business, that they will lose their land? Do we want to put them at the mercy of the big tobacco companies? That is what we are going to do if this amendment is adopted.

Mr. President, this tobacco program, I repeat, has cost this Government very little. I want to say, in summary that, first, the tobacco price support is not a subsidy. It is a loan which the farmer repays with interest.

Second, this tobacco price support program has been one of the most successful of all commodity price support programs. The realized cost of the program since its beginning in 1933 has been almost nothing—one-tenth of 1 percent of the cost of all 13 farm commodity price support programs. There have been no losses at all in more than a decade. In fact, in most years, the program produces a profit for the Government.

In 1980, the Federal Government received more than $2.6 billion in excise taxes on tobacco products. State treasuries were benefited by $3.8 billion in revenues from tobacco. Tobacco also contributed favorably to our balance of payments, as I said, netting nearly $2 billion in foreign trade in 1980.

Over $2.4 billion of U.S. tobacco was exported last year, while only $487 million of foreign leaf was imported.

Mr. President, the destruction of this successful program would create chaos in a farming sector where stability has prevailed. The ultimate victims would be thousands of small family farmers, many of whom are blacks and need this assurance to borrow money to farm, who depend on income from tobacco for a substantial portion of their livelihoods. It would reduce revenues to the Federal and State treasuries and adversely affect our trade balance.

Mr. President, 276,000 families in 20 States would be affected. If this program has not cost our Government hardly anything—less than a million dollars a year—how can we afford to abolish it when it has done so much good, provided so much for the economy, and has enabled these little farmers—little growers—to stay in business and make a living farming?

I hope the Senate will carefully consider this matter and not destroy this program. If we do destroy it, I can tell you what is going to happen: These small farmers are going to go out of business and lose their land. We are going to have more tobacco produced because there will be no allotments, but there will be far fewer farmers growing it. They will all produce all they can. Then we are going to have, as a result of that, more tobacco consumed and the little farmer down there, who has lost his land, will have to try to exist, if he can. If not, then he will have to go on welfare or try to secure some other way of living.

Mr. President, I have a letter here from the USDA on this subject. This is written to Congressman JOHN NAPIER:

DEAR CONGRESSMAN NAPIER: Thank you for expressing your concern on behalf of the

tobacco price support program. The USDA is opposed to any legislative attempts to alter the tobacco program at this time. As you know, various amendments have been proposed in the Congress that would either eliminate the current allotment and price support program altogether, or would modify it by redistributing allotments now held by non-tobacco producers to farmers who now grow tobacco under leasing arrangements.

However, the tobacco program does not expire with the 1977 Agricultural Act, and consequently does not have to be addressed at this time. It has also cost taxpayers very little since it began in the 1930's. So USDA's position is to favor *no change* in the program in the 1981 farm bills now before the Congress.

Sincerely,

EVERETT RANK,
*Administrator.*

Mr. President, how can Congress repeal a program that is costing so little and reaping such benefits to the economy, allowing small farmers to exist on the farm and make a living and allowing them to continue to support their families? What is going to happen to them?

I hope and plead with the Senate not to destroy this program, which has been the most successful farm program of all price support programs. As I said, it has cost only on-tenth of 1 percent of all farm programs.

Mr. President, when the Senate votes on this matter, I hope they will consider every facet of this question and cast this vote in favor of retaining this tobacco program.

Mr. EAST. Mr. President, I want to take a minute or two to speak in opposition to the amendment offered by the distinguished and able Senator from Oregon. Just to try to put this in perspective for my colleagues, I should like to point out that with the commodity programs that are currently under review, we have a series of programs that have been in operation in this country for nearly 40 years.

That does not mean, Mr. President, there is not time or place for modification, strengthening, improving, or whatever. But it is imperative to keep in mind that these programs were set in operation and people have acted in reliance upon them. They have become a part of the economic and political and social fabric of the area. That is true of this program.

It is difficult, sitting here in this Chamber, to appreciate what the elimination of this program would mean to thousands, hundreds and thousands, of people in the affected areas. This amendment, with all due respect to the distinguished Senator, is a frontal assault upon this vital program.

I remind Members of both political parties that farmers today are looking for leadership here in Washington; and to the extent that we bring out the wrecking ball and destroy the very essentials of these fundamental programs, we do a great disservice not only to them but also to the economies of the affected areas and to the overall farm economy in the United States.

These programs, including the tobacco program, represent a very delicately balanced combination of private and public sector working together. The Agriculture Committee has tried in many ways to keep that delicate balance in order.

If the Senate and Congress should adopt an amendment eliminating this program totally, which this amendment would do, or any other, I repeat, and I cannot emphasize too strongly, the incredible economic and political implications it would have.

I remind Members of both political parties that for either political party to be known as the enemy of the American farmer will place a heavy political burden on that party in the future, and rightly so.

We can say, fortunately, that we have friends of the American farmer on both sides of the aisle in the U.S. Senate, and among the strongest supporters are some who come from the Democratic side, and we want to acknowledge that.

I caution my colleagues on the Republican side—and I know that our distinguished friends on the Democratic side have cautioned their colleagues—that to come in and destroy a fundamental, basic program of this kind, I repeat, is not only an unbelievable economic disaster, but also, the political implications are enormous.

As we began this new administration and this new Congress, some positive things have been done for the American farmer. For one thing, the embargo was eliminated. The inheritance tax has now been changed so that the family farm can be preserved. The next task we have is to get inflation down and get interest rates down so that the American farmer can continue to produce domestically and in foreign commerce.

The last thing we need to do, Republicans and Democrats, is to come out and destroy these fundamental programs. That is what this would do.

I appeal to each and every one—I have tried to do it personally, and I do it here on the floor—to think very seriously about what they are doing.

Mr. DOLE. Mr. President, I will take about 2 minutes. The issue has been well debated, and it is well understood, and the debate has been interesting. There has been a little smoke but a lot of light.

I speak from the standpoint of Kansas, where we do not raise tobacco. We had one allotment the last time I checked. But we are in the process of putting together a farm bill. Some may not realize that, but this is how the process works. It takes a great deal of time to work out farm legislation, because there are different interests, different geographical areas, different philosophic interests from time to time.

I believe the Senator from Kansas can safely say—and others can answer the question better than I—that if we start to demolish any program, whether it is a wheat program, a tobacco program, or a sugar program, we are not going to have a farm bill. I do not say that as any kind of veiled threat or gesture, but it is a fact of life.

Commodities in my State are important to me—the ones we raise. Commodities in North Carolina and Kentucky, tobacco or whatever they are, are important to the people in that State. I assume that we have an obligation to represent the people who send us here—even those who try not to send us here.

It seems to me that we have just about made the case. We believe that sometime tomorrow we can finish work on this bill. But if we were to adopt the amendment of the distinguished Senator from Oregon—and many may agree with some of the sentiments, but I am speaking as one who is a part of this very loose coalition. It is so loose that it is hard to locate, but it is somewhere around here. We hope that when we finally vote, 51 Senators in the coalition will vote for passage of the farm bill. That will include all of the commodities we have discussed.

For that reason, I hope that if there is a motion to table the amendment, the motion will be adopted.

Mr. BAKER. Mr. President, I should like to add my comments to statements which have been made in support of the existing tobacco program. This program provides a livelihood for hundreds of thousands of one-family farms in this country. A number of these farms are in the State of Tennessee. Without the existance of this program, many of these small farms would lose substantial portions of needed revenues.

Let me briefly outline my objections to the Senator from Oregon's amendment and its adverse impact on tobacco farmers in the State of Tennessee and the Nation.

The tobacco program is an on going program and does not expire with the Agriculture Act of 1977.

All other major commodity programs do expire with the Agriculture Act of 1977 and the Department needs to place its major emphasis on an Agriculture Act of 1981 dealing with those commodities that expire with the act of 1977.

The tobacco program has operated with reasonable effectiveness and with a low percentage of cost. Price support loans for the last 45 years have amounted to only about $57 million or a loss of only about 1 percent of the more than $5 billion in loans. Tobacco cost has only been about one-tenth of 1 percent for all commodities.

In the 16 major tobacco producing States there are about 276,000 one-family farms that depend largely on the income from tobacco for a livelihood. Annual gross farm receipts from tobacco currently are about $2.2 billion.

Effective with the 1982 crop, this amendment would remove tobacco from the provisions of agricultural commodity legislation pertaining to price support and marketing quotas. As an example of the financial impact upon small farms which have traditionally produced tobacco, Federal land bank, PCA and other lending institutions in the tobacco growing area have traditionally placed a value of $5,000 per acre allotment on any given farm. Therefore, a 100-acre farm assigned a loan value of approximately $120,000 without tobacco allotments would be increased to $170,000 with a 10-acre tobacco allotment.

Most lending institutions in the area would normally come up to 80 percent of

the assigned loan value, in this case approximately $135,000. If tobacco allotments were eliminated, a higher percentage of small family farms would not have sufficient collateral to justify their loans presently made by lending institutions including Farmers Home Administration. Many small family farms would undoubtedly be sold.

The amendment would cause tobacco to be removed from various agricultural commodities being sold under export credit sales programs, therefore, probably significantly reducing the $1.9 billion a year favorable balance of trade position.

Because of the limited number of buyers of farm stock tobacco, reasonable returns to producers would not be assured in the absense of some type of price support program.

Mr. President, this is not the bill and this is not the time to eliminate what I believe has been a successful program.

I agree with the Senator from Kansas that if we do not go forward with this bill and without the Hatfield amendment, it will call into jeopardy the entire coalition of matters that have been welded together to try to produce a measure that will be agreeable to the majority of the Senate.

● Mr. MITCHELL. Mr. President, I rise in support of the Hatfield amendment that will eliminate the tobacco program and deregulate the industry.

Senator HATFIELD's amendment is long overdue.

It will eliminate the feudal tobacco allotment system, which allows only those persons who own or rent allotments to market the product. The vast majority of tobacco farmers must pay rental fees to allotment owners for the use of their land.

It has been estimated that farmers in the flue-cured tobacco belt of the Southeast paid allotment owners $279 million for the use of their land in 1980 alone. Allotment rent fees add to the farmer's production costs, which increase Federal price supports, which in turn raise market prices. Increased market prices often result in buyers turning to cheaper imported tobacco, which ultimately leaves the Federal Government with an ever-increasing surplus stock.

At a time when growers are finding that their export markets are being seriously challenged by foreign produced tobacco, the value of the allotment system is even harder to justify. Many tobacco growers, those people that this program was designed to help, perceive that the present system only increases their costs, while the profits of the allotment owners continue to grow.

Higher domestic prices have also caused a sharp decrease in the American share of the world market. In 1966, the United States held 60 percent of the world market; today it holds 28 percent.

The Hatfield amendment will allow the price of tobacco to be set by world demand, and not by the current artificial price set by the Agriculture Secretary.

We have heard claims that eliminating the program will reduce thousands of farmers to abject poverty. But the fact is that tobacco is a highly lucrative cash crop; flue-cured tobacco is a billion dollar annual industry in North Carolina alone. The fact is that growers could sell all the tobacco they could produce, if their production costs were free market production costs. The fact is there are no signs of the industry's imminent decline should the program be eliminated. But there are signs that deregulation will see tobacco producers prospering further in the future.

The current system may well be the least costly commodity program. I will not deny this. But at a time when budget cuts are making us ask school children to treat ketchup as a "vegetable" in their school lunches, even lower cost programs have to go. Tobacco allotments and price supports are a luxury we can no longer afford. It would be a travesty for the Senate to support deep cuts in the nutrition, school lunch, and food stamp programs while continuing to support millions of dollars yearly in Government subsidies for the production of an inedible, unhealthy crop.

When this body first questioned Government support of the tobacco industry, health concerns were said to be the sole argument of tobacco opponents. Budget realities have now intensified the issue, and elimination of the tobacco program has now gathered steam. But the significant social implications of Government support of the tobacco industry are still in the center of this controversy. There is a direct link between the use of tobacco and lung disease, birth disease, and forms of cancer not previously associated with tobacco use. But there is no rational link between tobacco and Government support of its production.

A sad paradox in the direction of Federal funds has existed since the public realization of the hazards associated with cigarette smoking in the 1960's. Since that time, our Government has encouraged the production of tobacco while another hand of Government has spent millions of dollars to discourage its use. The Hatfield amendment would eliminate this contradiction in the use of the taxpayers' dollars.

We have heard much discussion recently of free market economics and deregulation. We have heard of consistency, of denying the excesses of regional politics, of political courage. This amendment provides a test on these ideals. For if we are to support the free market system, if we are truly in favor of deregulation, if we are to deny the wasteful programs of one specific region, we have no choice but to vote for this amendment. And if we are truly concerned about the health of our citizens, and if we are to have the courage to strike down Government support of a product which imperils that health, we must vote to eliminate the tobacco program.●

● Mr. LEVIN. Mr. President, it is with some reluctance and a good deal of surprise that I find myself compelled to vote against the amendment of the distinguished Senator from Oregon. My reluctance springs from the fact that I agree with so much of what he had to say. I too think that the support programs we have developed for tobacco are inconsistent with what we know about the health effects of smoking. And I also believe that the almost feudal system of allotments is fundamentally wrong; its anticompetitive and it generally works against the interests of the small farmer.

Given those general views, I must confess that I was surprised to find myself persuaded by some of the arguments advanced by those who oppose the amendment. While I believe we should immediately end the allotment system for tobacco—just as I voted to end the allotment system for peanuts—I do not believe we should in the same breath immediately eliminate the loan support program. As the opponents of this amendment have indicated, the sudden ending of the loan support program would work a very real and very significant hardship on a large number of small family farmers.

Thus, while I support the immediate ending of the allotment system, the cost of achieving that goal through the mechanism of this amendment is simply too great involving, as it does, the sudden elimination of the loan support program. If this amendment had combined an end of the allotment program with a phaseout of the loan program, then I could gladly support it. Unfortunately, it did not.

But fortunately, there is another amendment which the Senate will consider later this evening which comes closer to meeting my twin goals of treating our farmers fairly and minimizing the noncompetitive and inflationary strains which too many of our farm programs have injected into our economy. The amendment that the Senator from Missouri intends to offer later this evening seems to me to be a more reasonable, though still not totally satisfactory, solution.●

THE TOBACCO PRICE SUPPORT PROGRAM

Mr. HUDDLESTON. Mr. President, I strongly oppose the amendment offered by the Senator from Oregon, Mr. HATFIELD.

This amendment will throw into disorder the tobacco production and marketing system that has functioned effectively for over 40 years, a system that today provides 276,000 farmers market stability and a fair price for their crops.

It could subject the world tobacco market to boom or bust cycles, or substantially weaken tobacco prices—lower tobacco prices will not benefit tenant farmers or others who the amendment may be intended to benefit.

In fact, the amendment may lead to greater concentration in tobacco production, which could mean the demise of thousands of small family farms. It will leave determination of tobacco prices at harvest up to the six major tobacco companies, two of which buy over 60 percent of the domestic crop. This will in time promote the production of tobacco in large units, most likely under contract with the tobacco companies.

The amendment will force farmers wanting to remain in production to expand their acreage of tobacco, and to do so with a greater price risk in the market and with increased production costs—of $2,000 or more per acre.

It will immediately destabilize the economy of the Commonwealth of Kentucky and of the other States and regions where tobacco is produced. It will adversely affect businesses and credit institutions that serve agriculture and that are already suffering from the effects of the worst net farm income position agriculture has experienced since the Great Depression.

It will take from retired farmers a source of income. And it will lower the net worth of farmers who purchased their farms with an allotment and those who have, in the settlement of estates, been given land in lieu of other items.

It will likely add to outlays in the Federal budget as small farmers' incomes are reduced and they become eligible for Federal assistance programs.

And, this amendment will kill a producer-supported program that has been effective and efficient in achieving the agricultural market objectives supported by Congress for over 40 years.

IMPORTANCE OF TOBACCO TO KENTUCKY AND OTHER STATES

Too frequently, Mr. President, the impression has been given that tobacco is important only in the flue-cured area and the leading flue-cured tobacco State, North Carolina. But, I wish to assure my colleagues who may consider supporting this amendment that this is not the case.

Kentucky is the leading burley tobacco State. Seventy-three percent of the farms in Kentucky produce tobacco. And of those farms, over 75 percent of the burley tobacco farms contain less than 50 acres. Over two-thirds of the producers grow less than 2 acres of tobacco. While many burley farm households received some off-farm income, one-third receive no nonfarm income or less than $2,500 from nonfarm sources.

Only 3 of Kentucky's 120 counties are untouched by the farming, auctioning, manufacturing, or wholesaling sectors of the State's tobacco industry. One of every 14 jobs in the Commonwealth, either directly or indirectly, is tobacco related. The farm value of Kentucky's burley tobacco crop in 1980 was $674 million.

Clearly there is not a crop alternative that can, at this time, replace tobacco in the economy of Kentucky or other States where tobacco is produced.

While produced on only three-tenths of 1 percent of the Nation's cropland, tobacco is consistently the fourth or fifth most valuable crop, accounting for approximately 4 percent of cash receipts from all crops grown in the United States.

ORDERLY MARKETING NEEDED

The contribution of tobacco to our agricultural economy has long been recognized, as has the need for orderly marketing in the tobacco industry.

Congress, in the Agricultural Adjustment Act of 1938, declared that it is in the national public interest—and I quote:

To assist in the marketing of agricultural commodities for domestic consumption and for export, and to regulate interstate and foreign commerce in cotton, wheat, corn, tobacco, and rice, to the extent necessary to provide an orderly, adequate, and balanced flow of such commodities in interstate and foreign commerce.

Following the passage of the 1938 act, cooperative tobacco marketing associations were established, and have been maintained, to serve as agents for the Commodity Credit Corporation and take under loan quantities of tobacco that would depress farm prices and farm income, and to offer those stocks to the market when production shortfalls occur. Similar loan and support operations have been provided for other commodities.

For 40 years, the tobacco program has assured fair prices for the thousands of tobacco farmers who sell their crops to the six major tobacco companies. It has provided tobacco companies with quality tobacco and a reserve supply of domestic tobacco when production shortfalls have occurred.

During its 40 years of operation, the Burley Tobacco Growers Cooperative Association, located in Lexington, Ky., has received and resold 1¾ billion pounds of tobacco. This equals 3 years' production. Had this amount of tobacco directly entered the market, it would have depressed farm prices and reduced farm income for tobacco producers.

To take surplus tobacco under loan, and process and resale it, the association has borrowed money from the Commondity Credit Corporation. The association has paid back the loans, however; and the loan paybacks, including interest and fees, have totaled $1.28 billion. Also, the association has distributed to its members net gains of $23.4 million. When settlement is made on recent crops, the net gain to growers is expected to total $32.3 million.

TOBACCO PROGRAM IS SOUND

Without question, the tobacco program has been effective, remains fiscally sound, and is needed.

In findings provided President Reagan on August 21, the U.S. International Trade Commission, following a 5-month investigation into the effects of imports of Flue-cured tobacco on support operations conducted by the Department of Agriculture, ruled that the tobacco program is sound.

In the case of burley tobacco, all commissioners and the Department of Agriculture conceded the program is in excellent shape. In the opinions of three of the four commissioners, the Flue-cured tobacco is healthy.

With respect to the Flue-cured program, the majority of the commissioners said, and I quote:

Loan stocks of flue-cured tobacco have been steadily declining since 1978 and are now at their lowest level since 1977. The amount of tobacco placed under loan each year has been significantly lower since 1978 than during 1974–77.

In addition, we have found that the cost to the Government of operating the program quite plainly has not been increasing relative to past years. In light of recently developed information, USDA estimates of financial losses on the 1975 crop and on subsequent crops appear to be exaggerated. While there was a slight loss of $5.6 million on the 1974 crop and there may be a loss of about $11 million on the 1975 crop, these losses are not comparable to the average losses experienced in the period 1950–70. They simply are not of a magnitude to suggest material interference or ineffectiveness of the program. Moreover, in stark contrast to USA estimates, the flue-cured stabilization cooperative projects that substantial profits will be made on sales from crop years 1976–80.

With respect to the prospective impact of imports on the programs, there is no evidence to demonstrate that imports are tending to render the program ineffective or that they are practically certain to be imported so as to cause future harm. While the best estimates do indicate a long term growth in imports, such an event is too protracted to be a basis for concluding imminent harm. Moreover, information on the current crop is that because of its high quality, auction prices are high, loan placements are down sharply over prior years, and processors are dipping into loan stocks to obtain lower grade tobacco. While USDA is alarmed by the apparent long-term decline in U.S. competitiveness vis-a-vis other tobacco producing countries, the facts before us do not suggest that harm is imminent.

Finally, the purposes of the tobacco programs, including assuring adequate income to farmers and fair prices to consumers, maintaining a balanced supply, and providing a balanced flow of tobacco in interstate and foreign commerce, are currently being achieved.

Mr. President, while modified legislatively and administratively during its history, the tobacco program has been supported, repeatedly and overwhelmingly, by farmers voting in regularly scheduled referendums.

TOBACCO SUPPORT NOT A PUBLIC HEALTH ISSUE

Perhaps the most frequent misrepresentation regarding the tobacco price support program, administered by the Department of Agriculture, has been the assertion that it is inconsistent with programs administered by the Department of Health and Human Services to discourage smoking. As clearly shown by statements issued from the then Office of the Secretary, and the Office of Smoking and Health in the Department of Health, Education, and Welfare, there is not an inconsistency.

In an April 15, 1980, letter to me from Mr. William B. Welsh, then Assistant Secretary for Legislation, Office of the Secretary, Department of Health, Education and Welfare, Mr. Welsh stated, and I quote:

The Department has long held that the price support program of the Department of Agriculture is not a public health issue.

The purpose of the program is to protect the price the farmer gets for his tobacco, not to encourage or uphold cigarette smoking. Presumably, if the program were removed the price would drop, which would mean either more profit for the cigarette manufacturer or lower prices for the person who buys cigarettes. This might actually increase consumption.

Similarly, Mr. Robert Hutchins, Associte Director, Office of Smoking and Health, and an ardent antismoking advocate, stated with regard to the tobacco price support program, and I quote:

If the Government's price support program for the tobacco farmer has any effect at all on public health, it is favorable. The purpose of the program is to stabilize tobacco production, and, thus, assure fair prices to the farmer. If the program were to be withdrawn, tobacco prices would fall, and cigarettes would become less expensive, possibly encouraging more young people to smoke.

President Reagan and Secretary of Agriculture Block have indicated support for the tobacco price support program.

Former Secretary of Agriculture Bergland indicated that it makes no sense to dismantle the tobacco price support program, and suggested that the issues of smoking and health and the tobacco support program be separated. I agree.

It is my hope that others will realize, as has Joseph Califano, the former Secretary of Health, Education, and Welfare, that abolition of the tobacco price support program will not result in one less cigarette being smoked.

TOBACCO PROGRAM IS NOT COSTLY

Further, the tobacco program is not costly. It has been effective and has been the least costly farm commodity price support program administered by the USDA during the 40-year history of commodity programs.

During the 1970's net outlays for feed grains, wheat, cotton, dairy, rice, and wool totalled $11.7 billion, $6.5 billion, $4.6 billion, $2.9 billion, $.5 billion, and $.5 billion, respectively. Within the same period, net outlays for tobacco were less than $50 million. In fact, the cumulative loss on the tobacco program represents less than three-tenths of 1 percent of CCC's total loss of about $18 billion on all commodity loan inventory operations since 1933.

The elimination of the tobacco program or modifications that would significantly reduce domestic production would lead to increased imports of tobacco and tobacco products. This could erase the net trade balance in tobacco of $2 billion that the U.S. economy benefited from last year.

Also, interest rates on CCC tobacco support loans are set at a level equal to the cost of money to the Government.

Further, tobacco farmers must pay user fees to cover the $8 million in annual costs to maintain the tobacco grading and inspection service—an essential marketing function that has been covered many times over by tax revenue produced by tobacco products.

And, to assert that tobacco is a drain on the Federal Treasury, one would have to ignore the $2.4 billion in Federal excise taxes collected annually on tobacco. If State, county, and local government taxes of $4 billion are added, the total tax revenue is $6.4 billion.

TOBACCO PROGRAM PROTECTS SMALL FARMERS

If this amendment becomes law, hundreds of thousands of small tobacco farmers in my State, and others, will be devastated economically.

There is no way that small farmers in my State would be able to continue to produce tobacco, considering the increased capital requirements and the market uncertainty that would exist if there were no tobacco program.

As I previously indicated, tobacco farmers in Kentucky are not large nor well capitalized farmers. They are small operators who could not continue farming under the boom and bust conditions that would prevail in the absence of the tobacco program.

CONCLUSION

Elimination of the program would adversely affect tobacco farmers, rural communities, and the national economy. Losses would be reflected in the revenue and expense lines of Federal, State, and local budgets.

With low farm income already a major national concern, a high farm debt loan, and interest rates unabated, there is little doubt that cancellation of this program would make worse the already severe problems facing the Nation's farm sector.

I urge the Senate to defeat this amendment and permit the tobacco price support and production control program to continue.

Mr. SASSER. Mr. President, I rise in opposition to the Hatfield amendment which would eliminate the tobacco price support program.

The tobacco program has been one of this Nation's agricultural success stories for a long time now. It was fashioned to insure a stable, high quality, and reasonably priced supply of tobacco and at the same time to provide for an acceptable return to tobacco growers.

This was a tall order Mr. President. To meet these requirements, any program would have to be extremely well conceived and executed. The tobacco program, as we know it, has met all of the original goals. Furthermore, it has not been a drain on the Treasury.

In 1979, tobacco contributed mightily to the Nation's economy. It was responsible for 2 million jobs, $30 billion in wages and earnings, $15.5 billion in capital investment, $22 billion in taxes, and $58 billion to the gross national product. In short, for every dollar's worth of goods and services in the American economy, tobacco was responsible for roughly 2½ cents.

In the approximately 40 years the program has been in effect, the cost per year has been less than $1 million and in many of these years the Treasury has realized a profit. The cumulative financial loss on the tobacco loan program represents less than 0.3 of 1 percent of the Commodity Credit Corporation's total loss on all commodity loan inventory operations since 1923.

In my own State of Tennessee, Mr. President, 1 out of every 32 jobs, or over 3 percent, exist because of tobacco. Two-thirds of these 49,000 jobs are created in nontobacco industries and services by the spillover effects of the industry. There are jobs in every one of Tennessee's 95 counties that exist because of tobacco, and Tennesseans earned almost $614 million in 1979 from these jobs.

The tax revenues generated by tobacco are also important to Tennessee. In 1979, the State's 13-cent cigarette tax alone yielded $72.5 million. Sales and corporate income taxes accounted for another $15.4 million.

Mr. President, with farm income already a major national concern, there is little doubt that damage to the tobacto industry would only contribute to this problem.

The thousands of small tobacco farmers in my State would be unable to continue to produce in the face of the uncertainty that would exist without the tobacco program. The tobacco farmers in Tennessee are not large, well capitalized farmers. They are small operators who could not continue farming under the volatile conditions that would result from damage to this program. The elimination of tobacco, which has been my State's first or second most valuable cash crop over the last 15 years, has serious implications for the income of Tennessee farmers.

I ask my colleagues to keep the many contributions of this cost effective program in mind as they consider this amendment. Its value to the economies of the Nation and of every State is too great to be rejected.

Mr. HATFIELD. Mr. President, I have been almost 15 years in the U.S. Senate, and I have been treated tonight to one of the most extraordinary discussions on a subject that I have ever experienced.

I do not believe I have heard as many hallelujahs and hosannas sung to any subject since the last Easter sunrise service I attended. [Laughter.]

I have listened to the discussion tonight, and I am mindful that if I took it seriously, every bit of all the claims as to what the tobacco industry has done for this Nation, I would feel ashamed for having brought up the issue. I would feel great contrition in my heart, and I would beg forgiveness for even having thought of such a horrible idea.

To think that I am about ready to destroy one of the greatest welders of family units we have. How it brings the family together and gives them occupation together and develops the family unit. How I have set up a proposition here that might destroy one of the greatest supporters of higher education in the South.

It is fantastic. I am utterly amazed how much higher education is provided by the tobacco industry.

I think that perhaps we should review the higher education subsidy from the Federal Government toward the tobacco States. If they are getting so much higher education out of these little farm allotments already, I am not so sure we should be spending my dollars coming into the Federal Treasury from Oregon for higher education programs that are so beautifully financed now by the tobacco industry.

I also listened to how much money is produced for the Federal Treasury.

Mr. President, we should be about the business of spreading the tobacco industry into all the 50 States for all the wonderful revenues that it produces.

I also have heard the same arguments given on behalf of establishing lotteries. I have also heard the same arguments used on behalf of legalization of marijuana, that people are going to smoke it anyway, so we may as well get some tax out of it.

I also remember trying to get the Turkish farmers to stop producing opi-

um poppies that they send into America as part of the drug traffic. The argument was, "We have a Nation of small farmers that we will throw out of work if we start restricting the drug traffic coming into the United States."

I am terribly sorry that I even created the illusion that I am somehow about the business of destroying small farmers.

Mr. President, we are confusing tonight in this debate the tobacco industry with the tobacco producers or the tobacco program.

I am only about the business of trying to remove the tobacco program. The tobacco industry will continue. There is no question about it.

I was hooked for 10 years. I still miss it. I quit smoking since 1954.

So we will still have the habit. We will still have the cigarettes. We will still have the chewing tobacco which I have been offered tonight in the Chamber, and a few other things, to tempt my resolve to stop smoking and stop chewing.

I want to say, as far as the small farmer is concerned, Mr. President, I am not about the business of destroying the small farmer, but let me also remind you 16 percent of the producers today in the South, only 16 percent have their total farm ownership but the others are depending on allotments that they are having to rent at $800 to $1,000 an acre.

That is under this program. Remove that from their back. That is part of getting Government off the the back of the people so they can stand in a free marketplace as free Americans, the good old individualism that all of us are now supporting.

Mr. President, all I say in closing is that this is in no way attempting to reregulate people's habits.

We heard the Volstead Act raised tonight as an analogy. It is no analogy at all.

I said in my opening statement that people will continue to smoke. It will not reduce the smoking habits of people, I am sure, and we will continue to produce tobacco.

I also, as a history buff, was very pleased to be treated tonight to this great rich heritage that we have as the first export product from America and how the early history of this Nation was formed around the tobacco industry.

Again, I am just utterly amazed at the significant role the tobacco industry has played in the heritage of this Nation, in the marvelous taxes that it produces, all of these things, the educational benefits, all the other things that have been alluded to.

Mr. President, let me say that we have the chip-o-logger in my State. After World War II there were literally hundreds of them. They had to face the marketplace. They did not have a support program. I tell the Senate that the chip-o-logger was the one man with a chain saw who had a little stand of timber that he was out there producing.

Therefore, I can understand what the impact of the support program is and where the free marketplace plays a part.

But I know in fact, also, that many of the small farmers in the South who are producing farmers would like to be in a free market where they did not have to pay the $800 to $1,000 fee for an allocation. So it is not all that rosy for the small farmer even today.

One would be surprised. We had small farmers contact our office and tell us that this was a handicap for their opportunity to be in the marketplace to begin with.

I am not saying that they are united on one side or the other on this issue.

Again, I wish to just close by saying that this is not a matter of trying to destroy an industry. The industry will continue.

I appreciate these Senators from tobacco States. If there were a timber issue, forestry issue, I would be on my feet, believe me. I would be defending the right of the timber industry to produce and to contribute.

But I must say when I look at the health side of the factor the forestry industry is not contributing to the difficulties of human life as we have been able to prove in a scientific way tobacco is, so we are in a situation where we have to make decisions.

We cut 1 million people off of food stamps and make 22 million people more ineligible because we believe that they should stand on their own and we should not provide them with this kind of support.

All I am saying is that we are making the decision here about nutrition programs and we are going to make further decisions of cutting more people off of life-supporting programs of the Federal Government. Yet we are going to continue to subsidize, and let me underscore the word "subsidize" tobacco. A rose by any other name is still a subsidy, when there is a differential of $600 million that has been paid between what the Government had to pay for the money in order to give the low-interest rate loans to the producer, even though we now begin as of January 1 to have the same rate paid by the producer that the money is costing the Government, except in this case it is 16.5 percent, and I do not think you and I could go in the marketplace and get 16.5 percent money today with 20 percent prime, so even in that sense, there is still a benefit that flows here that does not flow to other people.

Mr. President, I have come to one conclusion after listening again, and I say this good naturedly, about the benefits of tobacco to this Nation, that I have almost come to the conclusion that tobacco must be better than sex.

Mr. HELMS. I say to the Senator I do not remember. [Laughter.]

Mr. President, on behalf of the distinguished Senator from Kentucky I move to lay on the table the pending amendment, and ask for the yeas and nays.

The PRESIDING OFFICER (Mr. DENTON). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Oregon.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

I further announce that, if present and voting, the Senator from Vermont (Mr. STAFFORD) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY) and the Senator from California (Mr. CRANSTON) are necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. BRADLEY) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators wishing to vote or change their vote?

The result was announced—yeas 53, nays 42, as follows:

[Rollcall Vote No. 262 Leg.]

YEAS—53

| | | |
|---|---|---|
| Abdnor | Glenn | Lugar |
| Andrews | Goldwater | Matsunaga |
| Baker | Grassley | Mattingly |
| Baucus | Hart | McClure |
| Boren | Hawkins | Melcher |
| Burdick | Hayakawa | Nunn |
| Byrd, Harry F., Jr. | Heflin | Pryor |
| | Helms | Quayle |
| Byrd, Robert C. | Hollings | Randolph |
| Chiles | Huddleston | Sarbanes |
| Cochran | Inouye | Sasser |
| Denton | Jepsen | Stennis |
| Dixon | Johnston | Stevens |
| Dole | Kassebaum | Symms |
| Domenici | Laxalt | Thurmond |
| East | Leahy | Tower |
| Exon | Levin | Warner |
| Ford | Long | Zorinsky |

NAYS—42

| | | |
|---|---|---|
| Armstrong | Garn | Pell |
| Bentsen | Gorton | Percy |
| Biden | Hatch | Pressler |
| Boschwitz | Hatfield | Proxmire |
| Bumpers | Heinz | Riegle |
| Cannon | Humphrey | Roth |

| DeConcini | Mitchell | Tsongas |
| Dodd | Moynihan | Wallop |
| Durenberger | Nickles | Weicker |
| Eagleton | Packwood | Williams |

NOT VOTING—5

| | | |
|---|---|---|
| Bradley | Mathias | Stafford |
| Cranston | Murkowski | |

So the motion to lay on the table amendment No. 524, as modified, was agreed to.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the majority leader.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. Mr. President, who was seeking recognition?

The PRESIDING OFFICER. Several Senators.

Mr. EAGLETON. I was.

Mr. BAKER. Mr. President, let me have the attention of the Senate just for a brief moment and then I will be prepared to yield the floor.

Mr. President, I have four other amendments on which time limitations have been agreed. I make the following request under the same conditions as the previous request in respect to second-degree amendments, in respect to the control of time, in respect to points of order, appeals, and other material included in the request made earlier in the evening, and germaneness as it relates to the germaneness of second-degree amendments to first-degree amendments.

Mr. President, I ask unanimous consent that on the Grassley amendment dealing with payments for farmland conversion, there be a time limitation of 30 minutes to be equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. On the Domenici amendment dealing with agriculture export credit revolving fund, 20 minutes equally divided.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. On a Helms amendment dealing with the export subsidy program, 10 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. On a Helms amendment dealing with research title amendments, 10 minutes equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, it is now 8:30, and we have addressed many, I would hope most, of the major issues that we must deal with in this bill. It is the intention of the leadership to ask the Senate to remain in session for a good while yet. I still have some hope that we will be able to complete this bill tonight. I reiterate, if we cannot, we will be in tomorrow and attempt then to complete the bill tomorrow. But may I urge Senators to accept even shorter limitations of time if they possibly can, to forbear offering their amendments, if that is possible to do, perhaps even to consolidate amendments, if feasible.

I think it is distinctly preferable that we stay tonight and try to finish. I would urge Senators to give their attention to that and to make every effort to accommodate that purpose.

I would expect that we will be in at least 2½ or 3 hours and perhaps longer than that in an effort to finish the bill tonight.

Mr. RIEGLE. Will the majority leader yield?

Mr. BAKER. I yield to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding. I hope we will be successful in finishing the bill tonight, but as the leader points out we may or may not. I am concerned if we do not finish it tonight but go over until tomorrow. There is a ceremony taking place in my State for President Ford, in which a number of Senators, myself included, are participating. I think the majority leader is also participating in that program. I wonder if we find ourselves in a situation where it is necessary to be in tomorrow if perhaps an effort could be made to try to stack votes so that those of us who have to go out for that program and turn around and come right back can still have the opportunity to make the votes, if times could be set so that votes could be stacked in a fair and reasonable fashion so that we would have that chance to attend the ceremony.

Mr. BAKER. I thank the Senator for his inquiry. The Senator from Michigan and a number of other Senators mentioned to me the possibility of stacking votes on tomorrow afternoon. I find that is not feasible. I find by the same token a number of Senators want to get away tomorrow afternoon. I am afraid we will run into an objection. I will be glad to examine that further.

Indeed, as the Senator pointed out, I planned to be at that ceremony, too. I think the minority leader would agree with me that neither of us have asked the Senate to accommodate our schedule and I will not in this instance. Since there are a number of Senators attending that, I will be glad to examine those prospects and see if it is possible. I do not think it is possible, however.

Mr. ZORINSKY. Will the majority leader yield for a question?

Mr. BAKER. Yes, I am happy to yield.

Mr. ZORINSKY. The majority leader mentioned that all major amendments had been taken care of. I have one which is minor. It relates to commodity programs. I offered a time agreement which was not accepted. Is it the opinion of the majority leader that this is still pending but there is no time agreement? I offered an hour and a half equally divided but I was turned down.

Mr. BAKER. Mr. President, I do not recall now from which side of the aisle that objection came, but I will be glad to try to get agreement on the measure, if the Senator will permit me to try.

Mr. ZORINSKY. Certainly.

Mr. BAKER. Mr. President, there is one mistake, apparently, in the request I made previously. I am told now that the Senator from Iowa wished to make sure, at least, that the amendment that was qualified for him as to 30 minutes was amendment No. 539. Might I inquire of the distinguished Senator from Iowa, is that correct?

Mr. GRASSLEY. That is correct.

Mr. BAKER. I wish the RECORD to show, if there is no objection, that the amendment identified by the Senator from Iowa is an amendment No. 539. I will inquire of the minority leader if that makes any difference as to the clearance he had given to the amendment previously.

Mr. ROBERT C. BYRD. That was the amendment identified as the conservation tillage amendment, might I ask?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. That is agreeable.

Mr. BAKER. I thank the Chair. I thank the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I will inquire, is there some agreement on scheduling of the amendments on which there are time agreements, or am I in order to offer mine?

The PRESIDING OFFICER. There is no schedule.

UP AMENDMENT NO. 376

(Purpose: Proposed amendment to agriculture export credit revolving fund)

Mr. DOMENICI. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 376:

On page 238, strike line 20 and insert in lieu thereof: "sion of law.

"(8) The authority provided by this subsection to incur obligations to make loans shall be effective only to the extent that such obligations do not exceed annual limitations on new direct loan obligations which shall be provided in annual appropriations Acts.".

Mr. DOMENICI. Mr. President, I yield myself 1 minute.

The amendment I offer today is a minor one primarily technical in nature but one that is critical to our congressional process of carrying out our fiscal responsibilities.

The amendment affects the agricultural export credit program authorized by this bill and requires that Congress determine the appropriate annual level of loans through the appropriations process. This provision is consistent with the manner in which other Federal credit programs are treated. The provision is also consistent with the intent stated by the Senate in the first budget resolution that all credit programs be subject to annual limitations through the appropriations process.

In other words, the export credit program will be subject to a limit as to the amount of loans available in the appropriations process. That process would set the limit.

Mr. President, experience has taught us that Government assistance in the form of credit programs can be effective and useful, but experience has also demonstrated that fiscal prudence and the

right of congressional input requires annual review of such programs.

I urge swift adoption of the amendment.

Mr. HELMS. Mr. President, I support the amendment offered by my distinguished colleague. Because of the importance of exports to the Nation's farmers and to the entire Nation, the Committee on Agriculture, Nutrition, and Forestry included a provision in S. 884 establishing an agricultural export credit revolving fund. This fund would be used to finance the export of U.S. agricultural commodities. It had broad support from U.S. agricultural commodity groups throughout this country.

As I understand it, the amendment is a very simple one. It merely provides that the authority to incur obligations to make loans out of the revolving fund would be effective only to the extent that such obligations do not exceed annual limitations on new direct loan obligations which are provided in annual appropriation acts. In a nutshell the amendment makes the amount of loans made out of the fund subject to limitations set in appropriation acts.

Mr. President, this is in line with the President's desire to control the amount of new credit by making loan programs subject to the appropriation process. This is not revolutionary. Many of the credit programs of the Department of Agriculture now have annual limitations established in appropriation acts. These include the current export credit guarantee program and the lending programs of the Farmers Home Administration. Since, under the committee bill the fund is funded by appropriations, I am willing to accept the amendment and I urge its adoption.

Mr. DOLE. Mr. President, I am authorized by the distinguished chairman of the committee to indicate, as indicated by the Senator from New Mexico, that the amendment is acceptable to the majority.

I understand it is also acceptable to the distinguished Senator from Kentucky, Senator HUDDLESTON.

Mr. DOMENICI. Mr. President, before we vote, I yield myself 2 minutes on the amendment.

Let me begin by commending Senator HELMS and Senator HUDDLESTON, the distinguished chairman and ranking minority member, and the other members of the Agriculture Committee for the fiscal restraint they have shown in the farm bill. After 3 weeks of almost continuous meeting in markup sessions, the committee reported a bill last May that was estimated to be within $0.1 billion of the first budget resolution targets for fiscal years 1982–84. After accounting for the amendments adopted yesterday, the bill would be at the fiscal year 1982 targets in the first budget resolution.

With this bill and other legislation enacted in this session, the Agriculture Committee will have achieved $1.7 billion in outlay savings for direct spending programs under the committee's jurisdiction. I ask unanimous consent that a table showing the relationship of this bill to the first budget resolution be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. The policy changes necessary to achieve the level of savings, proposed or enacted, in farm programs this year are a clear movement away from Government interference in agricultural markets. Given the uncertainty inherent in estimating the costs of the farm programs due to changes in weather or exports, these programmatic changes represent a commendable effort in meeting the guidelines of the congressional budget.

I appreciate the great difficulty that the committee had in reducing the costs of the farm programs. Farmers are facing continued high production costs along with declining prices for many of their commodities. These circumstances certainly make cutting farm programs difficult.

However, the prospects for farmers are now, more than ever, tied to the health and vitality of the American economy. The health of the economy cannot be restored without restraint in all Government programs.

During the August recess, most of us listened to our farmer constituents complain of the high interest rates and their impact on the costs of producing farm commodities. These interest rates also put downward pressure on farm prices. Food processors cannot afford to purchase farm products for inventory. Our commodity export markets also decline with the rising value of the dollar overseas which is, in part, a result of our high interest rates. Thus, the American farmer has a tremendous stake in our efforts to reduce Federal spending and borrowing and will be among the first to reap the benefits of a stronger economy, if we are successful.

Since May we have been blessed with very favorable weather for growing crops with the prospect for record or near-record harvests of wheat, corn, and cotton. This bodes well for food price inflation but, unfortunately, budget costs for farm programs will go up, perhaps by as much as 50 percent over earlier estimates.

I am aware of the efforts of the Agriculture Committee, the administration, and individual Senators to reexamine the provisions of this bill and to propose changes to assure that nonessential spending is eliminated. In light of our current undertakings in the areas of defense and other spending reductions, and the reestimated costs of this bill, I strongly support the efforts to decrease the costs of this bill. If we are to reach our goal of a balanced budget by 1984, we must make every reasonable attempt to reduce spending in all ongoing programs. As long as these efforts produce a final version of the bill which is consistent with the overall congressional response to further spending restraint, I will do all that I can as chairman of the Budget Committee to assure that the full costs of the bill will be accommodated in the second budget resolution.

Mr. DOMENICI. Mr. President, I yield back the remainder of my time.

Mr. DOLE. Mr. President, I understand the distinguished Senator from Kentucky has no objection to this amendment.

Mr. HUDDLESTON. I have no objection.

Mr. DOLE. I yield back time on this side, Mr. President.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 376) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. EAGLETON addressed the Chair.

Mr. HAYAKAWA addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from California.

UP AMENDMENT NO. 377

(To provide greater protection against the introduction and dissemination of plant pests)

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA), for himself, Mr. THURMOND, Mr. TOWER, and Mrs. HAWKINS, proposes an unprinted amendment numbered 377.

Mr. HAYAKAWA. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following:

That the Federal Plant Pest Act (71 Stat. 31; 7 U.S.C. 150aa) is amended—

(a) in section 105 by renumbering subsections (b), (c), and (d) as (c), (d), and (e) and adding a new subsection (b) as follows:

"(b) Whereas the existence of a plant pest new to or not therefore known to be widely prevalent or distributed within and throughout the United States on any premises in the United States would constitute a threat to crops, other plant life and plant products of the Nation and thereby seriously burden interstate or foreign commerce, whenever the Secretary determines that an extraordinary emergency exists because of the presence of such plant pests on any premises in the United States, and that the presence of such plant pest anywhere in the United States threatens the crops, other plant life or plant products of the United States, he may (1) seize, quarantine, treat, apply other remedial measures to destroy, or otherwise dispose of, in such manner as he deems appropriate, any product or article of any character whatsoever, or means of conveyance which he has reason to believe is infested or infected by or contains such plant pest; (2) quarantine, treat, or apply other remedial measures to, in such manner as he deems appropriate, any premises, including articles on such premises which he has reason to believe is infested or infected by any such plant pest: *Provided*, That such action shall be taken under this section only if the Secretary finds that adequate measures are not being taken by the State or other jurisdiction. The Secretary shall notify the appropriate official of the State or other jurisdiction before any action is taken in any such State or other jurisdiction pursuant to this section."; and

(b) in section 107 by adding after the second semicolon the following: "to stop and inspect without a warrant any person or means of conveyance moving intrastate upon probable cause to believe that the person or conveyance is carrying any product or article subject to treatment or disposal under the provisions of this Act or the regulations issued thereunder;".

The PRESIDING OFFICER. On this amendment there are 15 minutes equally divided.

Mr. HAYAKAWA. I shall need much less than that, Mr. President.

Mr. President, a policy deficiency which surfaced early in the crisis has to do with the authority of the Secretary of Agriculture to take quick action in the infestation such as we are currently experiencing in California. Rather than having the authority to take action which would have eradicated the pest at an early stage—Secretary Block was limited to threatening a quarantine of host produce if the State did not take action.

The Secretary of Agriculture currently has the authority to move decisively on livestock disease outbreaks. The amendment I am introducing will provide the Secretary with similar authorities in dealing with plant pests. Specifically, the Secretary would be given the power to employ such effective measures as pesticide spraying and product seizure or quarantining. Mindful that the responsibility to deal with plant pests falls first with State officials, this legislation would authorize the Secretary to take action only if adequate measures are not being taken by the State.

All precautions must be taken to guarantee that plant pest crises, like the one we are dealing with in California today, do not occur in the future. This amendment is a necessary step toward insuring that both the Nation's agriculture will be adequately protected and that the Nation's consumers will be able to continue to enjoy a plentiful supply of farm produce.

Mr. President, I believe this amendment is acceptable to both sides. I propose it for myself and for Mr. TOWER, Mr. THURMOND, and Mrs. HAWKINS.

Mr. DOLE. Mr. President, I am again authorized by the chairman of the committee to indicate that there is no objection to this amendment. I have also checked with the distinguished Senator from Kentucky. There is no objection to this amendment.

Mr. HELMS. Mr. President, this amendment would grant to the Secretary of Agriculture the authority to control the intrastate movement of plant pests. The Secretary now has this authority with respect to pests which attack farm animals. The Secretary could exercise this authority only after determining that an extraordinary situation exists which threatens plant life or plant products and after determining that inadequate control measures are being taken by the State or local government. The Secretary would further be required to give notice to the State or local officials prior to taking any action to control the plant pests.

Mr. President, I feel this amendment would be beneficial to our farmers and to the general public. Therefore, I accept it on behalf of the majority and urge its adoption.

Mr. DOLE. Mr. President, I yield back the time on this side.

Mr. HAYAKAWA. Mr. President, I yield back the rest of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 377) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HAYAKAWA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk——

The PRESIDING OFFICER. The Chair has to recognize the first Senator to get my attention. That is the Senator from Montana.

Mr. HAYAKAWA. This is an amendment that can be acted on by voice vote.

Mr. DOLE. The Senator has an amendment that will take about 30 seconds. Will the Senator from Missouri yield?

Mr. EAGLETON. I yield to the Senator from California.

UP AMENDMENT NO. 378

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA), for himself, Mr. SPECTER, and Mrs. HAWKINS, proposes an unprinted amendment numbered 378:

At the end of the bill add the following:

To enable producers and importers of flowers and plants to establish, finance, and carry out a coordinated program of research, producer and consumer information, and promotion to improve, maintain, and develop markets for flowers and plants.

SECTION 1. That this Act shall be known as the "Floral Research and Consumer Information Act".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. Flowers and plants are an integral part of American life, contributing a natural and beautiful element, especially in urban areas, to what is increasingly a man-made, artificial environment for this country's citizens. Providing comfort and pleasure for many special occasions as well as for everyday living, flowers and plants work against "visual pollution" and, in the case of green plants, generate oxygen within their indoor environment. The flowers and plants to which this Act refers are cut flowers, potted flowering plants and foliage plants. These flowers and plants are produced by many individual producers throughout the United States and, in some cases, in foreign countries. These products move in interstate and foreign commerce, and those which do not move in such channels of commerce directly burden or affect interstate commerce of these products. The maintenance and expansion of existing markets and the development of new or improved markets and uses are vital to the welfare of flower and plant producers, brokers, wholesalers, and retailers throughout the nation. Because the floral industry within the United States is comprised mainly of small and medium-sized businesses, and because the producers are primarily agriculturally oriented companies rather than promotion-oriented companies, the development and implementation of adequate and coordinated programs of research and promotion necessary for the maintenance of markets and the development of new markets have been prevented. Without an effective and coordinated method for assuring cooperative and collective action in providing for and financing such programs, individual flower and plant producers, wholesalers, and retailers are unable to provide, obtain, or implement programs of research, consumer and producer information, and promotion necessary to maintain and improve markets for any or all of these products.

It is widely recognized that it is in the public interest to provide an adequate, steady supply of fresh flowers and plants to the consumers of the nation. The American consumer requires a continuing supply of quality and affordable flowers and plants as an important contributory element to his quality of life.

It is therefore declared to be the policy of the Congress and the purpose of this Act that it is essential and in the public interest, through the exercise of powers provided herein, to authorize and enable the establishment of an orderly procedure for the development and the financing through an adequate assessment of an effective and continuous coordinated program of research, consumer and producer education, and promotion designed to strengthen the floral industry's position in the marketplace, and maintain and expand existing markets, and develop new ones, for flowers, plants, and flowering

plants. Nothing in this Act shall be construed to mean, or provide for, control of production or otherwise limit the right of individual flower and plant producers to produce commercial flowers and plants or dictate quality standards. Nothing in this Act shall be construed to erect a trade barrier to flowers and plants produced in foreign countries. The Act seeks to treat foreign producers equitably in every respect.

DEFINITIONS

SEC. 3. As used in this Act:

(a) The term "Secretary" means the Secretary of Agriculture or any other officer or employee of the Department of Agriculture to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

(b) The term "person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

(c) The term "cut flowers" means all flowers and decorative foliage used as fresh cut flowers, fresh cut decorative foliage, dried, preserved, and processed flowers or dried and preserved decorative foliage, produced either under cover or in field operations.

(d) The term "potted flowering plants" means those plants that normally produce flowers, primarily produced in pots or similar containers, that are primarily used for interior decoration, whether grown under cover or in field operations.

(e) The term "foliage plants" means those plants, normally without flowers, primarily produced in pots or similar containers, that are primarily used for interior decorations, whether grown under cover or in field operations.

(f) The term "propagational material" means any plant material used in the propagation of the three categories included in subsections (c), (d), and (e) of this section, including cuttings, bulbs, and corms, seedlings, canes, liners, plants, cells or tissue cultures, air layers and bublets, rhizomes, and root stocks. This term does not include seeds.

(g) The term "flowers and plants" means all of the items included in subsections (c), (d), (e), and (f) of this section.

(h) The term "United States" means the fifty States of the United States of America, the territories and possessions of the United States of America, and the District of Columbia.

(i) The term "promotion" means any action, including paid advertising, to advance the image or desirability of cut flowers, potted flowering plants, and/or foliage plants.

(j) The term "research" means any type of research to advance the image, desirability, or marketability of cut flowers, potted flowering plants, and/or foliage plants.

(k) The term "consumer education" means any action to provide information on the care and handling of cut flowers, potted flowering plants, and/or foliage plants.

(l) The term "marketing" means the sale or other disposition of commercial cut flowers, potted flowering plants, and/or foliage plants.

(m) Unless otherwise noted, the term "producer" means any person who produces domestically, for sale in commerce, cut flowers, potted flowering plants and/or foliage plants.

(n) The term "Floraboard" means the board that shall be established pursuant to Section 7 of this Act.

(o) The term "importer" means any person who either imports cut flowers, potted flowering plants, and/or foliage plants from outside of the United States or who acts as an agent, broker, or consignee of any person or nation that produces flowers and plants outside of the United States for sale in the United States.

(p) The term "commodity group" means that portion of the flower and plant industry devoted to the production and/or importation of any one of the following: (i) cut flowers; (ii) potted flowering plants; or (iii) foliage plants.

(q) The term "cost of plant material" means the actual price paid by a producer or any propagational material or any other flowers and plants used in the production of flowers and plants. This term does not include the cost of seeds.

FLORAL RESEARCH AND PROMOTION ORDERS

SEC. 4. To effectuate the declared policy of this Act, the Secretary shall, subject to the provisions of this Act, issue and, from time to time, may amend orders applicable to persons engaged in production, sale, importation, and/or handling of flowers and plants. Such orders shall be applicable to all production or marketing areas, or both, in the United States.

NOTICE AND HEARING

SEC. 5. Whenever the Secretary has reason to believe that the issuance of an order will tend to effectuate the declared policy of this Act, he shall give due notice and opportunity for hearing upon a proposed order. Such hearing may be requested and proposal for an order submitted by an organization certified pursuant to Section 16 of this Act, or by any interested person affected by the provisions of this Act, including the Secretary.

FINDING AND ISSUANCE OF AN ORDER

SEC. 6. After notice and opportunity for hearing as provided in Section 5, the Secretary shall issue an order if he finds, and sets forth in such order, upon the evidence introduced at such hearing, that the issuance of such order and all the terms and conditions thereof will tend to effectuate the declared policy of this Act.

REQUIRED TERMS IN ORDERS

SEC. 7. Orders issued pursuant to this Act shall contain the following terms and conditions and except as provided in Section 8, no others:

(a) Providing for the establishment and appointment by the Secretary of a board to be named "Floraboard," which shall consist of not more than seventy-five (75) voting members, and defining its powers and duties, which shall include only the powers (1) to administer such order in accordance with its terms and provisions, (2) to make rules and regulations to effectuate the terms and provisions of such order, (3) to receive, investigate, and report to the Secretary complaints of violations of such order, and (4) to recommend to the Secretary amendments of such order. The term of an appointment to the Floraboard shall be for three years with no member serving more than two consecutive three-year terms; *Provided,* That of the initial appointments, one-third shall be for a term of one year and one-third shall be for a term of two years; *Provided, further,* That the Floraboard shall appoint from its members an executive committee, consisting of not more than fifteen (15) members, whose membership shall, to the maximum extent practicable, reflect the membership composition of the Floraboard, and whose commodity group representation shall be proportional to that of the Floraboard. Such executive committee shall have the authority to employ a staff and conduct routine business within the policies determined by the Floraboard.

(b) Providing that the Floraboard shall be composed of producers and importers appointed by the Secretary from nominations submitted by organizations certified pursuant to Section 16, or if the Secretary determines that a substantial number of producers and/or importers are not members of or their interests are not represented by any such certified organizations, then from nominations made by such producers and/or importers in a manner authorized by the Secretary. Certified organizations shall submit one nomination for each position on the Floraboard. Initially, the Floraboard shall be divided into thirds, each of which shall be composed of producers and importers from each commodity group; *Provided,* That two years after assessment of funds commences pursuant to an order, and periodically thereafter, the Floraboard shall adjust the commodity group representation on the board on the basis of the amount of assessments, less refunds, collected from each commodity group; *Provided, further,* That there shall at all times be more producers representing a particular commodity group on the Floraboard than importers representing that commodity group. In addition to commodity group representation, the periodic adjustment of the membership of the Floraboard shall reflect, to the maximum extent practicable, the proportionate share of assessments, less refunds collected from producers of flowers and plants produced in each of several geographic areas of the United States to be defined by the Secretary and the proportionate share of assessments, less refunds collected from importers of flowers and plants imported into the United States from each country.

(c) Providing that the Floraboard shall, subject to the provisions of subsection (h) of this section, develop and submit to the Secretary for his approval any advertising, sales promotion, consumer education, research and development plans or projects, and that any such plan or project must be approved by the Secretary before becoming effective.

(d) Providing that the Floraboard shall, subject to the provisions of subsection (h) of this Section, submit to the Secretary for his approval budgets on a fiscal period basis of its anticipated expenses and disbursements in the administration of the order, including probable costs of advertising, promotion, consumer education, research, and development projects.

(e) Providing that each producer shall pay for each sale pursuant to procedures to be set forth in the order, an assessment to the Floraboard on any flowers and plants sold in the United States. The assessment shall be based on the dollar value in such sales transaction minus the cost of plant material in a manner to be prescribed by the order. The assessment shall be used for such expenses and expenditures—including provision for a reasonable reserve and those administrative costs incurred by the Department of Agriculture after an order has been promulgated under this Act—as the Secretary finds are reasonable and likely to be incurred by the Floraboard under the order during any period specified by him. For any imported flowers and plants, the importer will pay an assessment on the first stateside sale. The cost of plant material shall not be deducted from the value of imported flowers. If the importer is a retailer, the assessment will be made on the laid-in cost (purchase price). Regarding sales by producers/retailers, the assessment will be based on the then current wholesale value of the flowers and plants less the cost of plant material. In the case of consignment sales, the assessment shall be based on the value of the sale less the sales commission, stateside freight, and the cost of plant material.

(f) Providing that the initial rate of assessment prescribed by the order, which rate shall remain in effect for the first two years after such order shall be approved in referendum, shall not exceed one-half of one percent (½%) of the value of flowers and plants; *Provided,* That the Floraboard may

thereafter increase or decrease the rate of assessment prescribed by the order by no more than one quarter of one percent (¼%) per year; *Provided further*, That in no event shall the rate of assessment exceed one and one-half percent (1½%) of the value of flowers and plants.

(g) Providing that the Floraboard shall maintain such books and records and shall prepare and submit such reports from time to time to the Secretary as he may prescribe, and for appropriate accounting by the Floraboard with respect to the receipt and disbursement of all funds entrusted to it.

(h) Providing that the Floraboard, with the approval of the Secretary, may enter into contracts or agreements for development and carrying out of the activities authorized under the order pursuant to Section 8 (a) and (b) and for the payment of the cost thereof with funds collected pursuant to the order. The Floraboard may contract with industry groups, profit or non-profit companies, private and state colleges and universities, and governmental groups. Any such contract or agreement shall provide that the contractor shall develop and submit to the Floraboard a plan or project together with a budget or budgets which shall show estimated costs to be incurred for such plan or project, and that any such plan or project shall become effective upon the approval of the Secretary, and, further, shall provide that the contracting party shall keep accurate records of all of its transactions and make periodic reports to the Floraboard of activities carried out and accounting for funds received and expended, and such other reports as the Secretary may require.

(i) Providing that the Floraboard may convene from time to time advisory panels drawn from the production, importation, wholesale, and retail segments of the flower and plant industry to assist in the development of marketing and research programs.

(j) Providing that no funds collected by the Floraboard under the order shall in any manner be used for the purpose of influencing governmental policy or action, except as provided by subsection (a) (4) of this section.

(k) Providing the Floraboard members and members of any advisory panels convened shall serve without compensation but shall be reimbursed for their reasonable expenses incurred in performing their duties as members of the Floraboard or advisory panel.

PERMISSIVE TERMS IN ORDERS

SEC. 8. Orders issued pursuant to this Act may contain one or more of the following terms and conditions:

(a) Providing for the establishment, issuance, effectuation, and administration of appropriate plans or projects for advertising, sales promotion, urban beautification, and consumer education with respect to the use of flowers and plants, and for the disbursement of necessary funds for such purposes; *Provided*, That any such plan or project shall be directed toward increasing the general demand for flowers and plants and shall make no reference to a private brand or trade name; *Provided, further*, That no such advertising, consumer education, urban beautification, or sales promotion programs shall make use of unfair or deceptive acts or practices with respect to quality, value, or use of any competing product.

(b) Providing for, establishing, and carrying on research, marketing, and development projects, and studies with respect to sale, distribution, marketing, or utilization of flowers and plants, to the end that the marketing and utilization of flowers and plants may be encouraged, expanded, improved or made more acceptable, and the data collected by such activities may be disseminated and providing for the disbursement of necessary funds for such purposes.

(c) Providing that producers, wholesalers, retailers, and importers of flowers and plants maintain and make available for inspection such books and records as are specified in the order and that such persons file reports at the time, in the manner, and having the content prescribed by the order, to the end that information and data shall be made available to the Floraboard and to the Secretary which is appropriate or necessary to the effectuation, administration, or enforcement of the Act, or any order or regulation issued pursuant to the Act; *Provided*, That all information so obtained shall be kept confidential by employees of the Department of Agriculture and the Floraboard, and only such information as the Secretary deems relevant shall be disclosed by them, and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary, or in a suit or administrative hearing to which he or any officer of the United States is a party, and involving the order with reference to which the information to be disclosed was furnished or acquired. Nothing in this Section shall be deemed to prohibit (1) the issuance of general statements based upon the reports of the number of persons subject to an order, or statistical data collected therefrom, which statements do not identify the information furnished by any person, (2) the publication by the Floraboard of general statements relating to refunds made by the Floraboard during any specific period, including regional information on refunds, (3) the publication by the Floraboard of information on the amount of assessments collected from each commodity group and the rate of refund in each commodity group, or (4) the publication by direction of the Secretary of the name of any person violating any order, together with a statement of the particular provisions of the order violated by such person. Any such person violating the provision of this subsection shall, upon conviction, be subjected to a fine of not more than $1,000 or to imprisonment for not more than one year, or to both, and if an officer or employee of the Floraboard or the Department of Agriculture shall be removed from office; *Provided further*, That no information obtained pursuant to the authority of this Act shall be made available to any agency or officer of the Federal Government for any purpose other than the implementation of this Act and any investigatory or enforcement actions necessary for the implementation of this Act.

(d) Terms and conditions incidental to and not inconsistent with the terms and conditions specified in this Act and necessary to effectuate the other provisions of such order.

REQUIREMENT OF REFERENDUM

SEC. 9. (a) The Secretary shall conduct a referendum among domestic producers and importers not exempt hereunder who, during a representative period determined by the Secretary, have been engaged in the production or importation of flowers and plants for the purpose of ascertaining whether the issuance of an order is approved or favored by such domestic producers and importers. No order issued pursuant to this Act shall be effective unless the Secretary determines that the issuance of such order is approved or favored by not less than two-thirds of the producers and importers voting in such referendum, or by a majority of the producers and importers voting in such referendum if such majority produced and imported not less than two-thirds of the total value of the flowers and plants produced and imported by those producers and importers voting in such referendum during a representative period defined by the Secretary.

(b) The Secretary shall be reimbursed from assessments for any expenses incurred for the conduct of the referendum. For the purpose of this subsection, the term "expenses incurred for the conduct of the referendum" shall include all costs incurred by the government in connection therewith, except for the salaries of government employees.

(c) The Floraboard may reimburse from assessments organizations which sought the adoption of an order in referendum for reasonable and properly-documented expenses incurred in connection therewith. For the purposes of this subsecton, "reasonable and properly-documented expenses" shall include legal fees, travel expenses, and educational expenses incurred in securing industry agreement on the terms of the order that is approved in a referendum of producers.

SUSPENSION AND TERMINATION OF ORDERS

SEC. 10. (a) The Secretary shall, whenever he finds that any order issued under this Act, or any provisions thereof, obstructs or does not tend to effectuate the declared policy of this Act, terminate or suspend the operation of such order or such provisions thereof.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of 10 per centum or more of the number of producers and importers voting in the referendum approving the order, to determine whether such producers and importers favor the termination or suspension of the order, and he shall suspend or terminate such order six months after he determines that suspension or termination of the order is approved or favored by a majority of the producers and importers voting in such referendum who, during a representative period determined by the Secretary, have been engaged in the production or importation of flowers and plants.

(c) The termination or suspension of any order, or any provision thereof, shall not be considered an order within the meaning of this Act.

PROVISIONS APPLICABLE TO AMENDMENTS

SEC. 11. The provisions of this Act applicable to orders shall be applicable to amendments to orders.

EXEMPTIONS

SEC. 12. Any producer or importer whose total sales of flowers and plants do no exceed $100,000 during a twelve consecutive month period prior to the date an assessment is due and payable shall be exempt from assessments under this Act under such conditions and procedures as may be prescribed in the order or rules and regulations issued thereunder and shall not vote in any referendum under this Act; *Provided*, That the Floraboard shall have the discretion to make annual adjustments in the level of exemption to account for inflation. For the purpose of this section, a producer's or importer's total sales shall include, in those cases where the producer or importer is an individual, sales attributable to his spouse, children, grandchildren and parents; in those cases where the producer or importer is a partnership or a member of a partnership, sales attributable to the other partners; and, in those cases where the producer or importer is a corporation, sales attributable to any corporate subsidiaries of which such corporation owns 50 percent or more of the stock, or if such subsidiaries are not corporations, subsidiaries which are controlled by such corporation. In addition, in determining a producer's or importer's total sales, the sales of any corpora-

tion in which such producer or importer owns 50 percent or more of the stock shall be attributed to such producer or importer. For these purposes stock in the same corporation which is owned by such producer's or importer's spouse, children, grandchildren, parents, partners and any corporation 50 percent or more of whose stock is owned by the producer or importer shall be treated as owned by the producer or importer.

PRODUCER OR IMPORTER REFUND

SEC. 13. Notwithstanding any other provisions of this Act, any producer or importer who pays an assessment shall have the right to demand and receive from the Floraboard a refund of such assessment; *Provided*, That such demand shall be made by such producer or importer in accordance with regulations and on a form and within a time period prescribed by the Floraboard and approved by the Secretary, but in no event more than 60 days after the end of the month in which the assessment was paid. No later than 60 days after submission of proof satisfactory to the Floraboard that the producer or importer paid the assessment for which refund is sought such refund shall be made.

PETITION AND REVIEW

SEC. 14. (a) Any person subject to any order may file a written petition with the Secretary, stating that any such order or any provisions of such order or any obligations imposed in connection therewith is not in accordance with law and praying for a modification thereof or to be exempted therefrom. He shall thereupon be given an opportunity for a hearing upon such petition, in accordance with regulations made by the Secretary. After such hearing, the Secretary shall make a ruling upon the prayer of such petition which shall be final, if in accordance with law.

(b) The district courts of the United States in any district in which such person is an inhabitant, or has his principal place of business, are hereby vested with jurisdiction to review such ruling, provided a complaint for that purpose is filed within twenty days from the date of the entry of such ruling. Service of process in such proceedings may be had upon the Secretary by delivering to him a copy of the complaint. If the court determines that such ruling is not in accordance with law, it shall remand such proceedings to the Secretary with directions either (1) to make such ruling as the court shall determine to be in accordance with law, or (2) to take such further proceedings as, in its opinion, the law requires. The pendency of proceedings instituted pursuant to subsection (a) of this Section shall not impede, hinder, or delay the United States or the Secretary from obtaining relief pursuant to Section 15(a).

ENFORCEMENT OF THE ACT

SEC. 15. (a) The several district courts of the United States are vested with jurisdiction specifically to enforce, and to prevent and restrain any person from violating, any plan or regulation made or issued pursuant to this Act. Any civil action authorized to be brought under this subsection shall be referred to the Attorney General for appropriate action: *Provided*, That nothing in this Act shall be construed as requiring the Secretary to refer to the Attorney General violations of this Act whenever he believes that the administration and enforcement of the program would be adequately served by administrative action pursuant to paragraph (b) of this Section or suitable written notice or warning to any person committing such violations.

(b)(1) Any person who violates any provisions of any order or regulation issued by the Secretary pursuant to this Act, or who fails or refuses to pay, collect, or remit any assessment or fee duly required of him thereunder, may be assessed a civil penalty by the Secretary of not less than $500 or more than $5,000 for each such violation. Each violation shall be a separate offense. In addition to or in lieu of such civil penalty the Secretary may issue an order requiring such person to cease and desist from continuing such violation or violations. No penalty shall be assessed or cease and desist order issued unless such person is given notice and opportunity for a hearing before the Secretary with respect to such violation, and the order of the Secretary assessing a penalty or imposing a cease and desist order shall be final and conclusive unless the affected person files an appeal from the Secretary's order with the appropriate United States court of appeals.

(2) Any person against whom a violation is found and a civil penalty assessed or cease and desist order issued under paragraph (b)(1) of this Section may obtain review in the court of appeals of the United States for the circuit in which such person resides or has his place of business or in the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within thirty days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence.

(3) Any person who fails to obey a cease and desist order after it has become final and unappealable, or after the appropriate court of appeals has entered final judgment in favor of the Secretary, shall be subject to a civil penalty assessed by the Secretary, after opportunity for a hearing and for judicial review pursuant to the procedures specified in paragraphs (b)(1) and (2) of this Section, of not more than $500 for each offense, and each day during which such failure continues shall be deemed a separate offense.

(4) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court of appeals has entered final judgment in favor of the Secretary, the Secretary shall refer to the matter to the Attorney General who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

CERTIFICATION OF ORGANIZATIONS

SEC. 16. The eligibility of any organization to represent (i) commercial producers of flowers and plants of any producing area of the United States or (ii) importers of flowers and plants as defined in Section 3(n) of this Act, for purposes of requesting the issuance of an order under Section 5 or making nominations under Section 8(b), shall be certified by the Secretary. Certification shall be based, in addition to other available information, upon a factual report submitted by the organization which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including, but not limited to, the following:

(a) Geographic territory covered by the organization's active membership,

(b) Nature and size of the organization's active membership, the proportion of such active membership accounted for by producers and/or importers, and information as to the volume of production by state or the volume of importation by country accounted for by the organization's producer and/or importer members.

(c) The extent to which the producer and/or importer membership of such organization is represented in setting the organization's policies,

(d) Evidence of stability and permanency of the organization,

(e) Sources from which the organization's operating funds are derived,

(f) Functions of the organization,

(g) Whether the majority of the governing board of the organization is composed of producer and/or importers, and

(h) The organization's ability and willingness to further the aims and objectives of this Act; *Provided*, that the primary consideration in determining the eligibility of any organization shall be whether its producer and importer membership consists of a substantial number of producers and importers who produce and/or import a substantial volume of flowers and plants. The Secretary shall certify any organization which he finds to be eligible under this Section and his determination as to eligibility shall be final. Where more than one organization is certified in any geographic area, such organizations may caucus to determine the area's nominations under Section 7(b).

REGULATIONS

SEC. 17. The Secretary is authorized to make regulations with force and effect of law, as may be necessary to carry out the provisions of this Act and the powers vested in him by this Act.

INVESTIGATIONS; POWER TO SUBPOENA AND TAKE OATHS AND AFFIRMATIONS; AID OF COURTS

SEC. 18. The Secretary may make such investigations as he deems necessary for the effective carrying out of his responsibilities under this Act or to determine whether a producer, importer, wholesaler, retailer, or other seller of flowers and plants, or any other person has engaged or is about to engage in any acts or practices which constitute or will constitute a violation of any provisions of this Act, or of any order, or rule or regulation issued under this Act. For the purpose of such investigation, the Secretary is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents which are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States. In case of contumacy by, or refusal to obey a subpoena to, any person, including a producer of flowers and plants, the Secretary may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents; and such court may issue an order requiring such person to appear before the Secretary, there to produce records, if so ordered, or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All processes in any such cases may be served in the judicial district whereof such person is an inhabitant or wherever he may be found.

SEPARABILITY

SEC. 19. If any provision of this Act or the application thereof to any person or circumstances is held invalid, the validity of

the remainder of the Act and of the application of such provision to other persons and circumstances shall not be affected thereby.

AUTHORIZATION

SEC. 20. There is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated such funds as are necessary to carry out the provisions of this Act. The funds so appropriated shall not be available for payment of the expenses or expenditures of the Floraboard in administering any provisions of any order issued pursuant to the terms of this Act.

EFFECTIVE DATE

SEC. 21. This Act shall take effect upon enactment.

Mr. HAYAKAWA. Mr. President, this amendment would allow the floral industry to establish a promotion, research, consumer education, and marketing program. I do this with the hope that American growers will be allowed to decide if they wish to follow in the direction of other agricultural groups which have successfully utilized similar research and promotion programs.

Known as the "Floral Research and Consumer Information Act," or "Floraboard," my amendment comes from the need of the industry to stimulate consumer demand for floral products. While floricultural production capability and product quality have both steadily increased, our domestic flower and plant industry continues to fall short of its potential in the marketplace. In fact, demand for flowers has remainder constant for the past 6 years.

Yet other agricultural commodity groups have had similar problems. The egg, wheat, wool, cotton, and potato industries all faced trends of declining demand for their products. For these industries, research and promotion programs have been instrumental in reversing these trends.

I believe that my amendment will likewise provide the necessary assistance to the many small- and medium-sized businesses that make up our domestic flower industry—at no cost to the taxpayer.

Mr. President, I yield back the remainder of my time. I think this has been agreed upon on both sides of the aisle.

Mr. DOLE. Mr. President, I am authorized by the Senator from North Carolina to accept this. I have not yet checked with the Senator from Kentucky on this amendment. I understand there may be no opposition to the amendment but there is some concern because hearings have not been held on the Senate side. It is my understanding that hearings were held on the House side, but I suggest to those who have concerns, they may be expressed between now and the time this bill goes to conference.

As I understand it, the chairman has no objection to taking the amendment on that basis. Has the Senator from California cleared this with the Senator from Kentucky?

Mr. HAYAKAWA. I have not, Mr. President. I understand that there has been one question raised, why this does not include retail florists as well as flower growers. The reason is very simple: Flower growers pay an assessment; the retail florist shops do not. This is an association of growers to promote the flower industry.

Mr. DOLE. The Senator from Kansas, among others, was contacted by the FTD. I have indicated their concern to the Senator from California. I understand if there is a real problem that should be addressed, it can be addressed between now and the time this bill goes to conference.

Mr. HAYAKAWA. Mr. President, I inform the distinguished Senator from Kansas that the FTD testified today in the House that they have reservations but they seemed to support floraboard.

Mr. DOLE. Mr. President, I suggest the absence of a quorum while we check with Senator HUDDLESTON.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, may we lay this amendment aside while we talk with the Senator from Kentucky?

Mr. HAYAKAWA. Mr. President, it is my understanding that it has been cleared with him by a member of my staff.

Mr. DOLE. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—AMENDMENT NO. 550

Mr. BAKER. Mr. President, I understand that the principals now are in agreement on the time limitation on an amendment to be offered by the distinguished Senator from New Hampshire (Mr. HUMPHREY), amendment No. 550. I ask unanimous consent, on the same terms and conditions as the previous request in respect to other matters, that there be a time limitation of 20 minutes equally divided on the amendment to be offered by the Senator from New Hampshire (Mr. HUMPHREY), numbered 550.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank all Senators.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I inquire of the distinguished Senator from Kansas whether he would like to set aside the amendment temporarily and take up a couple of amendments previously agreed to.

Mr. DOLE. First of all, it has been agreed to recognize the Senator from Missouri. There may be a couple of noncontroversial amendments, but I do not know that the Senator from Montana has anything like that. [Laughter.]

Mr. EAGLETON. Mr. President, if there are other amendments to be disposed of in an expeditious way, that is acceptable.

Mr. MELCHER. I advise the Senator from Kansas that these are not controversial.

Mr. DOLE. Maybe the Senator can offer them en bloc.

Mr. MELCHER. I would like to.

UP AMENDMENT NO. 379

(Purpose: To memorialize the International Trade Commission)

Mr. MELCHER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. Without objection, the pending amendment will be set aside.

The amendment offered by the Senator from Montana will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER), for himself and Mr. DURENBERGER, proposes an unprinted amendment numbered 379.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 136, between lines 9 and 10, insert the following new section 107:

"CONGRESSIONAL FINDINGS

"SEC. 107. (a) The Agricultural Act of 1949 (7 U.S.C. 1446) directs the Secretary of Agriculture to support the price of milk so as to assure the domestic production of an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity sufficient to meet future anticipated needs.

"(b) Section 22 of the Agricultural Adjustment Act (7 U.S.C. 634) provides that whenever the Secretary of Agriculture has reason to believe that imports of any product render or tend to render ineffective or materially interfere with the effective operation of a price support or similar program of the United States Department of Agriculture or that such imports reduce substantially the amount of any product processed in the United States from any agricultural commodity for which such price support or similar program is in effect, he shall so advise the President who shall, if he agrees there is reason for such belief, cause an immediate investigation by the United States International Trade Commission to determine the facts, he shall impose fees not to exceed 50 percent ad valorem or quantitative limita-

tions of not less than 50 percent of the quantity entered during a representative period on such imported products.

"(c) United States Department of Agriculture investigations have documented the fact that imports of milk protein products increased the cost of the Dairy Support Program conducted by the Secretary of Agriculture by $300 million during 1980 and that such added costs under the program will rise in the future.

"(d) On the basis of these findings, the Secretary of Agriculture has advised the President that the import of milk protein products into the United States causes material interference with the Department of Agriculture's price support program for milk and the President has directed an investigation by the United States International Trade Commission as provided for under Section 22 of the Agricultural Adjustment Act.

"(e) Congress finds that the $300 million added cost of the Dairy Price Support Program resulting from these imports does represent material interference with the Dairy Price Support Program and that the prospect of additional future costs will further interfere with achievement of the purpose and intent of the program.

"(f) To relieve such interference, the Congress further finds that limitations on the import of milk protein products, including but not limited to casein, mixtures of casein, latalbumin, and whey protein concentrates or mixtures containing 5 percent or more of these products that may enter the customs territory of the United States in any calendar year should be established in accordance with Section 22 of the Agriculture Adjustment Act. Such annual limitation should be no more than the average of such imports into the United States during the five-year period preceding 1981.

"(g) It is directed that the Secretary of the Senate transmit these findings to the Chairman of the United States International Trade Commission with the request that it be made part of the record of the investigation now being conducted by the said Commission on the import of such milk protein products."

Mr. MELCHER. Mr. President, this is a measure with respect to imported casein. It has been discussed with the chairman of the committee and with others. It would direct the Secretary of Agriculture to look at whether or not the policy we have on imported casein is good. We are looking at it right now. The President is doing that under section 22 of the Agriculture Adjustment Act, directing an international trade commission investigation.

I am gratified that the President has acted under the terms of section 22 of the Agricultural Adjustment Act directing an International Trade Commission investigation into the impact of the import of milk protein products on the dairy price support program.

Earlier this year, the Senate discussed this issue in some detail. Concern was expressed at that time that action to limit imports of milk protein products might be premature.

The Department of Agriculture was in the midst of a study aimed at determining the impact of these imports on the dairy price support program.

Concerns were expressed that legislative actions dictating such import restraints might be construed as a violation of U.S. international trade agreements. It was also argued that the law itself, section 22, set forth specific procedures to be followed in the development and establishment of such limitations.

We are now at a point where these concerns are answered or can be answered.

The Department of Agriculture has completed its examination of the issue. In its report, "U.S. Casein and Lactalbumin Imports: An Economic and Policy Perspective," USDA has concluded that imports of these products reduced the use of domestic milk solids by the equivalent of 333 million pounds of nonfat dry milk in 1980.

Noting this, the report states:

Thus, Government purchases of nonfat dry milk would be 333 million pounds lower, saving about $300 million in Commodity Credit Corporation (CCC) outlays.

The further conclusion is drawn that if nothing is done to restrain imports, the added costs to the price support program will continue and increase.

The National Milk Producers Federation has made a thorough review of it.

Acting on this information, the Secretary of Agriculture did, in late June, advise the President that there is reason to believe that unrestrained imports of these products are interfering with the effective operation of the dairy price support program. At the same time, it was recommended that the President direct the U.S. International Trade Commission to undertake an investigation of the situation for the purpose of providing a report to the President as required by the provisions of section 22. That investigation has now been ordered.

Thus, the concerns of early spring are behind us. The procedures have been set in motion that will lead to establishment of the needed import restraints.

Or does that prejudge the issue?

Section 22 of the Agricultural Adjustment Act has been approved by the Congress for the specific purpose of providing a means of preventing unneeded and unnecessary imports of products from interfering with the effective operation of a domestic price support or similar program.

The $300 million added program costs as the result of imports represents interference on a massive scale.

Over the past several months, we have been deeply involved in actions to reduce Federal spending. The budget resolution and the reconciliation bill approved by the Senate have brought the reality of the effort to each of us.

In the development of other legislation, the legislative committees have labored under the most rigorous type of restraint as the result of this budget process.

The bill before us at this time, the Agriculture and Food Act of 1981, is a shadow of what is actually needed by the American farmers. It is purely a product of the budget process. In the Agriculture Committee, we took two sets of actions. First, the committee developed a bill that it felt would meet the needs of producers and consumers. Then, when that set of programs failed to fit within the constraints of the budget process, we rewrote the programs.

We have done much in the name of budget cutting. But there are other steps that can be taken. The amendment I have proposed expresses the view of the Congress that the $300 million added cost to the dairy price support program determined to be a result of these imports, and the prospect of increased additional costs in the future does represent material interference with the dairy price support program.

Further, as a means of relieving this interference, the amendment expresses the view that import restraints, under the authority provided in section 22 of the Agricultural Adjustment Act, should be established on the import of milk protein products, including but not limited to casein, mixtures of casein, lactalbumin and whey protein concentrates or mixtures containing 5 percent or more of these products at a level of no more than the average of such imports into the United States during the past 5 years,

Frankly, import restraints of that magnitude are very mild. For casein, for example, this would mean an annual limitation of 139.3 million pounds. According to the USDA study, imports of casein in 1980 totaled 152.2 million pounds. However, only 128.1 pounds of that total was used for products consumed last year. The balance was used in products that were later exported from the United States—1 million pounds—or went into inventory—23.1 million pounds.

Thus, a limitation of this magnitude would be applying a brake to the process that is now piling up added Government costs, eroding the market for domestic milk, and reducing the effectiveness of the dairy price support program.

The dairy price support program does face serious challenges. The expansion of milk production over the past 2 years and reduced consumption due to a lower level of general economic activity have resulted in greatly increased purchases of dairy products by the Commodity Credit Corporation.

Dairy farmers have recognized this fact and have initiated programs seeking to reduce milk production. They have recognized it in their recommendations to the Congress in connection with this legislation.

The program has been the target of major effort by the administration in its budget cutting operations. The first piece of legislation dealing with budget reduction to come before the Congress was a measure to set aside the scheduled April 1, 1981 semiannual adjustment of the dairy price support level.

It was argued that such action would reduce Government costs by $149 million. Passage of that legislation by a vote of 88 to 5 indicated the depth of support for budget reduction in the Senate.

In the legislation before us at this time, further major reductions are proposed for the dairy price support program. We have told and are telling the dairy farmers of the country that the level of price assurance afforded under the program will be lower than it has been. It is said that this is necessary to restore soundness to the price-support program. It is said this is necessary to restore a more normal supply-demand balance to the dairy industry.

In recent weeks, the Secretary of Agriculture has stated that action must be taken to cut back the dairy price support program or the farm bill will face a Presidential veto. In S. 884, we have cut the program back substantially.

But other steps can be taken that will help to achieve these goals.

According to USDA, 333 million pounds of the nonfat dry milk purchased by the Commodity Credit Corporation was produced from skim milk that had been displaced by imported milk protein, $300 million of the dairy price support program outlays were forced on the Government by this displacement.

This represents interference with the dairy price support program on a massive scale.

It represents lost commercial markets for domestic dairy products.

It represents an added burden to the American taxpayer.

The process to bring this drain under control has now been put in motion. In keeping with the thrust of congressional efforts to reduce and control Government expenditures and as an expression of support for the actions of the Secretary of Agriculture and the President, this amendment will provide direction to the efforts of the International Trade Commission in their investigation.

I urge its adoption.

Mr. DOLE. Mr. President, I have spoken to the chairman of the committee with respect to this amendment. I understand that it is not controversial, and he will accept it. I understand that there is no objection by the Senator from Kentucky.

I am prepared to yield back the remainder of my time.

Mr. MELCHER. I thank the distinguished Senator.

I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 379) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from California.

Mr. DOLE. Mr. President, I again ask that that amendment be temporarily set aside, so that we may consider "noncontroversial" amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Iowa is recognized.

AMENDMENT NO. 539

(Purpose: To express the sense of the Senate that the Secretary of Agriculture should draw attention to the benefits of, and conduct additional research on, conservation tillage)

Mr. GRASSLEY. Mr. President, I call up amendment No. 539, and ask unanimous consent that the name of the Senator from South Dakota (Mr. PRESSLER) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY), for himself and Mr. PRESSLER, proposes amendment numbered 539.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Wtihout objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert the following new section:

CONSERVATION TILLAGE

SEC. 112. (a) The Congress finds that—

(1) domestic and international demand for agricultural products from the United States is great and is expected to significantly increase over the next twenty years;

(2) the ability of the United States to provide agricultural products to meet that demand is seriously impaired by the annual loss of five billion tons of soil due to wind and water erosion;

(3) the battle against soil erosion is being lost despite the annual expenditure of millions of dollars by the Federal Government on research, technical assistance, and conservation incentives to control soil erosion;

(4) conservation tillage practices are estimated to reduce soil erosion by 50 to 90 per centum over conventional farming practices; and

(5) conservation tillage may result in better yields, greater land use flexibility, decreased fuel use, decreased labor and equipment costs, increased retention of soil moisture, and more productive land than that provided by conventional farming practices and may be adaptable to a broad range of soil types and slopes throughout the country.

(b) It is the sense of the Congress that the Secretary of Agriculture should, and is hereby urged and requested to—

(1) direct the attention of our Nation's farmers to the costs and benefits of conservation tillage as a means of controlling soil erosion and improving profitability; and

(2) conduct a program of research designed to resolve any unanswered questions regarding the advantages and disadvantages of conservation tillage over other soil conservation practices.

The PRESIDING OFFICER. On this amendment there are 30 minutes, equally divided.

Mr. GRASSLEY. Mr. President, the purpose of this amendment is to draw the attention of our Nation's farmers to conservation tillage—an available, yet underutilized conservation practice that can significantly curb soil erosion, as well as enhance our farmers' incomes. Despite the amendments simplicity, its potential benefit should not be underestimated.

The resolution requests the Secretary of Agriculture to direct the attention of our Nation's farmers to the costs and benefits of conservation tillage as a means of controlling soil erosion and improving profitability. It also requests that the Secretary conduct a program of research designed to resolve any unanswered questions regarding the advantages and disadvantages of conservation tillage over other soil conservation practices.

It is clear that soil erosion has become a major national problem. Consequently, it should be the role of Congress to provide help and exhibit leadership in fighting soil erosion. One way Congress can help out is by passing laws authorizing soil conservation programs and offering incentives.

In this light, I am very pleased that the Senate Agriculture Committee wisely chose to include, for the first time, soil conservation provisions in the farm bill. Moreover, I believe additional soil conservation legislation should be passed once the administration completes its Resource Conservation Act study and once the Senate Finance Committee completes work on conservation tax incentive proposals.

But beyond this, there is another role Congress can play in this fight—and that is by simply exhibiting leadership by drawing attention to conservation practices that have built-in incentives and benefits. Conservation tillage is one of these practices.

Conservation tillage may be a new term to many of my colleagues, but as a practice, it has been around for several years. During the early 1960's, about 4 million acres were under conservation tillage; by 1980, about 60 million acres benefited from this practice.

Briefly, conservation tillage is a comprehensive system for planting and cultivating crops which is aimed at: Minimizing the cost and time required to plant a crop, thus increasing net farm income and reducing soil erosion and preserving soil moisture in order to maintain or increase crop yields. Other names for this practice include reduced tillage, minimum tillage, and no-till farming.

Instead of going into a lot of detail, I ask unanimous consent to have printed in the RECORD, at the conclusion of my remarks, a report on conservation tillage that was recently completed for me by the Library of Congress. This report analyzes the costs and benefits of using conservation tillage as opposed to conventional farming practices. I urge my colleagues to study this report and relay its contents to the farmers from their home States.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRASSLEY. Mr. President, my request for this report. and my subse-

quent offer of this resolution, was prompted by increasing interest exhibited by my constituents for the promotion of conservation tillage. They pointed out to me that, despite the benefits of this practice, far too few farmers have converted to this system of farming.

This fact could not be better illustrated than by the present situation in my home State of Iowa. Iowa has the misfortune of leading the Nation in soil erosion. During 1980, only 9 million acres out of Iowa's approximately 26 million acres of cropland, received sufficient conservation treatment.

In fact, during this same year, 4.3 million acres suffered erosion levels higher than 10 tons of soil lost per acre during the month of June alone.

In no way can this dismal record be attributed to lack of effort—Iowa has available to it over 30 Federal programs that assist soil conservation efforts by providing loans, cost-sharing funds, research, and educational and technical assistance, which were utilized by over 170,000 land users. Furthermore, over $14 million from State, local, and private contributions were directed toward conservation work—an effort exceeded by no other State in the country.

What very well may have been the missing ingredient in this effort, was the failure to more widely utilize conservation tillage. The report that I have submitted for the RECORD reveals that conservation tillage could reduce soil erosion by 50 to 90 percent over conventional farming.

During 1980, fewer than half of Iowa's farmland was conventionally plowed; however, only a little over 111,000 acres received strictly no-till farming. It was recently reported that almost every acre of row and small-grain crops in Iowa could be placed under conservation tillage. I believe the implications are clear.

Consequently, I believe it is in our national interest to do all we can to direct the attention of our farmers to this practice. I believe there is much to be gained by doing so, and I urge Senators to support my amendment.

Mr. President, I have cleared this matter with the minority manager of the bill as well as the majority manager, and I do not believe there are any questions.

EXHIBIT 1

ABSTRACT

Conservation tillage is a concept or set of criteria for farm production practices, rather than a particular set of tillage practices.

Conservation tillage practices are undertaken primarily for two reasons: (1) to minimize cost and time required to plant a crop, thereby increasing net farm income; and (2) to reduce soil erosion and preserve soil moisture in order to maintain or increase crop yield. These objectives are generally accomplished by shifting from conventional plowing and cultivating to production practices that involve reducing or minimizing soil tillage. In turn, reduced tillage farms become increasingly reliant on chemicals to control weeds and insects.

The crops that offer the greatest potential for conversion to conservation tillage are corn, sorghum, soybeans, and other small grains. It is estimated that in 1979 between 55 and 80 million acres, or one-fourth of all cropland harvested in the United States, was in conservation tillage. Scientists and researchers predict that by the year 2000, an additional 50 to 100 million acres of cropland, or almost 50 percent of U.S. cropland harvested, will be in conservation tillage. Much of the gain is expected to be in corn and soybean acreage in the southern corn belt.

Presently, data conflict or are not precise enough to compare costs of alternative tillage practices. The U.S. Department of Agriculture, other Federal agencies, and private research analysts suggest that labor, fuel, and possibly equipment costs can be reduced with conservation tillage. However, chemical costs increase because of extra pesticides needed to control weeds, insects, and plant diseases. Conservation tillage would also increase the use of fertilizer.

CONSERVATION TILLAGE

*Introduction*

Conservation tillage is a concept or set of criteria for farm production practices, rather than a particular set of tillage practices.[1] Conservation tillage is a comprehensive system for planting and cultivating crops to achieve two purposes: (1) to minimize the cost and time required to plant a crop, thereby increasing net farm income; and (2) to reduce soil erosion and preserve soil moisture in order to maintain or increase crop yield. This involves reducing or eliminating tillage, or leaving crop residues on the soil surface; it may include crop rotation, alternate-row planting, double cropping, or multicropping.

*Conventional and conservation tillage farming defined*

In conventional farming operations, typically 100 percent of the soil surface is plowed, mixed, or inverted, to incorporate crop residue and control weeds. Conservation tillage does not include the use of a moldboard plow, but rather uses implements that leave enough residue on the surface to significantly reduce erosion, relying more on herbicides and less on cultivation to control weeds. The term "conservation tillage" is often used synonymously with reduced tillage, minimum tillage, and no-till farming. Reduced tillage implies a reduction in the number of times the field is tilled.[2] Minimum tillage is the least amount of tillage required to germinate the seed, provide an adequate stand, and produce a satisfactory yield. Often the entire surface area is worked, but top soil is not necessarily inverted or mixed by plows or other equipment. In no-tillage farming, the immediate seed zone is prepared without tillage, or with only sufficient tillage (generally less than 25 percent of the surface area), to plant and cover the seed. Usually no further cultivation is done before harvesting.

*Land in conservation tillage*

Crops offering greatest potential for conversion to conservation tillage are corn, sorghum, soybeans, and other small grains. Estimates of land under conservation tillage in the United States vary. (See table below.)

TABLE 1.—ESTIMATES OF LAND IN CONSERVATION TILLAGE IN THE UNITED STATES, 1973-79

| Year | USDA estimates of conservation tillage | | No-till Farmer estimates of conservation tillage | Magazine |
|---|---|---|---|---|
| | Millions of acres | Percent of cropland harvested | Millions of acres | Percent of cropland harvested |
| 1973 | 29.5 | 9.3 | 44.0 | 13.9 |
| 1975 | 35.8 | 10.8 | 56.2 | 17.0 |
| 1976 | 39.2 | 11.8 | 59.6 | 18.0 |
| 1977 | 47.5 | 14.1 | 70.0 | 20.7 |
| 1978 | [1] 51.7 | 15.6 | 74.8 | 22.6 |
| 1979 | [1] 55.0 | 16.1 | 79.2 | 23.2 |

[1] Estimates. Since 1977, data have not been collected by SCS on specific conservation practices, including conservation tillage.

Source: Pierre Crosson, senior fellow, Resources for the Future, prepublication draft on conservation tillage, 1981.

Footnotes at end of article.

*Why farmers convert from conventional to conservation tillage*

A farmer's decision to convert to a reduced, minimum, or no-tillage farming operation depends on a variety of factors. Some of the considerations most frequently mentioned in the literature include: (1) the given availability of resources at hand—land, water, machinery, capital, and labor; (2) expectations about commodity prices, production input prices, and yields; (3) and managerial attitudes toward risk and the stability of income desired. In addition, the type of farming practice selected depends highly on a series of environmental considerations, including previous land use, the size and shape of the land, the amount of moisture in the soil, climate, and the physiological properties and biological needs of the crop being produced. The degree to which each of these factors influences a farmer's decision to crop a particular way varies, of course, with the short- and long-term needs of the individual farmer.

*The costs of converting from conventional to conservation tillage*

Presently, most data conflict or are not precise enough to compare costs of alternative tillage practices. The USDA, other Federal agencies, and private research analysts indicate that labor, fuel, and possibly equipment costs would be reduced if a farmer adopted conservation tillage practices. However, chemical costs would increase because of the increased amount of herbicides, insecticides, nematicides, and fungicides needed to control weeds, insects, and other pests. Fertilizer costs would also increase because a large amount is needed to promote plant growth.

Labor

There is no conclusive evidence, but most analysts agree that labor costs can be significantly reduced if a farmer uses conservation tillage practices rather than conventional practices. Less labor is required in reduced tillage or minimum tillage operations because the farmer makes fewer passes over the field. Thus, the majority of the labor saved is post-harvest which is not likely to be paid labor, but rather that of the farm operator.

Additionally, if the farmer double crops (plants a second crop immediately or at the same time that the previous crop is harvested, within the same season), or multicrops (plants more than two crops at the same time, within the same season), or practices no-till farming, labor is reduced further. Time between plantings is reduced because the second crop is planted immediately after (up to several days), or jointly with the harvest, depending on the farmer's equipment. Reduced time between plantings also means that soil moisture is retained because the land remains under continuous crop cover. The soil structure is maintained, thereby enhancing production of second and third crops. Reduced time between plantings also means that the farmer will more quickly receive a monetary return on the crop produced. The development of new machines to simultaneously plant and harvest will also reduce labor requirements.

Fuel

Agricultural production uses 1 percent of total U.S. energy demand. Energy use would be reduced if farmers converted from conventional to conservation tillage farming operations. Most of this anticipated reduction would be petroleum used in farm tractors.

The amount of fuel used in farming depends on the size, shape, and topography of the land; soil type; equipment used and how well this equipment matches up with the size and shape of the field; what is grown; and the amount of clay in the soil (the more clay, the more energy required).

In an article in Science magazine, the authors provide an estimate of the possible reductions in fuel for corn production if farmers convert from conventional to no-tillage farming.[3] The elimination of plowing and disking, a reduction in trips over the field with machinery, and a reduction in machinery manufacture brought about by the no-tillage system result in an annual energy saving equivalent to about 36.6 liters of diesel fuel per hectare. The extra pesticides needed for the no-tillage system offset this savings by about 2.65 liters. Additional seed, which is usually recommended for no-tillage agriculture, offsets it by another 1 liter per hectare. Thus, the energy saved is equivalent to about 33 liters, or 7 percent of the diesel fuel used in conventional tillage farming operations. For soybean production, there is an energy saving of about 18 percent.

Energy savings on an individual scale will vary and may seem small when expressed on a per-hectare basis. However, if 65 percent (the authors' projection) of corn and soybeans is grown under the no-tillage system by the year 2000, this will equal a saving of 1.5 billion liters of diesel fuel annually.

The USDA is less definite about fuel savings. Its estimates indicate a general saving of 9.5 to 42.56 liters of diesel fuel per hectare.

### Equipment

If a farmer converts from conventional to conservation tillage farming, equipment maintenance costs may decrease, since the farmer will make fewer trips across the field, thereby decreasing equipment use. In a recent study on conservation tillage, Pierre Crosson suggests that the investment cost difference between conventional and conservation tillage is "meager."[4] Crosson adds that the farmer may save money because less use of the tractor may result in less frequent repair.

Additionally, it is often suggested that farmers plow their fields every 4 to 5 years if they engage in conservation tillage. This is needed to work up the soil and add drainage, particularly in poorly drained fields. Plowing at intervals also releases herbicide buildup which otherwise can eventually lead to permanent soil damage. Thus, every 4 to 5 years farmers will have to rent, cost-share with other farmers, or purchase a moldboard or other plow to accomplish this task. Such an expense will somewhat offset the cost savings achieved by any reduction in equipment use.

In a 1-year study of the economic costs of conservation versus conventional tillage, recently completed by USDA and Iowa State University, it was found that conservation tillage—in particular, no-till—required somewhat lower fixed costs than conventional tillage.[5] Total tractor and implement costs per acre for corn and soybeans equaled $47.54 for conventional tillage, $27.68 for reduced tillage, and $17.05 for no-till. Because of an overall cost reduction in most areas, no-till farming showed a $15 greater net return per acre over conventional tillage.

### Chemical

Land is plowed in conventional farming operations to reduce and control weeds, and thereby reduce disease and insect buildup which can occur when crop residues are left on the ground. A reduction in tillage or the elimination of tillage means that chemicals will have to be substituted for the plowing action to control weeds, disease, and insects.

Weeds are controlled primarily through the application of herbicides. Crop residues are left on the ground to help control erosion and retain soil moisture. However, this increase in soil moisture improves conditions for weed germination and growth. Thus, when a particular area of land is in conservation tillage for a period of time, the soil becomes more moist and weed growth increases. Herbicide applications over time will need to be more frequent and more concentrated to remain effective in reducing weed growth; therefore, herbicide costs will rise.

In addition, herbicides cling to soil particles. Crop residues have the effect of keeping the soil particles in place, which controls erosion. However, this creates a buildup of herbicides on soil particles, which in the long run may become toxic, thereby making the cropland unproductive for certain crops.

Pest populations may also increase because soil compaction is reduced. Some analysts suggest this reduction in soil compaction can lead to healthier plants that may be able to withstand more disease and insect pressures. Advances in genetic engineering could produce new crop strains that are even stronger and better able to sustain repeated exposure to herbicides.

Insects, disease, and other pests are controlled primarily through the application of insecticides, fungicides, nematicides, and rodenticides. Some analysts suggest that environmental laws currently regulating the application of these chemicals may have to be relaxed to facilitate conservation tillage.

There are other chemical costs associated with an increase in fertilizer application. The increased soil moisture caused by crop residues that cover the soil lead to a decrease in soil temperature, which slows down the mineralization of nitrogen, and promotes denitrification. This means that to achieve optimum yields, farmers will have to apply more nitrogen fertilizers to the soil.

Costs associated with increased pesticide application can be environmental as well as economic. Environmental costs include damage to air and water from concentrated chemical applications. For example, many pesticides are not water soluble, and are strongly attached to soil particles. To the extent that conservation tillage reduces erosion and chemical runoff, it will reduce the amount of pesticides in water. However, over 95 percent of the Nation's river basins are now affected by nonpoint-source pollution from agricultural runoff. Because nonpoint-source pollution is not easily controlled, it is possible that improper conservation tillage practices, in combination with a heavier pesticide and fertilizer load, could lead to even more serious pollution. But the opposite is expected: As conservation tillage increases, soil erosion will be reduced and moisture retention improved, keeping both pesticides and fertilizer in place where they biodegrade or are used by growing plants.

### Soil Productivity

There is a general consensus that conservation tillage farming practices reduce soil erosion from 50 to 90 percent over conventional farming practices. There is also a consensus, however, that a farmer's decision to convert from conventional to conservation tillage is not necessarily based on the erosion factor. Instead, the overriding factors are economic, generally based on expectations of production costs and yields. However, the relationship between soil productivity and erosion is not well defined. Until there is better understanding, it will be difficult to persuade farmers to give up traditional and proven tillage methods for a system of conservation tillage. Furthermore, there is no clear short-term yield advantage between conservation tillage and conventional farming. Conservation tillage results in less erosion than conventional tillage; however, where erosion is not a problem, the erosion factor will not affect a farmer's decision to convert to conservation tillage methods. Moreover, as worldwide export demand increases, and the incentive for farmers to produce more increases, farmers will increasingly crop marginal lands. Erosion is difficult to control on marginal lands, even with conservation tillage.

Although it is difficult to quantify the soil productivity gains of conservation tillage, some researchers have completed preliminary analyses.[6] McGregor, et al., found that on highly erodable soils in Mississippi, erosion was reduced to 17.5 metric tons per hectare to about 1.8 metric tons per hectare when no-till farming was used. Triplett, et al., found that no-till farming reduced erosion by 50 percent. Langdale, et al., found in Georgia, on land with a 6 percent slope, that no-tillage system reduced soil loss from about 40 tons to about 0.2 tons per hectare, in a simulated rain experiment.

### *Regional adaptation of conservation tillage practices*

Conservation tillage can be and has been adapted to a broad range of soil types and slopes over much of the country. The table below, showing the extent of conservation tillage by region, is followed by a region-by-region discussion of current conservation tillage application, and of the research needs that must be met to achieve broader acceptance and success of conservation tillage.

TABLE 2.—*Conservation Tillage by Region, 1979*

| Region | Millions of acres | Percent of cropland harvested |
|---|---|---|
| Northeast | 2.40 | 18.2 |
| Lake States | 6.93 | 17.9 |
| Corn Belt | 21.73 | 28.7 |
| Northern Plains | 25.01 | 33.3 |
| Appalachia | 5.83 | 30.7 |
| Southeast | 5.09 | 33.5 |
| Delta | 1.36 | 7.0 |
| Southern Plains | 1.08 | 6.1 |
| Mountain States | 6.43 | 24.8 |
| Pacific | 2.35 | 13.5 |
| U.S. total | 79.11 | 23.1 |

Source: Pierre Crosson, Senior Fellow, Resources for the Future, pre-publication draft on conservation tillage, 1981.

### Northeast[7]

Row crops in the Northeast are traditionally produced under clean cultivation: moldboard plowing and disking for seedbed preparation, with several tillage operations after planting. Since row crop production is easily adaptable to conservation tillage farming, it is not surprising that northeastern farmers have been experimenting with conservation tillage methods since the 1940s.

Among the more common conservation tillage planting practices for corn in the Northeast are: planting corn after corn with no-till; planting corn in sod and no-till corn planting in legumes; and double cropping with no-till soybeans after barley or wheat.

Research and development needs for conservation tillage in the Northeast include: information on the effect of fertilizer in no-till crop production; development of crop strains resistant to repeated applications of herbicides; development of herbicides that are more effective against resistant weeds; and information on soil moisture and its effect on plant growth, particularly as new crop strains are developed.

### Southeast[8]

Although the concept is relatively new to

Footnotes at end of article.

the area, conservation tillage systems may contribute more to cultivated production in the Southeast than in any other region in the United States. Conservation tillage practices are particularly attractive for controlling erosion in the upper Coastal Plain and in the Piedmont and Appalachian uplands. Such practices also conserve soil moisture, which is crucial because the area suffers from occasional periods of drought.

Conservation tillage practices have been widely accepted in corn and soybean production throughout the areas. No-till production of soybeans, and double cropping small grains with soybeans have escalated in Kentucky, Virginia, and Tennessee, and in the Piedmont and lower Coastal Plains of South Carolina.

Research and development needed to promote conservation tillage in the Southeast include: establishment of a quantitative relationship of soil and climate properties to crop responses; development of herbicides for double-cropping systems that involve soybeans; improvement in disease and insect control, particularly the long-term effectiveness of pesticides for use in no-till soybeans, corn, and cotton production.

Eastern Corn Belt [9]

Conservation tillage offers great potential for reducing severe erosion problems in the eastern Corn Belt States of Illinois, Indiana, Ohio, Michigan, and Wisconsin. In addition, the use of conservation tillage in double cropping is especially important, since much of the wheat acreage in the eastern Corn Belt is on highly erosive land. The no-till yield potential for double cropping is at least as good as with conventional tillage, and better in dry seasons. And, no-till planting is well adapted to the rolling soils in the southern half of the eastern Corn Belt and to the well-drained loams and coarser-texture soils in the northern half of the region, if pests are controlled.

A survey of available research information and farmer experience with conservation tillage systems indicates that the following items clearly need further study if conservation tillage is to be more extensively adopted throughout the area: better methods of controlling perennial and herbicide-resistant weeds with no-till practices; effects of soil compaction on crop yields, and the remedial effects of conservation tillage; rodent control in sod-planted corn; and toxic effects (if any) of decaying corn residues on corn root growth.

Western Corn Belt [10]

Prudent land resource use is essential if the western Corn Belt States—Iowa, Missouri, Minnesota, Nebraska, and South Dakota—are expected to continue to meet domestic and world agricultural needs. For more than 40 years, researchers in the western Corn Belt States have been studying the relationship between tillage practices and soil and water conservation. Conservation tillage has been adapted to a broad range of soil types and slopes over much of the area, and is viewed by many as possibly the most effective and least costly means of reducing severe erosion problems in the area. However, despite their many advantages, conservation tillage practices have not been adopted on a wide scale.

Scientists include the following among the most important conservation tillage research needs for the area: refinement of cropping and management coefficients in the universal soil loss equation that are more representative of various conservation alternatives; determination of critical soil and topographic limits of various conservation tillage systems; development of pest management systems compatible with conservation tillage; determination of conservation tillage systems appropriate to different farm sizes; and calculation of threshold levels of weed infestation relative to economic and environmental impacts of herbicide use.

Southern Plains [11]

Wind and water erosion and low soil moisture caused by erratic rainfall and diminishing ground water supplies are dominant problems in the southern Great Plains States—Kansas, New Mexico, Oklahoma, and Texas. Conservation tillage practices can help alleviate these conditions. Among the systems that show promise are: wheat-sorghum-fallow rotations in Kansas and Texas under dry-land and irrigated conditions; alternate reduced tillage and no-till for irrigated continuous winter wheat; and no-till grain sorghum double cropped after winter wheat.

Areas in need of immediate research attention to make conservation tillage practices more applicable in the Southern Plains States are: development of more effective and specific herbicides that are compatible with subsequent crops; development of improved application techniques for controlling weeds in close-grown crops; determination of fertilizer rates and application techniques for most efficient use; and equipment which can be operated without difficulty in anchored and loosened surface residues.

Northern Plains [12]

Conservation tillage practices can aid in controlling water and wind erosion in the Northern Great Plains States—Montana, Wyoming, South Dakota, North Dakota, and Nebraska. One of the most common practices in the area is stubble-mulch farming, with a 2-year-cycle system of small grain and fallow. However, increased weed problems and the difficulty of operating tillage and plant equipment in crop residues has slowed the progress of conservation tillage practices in the Northern Plains area.

Some suggested research needs for conservation tillage are: improved methods of weed control; information concerning the effects of plant residues on the physical, chemical, and biological properties of the soil; and guidelines on conservation tillage methods, and on planting dates and rates by crop.

Pacific Northwest [13]

Despite years of research and development, tillage practices to conserve soil and water have not completely achieved the goals of efficient water use and soil protection in the Pacific Northwest. Precipitation and irrigation water runoff, and soil losses remain among the highest in the country, particularly in the Palouse region. Farmers have had problems with weed control and with inadequate equipment for tillage and for planting in surface residues: and as a result, have suffered low crop yields. In addition, the highly diverse environment of the Pacific Northwest limits the transferability of tillage and planting methods from one location to another.

Areas in which research can aid in the development of more promising approaches to conservation tillage are: improved herbicide-tillage combinations and development of no-till planting for crop rotation; for the higher elevation areas, winter wheat planting in surface residue, followed by a spring crop; and for the intermediate and lower-precipitation zones, intensified spring cropping, improved residue management, and early fall planting.

*Advantages and disadvantages in conservation tillage as compared with conventional farming*

Conservation tillage can be adopted to a broad range of soil types and slopes over much of the country. The preceding section reflected on some of the problems in need of further study for specific regions of the country. However, some generalizations about the advantages and disadvantages of conservation tillage in comparison with conventional farming practices can be drawn.

Advantages of Conservation Tillage

(1) Conservation tillage helps reduce wind and water erosion because crop residues are left on the soil to provide a vegetative cover that reduces soil shifts. Studies by the USDA and others indicate that the Nation is losing 5 billion tons of soil each year because of wind and water erosion. This is continuing despite the fact that the Federal Government is spending millions of dollars annually in research, technical assistance, and conservation incentives to control erosion. Conservation tillage practices are estimated to reduce erosion anywhere from 50 to 90 percent over conventional farming practices. Crop residues on the field form a natural barrier that controls erosion without additional money or the need to construct physical barriers.

(2) Yields usually equal and sometimes surpass those of conventional farming practices. Moreover, the time saved between planting, and the increasing popularity of double and multicropping operations facilitate the farmer's efforts to earn more in one season.

(3) Soil moisture is retained because the crop residues prevent rapid evaporation. Preserving soil moisture means that farms in the West would require less irrigation water; and farms in the Midwest, the Great Plains, the Northeast, and the Southern Coastal Plains would produce higher and possibly better yields than they ordinarily would during periods of drought.

(4) Greater flexibility in land use is possible with conservation tillage practices because steep lands can be cropped without severe erosion problems. Because domestic and worldwide demand for U.S. agricultural products is expected to rise significantly within the next 20 years, cropping steep lands could help farmers meet this anticipated challenge.

(5) Conservation tillage may be more economical than conventional farming practices. Increasing energy costs alone may force farmers to reduce fuel use, which is higher under conventional farming operations. In addition, the decrease in labor and equipment costs may make conservation tillage methods more practical, particularly in the long run. Moreover, because the quality of the land base is maintained and even improved, farmers can crop more intensively, on a continuous basis, and hence, earn more.

Disadvantages of Conservation Tillage

Most of the disadvantages associated with conservation tillage operations are environmental.

(1) Chemical use increases because concentrated amounts of pesticides are needed to control weeds, disease, and insects, which multiply when crop residues are left in the field. In addition, chemical costs increase because of the additional amounts needed.

(2) Air and water pollution could increase because of this increase in chemical use. Since nonpoint source pollution from agricultural runoff affects 95 percent of the Nation's river basins, an increase in pesticide use could exacerbate this situation. However, proper application of conservation tillage systems should reduce erosion and thereby prevent the chemicals from reaching waterways.

(3) Concentrated use of herbicides and

**Footnotes at end of article.**

the reduction in particulate movement increase amounts of herbicides left in place on the soil surface. The effect of this is twofold: Weeds become herbicide resistant, and a residual buildup of herbicides in the soil would permanently damage soil chemistry and the ability to produce subsequent crops.

(4) When marginal lands are brought into production, land in forest, range, pasture, and wetlands is reduced. An increase in conservation tillage and shifts in land use have several effects: Timber supplies that would otherwise be available on these lands are reduced; fish and wildlife may be displaced; recreational uses of woodlots and wetlands may be eliminated; and soil quality may diminish, and erosion may be exacerbated by cropping marginal lands.

(5) Greater management ability is required for success of conservation tillage because there are fewer alternatives for correcting management errors. Conservation tillage methods are often tailored to the individual farm because of the differences in soil structure and type, and other topographical and geological characteristics that are unique to the farming area.

*Incentives for conservation tillage*

It is evident from the discussion on regional adaptations of conservation tillage that additional research is needed; reliable data must be collected on the success rate of different tillage methods; new crop strains should be developed; and data on biological and toxic effects of increased chemical use must be gathered. In addition, because conservation tillage as a farming system involves a variety of practices, data is needed on which methods work best on particular soil types in the various regions of the country. Furthermore, farmers may need assistance in adopting this alternative technology because conservation tillage systems are often complex and difficult to implement.

However, it is possible that increasing energy costs alone could induce farmers to convert to some form of conservation tillage. Thus, the economic marketability of the technology may prompt farmers to substitute conservation tillage practices for conventional farming operations—a change that might give farmers an advantage anyway, with or without Federal assistance.

In addition to providing funds for research, Federal assistance options include:

Developing pilot programs to demonstrate the effectiveness of the various practices, particularly in areas of the country where erosion is most severe;

Providing cost-sharing assistance through the Rural Clean Water Program to farmers who experiment with various practices;

Increasing the technical assistance provided by the SCS to include planning for and applying conservation tillage technology;

Providing additional cost-sharing assistance for conservation tillage through existing conservation programs, and targeting it only to areas that have severe erosion problems; and

Providing incentives to farm equipment manufacturers to research and design the appropriate tools and equipment necessary for conservation tillage farming.

[13] Papendick and Miller. Conservation tillage in the Pacific Northwest. Journal of soil and water conservation. (See footnote 7) p. 49–56.

Mr. HELMS. Mr. President, my friend from Iowa has raised an important issue with this proposed amendment on conservation tillage. Every Senator here, I am sure, realizes that this Nation is faced with increasing problems in the area of soil conservation. Particularly in difficult economic times, as these are, farmers are less able to institute more traditional conservation measures, often requiring capital expenditures that do not realize any short-term gains.

However, the benefits of conservation tillage bring immediate results and can, given the right conditions, actually mean a decrease in costs for many farmers.

There are two major forces preventing the successful utilization of conservation tillage methods. One, is the economic disincentive. Farmers who practice other tillage methods, usually have a sizable investment in farm equipment that is designed to perform those methods. Making the switch to conservation tillage methods requires the use of different equipment, which is expensive. As in any business, existing equipment must usually serve out its useful economic life before new equipment can be justified. Economics alone dictates that there will not be an overnight adoption of conservation tillage.

But the other major force resisting the use of conservation tillage has nothing to do with economics. It has everything to do with education and demonstration that conservation tillage methods work. Everyone knows that each and everyone of us is resistant to change. We all know this, and accept it—in ourselves and in others. History is full of examples where someone found a better way to do something, but the resulting change to the new method took many years. The concept of conservation tillage is one such idea.

The Senator from Iowa has asked that the Senate go on record as favoring the practice of conservation tillage where applicable. I would support that idea and believe that this amendment would accomplish that result.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. GRASSLEY. I yield.

Mr. DOLE. Mr. President, this is a good amendment. I have made a radio spot about the progress made in the State of Iowa with this technique, so far as conservation is concerned.

The chairman of the committee supports this amendment, and I understand there is no objection by the distinguished Senator from Kentucky.

Mr. GRASSLEY. Mr. President, I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 539) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 378

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from California.

Mr. DOLE. Mr. President, the Senator from Kansas has been advised by the Senator from Kentucky that there is no objection to the floral checkoff amendment, the pending amendment.

The question is on agreeing to the amendment.

The amendment (UP No. 378) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HAYAKAWA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ELDERLY CSFP PILOT PROGRAM

Mr. BOSCHWITZ. Mr. President, I am not going to offer an amendment. I would have offered it if I thought the Senate would accept it and not engage in extended debate.

I have had a colloquy with the chairman of our committee regarding extending the commodity supplemental feeding program to low-income elderly who are nutritional risks. The commodity supplemental feeding program is not new, but it now serves only pregnant and breast-feeding women and children up to the age of 6.

The amendment I would have offered would have extended the commodity supplemental feeding program to the low-income elderly who are at nutritional risk.

At the outset, I must say I realize a few eyebrows may be raised at the suggestion of expanding a program in these days of budget cutting. As a member of the Budget Committee I have been a stanch supporter of this administration's goal of reduced Federal deficits.

But, as the Government reduces the growth of some of its programs, we must

be looking for alternative, cost-effective means to help those who are truly needy.

Again, the CSFP is a program already in place, but it does not include elderly Americans. Of particular interest is this program's extensive reliance on volunteers. Public service organizations operate the programs on a largely volunteer basis. There are few paid staff in the programs; rather the majority of the work is done by volunteers—doctors, drivers, dock loaders, et cetera. This program depends for its livelihood upon the commitment and involvement of the private sector.

Public service organizations contract with the Department of Agriculture to receive commodities—juice, canned vegetables and meat, cheese, dried milk, and so forth—and set up an establishment like a grocery store in a warehouse or similar building. The CSFP then provides packages of USDA commodities to pregnant mothers and their children under the age of 6 who are food stamp eligible—130 percent of poverty and asset test—and at a nutritional risk. Those pregnant mothers in the area who meet the food stamp income test and who have been examined by a health professional who has documented that they are at nutritional risk can participate in the program. Doctors who volunteer their time for these examinations, prepare a food prescription. The participant takes this prescription to a food center and receives a food package based upon the participant's nutritional needs.

The commodity supplemental feeding program has been one of the most cost effective nutrition programs because of the involvement of volunteers and the private sector and because administrative costs are limited, by law, to 15 percent of the value of the commodities. Compare this program with the women, infants, and children (WIC) nutrition program. The WIC program is widely recognized as one of our most effective nutrition programs and that program costs the Government about $27.49 per food package, according to the USDA. A similar package in the commodity supplemental feeding program costs the Government $17.50. Compare this also with the food stamp program, which in 1980 had an average monthly cost of $34.35 per person and in June 1981 was over $41.

In my estimation, the two most determinative factors in the cost effectiveness of the commodity supplemental feeding program are the use of commodities rather than retail goods as in the food stamp program and the heavy reliance of this program on volunteers and the private sector.

Again, it is well known that the elderly do not participate in existing programs nearly to the extent of the rest of the population. In November of 1979 there were 19.1 million people eligible for the food stamp program, of those eligible 17.2 million participated and 90 percent of the total population participated. During that same month, according to the USDA, however, only 1.8 million of the 3.6 million eligible elderly participated in the food stamp program. Only 50 percent of the eligible elderly participated as compared with 90 percent of the eligible total population.

What causes so little representation? According to the USDA, the two principal reasons for lack of participation by the elderly are welfare stigma and lack of transportation. The commodity supplemental feeding program would alleviate these problems. The visit to the doctor and the food prescription help eliminate the welfare stigma. The transportation problem is solved through the use of volunteers to deliver the commodities to the homes of the participants and take the participants to their semiannual doctor visits.

The one feature that distinguishes this program from any other elderly nutrition program is that it will specifically serve those elderly people who have nutritional need. It will serve these elderly people through a program that is already in place, and operating most effectively.

Finally, I stress that this program, unlike any other, would serve only those elderly people who are found to be at nutritional risk. There is a population of low-income elderly that is not being reached through existing nutrition programs for the elderly and these people need, and certainly deserve, a program such as this.

Mr. President, if I may have the attention of the acting majority manager of the bill, Senator DOLE, I have agreed with the distinguished chairman of our committee that we will hold hearings on the extension of the commodity supplemental feeding program, to include low-income elderly as a nutritional risk.

While the matter is to be included in the House bill, and perhaps we can include it by conference, I hope our conferees will do so. In the event that does not happen, I have agreed that hearings should be held.

If I went into greater detail on this matter, I know that the distinguished acting majority manager of the bill would make a radio spot on this matter as well.

Mr. DOLE. If it has merit, I would. We are fairly selective.

I say to the distinguished Senator from Minnesota that I understand the chairman's position, and he has indicated an interest in having appropriate hearings.

Mr. EAGLETON. Mr. President, I will be pleased to yield a minute to the Senator from Minnesota; and if the Senator from New Hampshire wants a minute or two, I will be pleased to yield to him.

Mr. DURENBERGER. I have an amendment.

Mr. EAGLETON. I ask unanimous consent that my amendment be temporarily laid aside, to consider the Durenberger amendment, and that my amendment then be in order, on the completion of that amendment.

The PRESIDING OFFICER. The amendment of the Senator from Missouri has not been called up yet.

Mr. BAKER. Mr. President, reserving the right to object, the Senator from Missouri has been very patient. If the Senator will yield to me, I ask unanimous consent that the Senator from Missouri be recognized after the recognition of the Senator from Minnesota for the purpose of offering an amendment.

Mr. EAGLETON. If the Senator from New Hampshire has a brief amendment, it is all right.

Mr. BAKER. I believe it will take a few minutes.

Mr. HUMPHREY. I would appreciate it if the majority leader would include my amendment in the unanimous-consent request.

Mr. BAKER. I ask unanimous consent that the Senator from New Hampshire be recognized after the disposition of the amendment to be offered by the Senator from Missouri.

Mr. HUMPHREY. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Minnesota.

UP AMENDMENT NO. 380

(Purpose: To equalize access to credit for widows, and other single parents)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER) proposes an unprinted amendment numbered 380:

At the appropriate place, insert the following language: "The second sentence of section 303(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1923(a)) is amended by striking out 'are married or'."

Mr. DURENBERGER. Mr. President, this amendment—which is based on section 404 of the Economic Equity Act (S. 888)—reforms a section of the Consolidated Farm and Rural Development Act that has proven to be an unintended barrier to widows and widowers seeking to preserve their stakehold in family farms.

That law contains a two-pronged credit preference test. Preference is based on the number of dependents, and on whether the applicant is married or unmarried. It is certainly rational to grant a credit preference based on the number of dependents in a family unit. But when the number of dependents is equal, present law gives a preference to those who are married over those who are widowed or divorced. This provision has had a particularly bitter impact on farm widows, as well as separated or divorced women and men seeking to preserve the existence of their farm investment.

The amendment I offer this evening retains the preference based on the number of dependents, but eliminates the distinction between dependents of a married couple and dependents of a widow or other single parent. It does not compel the program's administrators to grant preference to either group. It gives the administrators the ability

to weigh the equities of each case, and make their own judgment on which party has the best claim on the program's limited resources. It recognizes the fact a widow with the same number of dependents as a married couple can have at least as strong, if not a stronger claim. And it leaves the administrator free to exercise his or her discretion on a case-by-case basis.

The administration has no opposition to this amendment and I ask unanimous consent that a letter from Under Secretary of Agriculture Frank W. Naylor, Jr. be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, D.C., Aug. 19, 1981.*

Hon. DAVID DURENBERGER
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR DURENBERGER: Secretary Block has asked me to respond to your recent letter regarding an amendment you intend to propose to the Agriculture Act of 1981 when that legislation is considered by the Senate.

I understand that you propose to eliminate from Section 303(a) of the Consolidated Farm and Rural Development Act (U.S.C. 1923), the preference to persons who "are married" in receiving preference for farm ownership loans made through the Farmers Home Administration (FmHA). The expressed intent of your amendment would be to eliminate the distinction between dependents of married persons and dependents of a single parent, such as a widow or widower.

The Department and FmHA would not oppose such an amendment as long as it would leave intact the established preference for persons who have dependent families. In other words, if your amendment proposed only to strike the words, "are married or," from Section 303(a), this condition would be met, in our opinion.

I hope this information will prove useful to you, and that you will not hesitate to contact me should you have further questions.

Sincerely,

FRANK W. NAYLOR, Jr.,
*Under Secretary for*
*Small Community and Rural Development.*

Mr. DURENBERGER. Mr. President, I move the adoption of this amendment.

Mr. HELMS. Mr. President, the intent of this amendment is to end the preference in granting farm ownership loans to "persons who are married" while retaining the preference for persons with dependent children, regardles of marital status.

It is my understanding that the present statute gives equal preference to both married couples and persons with dependent children. This amendment would simply end the special consideration of marital status while reserving this preference for applicants who have dependent children.

Although I feel that S. 884 should not be encumbered with a multitude of amendments which would hinder expeditious consideration of it, I have no objection to this language. I understand that the Department of Agriculture has no problem with this amendment and therefore I will accept it on behalf of the majority.

Mr. HUDDLESTON. Mr. President, I support the amendment to drop the preference given to FmHA borrowers who are married.

Priority will still be given to individuals who have dependent families—that accomplishes the objective of assisting family farmers. The amendment recognizes that many farm families today are headed by one adult.

Mr. DURENBERGER. Mr. President, I yield back the remainder of my time.

Mr. DOLE. Mr. President, I yield back the remaining time on behalf of the floor managers.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (UP No. 380) was agreed to.

Mr. EAGLETON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DURENBERGER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. By the previous order, the Senator from Missouri is recognized.

UP AMENDMENT NO. 381

(Purpose: To authorize adjustments in the price support levels for different kinds of tobacco in order to make such kinds more competitive in the world markets)

Mr. EAGLETON. Mr. President, I have an unprinted amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 381.

Mr. EAGLETON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert the following new section:

AUTHORITY OF SECRETARY OF AGRICULTURE TO ADJUST THE PRICE SUPPORT OF CERTAIN KINDS AND TYPES OF TOBACCO

SEC. 1112. The Agricultural Act of 1949 is amended by adding after section 106 the following new section:

"SEC. 106A. Notwithstanding any other provision of law, whenever the Secretary determines that a kind of tobacco or a grade of such kind of tobacco for which marketing quotas are in effect or have not been disapproved by producers will be in excess domestic supply or will be noncompetitive in the world market, the Secretary may establish the price support level for such kind of tobacco at such level as the Secretary determines will encourage the exportation of such kind or grades of such kind of tobacco and not encourage excessive domestic supplies after taking into consideration the cost of production, supply and demand conditions, and world prices except that the Secretary may not establish an average price support level under this section for any crop of any kind of tobacco below the level of the adjusted cost of production. The adjusted cost of production shall be determined on the basis of such information as the Secretary finds necessary or appropriate for the purpose and shall not include (1) costs of purchasing or leasing land, (2) costs of leasing marketing quotas, or (3) management costs."

Mr. EAGLETON. Mr. President, the amendment I offer tonight does not eliminate the tobacco price support program. It is quite modest. It is a middle ground, which I believe those who want to end the tobacco price support program can accept in order to avoid the economic hardship such action would bring the tobacco-producing States, and which I hope those who defend the program can support in order to bring about needed reform without which the program will increase in cost to the taxpayers and to the tobacco producers. This amendment will simply provide the Secretary of Agriculture with the authority to adjust price supports on kinds, types, or grades of tobacco that are noncompetitive in the world market.

Farmers must bear the burden in the status quo because of the way the program is structured. Unfortunately, the authors of the Agricultural Act of 1938, the basic authorizing statute for the price support program, did not envision the circumstances that exist today. The New Deal liberals that wrote the tobacco program believed that production and exports would increase over the years to the benefit of all American people. What they wanted was a program that was social and economic in orientation, a program that kept supply in line with demand and families on the farm.

For better or worse, the world has changed a great deal in the past 43 years.

First, tobacco consumed domestically has dropped sharply, especially since the Surgeon General's report was issued in 1964.

Second, our share of the world market is declining sharply. In 1960, the U.S. share of the world market was 60 percent. Today, the market share is somewhere in the magnitude of 28 percent and dropping. This development is particularly astonishing in view of the rapid increase in the market share of commodities such as corn, soybeans, wheat, and cotton.

Third, imports of foreign tobacco have continued to accelerate. In 1969, we imported 159.1 million pounds of tobacco. In 1979, that figure had grown to 313.6 million pounds—nearly double in just one decade. The result is that domestic manufacturers have increased the percentage of foreign tobacco in U.S. cigarettes from 11 percent in 1965 to 30 percent in 1980.

Fourth, our stocks of flue-cured tobacco are growing. In 1975, we had 136.3 million pounds of tobacco on hand. By the end of 1980, that had grown to 595.1 million pounds. Since then, our stocks have been depleted by over 100 million pounds, largely because of a drought in tobacco-producing areas of China, the world's leading producer of leaf tobacco. However, stocks are still triple the level of just 5 years ago.

Mr. President, these facts reflect serious structural problems with the tobacco price support program, problems that we must address if the Members of this body believe in serious public policymaking. If we choose to ignore these facts, both producers and the American people will suffer.

The problems that we have today with tobacco come as a consequence of what clearly is the least discretionary of the price support programs administered by the Secretary of Agriculture.

Current law has the hands of the Secretary of Agriculture tied. He must continue to increase the price support level for tobacco based upon a specific formula. His only option is to reduce production to keep supply and demand in line. Let me quote what former Secretary of Agriculture Bob Bergland had to say about this matter. This clearly illustrates what the problem is:

> Under the Agricultural Act of 1949, support prices for flue-cured tobacco are based on a formula which I have no discretion to alter. These support levels are relatively high compared to prices of foreign produced tobacco. As the support price of flue-cured tobacco has risen in line with the legislated formula, imports have risen, stocks under loan have risen, and reductions in the national marketing quota have been necessary to bring supplies more in line with demand.

Let me quote as well from a letter I received from Everett Rank, Administrator of the Agricultural Stabilization and Conservation Service:

> U.S. prices to a large extent are determined by the legislated support formula. So long as U.S. tobacco remains out of line price-wise with foreign tobacco of comparable quality, our share of world exports can be expected to continue to decline and pressure from imports to increase.

Now let us examine what my amendment would change. My amendment would simply provide the Secretary of Agriculture with authority to adjust price support for grades or kinds of tobacco that are in excess supply.

This amendment would not provide total discretion to the Secretary. Rather, it would not permit the Secretary to reduce the price support below the adjusted cost of production.

The intent of this approach is clear—we need to discourage the production of grades or kinds of tobacco that are in surplus. By doing so, the producers of tobacco would receive a number of corresponding benefits—stocks would be reduced, imports would decline, exports would increase, and supply would fall in line with demand.

It may be that the tobacco price support program was the first of the so-called indexed programs. Since 1938, farmers of tobacco have had a good deal—their prices have been guaranteed to rise in line with inflation. And, it is clear that the average farmer has been guaranteed a profit, an equally good deal. This is especially generous in view of the fact that actual market prices generally have been 2 to 3 cents a pound over the support levels in recent years, assuring still further profits.

This arrangement would not be bad except that it no longer accommodates changing world realities. We are no longer holding our share of the world or domestic markets. The result is that the producer and the taxpayer suffer, the producer because his quota is reduced and the taxpayer because more money is committed to the stocks program.

Mr. President, I have several tables that I would like to have included in the RECORD exploring the situation regarding loan stocks, exports, imports, and market share. These tables graphically illustrate the problems that I have articulated here today. I have offered this amendment as a response to the problems of the program with the hope that constructive change will result in a better program for all of our citizens.

I urge the adoption of my amendment.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. WARNER). Does the Senator make inquiry to have those tables included in the RECORD as part of the Senator's statement?

Mr. EAGLETON. I beg the Chair's pardon. I ask unanimous consent that the tables previously referred to be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—FEDERAL EXPOSURE FOR FLUE-CURED TOBACCO STABILIZATION CORPORATION [1]

| Year | Dry weight [2] | Principle | Interest and insurance | Total |
|---|---|---|---|---|
| 1975 | 136,276,098 | $153,259,470 | $72,485,665 | $225,745,135 |

Source: U.S. Department of Agriculture.

Mr. HUDDLESTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, there has already been spoken on this floor tonight a substantial volume about the tobacco program, its value, its need, and the desirability of continuing it substantially in effect as it is.

I mentioned during my remarks earlier that one of the strengths of the tobacco program has been throughout the years the flexibility of it, the ability to adjust it to meet conditions that occur because of unusual marketing years or unusual growing years or any other changes that may occur, and this has, in essence, kept the program in balance as far as supply and demand are concerned, and as far as costs to the Federal Government are concerned.

But the way to bring about those kinds of changes, to adjust it to meet the needs, is through the usual process, in my judgment, and not to try to rewrite a complicated program here on the Senate floor.

Looking over the amendment of the Senator from Missouri—he does detail some statistics that indicate some problems that may be developing as far as the program is concerned—and they should be addressed in the proper way and at the proper time.

But I find in the amendment such things as "will be in excess of domestic supply or will be noncompetitive in the world market."

These are pretty vague terms not eas-

ily defined. It says: "The Secretary then may establish a price support level for such kinds of tobacco at such a level as the Secretary determines will encourage the exportation of such kinds or grades."

It seems pretty vague language to me to be able to develop a sound policy and one that provides a certain amount of, a certain degree of, stability and certainty as to just what the policy will be.

So I think for these reasons and others this amendment should be rejected tonight.

Mr. HELMS. Mr. President, this amendment authorizes the Secretary of Agriculture to establish the price support level for any kind, type, or grade of tobacco at his discretion whenever he determines that such tobacco will be in excess in domestic supply or will be noncompetitive in the world trade. He will not be permitted to reduce the price support level below a formula for the cost of production of the crop.

The amendment is offered as a remedy for a problem that it cannot solve. The price support for tobacco has very little relationship either to domestic supply or to the world trade.

The domestic supply is a function of the poundage quota established each year by USDA in accordance with the allotment aspects of the tobacco program.

These production control mechanisms are the result of tobacco farmers agreeing in referendum to accept annual adjustments in the poundage quota. Tobacco farmers are proud of the fact that their program is operated at virtually no cost to the Government, and they have accepted the controls on production as a means to assure that their program will never likely be a burden on the taxpayers. The domestic supply is controlled in this fashion so as to be independent of the price fluctuations which would otherwise result.

There is no question that U.S. produced tobacco is now and will probably always remain competitive in the world trade. The unique characteristics of U.S.-produced tobacco make it highly desirable in quality cigarette blends. It is so highly desirable, in fact, that most observers readily agree that price is not as significant a competitive factor as continued high quality.

The price support formula now in effect assures farmers of the ability to continue to produce the highest quality—and therefore most highly competitive—tobacco grown anywhere.

Now, U.S. tobacco farmers have been plagued with competition for certain grades of tobacco, but the extent to which the impact has been adverse has been more of a function of improper and unfair application of U.S. tariff laws than price.

As regards the tariff issue as it relates to tobacco, the first problem our farmers face is that U.S. tariffs have traditionally been levied on a "specific" basis—that is, a certain dollar amount. The tariff schedules of our competition and our trading partners generally have been based on an "ad valorem"—to the value—valuation. That means that as inflation increases worldwide, U.S. tariffs actually decrease, while those of our trading partners remain constant in real terms.

Then, in 1976 and 1977 very large quantities of foreign tobacco began to enter the United States under the Customs Service classification of "scrap," paying a duty of 16½ cents per pound rather than the then 45 cents per pound required by law.

In 1979 the U.S. Comptroller General found that the Customs Service was improperly misclassifying these so-called scrap tobaccos. When the previous administration refused to take action to rectify the problem, tobacco farmer interests pressed for an investigation of the matter by the International Trade Commission.

At the subsequent ITC hearings a number of tobacco representatives—including myself—contended that these imports were causing harm to the tobacco price support program.

Those interests who favored a continuation of the importation of foreign tobaccos at the improper and lowest duty rate argued that our problems with foreign tobacco do not stem from improper tariffs, but with price.

On August 4, 1981, the ITC ruled that the tobacco price support program is not harmed by tobacco imports at this time, and that any action to impose quotas or to impose higher tariffs is not appropriate at this time.

No doubt, part of the reason for that ruling is the fact that the domestic supplies of tobacco previously thought to be in dangerous surplus have been reduced significantly in recent months.

First of all, U.S. tobacco farmers agreed to a 7½-percent reduction in their poundage quota for the 1981 crop year. This is the kind of action taken to keep the potential taxpayer exposure to a minimum. It demonstrates how effective the tobacco program is.

Second, the Flue-Cured Tobacco Stabilization Cooperative has had tremendous success in reducing its stocks—stocks for which the CCC has extended price support loans to farmers.

At this time last year stabilization held some $800 million in tobacco; today that figure is about $600 million. A year ago stocks were some 515 million pounds; now they are about 400 million pounds. Stabilization has sold 192 million pounds in 9 months this year, compared to just 88 million pounds for all of calendar year 1980.

So, any purported purpose in this amendment is significantly brought into question. It would be extremely unwise for the Senate to adopt this amendment at this time.

U.S. tobacco farmers produce a crop worth some $2.5 billion in foreign exchange to the United States—with a net favorable balance of trade in tobacco at just a little over $2 billion. That represents fully 10 percent of our entire agricultural balance of trade.

In addition, tobacco farming provides a livelihood to more than 276,000 farm families and to some 80,000 tobacco manufacturing employees.

There is just too much at stake here for the Senate to decide to alter the price support formula on a crop that means so much to so many people and to the entire Nation.

In addition, Mr. President, the amendment contemplated here would create more problems than it would resolve. If the price support levels are reduced substantially, there is no question that we could find ourselves in a situation where the stabilization cooperative would have to compete for its sales of tobacco against tobacco not under loan. That is, stabilization could find itself encumbered with stocks of tobacco for which it made loans to farmers at a rate greater than the new support price. Stabilization would be extremely hard pressed to ever dispose of those stocks without a loss—a loss which would be borne by the taxpayers.

Now, there are a number of tobacco specialists who are concerned that some grades of tobacco may be carrying price support levels which are too high to be competitive. Most often these grades are identified as the "four-letter" grades, which represent unripe or improperly cured tobacco. The problem is not serious, but there is some thinking that some limited authority to adjust those rates may be desirable.

But those same specialists are adamantly opposed to the extensive revision of the price support levels contemplated by this amendment.

This is such a delicate and complicated issue that the Senate would be well advised to take carefully considered testimony from specialists and experts in tobacco trading and marketing.

Frankly, it would be irresponsible for the Senate to adopt this kind of legislation without such an opportunity. It is beyond the scope of reason for Senators to really think otherwise. If we are going to be conscientious legislators, we simply must adhere to sound legislative practice which includes a thorough hearing process.

Mr. DOLE. I think for all the arguments made earlier, this amendment ought to meet the same fate as the last tobacco amendment not because it may not have some merit but because, as this Senator views it from a nontobacco State, we are in the process of getting nearer and nearer the end of a successful piece of farm legislation.

This Senator is also convinced that if such amendment is adopted, it could threaten the entire package of commodities, whether they be tobacco, rice, sugar, wheat, or whatever.

Mr. President, I hope—I am not certain what the distinguished Senator from Kentucky and the Senator from North Carolina have in mind—but not knowing that I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina.

Mr. EAST. Mr. President, I have a few remarks I would like to make in regard to the amendment of the distinguished Senator from Missouri. I had earlier made a floor statement regarding Senator HATFIELD's amendment. I have a statement on the amendment of the distinguished Senator from Missouri, just to make a brief comment or two on his proposed amendment and why we find, those of us who are intimately involved in this matter, why we find it is simply an unacceptable approach to this problem.

As the distinguished Senator from Kentucky (Mr. HUDDLESTON) has pointed out just a moment ago, this commodity program has been a part of the economic fabric of our areas for a long time. People have bought and acted in reliance upon it. It is an integral part of our economy. It is complex; it is delicate. This simply is just not the forum for sorting out through whatever problems one might perceive in it.

This is not to say, as the Senator from Kentucky has already indicated, that we cannot and should not—indeed, we must—keep abreast of the weaknesses in it, as we must in any commodity program. We are willing to do that and expect to do that and, indeed, I wish to point out that the tobacco people in my State are fully aware of some of the problems that the Senator raises.

For example, if too much tobacco goes into stabilization, the excess builds up, and that is a negative thing. It is negative economically and it is negative politically.

There is not a lack of awareness on the part of the tobacco farmers of this country that their job is to raise a high quality leaf at a competitive price for the domestic and foreign market. They understand that. Their task is not to raise tobacco to be taken by the Government under loan and to be held for an indefinite period of time.

Whatever changes, then, that would be made in this program, I respectfully ask Senators on both sides of the aisle, because this is a bipartisan effort, are to be made, those changes must be made after hearings and reflection, lest we do something dramatic and cannot see through its implications.

This amendment, with all due respect to it, would strike at the very essence of the program and the amount of damage it would do economically and, quite candidly, politically, in all areas is incalculable at this point.

I appeal, as I did earlier, to the bipartisan spirit of this body to appreciate that this is one of the vital commodity programs of our farm community. The farm community is one of the great productive sectors of our economy, one we look at with great pride. They have many pressing problems, including inflation and interest rates. Fortunately, we have removed the embargo. They are going to have a continuing series of problems that we are going to have to try to help with within the limitations that we have.

But we would do a great disservice to them and their economic well-being and, thereby, do a great disservice to the farm economy of this country if we casually come in with amendments, without hearings, without understanding their far-reaching implications and begin dismantling a program that has been in operation for nearly half of a century.

I am simply counseling, ultimately, Mr. President, prudence and restraint and appreciation of what this sort of thing would do in the areas that are affected.

I repeat, the impact, economically and politically, would be tremendous and far-reaching. I only ask that people consider the impact of what this would be and join with us in defeating this amendment.

With all due respect to the distinguished Senator from Missouri and the points that he raises, I am contending, along with the distinguished Senator from Kentucky (Mr. HUDDLESTON), that these matters are more appropriately addressed in other forums and we are happy to address them and consider them and weigh them. Every program, including this one, can undergo examination. Our farmers are willing to do that. But we cannot, in good conscience, knowing the realities of our situation economically, accept this amendment as it is presented.

Mr. President, I respectfully urge my colleagues to vote against the amendment of the distinguished Senator from Missouri.

Mr. President, I support the tobacco price support system and the hundreds of thousands of small farm families who depend on this program for their very existence.

A great deal of misinformation abounds concerning the tobacco program. Discussions center on the myth of a tobacco subsidy and other misconceptions.

I would like to take this time to set the record straight, and hopefully lay to rest these misconceptions about the tobacco program, which is the most effective and least expensive of all our commodity loan programs.

I will begin by attempting to enlighten you as to how the tobacco program works. There are many different major classifications of tobacco. Among these are fluecured, burley, Maryland, and others. For the purpose of my discussion, I will group all these types under the general heading of tobacco.

Tobacco is grown all over the world, with the United States producing about 15.5 percent of the total. We are currently the leading producer, but other countries, notably China, India, and Brazil, are gaining rapidly in production.

Tobacco is a principal cash crop on 276,000 farms in 22 States. The 1980 farm value of tobacco grown in this country was $2.7 billion with 17 States producing more than $1 million worth of tobacco each. This points out the fact that tobacco production is not confined to just three or four States. North Carolina does share favorably in this production though, with a 1981 crop income predicted to exceed $1.1 billion. Now you see why I am so vitally interested in a healthy tobacco program.

But tobacco not only enhances North Carolina's income—it adds greatly to the overall economy of the Nation. Almost $21 billion annually is spent on tobacco products, which is equal to approximately 10 percent of all food expenditures for the same period.

A survey of direct and indirect contributions to the national economy was conducted by the Wharton Applied Research Center at the University of Pennsylvania.

They determined that tobacco contributd to all 50 States in 1979 the following; 2 million jobs of all kinds; $30 billion in wages and earnings; $15.5 billion in capital investment; $22 billion in taxes; and $58 billion, or 2.4 percent, to America's gross national product.

In short, of every dollar's worth of goods and services rendered to, and by Americans in 1979, roughly 2½ pennies were generated by tobacco.

Governments also receive in the form of direct excise taxes three times the revenue received by farmers. In 1980, the Federal Government received $2.4 billion in direct excise taxes, and State, county, and local governments collected almost $4 billion more. U.S. farmers received about $2 billion on this same crop.

So, the government is not supporting tobacco farmers—tobacco farmers are supporting the Government.

Tobacco also contributes favorably nearly $2 billion annually to the U.S. balance-of-payments. Net tobacco exports account for slightly more than 8 percent of our total net agriculture exports.

These economic facts alone make it inconceivable to me that there are those who would like to devastate this commodity loan program.

This tobacco program has worked exceedingly well for more than four decades. Tobacco was first included in the Agriculture Adjustment Act of 1938. Then in 1949, the program was structured as we know it today—based on price support and supply control. This is the same foundation used for many of our commodity programs. And it has proven highly effective in the orderly production and marketing of this crop.

The supply control mechanism uses marketing quotas and acreage allotments. Marketing quotas limit the amount of pounds a farmer can sell under the program. And the acreage allotment system limits the number of acres on which tobacco can be grown.

Incidentally, an HEW report some time back said that if the tobacco program has any effect on the health issue, it is probably a positive one—because it limits the amount of tobacco that can be grown and keeps the price relatively high.

I think it is safe to say also, that since the use of tobacco is older than this country, doing away with a highly effective tobacco commodity loan program is not going to mean people will stop smoking tobacco or growing it.

In return for limiting production—and

I might add that farmers have voted overwhelmingly in referendum for these self-imposed limitations—the Government has offered price supports in the form of Commodity Credit Corporation nonrecourse loans.

These loans come about this way:

When a farmer brings his tobacco to an auction warehouse for sale, if his crop does not bring a bid of at least 1 cent per pound above the support price, the tobacco goes under government loan.

These loans are made from CCC funds to producer cooperatives. And these producer cooperatives pay interest on the loans. The current interest rate is 14.5 percent—and will now be adjusted semiannually to keep the interest rate in line with the cost of money.

This past year, new loans totaling $172 million were made through CCC to the tobacco cooperative. Repayments from the sale of past crops under loan last year totaled $260.1 million. The net result was a plus factor for the Federal Government of $88 million.

At the end of 1980, the value of tobacco under loan was $815 million, representing 647 million pounds. Tobacco companies have purchased sizeable amounts of this tobacco, and stocks have dropped to 406 million pounds. This reduces outstanding loan volume—which has been subject to criticism from some of the enemies of tobacco.

Over the 45-year life of the tobacco program, the cumulative net loss realized by Commodity Credit Corporation is only $56.7 million—and much of this loss can be attributed to a devastating warehouse fire and two bad growing seasons.

These losses represent less than one tenth of 1 percent of all losses on the 13 commodities covered under CCC loan programs. No other commodity program can even approach tobacco's record.

If you add the annual administrative costs of the program, you are only talking about another $29.3 million, and more than $8 million of this projected cost for upcoming seasons will be eliminated under new provisions that call for producers to pay for the inspection and grading.

I think these figures demonstrate dramatically the cost-effectiveness of the Government's investment in a commodity that adds substantially to the livelihood of thousands of small family farmers.

The program has resulted in price stability—higher return on the farmers' investment—and has helped maintain the small family farm at a competitive level with the larger corporate farm. I point out that while the average tobacco farmer may grow other crops on his land, he only cultivates 6.5 acres of tobacco. From the small acreage, though, he derives a substantial portion of his annual income.

Tobacco is a very labor-intensive crop. It takes approximately 250 hours of labor to grow and harvest an acre of tobacco, compared to 21 hours for cotton and 3 hours for food and feed grains. This need for labor had provided thousands of jobs in the tobacco-growing States, and has reduced outmigration.

If this program were eliminated, there would be wide fluctuations in production—and price. This would make it difficult for farmers to make long-range plans, and even to stay in business.

The distinguished Senator from Missouri has introduced legislation that he claims will make American tobacco more competitive on the world market and get the allotments into the hands of the producers. This probably sounds good on the radio and television, and in the newspapers. The general intent of these amendments may be appealing to the nonfarmer, to the outsider, or to the misinformed.

But for the tobacco farmer and the tobacco program, these amendments are a "trojan horse." If you let this legislation in, it will wind up actually killing any program you have left by creating gross inequities and an administrative nightmare.

Senator EAGLETON'S first amendment would provide the Secretary of Agriculture with the authority to adjust price supports on grades of tobacco that are noncompetitive in the world market. This move could, and probably would, subject the tobacco price support program to a game of partisan politics. The Secretary of Agriculture is not given this much power or free hand in determining the price support levels on other commodities. It would create an air of uncertainty and unpredictability for the farmers, warehousemen, and buying companies. The amendment also fails to give specific enough guidelines for determining the cost of production.

The second amendment seeks to return the allotments now controlled by the nonfarmer to the tobacco producers who are currently leasing the land from nonfarmers.

One argument behind the need for this amendment is that major corporations own a substantial amount of farmland with tobacco allotments on them. This is hardly the case, since less than 2 percent of the tobacco acreage in North Carolina is owned by nonfarm corporations. Serious damage would be inflicted upon the small family farmer, while the newspaper headlines would read "Allotment Taken From Corporations."

There would be complicated problems resulting out of the reassignment of these allotments from the nonproducers to the producers. This legislation fails to take into consideration the property rights of the current allotment holders. The great majority of these people have either purchased this land at a much higher price because an allotment was included; or they have inherited the land and allotment, and have paid greater estate and property taxes on land valued higher due to allotments. Why should these owners have to give their property to another party without just compensation?

Some of the producers receiving allotments under this provision have a history of growing leased allotment on rented land, and own no land themselves. Where would they plant this new allotment? In the past the allotment has always been considered an integral part of the land.

This amendment would assign the allotment to the last producer who leased it. No consideration would be given to the other producer who had leased it for 10 years in a row, but did not lease it this past year. This windfall allocation of allotments would also be unfair to the producer who was unlucky enough to lease from quota owners who did not lose their allotments.

The planting requirement for nonfarmers is retroactive. The amendment states that they must plant such allotment in two of any three consecutive crop years beginning with the 1980 crop year. The 1980 and 1981 crop years are over, and there is no way a nonfarmer can protect his allotment if he did not plant during one of those 2 years. If a planting requirement was deemed necessary, it should at least be applied to future crop years. Then some allotment owners might choose to resume planting their tobacco to protect their allotments.

The administrative nightmare I mentioned earlier would best be created by the income test. The provision requiring allotment owners to derive at least one-half of their income from farming in order to keep the allotment would be very difficult to administer properly, and would also do a great injustice to the small family farmer. Many of these such people find it necessary to supplement their farm income by finding employment elsewhere, and they should be awarded—not penalized.

I hold my distinguished colleague, Senator EAGLETON, in the highest personal regard, for he has served his State and country with such grace and distinction. We seem to have a difference of opinion on the merits of his proposal, but I look forward to working with him in the future.

We have today a program that has proven its effectiveness, its worthiness, and its efficiency over more than four decades. Let us not destroy something that works so well for so many.

I urge my colleagues to oppose these amendments and any other attempts to end this successful program.

The PRESIDING OFFICER. Who seeks recognition?

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MISS AMERICA—ARKANSAS' ELIZABETH WARD

Mr. PRYOR. Mr. President, the poet Keats once declared that "A thing of beauty is a joy forever," and seldom has the State of Arkansas produced greater beauty and poise and talent than Elizabeth Ward of Russellville.

Miss Ward was crowned, last weekend, in Atlantic City, as the 55th Miss America.

Pictures of the much photographed Liz Ward show a classic brunette, a gracious stature, a dazzling smile. And those in

my home State who know her, who helped raise her from childhood, who taught her in public schools, and who nourished her talent and ability, claim that she is a natural and spiritual beauty as well. She brings to the reign of Miss America a dimension of concern for people, for State, and country, and for self-reliance as an American adult. She commented, shortly after receiving her honor, that her goal is "to be the best Miss America I can, and to represent the young people of this country."

Mr. President, I am proud of Miss Elizabeth Ward, and I know that I speak for all Arkansans in expressing both my congratulations to a fine young lady and my encouragement that she continue to set an example for others in this country. Certainly she has maintained not only her looks, but her wits as well. And she demonstrates for us all another basic point of fact from the poet Keats: That beauty is truth, and truth beauty.

I ask unanimous consent that a recent article in the Arkansas Democrat be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARKANSAN HEADS FOR NYC—MISS AMERICA VOWS TO DO HER BEST

Elizabeth Ward of Russellville took off from Atlantic City, N.J., bound for New York City on Sunday to begin her reign as Miss America 1982, vowing to be "the best Miss America I can."

Miss Ward, 5-foot, 9-inch brunette, was crowned the 55th Miss America Saturday night during ceremonies in the Atlantic City Convention Hall. Asked what she would be doing in New York City, she said, "I don't know, they haven't told me yet."

In a telephone interview Sunday, Miss Ward said the position of Miss America, "means a lot to me . . . so much more than the ($20,000) scholarship. I will have the chance to meet people, including those who can help me in my future career."

Miss Ward said she would not return to Arkansas until sometime in October. She added that "there is no way" she can return to her junior-level accounting studies at Arkansas Tech University in Russellville during the next year. She said she does intend to pursue her goal of becoming a corporate lawyer once her reign ends.

She said her goal as the reigning queen will be "to be the best Miss America I can and represent the young people of this country."

The new Miss America is a teetotaling, born-again Christian who doesn't smoke or curse and who will make her nation proud of her, her friends and relatives said.

Jim Ward of Russellville said his phone was "ringing off the wall" since his daughter won the title. "We're all very elated and very proud of her," he said during a telephone interview Sunday. "She's a beautiful girl and she's done a wonderful job," he said.

Ward said he and about 40 neighborhood guests watched the pageant on television at his home. When Miss Ward was proclaimed the winner, "the top of the house blew off," he said. "The excitement was so great around the area, he said, his family fell into bed about 4 a.m. and arose around 6 a.m. when the phone congratulations began pouring in again.

Mrs. Mary Ward of Booneville, Miss Ward's grandmother, said Sunday she "hadn't done anything but answer the phones."

"Everyone is real proud and happy," Mrs. Ward said. "Everyone has been so nice."

Miss Ward's mother, Patricia Hampe, traveled to Atlantic City for the event.

Mrs. Hampe said later Sunday that her daughter would appear this morning on NBC's "Today" from New York City.

Miss Ward's parents divorced when Elizabeth was in about the fifth grade. Mrs. Hampe said Sunday that she thought her daughter had coped with the divorce as well as any child could have.

"We all went through a terrible time, but that's normal. You have to go through the normal pain," Mrs. Hampe said.

Mrs. Hampe described her daughter as a conscientious student who's never cheated on a test to Mrs. Hampe's knowledge.

"She believes in doing things honest and right," Mrs. Hampe said.

Miss Ward was the runner-up during the 1980 Miss Arkansas contest. She worked in Dallas as a model. In addition, she was voted Miss National Sweetheart in 1981.

A cheerleader and honor student, Miss Ward studied piano for nine years.

Runners-up in the Miss America pageant were Miss Illinois, Sandra Truitt, 25, of Evanston; Miss Georgia, Kristi Anne Evans, 21, of Atlanta; Miss Indiana, Pamela Carlberg, 21, of Bourbon; and Miss Texas, Sheri Ryman, 20, of Texas City.

Miss Ward is the second Miss Arkansas to win the Miss America title. Donna Axum won the pageant in 1964.

Meanwhile, Miss Ward's boyfriend, Jon Birmingham, 23, of Russellville, said she called him about 2 a.m. Sunday. The two have dated about three years, said Birmingham, who's about to begin work on a master's degree in business at Arkansas Tech University.

Birmingham said he first met the new beauty queen when he was running a sound system while she sang in a high school talent show.

"It was her voice. That was the first thing I heard," he said.

Miss Ward's voice played a part in attracting the attention of the pageant judges, too. Her talent competition was a bouncy rendition of the 1920s ballad, "After You've Gone."

Daniel Raines, Miss Ward's speech and drama teacher at Russellville High School, said Saturday night that the beauty queen had roles in a school play, "Arsenic and Old Lace" as well as in a musical, "Hello Dolly."

But Raines said Miss Ward's talent wasn't that outstanding. "She was very pretty, and I thought she had some potential," he said.

When she began entering beauty pageants several years ago, Raines said, her personality didn't change. "She seemed to achieve more poise. But whenever we meet her out in town, she is unfailingly pleasant. She's still Liz."

Mr. HUDDLESTON. Mr. President, the Senator from Arkansas was very eloquent, but he might have done us a much greater favor if he had just sent Miss Ward and spared us the oration. [Laughter.]

## ORDER OF BUSINESS

(The following occurred earlier:)

Mr. HEFLIN. Mr. President, I yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I appreciate the courtesy of the able Senator from Alabama in permitting me to comment on another subject and to have my remarks in an appropriate place in today's proceedings.

## THE 194TH BIRTHDAY ANNIVERSARY OF THE CONSTITUTION

Mr. RANDOLPH. Mr. President, I call our attention to the 194th birthday of the Constitution of the United States.

It was on this date almost 2 centuries ago, when those who were active in the Declaration of Independence formulated this document which has withstood the test of time. It has been expanded and contracted, but the body of that document is intact. Twenty-six amendments have been added to the basic Constitution.

Often we fail to pause, as we should, to express our thanks and admiration for the Founders, both men and women, who worked in that early period of the beginning, the awakening, of this Republic.

This morning a very unique and memorable breakfast, on Capitol Hill, was held, 194 candles were lighted in the Caucus Room of the Russell Office Building to commemorate the anniversary of the Constitution and to express tribute to the Founders of our Nation.

There were remarks by young men and young women from the college campuses of America who expressed their deep feeling and the hoped-for part they will have in a reawakening of the commitment of Americans of all ages to the giants of this country who wrought so beautifully and well for us, as emphasized in the language, the heritage, and the vision set forth in the Constitution of the United States.

It was my privilege to join Senator HATCH in hosting this event. Several of our colleagues participated: Senators THURMOND, BURDICK, MATHIAS, and GRASSLEY.

The Archivist of the United States, Robert Warner, was also present.

Mr. Boris Feinman, chairman and founder of Convention II, the sponsoring organization for this anniversary ceremony, chaired the program and welcomed the 125 participants.

Timothy Leighton, president and chief executive officer of Convention II, emphasized the importance of understanding our heritage and charged the young students present to become more involved in the political process.

He stressed:

Citizenship education in school has tended to focus on government and voting, which are very important but are not the totality of citizenship. Our educational institutions need to include the joys and challenges of real political activity, of the give-and-take vital process which are also citizenship.

We need to appreciate where we've come from to be able to proceed intelligently. Convention II, the national model constitutional convention of high school students, for whom I serve as president, believes that the Constitution of the United States is one of the greatest inventions in the history of man. Our program fosters an understanding of and appreciation for much of the process and politics undergirding our system by inviting challenges to that very system in a recognized forum. Let history inspire fierce appreciation for our heritage while understanding its problems.

After talking with the Convention II delegates and some 100,000 other young Americans, I leave with you the following thoughts. Ultimately the responsibility for our future rests on our shoulders and requires our working to insure our abilities. We shall progress farther than you simply because we shall stand upon your shoulders and your accomplishments while attempting to avoid your mistakes. Yet there is not and should not be a dramatic line of demarcation between your turn and ours. Although we may lack the experience which years might provide, we are

coincidentally not burdened with prejudices. Though our idealism may need to be tempered, through experience and through an enhanced citizenship education, our vitality is a key resource for this Nation to tap. Let the leaders of today and the leaders of tomorrow merge our energies.

Bernard Friedman, president, College Democrats of America, and Jack Abramoff, chairman, College Republican National Committee, assessed the failure of young people to participate and vote in elections at all levels of government. They underscored the need for this segment of our population to exercise our "franchise of freedom"—the ballot.

Mr. Friedman declared:

The human deprivation that I witnessed behind the iron curtain that year has had a lasting impact on me—and has served as an impetus for my political involvement. I know that we truly live in the greatest nation on earth, for no other country can offer so much freedom and so many opportunities to its citizens.

But, unfortunately, most young people in this nation do not appreciate their freedom, and, even worse, choose not to participate in our democracy. This morning I would like to address the major problem which college Democrats face throughout the entire nation, the indifferent and non-voting young American. In 1980, the voter turnout of those between the ages of 18 and 30 years was below 30 percent. We need to ask ourselves not only why so few young people vote, but more important, why the youth of this nation feel alienated from the political system.

College Democrats today face the same "trials and tribulations" that our founders did twenty-two years ago. Whether due to ignorance or indifference the fact remains that today, as in 1959, the vast majority of young people in this nation chose not to vote. Whether Democrat or Republican, liberal or conservative, we must all seek to combat the embarrassingly low level of political participation amongst America's youth.

This is why what we are doing today is so important. College Republicans and college Democrats may not agree on every issue, such as cuts in student loans, but we do agree that it is essential that our two organizations reach out and support nonpartisan groups such as "Convention II," which educate young people on the realities of our political system. College Republicans and college Democrats are determined to join Convention II's efforts to combat the apathy and indifference among American students.

Yet despite the good programs and high enthusiasm of convention II, college Democrats and college Republicans have a difficult road ahead of us. We need the support of every Senator and Representative in Congress, and all officials within each party if we are to activate America's youth. We must attract millions of young people if we are to increase participation within our democracy. After all, the first three words of our beloved Constitution, the foundation of our great Nation, are "we the people." These three words best explain the goals of our three organizations. We each seek to have America's youth join the mainstream of the Nation in using the knowledge and skills of their education to revitalize the ideals of our Founding Fathers. If we are to be successful, we need your help. I hope that you will join our efforts.

Mr. Abramoff pleaded:

I talk about voter apathy, why it occurs, and what we can do to counter it. As chairman of the college Republicans I feel I have a different perspective on the low voter turnout of recent elections.

When 18-year-olds were granted the right to vote in 1972, the world's most basic right became a possession of a new segment of America and everyone thought that the vote of the college age group would be substantial.

Well, it hasn't worked out that way. In the three Federal elections in which they have participated, the 18 to 20 year age group has proved, as Senator Randolph has indicated, to be the worst in voter turnout.

What happened? Why did young people, brimming with ideals and energy abandon the citizen's most cherished right and duty?

I think the answer lies hidden somewhere in the pile of Government red tape. I think that college students feel that, like the inflated economy which weakens a student's dollar, the runaway Government bureaucracy has weakened the student's vote. It has eroded the power of the officials the voter seeks to elect.

One in every 14 Americans is in the business of telling the rest of us what we can and cannot do. And percentagewise, very, very few of these are elected officials.

Unfortunately, we can't vote bureaucrats out of office. Often, the courts have given them as much power in some areas as elected officials. And until you, the Members of Congress, dismantle the bureaucracy, there's not much a voter can do with his one vote.

Now, I'm not so naive as to think that students or others consider the reasons why they fail to register and vote. All they know is that their one vote doesn't matter. They often don't care about which candidate wins, because they feel that, quote, one man can't make a difference, end quote. And by not voting for Senators, Congressmen, State and local officials, the message they send us is that in general elected officials collectively can't make a difference, is that what you, members of the United States Senate, believe?

I know people still care. Students care. They'll vote and participate more often, but only if the Government gives their vote the value it was meant to have by Madison, Jefferson, and our other Constitutional forefathers. We can defeat voter apathy by guaranteeing the voter the rights he/she were guaranteed in the Constitution.

Mr. President, the discussions at our ceremony on the 197th anniversary of the Constitution focused attention on the vital issue of voter participation which should be a concern of all citizens. Government will only be as good as "we the people" work to make it so. Voting is the basic decision process through which this objective can be achieved.

Mr. President, I ask unanimous consent that the program for the 194th birthday of the Constitution be inserted in the RECORD.

There being no objection, the program was ordered to be printed in the RECORD, as follows:

PARTIAL GUEST LIST FOR 194TH BIRTHDAY OF THE CONSTITUTION

Senatorial Hosts: Orrin Hatch and Jennings Randolph.

Breakfast Hosts: Convention II—Boris Feinman, Chairman, Timothy Leighton, President. Co-hosts: College Republican National Committee—Jack Abramoff, Chairman; College Democrats of America—Bernard Friedman, President.

Senators: Orrin Hatch, Jennings Randolph, Quentin Burdick, Charles Mc Mathias, John Warner, Strom Thurmon, Charles E. Grassley.

Senator Historian: Richard Baker.

Senate Rules Committee: Mrs. William Oberle, Helen Kane.

United Sttes Supreme Court: Dr. Mark Cannon, Administrative Assistant to Chief Justice; Ron Collins, John Yoder.

The President's Assistant for Legislative Liaison: Powell Moore.

Bicentennial Council of the Original 13 States: Board of Directors—A. K. Johnson, Chairman; W. Robert Higgins.

Project '87: Prof. Richard Morris, Chairman.

American Bar Association: Marna Tucker.

Hudson Leftwich and Davenport: Ronald Jessamy, Partner.

And Guests:

Bicentennial Council of the Original Thirteen States: The Members of the Board, ADA Youth Caucus, Graydon Forrer.

Center for Citizenship Education: Mary Ann Kirk, Harry Hogan, Dr. James Addy.

College Democrats of America: Jonathan Slade.

College Republican National Committee: Grover Norquist, Paul Erricson.

American Association of School Administrators: Garry Marks.

American Bar Association: Lillian Gaskin.

Baltimore City Public Schools: Dr. Samuel Banks.

Baltimore County Public Schools: Dr. Paul Rivera.

Maryland Council on Economic Education: Dr. Saul Barr.

Convention II: Debra Boyle, Adam Rothman, Tim Mullaney, Peter Deschamps, Robert Friant, Jaki Brown.

Charles County (Md) Board of Education: James Forcum.

Calvert County Board of Education: Eugene Uhlan.

Future Homemakers of America: Mildred Reel.

Girl Scouts Council: Paul Poffenberger.

Kettering/Fairmont West High School, Ohio: Kathaleen Herdman.

Georgia University, College of Education: Dr. Mary Hepburn.

Institute for Political and Legal Education: John Khanlian.

League of Women Voters: Marilyn Cohen.

Johns Hopkins University: Dr. Margaret Murphy.

National Council of Negro Women: Dorothy Height.

National Governors Association: Jim Martin.

National PTA: Patricia Morris.

National School Volunteer Program: Terry Nagle.

National Council for Social Studies: Elizabeth Scott.

National Association of Secondary School Principals: Scott Thomson.

YWCA: Jo Missler, Esther Van Waggener Tufty, Lt. Col. Dorothy Manning, Evelyn Foley, Jeniffer Edson.

Mr. HEFLIN. Mr. President, I would like to join with the Senator from West Virginia in his remarks. I concur in them.

## ANNOUNCEMENT OF POSITION ON CERTAIN VOTES

● Mr. ARMSTRONG. Mr. President, earlier today I was absent from the Chamber at the time of three rollcall votes.

Although my vote would not have been determinative of the outcome, I would like to state my position for the record.

On the Helms motion to table the Quayle-Tsongas amendment, I would have voted aye.

On the Helms motion to table the Eagleton amendment, I would have voted no.

On the Inouye motion to table the Humphrey amendment, I would have voted aye.●

## AGRICULTURE AND FOOD ACT OF 1981

UP AMENDMENT NO. 381

The PRESIDING OFFICER. The Senate will now return to S. 884.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The pending amendment is unprinted amendment numbered 381. The Chair recognizes the distinguished chairman, the Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Chair. I would inquire if any other Senator has any comments he would like to make.

● Mr. WARNER. Mr. President, we have debated at length today just how the tobacco program is one of the few Federal programs which pays its own way, and I will not repeat those explanations. That is a fact that is accepted by even its most severe critics.

Over the past 10 years, loan repayments have come within $24 million of equaling new loans that were made. There were large differences from year to year, but over the long run, repayments and loan outlays have approximately balanced.

It is the loan program that absorbs some of the shock of production variations due to weather. Without stocks of tobacco under loan, the supply shocks would produce greater market price variations. The loan program works to stabilize the tobacco market. In fact the Government has lost only $166,000 a year over the last decade because of the program.

Tobacco is the principal cash crop on 276,000 farms in 22 States and the program assists those farmers. The average tobacco allotment is 4.4 acres—so we're talking about relatively small farmers benefitting most from the program.

There are adjustments that need to be made to assist farmers and help to reduce Government cost even further, but those adjustments can't be done here on the Senate floor as amendments to the farm bill. These adjustments need studying and the changes recommended by the Agriculture Committee in an orderly manner.

For these reasons, Mr. President, I urge all Senators to reject the amendments proposed by the Senator from Missouri, as I did in connection with the amendment offered by the Senator from Oregon.●

Mr. FORD. May I take 1 minute?

Mr. HELMS. Certainly.

Mr. FORD. I thank the distinguished Senator from North Carolina.

May I just say to my colleagues that this amendment now being presented to us is almost identically the same thing as the amendment of the Senator from Oregon. This amendment will complicate the procedure of a stable industry so much, attempting to try to get so many people to cooperate, that it will be devastating to try to figure it out.

If this amendment is agreed to, we will have one individual make decisions. Now the farmers of this great country have the opportunity to vote for what is good for them. I think this procedure has worked well in the past. We do not have to complicate a program and extinguish a program by virtue of this amendment. I hope my colleagues will follow the same procedure as with the previous amendment.

Mr. HELMS. Mr. President I see no Senators arriving to continue this debate. On behalf of the distinguished Senator from Kentucky, the ranking minority member of the committee, and myself, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Missouri (Mr. EAGLETON). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. BRADLEY) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 48, nays 45, as follows:

[Rollcall Vote No. 263 Leg.]

YEAS—48

| | | |
|---|---|---|
| Abdnor | Goldwater | Melcher |
| Andrews | Grassley | Nunn |

NOT VOTING—7

| | | |
|---|---|---|
| Armstrong | Kennedy | Murkowski |
| Bradley | Mathias | Stafford |
| Cranston | | |

So the motion to lay on the table Mr. EAGLETON's amendment (UP No. 381) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the motion was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the able was agreed to.

Mr. HUMPHREY addressed the Chair.

The PRESIDING OFFICER. The Chair is unable to determine who is speaking.

The Senator from New Hampshire.

AMENDMENT NO. 550

(Purpose: To modify the price support provisions applicable to sugar)

Mr. HUMPHREY. Mr. President, I call up amendment 550 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. HUMPHREY) proposes an amendment numbered 550.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In section 901 of the bill, relating to sugar, strike out all of the new subsection (h) added by clause (2) of such section and insert in lieu thereof the following:

(h)(1) The price of each of the 1982 through 1985 crops of sugar beets and sugar cane, respectively, shall be supported through loans or purchases made with respect to the processed products thereof.

(2) The level of the loans or purchases which shall be made available with respect to the processed products of sugar cane under this subsection shall not be less than 16.5 cents per pound of raw sugar.

(3) Loans or purchases shall be made available with respect to the processed products of sugar beets under this subsection at such level as the Secretary determines is fair and reasonable in relation to the level of the loans or purchases made available with respect to the processed products of sugar cane.

(4) Loans made under the authority of this subsection shall mature no later than September 15 of the fiscal year in which such loans are made.

Mr. HUMPHREY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HUMPHREY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from New Hampshire is aware that under the previous order, there are 20 minutes on this amendment, equally divided.

Mr. HUMPHREY. I thank the Chair. Will the Chair restore order, please?

The PRESIDING OFFICER. The point of the Senator from New Hampshire is well taken. The Senate is not in order. The Senate will be in order so that the Senator may be heard.

Mr. HUMPHREY. Mr. President, I wish to stress that there is a distinct difference between this amendment which is being offered to the sugar provision and that which was tabled earlier in the day. The earlier amendment was an all or nothing proposition to eliminate

completely the sugar loan program. This amendment would not do that at all. It would make a modest reduction in the loan rate.

I do not intend to take a great deal of time. I believe the arguments have been made on both sides.

The amendment explicitly reduces the loan rate from the 18 cents per pound, which is presently in the bill, which of course increases over the years to 19½ cents. It reduces that language to 16½ cents for all the years of the authorization. So it is a modest reduction.

Further, Mr. President, with regard to the 16½-cent rate, several weeks ago the administration was proposing this very rate. I am not criticizing the administration for changing its position. I realize that some give and take is necessary in this process. But it was a figure very carefully arrived at by some experts in the Agriculture Department.

Mr. President, in the last few hours, a number of Senators have asked me to offer this amendment. Apparently, a number wish to make some modest reduction in this program, even though they voted earlier in the day to table the amendment which would have eliminated the program altogether. So I am happy to offer a chance to my colleagues to embrace this modest reduction, to take a position somewhat different from the one they took earlier in the day and one which is very reasonable, in my opinion.

I am not disposed to debate the issue fully, but I reserve the remainder of my time, pending the option of the Senators on the other side.

The PRESIDING OFFICER. Who yields time?

Mr. ANDREWS addressed the Chair.

The PRESIDING OFFICER. There are 20 minutes on this amendment, equally divided, and the Chair is trying to determine who yields time.

Mr. ANDREWS. Mr. President, will the chairman of the Agriculture Committee yield to me? I assume he is on the other side.

Mr. MATSUNAGA. I yield to the Senator.

The PRESIDING OFFICER. The Senator from Hawaii yields from the time under his control.

Mr. ANDREWS. Mr. President, I wish to point out two or three things.

The 18-cent price that was arrived at was very carefully thought through. We held rather exhaustive hearings on this matter before a subcommittee of the Senate Agriculture Committee, which I was privileged to chair.

During those hearings, we heard testimony from producers and from consumers.

The price of 18 cents, as set in this measure, is 44 percent of parity. That compares with the price that is set in this bill for wheat and feed grains at 50 percent of parity and the lower price arrived at for milk of 70 percent of parity.

So, Mr. President, I strongly suggest that the Senate go along with the price of 18 cents, which, at that level, is even a little below the price set for other commodities.

I also point out that this is not just for the producers of sugar. It is also for the consumers of sugar.

Between the earlier debate this morning and this evening, I went back to my office and picked up the transcript of those public hearings, and I should like to share with my colleagues the comments of the Sugar Users Group, as expressed by their individual, Mr. Tipton. He said this:

> The Sugar Users Group has consistently favored a free and unfettered sugar and sweetener market, in principle. However, we recognize that the world market situation is such that it cannot be relied upon to sustain the domestic industry. In the past, the combined effects of national policies and program around the world and the internal dynamics of the world sugar production system have resulted in occasional periods of substantial over-supply. Therefore, we favor a domestic program designed to protect U.S. growers and processors from unrealistically low prices at such times.

Mr. President, during that testimony it was developed that the cost of production of sugar in the United States, with respect to the Hawaiian Islands, the cane areas in the South, and the beet areas in the Midwest, averaged in the neighborhood of 22 to 23 cents. Some areas were higher than that.

I suggest that the 18-cent figure is a minimally low figure, and to lower it beyond that would destroy the program totally.

I yield to my colleague from the great State of Louisiana.

Mr. JOHNSTON. Mr. President, first of all, if this amendment is agreed to, it will put sugar at 42.1 percent of parity. That is not fair. We are giving corn 50 percent. We are giving wheat 50 percent. We are giving dairy 70 percent. It is below the cost of production. It will put a sick industry out of business.

In my State, we have only 24 sugar mills remaining. That is down from 36 mills in 1975. In 1973, we had 1,300 farmers. Today, we have about half that many, only 853 farmers.

We have 25 percent less production than we had just a few years ago.

Mr. President, this is a very personnel-intensive business. There are about five times as many employees per dollar of production than for other kinds of crops. That means, if we put the sugar mills out of business, the farms go out of business, and the employees are unemployed.

This is a relatively small business. These are small farms. In my State they average 200 acres. Two hundred acres is the minimal size considering the investment in equipment.

Mr. President, I plead with my colleagues. This amendment will be the death knell of sugar in my State and elsewhere in the country. It is just not there. It is not good economics to kill an industry that is greatly needed by this country.

Let us learn from the lesson of OPEC. Let us not destroy a domestic industry while we still have a chance to save it.

I thank my colleagues.

Mr. ANDREWS. Mr. President, I yield to the distinguished senior Senator from Hawaii.

Mr. INOUYE. Mr. President, this amendment is not just a modest reduction. It will literally gut the program.

This program is not to reward inefficiency. In fact, the sugar producers in the United States are the most efficient in the world.

This program will provide an opportunity for our industry to be competitive with the international sugar market.

I am certain all of us know that the United States is the only place where sugar is not supported by the Government. All other sugar in the world has some sort of subsidy.

This most importantly will provide our consumers with a stable price schedule.

If we want to gut the industry and as my distinguished friend from Louisiana suggests to repeat an OPEC-type situation here then vote for the amendment.

But if we want to be at least halfway independent in sugar, then I will say we have to vote down this amendment.

I hope that the Senate will vote this down with a resounding vote.

I thank the Chair very much.

Mr. MATSUNAGA. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Hawaii has 4 minutes and 4 seconds remaining.

Mr. MATSUNAGA. Mr. President, the offeror of the amendment has stated that his is a moderate amendment, that his is different from the amendment which was earlier defeated by an overwhelming vote of 61 to 33.

But his amendment will have the same effect. It would simply destroy the sugar industry in the United States, which would mean the loss of 100,000 jobs in America, 30,000 of which would be in Hawaii.

As responsible and responsive Members of the Senate, we are making every effort to create new jobs even by spending hundreds of millions of dollars; yet we are being asked by the Humphrey amendment to bankrupt a viable sugar industry and add 100,000 American workers to the unemployment rolls, by eliminating a program which will not cost the taxpayer a penny.

How foolish can the Senate be by voting for an amendment such as this? So I ask for the same vote which was cast to defeat the earlier amendment, offered by the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Indiana (Mr. QUAYLE).

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HUMPHREY. Mr. President, I wish to address a number of points that have been raised.

First and foremost is the point just made by my friend from Hawaii that the program as it now stands will not cost the consumer anything. Quite the contrary. That is the whole point. It is going to cost the consumer a good deal more than would otherwise be the case. For

each 1-cent increase in the loan rate an additional $300 million would be borne by the consumers whom we represent.

It has also been stated that this program as it now stands will result in stable prices. That may be true, but they will be stable at a level higher than would normally be justified.

It has been stated that all sorts of tragedies will result in the sugar industry. I wish to point out that all kinds of tragedies are resulting in other industries which do not enjoy the protection of programs such as this, industries such as automobile dealerships and homebuilders who are suffering terribly today. Yet they have no similar socialistic underpinning offered them by the Federal Government.

The question of fairness has come up. Is it fair to sugar processors? I suggest we consider the fairness to consumers. It is patently unfair to them.

It has been asserted further or implied that the sugar processors are unanimous in their support for this sugar provision in this bill as it now stands. That is not true at all.

In fact, the chairman of the U.S. Cane Sugar Refiners Association, Mr. Nicholas Kominus, testified before the Agriculture Committee and among other things respectfully urged that the committee not include the sugar provision in the farm bill.

So there is disagreement even within the association of sugar producers.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from New Hampshire has 5 minutes and 45 seconds remaining.

Mr. HUMPHREY. Mr. President, I think the argument has been well made. The Senate is anxious to get on with other business. I am willing to yield back the remainder of my time if the manager on the other side is also willing.

Mr. INOUYE. Let us vote and yield back the time.

Mr. MATSUNAGA. Mr. President, I yield to the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, the issue raised by this amendment is a simple one: Should the Federal Government provide the same price protection for domestic sugar beet and sugar cane producers that it provides for every other agricultural commodity? I believe the only response to the question is "Yes."

This country imports approximately 50 percent of its domestic sugar needs, a distressingly high figure. These imports, primarily from Latin American and Caribbean countries, have had an adverse impact on Minnesota's sugar beet growers in the past, and without the price protection of the sugar program in this farm bill, I have every reason to believe that a large segment of our domestic sugar producers will cease to exist. Should this be allowed to occur, this country will be held hostage to developments in the world's other sugar producing countries, a development feared by consumers and commercial users alike.

Most sugar moving in world trade is covered under contracts between importing and exporting countries. When a sugar-exporting country's annual production exceeds its contractual obligations it seeks to dump its surplus on other sugar-deficit countries. Unfortunately for U.S. sugar producers, this country is virtually the only one in the world which welcomes these imports with open arms. While I know sugar exports are key to the economic health of many LDC's, it would be sheer folly to allow foreign imports to displace our domestic producers.

The most equitable position this body can take is to offer domestic sugar producers the same price supports as are offered to every other agricultural producer. The 18-cent loan rate contained in this bill is approximately 40 percent of parity. Given the loan rates provided for other commodities in this bill, this figure is relatively low. The amendment before us would strike even this meager assistance.

Every Senator considering this amendment should remember these simple facts:

The U.S. sugar-producing industry is important to the general welfare of the Nation and makes substantial economic contributions to the several States and many communities in which it operates;

Sugar is a major crop. It ranks 10th in terms of acreage and will rank 6th or 7th in dollars to the farmer for the 1980 sugar-producing year;

Nearly 100,000 Americans are directly dependent on the domestic sugar industry for their livelihood. In many rural areas or small towns in which the bulk of the industry operates, alternative job opportunities are just not available; and

When fluctuations in world sugar prices force cutbacks in American production, they also force the closure of American refineries. Refineries are capital intensive, and cannot be easily reopened. A price support level sufficient to protect our refining capacity is essential to protect the existence of the domestic sugar industry.

Minnesota is second only to North Dakota in sugar beet production, and sugar is the key to the economic livelihood to cities such as Renville, Crookston, Ortonville, East Grand Forks, and dozens like them. The Renville sugar beet processing plant is among the most sophisticated in the Nation, and anyone who has seen the facility can understand its economic importance to the region. In short, these plants represent a tremendous investment, both in human and economic terms, and passage of this amendment would mean the end to its operations and similar ones along the Red River Valley. That result is not in the interest of Minnesota or the Nation, and I urge all of my colleagues to reject this amendment.

The PRESIDING OFFICER. The Senator from New Hampshire yields back all time

Does the Senator from Hawaii yield back his time?

Mr. MATSUNAGA. Mr. President, I yield back all time remaining.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Hampshire.

Mr. INOUYE. Mr. President, I move to lay that amendment on the table.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Hampshire.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 64, nays 30, as follows:

[Rollcall Vote No. 264 Leg.]

YEAS—64

| Hatfield | Pell | |
| | Percy | |

NOT VOTING—6

| | | |
|---|---|---|
| Armstrong | Cranston | Murkowski |
| Bradley | Kennedy | Stafford |

So the motion to lay on the table amendment No. 550 was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, may I have the attention of the Senate for a moment?

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, If I could have the attention of the Senate

for a moment, I think we have an arrangement on an amendment that will expedite the progress of the Senate.

I may say, by the way, that we intend to continue for a while tonight. We are not finished. I would expect another hour or perhaps longer, before we can call it a night.

I must confess now that I do not see any realistic prospect that we are going to finish this evening, which means we will be in tomorrow. I regret that it is necessary to stay in longer, but we still have a great number of amendments to deal with.

Mr. President, I understand that on the amendment to be offered by the distinguished Senator from Nebraska dealing with target pricing there is an agreement on both sides that here will be a time limitation of 2 hours. Might I inquire of the Senator from Nebraska if that is correct?

Mr. ZORINSKY. There was no agreement for time as of yet.

Mr. BAKER. I was misinformed or I misunderstood. Would the Senator be agreeable to a time limit of 2 hours, equally divided?

Mr. ZORINSKY. I want to get a parliamentary question answered before I respond.

Mr. BAKER. Mr. President, let me say, before I yield, that what I thought we had arranged was that the Senator from Nebraska would call up his target pricing amendment, that there would be a 2-hour time limitation on the same arrangement that we had on other amendments, that the amendment would be laid down and made the pending business and then temporarily set aside to become the amendment to be dealt with when we resume consideration of this bill tomorrow. That would permit the Senate, then, to go on to other amendments tonight on a shorter time limitation and Senators would be prepared to deal with this amendment when we resume consideration of the farm bill on Friday.

Mr. DOLE. Will the majority leader yield?

Mr. BAKER. Yes, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, the Senator from Kansas does not have any problem with the time agreement. It may not take 2 hours.

Mr. ZORINSKY. Would it be possible to structure the time agreement on a second-degree amendment?

Mr. BAKER. Under the agreements that we have so far, with the 2-hour limitation, it automatically would be a 1-hour limitation on the second-degree amendment, with the requirement that the second-degree amendment be germane to the first-degree amendment. There would also be a 10-minute limitation on any point of order or appeal, if the same is submitted to the Senate. That is the boilerplate language that we have used on amendments so far and I would propose for this amendment.

Mr. ZORINSKY. Mr. President, I ask the majority leader, if I were to add a perfecting amendment to my amendment, would the time agreement pertain to the perfecting amendment or the original amendment?

Mr. BAKER. Mr. President, let me yield to the minority leader.

Mr. ROBERT C. BYRD. Mr. President, I would suggest to the distinguished Senator that he cannot offer an amendment to his amendment unless the yeas and nays have been ordered on the amendment in the first degree.

Mr. BAKER. Does the Senator intend to modify his amendment?

Mr. ZORINSKY. Yes.

Mr. BAKER. He may do that, of course, at any time before the yeas and nays are ordered, simply on application.

Mr. ROBERT C. BYRD. Not if there has been a time agreement entered on his amendment, without unanimous consent.

Mr. ZORINSKY. I was desirous of amending my amendment in the second degree, not modifying it.

Mr. BAKER. The minority leader, of course, is right, that if we have agreed to this time limitation, it would require unanimous consent to modify the amendment. But as I understand, the Senator from Nebraska now intends to offer a second-degree amendment to his first-degree amendment?

Mr. ZORINSKY. Yes. I do not want to take additional time. I just want to make sure that the time allotment is for the proper amendment.

Mr. BAKER. Under the time agreement that has been offered, any Senator would have the right to offer a second-degree amendment if it is germane to the first amendment, as I understand it. Does that answer the Senator's question?

Mr. ZORINSKY. Yes.

Mr. BAKER. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, this is one of the very substantial amendments. There are two or three left which will take considerable time. It may not take 2 hours. I hate to object to a time agreement except that it takes away certain options we have in the event the amendment of the Senator from Nebraska would carry. I do not know what the amendment contains precisely, but it is to go back to the original package, the original Senate bill, which would raise the cost of the program $1 billion or more. I doubt that it would prevail. But even if it did, it would mean that we would have to revise whatever strategy we might be able to develop by that time.

I have discussed this with the Senator from Nebraska. We do not have any problem moving very quickly on the amendment, unless there is just some deep desire to lock us into an agreement. I think we can probably dispose of it in less time than that and still not lose our options. Of course, if he prevails, it might take a little longer, a day or two.

Mr. BAKER. Mr. President, I think what I have done is to make matters more complicated rather than simpler.

Mr. ZORINSKY. Will the majority leader yield one additional moment?

Mr. BAKER. Yes.

Mr. ZORINSKY. This does not require the time that we are requesting. The Senator from Kansas and I have an understanding. If we do not have a time agreement, I can assure this body that it will not take in excess of the time I originally offered.

Mr. BAKER. Sometimes a time agreement would hurt and sometimes it would not. I will withdraw my suggestion. Before I do that, could I inquire, does the distinguished Senator from Nebraska still wish to call up his amendment this evening?

Mr. ZORINSKY. If at all possible.

Mr. BAKER. Does the Senator wish to debate the matter this evening or put it over, as originally contemplated?

Mr. ZORINSKY. I will leave that to the option of the majority leader.

Mr. BAKER. Mr. President, if the Chair will indulge us for just a moment, I will have an answer for the Senator from Nebraska.

Mr. ZORINSKY. The majority leader has indicated on numerous occasions that he intends to be in until midnight this evening. I can either lay it down and withhold it until tomorrow, at his direction, or debate it this evening. Whatever suits the majority leader.

Mr. BAKER. The Senator is very considerate and cooperative. Perhaps he can give us a few more minutes.

Mr. DOLE. I suggest we go ahead and dispose of the amendment, if we can. We can go ahead and debate it. We are not precluded from offering a motion to table.

Mr. BAKER. Mr. President, I think the Senator from Kansas is right. I think if we try to pin this in at this hour, we will be in trouble. I will recommend, if I may be privileged to do so, that the Senator seek recognition and offer his amendment and we will just proceed to debate it. There will be no time limitation.

Mr. DECONCINI. will the majority leader yield?

Mr. BAKER. Yes.

Mr. DECONCINI. Is there a possibility that we might come back at a more sane hour and finish this, like Monday or tomorrow?

Mr. BAKER. I can assure the Senator from Arizona when we come back it will be tomorrow, not Monday. I regret to say that.

Mr. DECONCINI. But it is after 10:30.

Mr. BAKER. I would like to accommodate the Senator, but I feel that after so many Senators have invested so much time in this matter, we ought to stay and do as much as we reasonably can. It is with regret that I say to the Senator I am not in a position to agree with his request. I yield the floor.

The PRESIDING OFFICER. The Senator from Nebraska.

UP AMENDMENT NO. 382

(Purpose: To revise the provisions relating to commodity programs)

Mr. ZORINSKY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from Mississippi has requested that order be restored to the Chamber. Until such time as order has been restored, the clerk will refrain from reading the

amendment of the Senator from Nebraska.

The amendment will be stated.

The assistant legislative clerk read as follows.

The Senator from Nebraska (Mr. ZORINSKY) proposes an unprinted amendment No. 382.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 139, lines 13 through 15, of the Committee amendment, as modified, strike out "$4.10", "$4.30", "$4.50", and "$4.70", and insert in lieu thereof "$4.20", "$4.40", "$4.60", and "$4.80", respectively.

On page 153, lines 5 through 7, of the Committee amendment, as modified, strike out "$2.75", "$2.90", "$3.05", and "$3.20", and insert in lieu thereof "$2.80", "$2.95", "$3.10", and "$3.25", respectively.

On page 170, line 5, of the Committee amendment, as modified, strike out "$0.83" and "$0.89", and insert in lieu thereof "$0.85" and "$0.93", respectively.

On page 183, lines 22 through 25, strike out "$10.98", "$11.63", "$12,28", and "$12.93", and insert in lieu thereof "$11.23", "$12.14", "$12.70", and "$13.50", respectively.

On pages 134 and 135 of the Committee amendment, as modified, strike out section 103, and insert in lieu:

"MILK PRICE SUPPORT

"SEC. 103. (a) Section 201(c) of the Agricultural Act of 1949 is amended by striking out the second sentence and inserting in lieu thereof the following: 'Notwithstanding the foregoing, effective for each of the fiscal years during the period beginning October 2, 1981, and ending October 1, 1985, whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $500,000,000 or that net Government price support purchases of milk or the products of milk will exceed 3.52 billion pounds (milk equivalent) during any fiscal year, the price of milk beginning on October 2 of such fiscal year shall be supported at such level, as determined by the Secretary, not less than 70 per centum of the parity price therefor: *Provided*, That the support price shall in no case be less than $13.10 per hundredweight of milk containing 3.67 per centum butterfat: *Provided further*, That the level of support for milk for the remainder of the marketing year beginning October 2, 1981, may be adjusted in accordance with the foregoing if the level of support for such year has been established prior to the effective date hereof.'.".

Notwithstanding any other section in this bill, the provisions in this amendment shall become effective October 2, 1981.

Mr. ZORINSKY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 383

(Purpose: To revise the provisions relating to commodity programs)

Mr. ZORINSKY. Mr. President, I send a perfecting amendment to my amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the perfecting amendment.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. ZORINSKY) proposes an unprinted amendment No. 383 as a substitute for UP amendment No. 382.

Mr. ZORINSKY. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out the text of amendment No. ——, and insert in lieu thereof the following:

On page 139, lines 13 through 15, of the Committee amendment, as modified, strike out "$4.10", "$4.30", "$4.50", and "$4.70", and insert in lieu thereof "$4.20", $4.40", $4.60", and "$4.80", respectively.

On page 153, lines 5 through 7, of the Committee amendment, as modified, strike out "$2.75", "$2.90", "$3.05", and "$3.20", and insert in lieu thereof "$2.80", "$2.95", "$3.10", and "$3.25", respectively.

On page 170, line 5, of the Committee amendment, as modified, strike out "$0.83" and "$0.89", and insert in lieu thereof "$0.85" and "$0.93", respectively.

On page 183, lines 22 through 25, strike out "$10.98", "$11.63", "$12.28", and "$12.93", and insert in lieu thereof "$11.23", "$12.14", "$12.70", and "$13.50", respectively.

On pages 134 and 135 of the committee amendments, as modified, strike out section 103 and insert in lieu:

"MILK PRICE SUPPORT

"SEC. 103. (a) Section 201(c) of the Agricultural Act of 1949 is amended by striking out the second sentence and inserting in lieu thereof the following: 'Notwithstanding the foregoing, effective for each of the fiscal years during the period beginning October 1, 1981, and ending September 30, 1985, whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed $500,000,000 or that net Government price support purchases of milk or the products of milk will exceed 3.52 billion pounds (milk equivalent) during any fiscal year, the price of milk beginning on October 1 of such fiscal year shall be supported at such level, as determined by the Secretary, not less than 70 per centum of the parity price therefor: *Provided*, That the support price shall in no case be less than $13.10 per hundredweight of milk containing 3.67 per centum butterfat: *Provided further*, That the level of support for milk for the remainder of the marketing year beginning October 1, 1981, may be adjusted in accordance with the foregoing if the level of support for such year has been established prior to the effective date hereof.'.".

Notwithstanding any other section in this bill, the provisions in this amendment shall become effective October 1, 1981.

Mr. ZORINSKY. Mr. President, I ask for the yeas and nays on the perfecting amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ZORINSKY. Mr. President, I recently supported S. 884 as reported out of the Agriculture Committee. I felt that even though it compromised sound farm policy for the next 4 years, it was the best we could do under the extreme budget constraints we faced.

However, late last week I was appalled by the Reagan administration's 11th hour attempt to submit a substitute agricultural farm bill to the Senate Agriculture Committee.

It was inconceivable to me that 3 days before the farm bill was to be taken up on the Senate floor that the administration would come in with a substitute.

Mr. President, I reaffirm my support of the committee's report on S. 884. The bill proposes farm programs at funding levels that are realistic in terms of spending restraints and the needs of America's agricultural producers. The bill is a compromise which took weeks of committee hearings and hours of painstaking discussion to develop.

I reluctantly agreed with the 1981 farm bill as reported. While the bill does not contain all of the provisions and levels of income support measures that U.S. farmers need, I was convinced that it was the best package of price support legislation possible under the budget constraints initially imposed by the Reagan administration. For the administration to come back for even more cuts to be felt directly by our Nation's farmers is outrageous.

Mr. President, I refuse to sell our Nation's farmers out back there, regardless of what songs the sirens of the Reagan administration sing. They have come to the agricultural well one time too often, at a time when there may not be any people left to save in that well. That farm bill took the Senate Agricultural Committee 5½ months to complete. It is a bipartisan bill in nature, Republican and Democrat, the Senate Committee on Agriculture evolved it, and Mr. Stockman once again missed his target on balanced budgets and now is attempting to have agriculture be the one carrying the bailout pail.

During the Agriculture Committee discussions last spring, the committee's final action on target prices was lower than I had fought for. Now to compromise at an even lower level is unconscionable.

Mr. President, my amendment would set the 1982 target price for wheat at the original level agreed to by the Senate Agriculture Committee—$4.20 with minimum increments of 20 cents per year for crop years 1983, 1984, and 1985. Farmers would thus have the assurance that their incomes for each of these years would be 10 cents per bushel above the compromise package.

My amendment would also set the 1982 target price for feed grains at the original level agreed to by the committee—$2.80, with minimum increments of 15 cents per year for crop years 1983, 1984, and 1985.

My amendment makes similar adjustments for the target prices of upland cotton and rice to restore the target price levels contained in the original committee reported bill.

This assurance can be made without additional cost to the Government. The Senate Agriculture Committee's bill gives the Secretary the programs he needs and the discretion he sought to use them to manage grain inventories to keep a stock buildup from depressing market prices. He can stimulate exports, implement acreage reduction programs, and conduct effective loan and grain reserve programs to achieve market prices which are hopefully well above the target price levels in this proposal. Higher prices mean no prospects for payments. It is that simple.

Mr. President, we should also take note of the fact that the Secretary has announced his intention to conduct an acreage reduction program for wheat in 1982 at the same time he is seeking farm bill changes which eliminate the incentive for producers to use this option to control acreage and reduce supplies. A target like that contained in S. 884 is essential to an effective acreage reduction program, and the effect of an inadequate program will be a further buildup in stocks and a continuation of market prices averaging at bankruptcy levels.

I feel that it is vital to the well-being of the Nation's farm economy that this Congress endorse a program that will help put a stop to the downward spiral of farm prices, and the target program the committee originally agreed to is the minimum that can be done to achieve this goal.

Mr. President, the amendment would also revise the provisions of the dairy price support section of S. 884 by substituting the basic section approved by the Committee on Agricutlure for the Jepsen amendment. It would, however, delete the semiannual adjustment provision originally contained in the committee approved bill.

Mr. President, the target retention in the original Senate agriculture bill has been said to be, by the Congressional Budget Office, an addition of about $530 million. Certainly, in the area of the dairy price support portion of this amendment, taking Secretary of Agriculture John Block at his word that the support price shall be in no case no less than $13.20 per hundredweight of milk containing 3.67 percent butterfat, this would merely lock in the 70 percent of the parity price thereof.

Mr. President, I think it is vitally important that people who, for a long, long time, have been looked at as a mere 4 percent of the population of our Nation, who have produced the food and fiber which serves our country, feeds our country and much of the rest of the world, have not gotten a fair shake from the Congress of this Nation.

Bills that are passed in this Hall work adversely to the best interests of agriculture, always have, and continue to do so. Mr. President, I think that with the high interest rates that exist today, we must create an economy on behalf of the family farm so the farmers can stay in business. People say, "How are farmers staying in business?" It is pure and simple, Mr. President: They all have other jobs or have, by necessity, to have other means of income in order to maintain their livelihood to pay for those encumbrances that they have created.

Mr. President, I yield to the Senator from Oklahoma at this time.

Mr. BOREN. Mr. President, I thank my colleague from Nebraska. I am glad to join with him, and I commend him for coming forward with a farm proposal that will be at least, at the minimum, worthy of the title.

As I said on the floor 2 days ago, we are in the process of watering down this bill to the point that we should perhaps consider changing the title of it from "the farm bill" to the "Farm Liquidation Act of 1981." I hope that the Members of this body will seriously consider the situation that we face in agriculture and will ponder whether it is wise to allow the so-called farm bill to be written by the Office of Management and Budget as opposed to the Secretary of Agriculture and members of the Committee on Agriculture of this body.

S. 884, as reported by the committee, was the product of many hours of work, over 25 markup sessions of the Senate committee. It represents an attempt to work under budgetary constraints, but still to come forward with a bill that would at least be marginally beneficial to American agriculture, to retain some stability in the agricultural sector. Mr. President, we should seriously consider what we are on the verge of allowing to happen to agriculture in this country. It can be demonstrated, if we will but pause to think about one statistic.

Thirty years ago—that is not a very long time ago—total farm debt in this country and annual net farm income were roughly equal. Annual net farm income was $12 billion. Total farm debt was roughly the same amount.

This year, net farm income is $20 billion. By the way, Mr. President, when adjusted for inflation and considering purchasing power, the net farm income for the farmer is lower than at any other time since 1934. Today, net farm income of about $20 billion is measured against total farm debt of $200 billion.

In other words, 30 years ago annual farm income and total farm debt were roughly equal. Today, farm debt is 10 times as large as annual farm income. Commodity prices are below the cost of production.

I am told by those in the financial community who are experts in the field of agricultural credit that there are vast numbers of farmers in this country who on the brink of not being able to make payments on their mortgages of their farmland.

The only thing that has preserved individual ownership and family ownership of farms in this country has been the appreciation of land values, so that the farmer could borrow against that appreciated value in order to stay in operation.

Mr. President, we are on the verge of people no longer being able to make those interest payments, with interest rates at 20 percent and such a heavy burden of debt. This will have the effect, if we do not enact adequate farm legislation, of forcing land onto the market. It has the potential effect of forcing such amount of land onto the market that the appreciation of land values not only will be halted, but also, will sharply decline. When that happens, the small margin that has allowed the individual American farmer to stay in business will be wiped out.

Individual and family farm operations simply cannot stay in existence year after year with an inadequate cash flow and going deeper and deeper into debt. Large corporations that are diversified can afford such operations. A large, diversified corporation can afford to engage in agriculture if, over a 10- or 20-year period, they have a net profit for the entire period, even if 7 or 8 years in a row they lose money. Individuals cannot do that.

We must seriously ponder what is going to happen to the structure of agriculture in this country. We are fast approaching the point at which it will be absolutely impossible to continue individual and family ownership of agricultural units in this country.

I wonder, Mr. President, if those of us in the so-called farm belt are the only ones who will be affected by this massive change in the structure of agriculture. I wonder when those who represent the great metropolitan areas of this country will wake up to the fact that the citizens who live in those cities go to the supermarket to buy food and will be facing a very different kind of pricing structure once we lose individual and family farm ownership and see it supplanted by diversified, corporate ownership of the means of agricultural production in this country.

I wonder when they will wake up to the fact that American agriculture, the most productive single segment of our economy, at a time when we have been harping on the need for increased productivity, will no longer be able to make the contribution to our balance of payments, to our competitive economic situation in the world, when we lose the individual and the family farmer who have made it as productive as it is now because they have personal management and a personal interest to see to it that they operate their own farms in a most productive possible fashion.

Perhaps, then, every Member of this body, from urban or rural areas, from parts of the country that produce great agricultural commodities or form parts of the country where little is produced, will all stand up together and say, "What has happened? What has happened to the good old days, when we could buy food at reasonable prices in the supermarket? What has happened to the good old days, when the American farmer set the standard for economic productivity unparalleled in the world?"

I believe they will trace it back to this particular period of time when we—too many of us in this body and in the Chamber on the other side of the Capitol—were asleep at the switch, not realizing that we were presiding over the liquidation of American agriculture as we have known it in the past.

I am as serious as I possibly can be when I say that I believe we are approaching that point, and the very least we can do is to return to the provisions of the bill as originally reported by the Senate Agriculture Committee. That bill in itself was inadequate to really meet the needs, but at least it had enough provisions in it that would be of help to the farmer, that might give us a little more time to deal with the underlying problems before the basic structural change in agriculture takes place.

One of the members of our committee, as we were deliberating about this bill, stopped in the middle of the discussion and said, "We could write a farm bill that would not cost the Treasury of the United States one penny." We could do

that, Mr. President. But it also would be a farm bill that would not be of any assistance to the farmer.

As we listen to these deliberations, I believe we are approaching the point at which we are engaged in the writing of a piece of legislation, and we are going to call it a farm bill; we are going to label it. I am glad we are not subject to actions for false labeling, because I believe a suit could be brought by parties in the country who observe this legislation in the process of writing a bill that will not help the farmer, will not help keep the farmer in business, and, in the long run, certainly will not help the American consumer.

So I appeal to Senators to consider seriously the amendment of the Senator from Nebraska and the others who have joined him, not to regard it as a maneuver or a symbolic gesture, but to consider seriously the impact on the structure of American agriculture if we do not act.

Again, I compliment my colleague from Nebraska for drafting the amendment, and I am proud to join him. I yield to the Senator from Nebraska.

Mr. ZORINSKY. Mr. President, I yield to my junior colleague from Nebraska, Senator EXON.

Mr. EXON. I thank my friend and colleague from Nebraska.

I ask the Senator to enumerate at this time the bipartisan cosponsors of this amendment. I do not believe that has been brought before the Senate.

Mr. ZORINSKY. No; it has not.

The cosponsors of this amendment are Senator PRESSLER, Senator BOREN, Senator MELCHER, Senator BAUCUS, Senator KASTEN, Senator HART, and Senator LEAHY.

Mr. EXON. Have they been added already as cosponsors of the amendment?

Mr. ZORINSKY. They will be added as original cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, before I make my remarks, I inquire of the Chair as to what is planned for the Senate for the remainder of the evening. I can talk for a long time, but I have assumed that we might want to adjourn and take up this bill in the morning.

What is the pleasure of the managers of this bill on the Senate floor?

The PRESIDING OFFICER. The Chair is not in a position to respond to the Senator's request.

Mr. EXON. I have inquired of the managers of the bill, and I see my distinguished friend from Kansas about to take the microphone.

Mr. DOLE. Mr. President, I am the assistant manager.

Mr. EXON. I will be glad to talk with the assistant manager about it.

Mr. DOLE. I wish to dispose of it in the next 5 minutes.

Mr. EXON. I think that will not be possible.

Mr. DOLE. Ten minutes?

Mr. EXON. I think that will not be possible.

Mr. DOLE. What did the Senator from Nebraska have in mind?

Mr. EXON. I had better continue with my talk, Mr. President.

Mr. DOLE. I just say the Senator from Kansas certainly understands the seriousness of this as far as the sponsors are concerned, and I indicated to the majority leader that a time agreement would not be necessary, but if it is going to be a protracted debate then this Senator would just as soon start again in the morning.

We might think of something between now and then that would be helpful.

Mr. EXON. That is very encouraging news.

We have what, 45 minutes on this measure?

Mr. DOLE. No. There is no time agreement. The Senator has all night long if he wishes.

Mr. EXON. If there is no time agreement and if it is the will of the assistant manager of the bill, I am suggesting it might be well to accommodate our colleagues on both sides of the aisle and on both sides of this issue to resume this debate in the morning. If that is not acceptable, if the Senator wishes to use up time, then I am prepared to talk.

Mr. STENNIS. Mr. President, will the Senator yield to me briefly?

Mr. EXON. I am glad to yield to my friend from Mississippi.

Mr. STENNIS. Mr. President, I will be quick to try to accommodate any Senator, including the Senator from Nebraska.

But those of us here, though, have stayed around with the hope, and we are not threatening to leave either, there might be a chance to finish this bill tonight. That has been held out to us as a possibility in good faith. I wish to continue to cling to that hope.

I put nothing ahead of duties here, but Senators do have conditions they have to meet elsewhere.

I understood one group wanted to go to a ceremonial for the morning hours and another group for tomorrow afternoon. I did not know whether anything had been worked out along that line.

But just to accommodate Members, there are quite a few in those two groups. I am not in that group, but I still think if we could keep going with the spirit of things here all day almost, if we could finish the bill tonight, we should try, try hard. If we could finish the bill tonight in the spirit of which today's debate has gone, let us make every effort along that line anyway.

Mr. DOLE. Mr. President, will the Senator from Nebraska yield?

Mr. EXON. I yield.

Mr. DOLE. Mr. President, it is my understanding we probably cannot finish the bill tonight. There are still a dozen or more amendments and a couple of those will take considerable time, but it was hoped we might dispose or complete action on this amendment tonight.

The Senator from Kansas had planned on going to Grand Rapids tomorrow but about the time I arrive we will be taking up the wheat section, so I think I will stay here.

Mr. EXON. Mr. President, if I could regain my right to the floor, I apologize to my colleagues. I had a misunderstanding. I understood that this bill was going to be laid down earlier and we were going to take it up in the morning. The plans were changed without my knowledge. So let us move ahead.

I do not intend to talk at great length on this. I just wish to congratulate my colleague from Nebraska for offering this amendment because I think it gets to the heart of the situation that we are discussing here.

I have been listening with great interest during the debate on this farm bill, and I have been in the Chamber on many, many occasions. I think I have made myself quite clear that the basic farm bill that was reported out by the Agriculture Committee was a bill that was not, in my opinion, a fair or satisfactory bill to report out as a farm bill and certainly not pass in this Chamber.

But I agreed to accept that because I thought it was the best that we could get under the circumstances, and then suddenly out of the blue we find ourselves in a position where a bare majority of the Agriculture Committee changes horses on us in the middle of the stream. They come in with what is called a compromise bill that does great injustice, in my opinion, to the family-sized farmer in Nebraska.

I have listened with great interest to the pleas that have been made in behalf of the sugar producers, the pleas that have been made on behalf of the tobacco producers, and I say to my friends from the tobacco-producing States, who just won a key vote in this body by three votes, that they better take a look around and see from whence came those key votes for their program that they thought was so precious and so important to the producers in their States.

I say in all sincerity that the amendment offered by my friend from Nebraska basically does five things, but four of those things were done after careful consideration by the Agriculture Committee and all that the amendment offered by my colleague from Nebraska is doing is to restore to the levels reported out after many months of hearings by the Agriculture Committee the target prices on corn, wheat, rice, and cotton.

In addition thereto, it addresses once again this problem that we have had two previous votes on in this body with regard to dairy price supports.

The amendment that is a part of the amendment being offered by my colleague from Nebraska basically establishes at 70 percent of parity the dairy price support program.

Basically, it is not much different from the last amendment in this regard offered by Senator BOSCHWITZ, the Senator from Minnesota, except that it spells out once and for all that we will have once a year instead of twice a year adjustments on dairy price support commodities.

I am sure that when the other side takes over and argues against this they are going to start talking about cost. The facts of the matter are that no one knows for sure what the costs are going to be to this or any other bill.

If Senators do not believe that, look at the costs that were estimated by the administration in March of this year on the cost of borrowing to the Federal Government.

In March, the administration estimated that those costs would average 8.9 percent for all of fiscal 1981 and all of fiscal 1982.

Most of us knew and recognized that that was an unreasonable figure at the time.

In July, just shortly before we left for our August recess, the administration 'fessed up in its costs and it cost an additional $17.1 billion just for the false estimates of the administration on the cost of borrowing.

If we can make a minor error of $17.1 billion from March until August by the administration, I do not think we are going to get all hung up here over $500 million or $1 billion cost on fundamental farm programs.

I hope that those who have fought very hard for what they believe in in this Chamber, minimum price support for tobacco, minimum price support for peanuts, and minimum price support for sugar, will recognize and realize that to those of us who are concerned about cotton, rice, corn, wheat, and basic 70 percent of parity, which is the lowest price support that we have ever had for dairy farmers in this country, this is all that we can accept. I hope that they will all recognize and realize that many of us who supported them on what they thought their minimum needs were are now asking for their support in return to put back the coalition hopefully that has historically put together a workable farm program for this Nation.

It has been alluded to by others. I want to emphasize once again that about the only thing we do well in the United States of America anymore from a production standpoint is to produce food, and if we do not protect the basic integrity of our food plant in these United States of America we are going to rue the day when we did not.

I heard a great deal today, Mr. President, about "Let us return to the free open market in agriculture." I have stood on this floor before and talked about that. It is a folly.

I hear time and time again people say that under this administration we are going to turn to a free and open market. There is no such thing in the world today in food, and you had better all understand it. The Common Market countries subsidize their agricultural producers far more than we do ours.

We certainly know what has happened in the past several years with our trading partner, the Japanese. There is not a food product that is produced by our food producers that is not multiplied twofold or threefold before it is pumped into the Japanese economy. For what reason: For the reason openly stated by the Japanese Government that they feel that agricultural production in Japan is fundamentally necessary to their long-term survival. Yet I find all too often in the United States of America that we take a shortsighted approach.

This is not a giveaway program. This is a program that might, just might—and I am not sure it will—help to guarantee our farmers, if they agree to control their production, and that is a key matter that has not been brought up, if they agree to control their production, that they might be able to get somewhere near the cost of production without any profit under this minuscule program we are offering them.

So, my friends and colleagues in the U.S. Senate, I hope you will join with us who are simply saying that we think it is important to treat these people fairly.

The bill that was originally reported from the Senate Committee on Agriculture might not be a fair bill in some people's estimation, but certainly that bill is far better than the "compromise" that was foisted on this body by the Reagan administration. I hope we can garner the votes to pass this modest amendment.

I yield the floor.

Mr. DOLE. Mr. President, I am going to take just a moment or two. Before I do that, are there any other speakers on that side?

Mr. ZORINSKY. Are there any other speakers on this side who wish to speak on this? No.

Mr. DOLE. Mr. President, I do not have any quarrel with those who offer the amendment, and I am reminded again of Senator Talmadge who used to shepherd farm bills through this body, who would say to us privately as well as for the record, "Do you want a farm bill or do you want a veto?"

I am not threatening anyone but just suggesting this is going to add $2 billion to the cost of the bill.

This was a bill reported from the Senate committee. This Senator is on the committee and voted for it. But we now understand that, if we do not understand now we are going to understand by next Tuesday night that, we have not even started to cut the budget enough to bring down inflation and interest rates and the things that really affect farmers.

There is not enough money in the country to bail out every farmer with the farm program. What the farmer wants are lower interest rates and lower inflation and fewer regulations and, above all, a sound economy.

He understands, at least most farmers understand, they are going to have to make sacrifices or contributions, call it what you will, as well as the rest of the economy.

Having been on both sides of the debate on farm bills over the years, I certainly sympathize with those who would like to do more for the farmer. What they really want to add is about $600 million for wheat, $610 million for rice, $740 million for dairy, and about $60 million for feed grains.

Two billion dollars is not a lot of money, I guess, if we had any in the Treasury, if we were not faced with a big, big deficit next year. We are trying to keep it down to $42.5 billion, and this is not a way we should start.

This Senator would hope that what we are doing after 3 or 4 days of debate, going back and trying to put everything back in a package, days we spent trying to get out of the package, trying to get some sanity in the bill—farmers must recognize, and most farmers do recognize, that they have to make, as I have indicated, some contribution to this economic problem we have, too, and I would suggest that the President is committed to turning this country around and turning the economy around, and the best thing we can do with the American farmer is to stop inflation, control interest rates.

I do not care how much we appropriate or how much we authorize. That is not going to solve the problem. It is going to worsen the problem.

I know some people have different views on farm programs. Some farmers like farm payments, others like to make it in the marketplace. I believe we have the market-oriented approach. I believe that is the approach most of us in this Chamber, regardless of which side of the aisle we are on, have. So I hope that if, in fact, we are serious about a farm bill—some would rather have an issue, some of us would rather have a farm bill—there would be a strong bipartisan vote to table this amendment.

I certainly have the greatest respect for everyone who has spoken, both Senators from Nebraska, the Senator from Oklahoma, they all come from very important farm States with a farm economy. But I would suggest that if we divide up the wheat money, $600 million, among all the producing States, and $600 million with all the corn-producing States, it might mean $200 or $300 for all of the families of Nebraska or Kansas, and that is not enough.

The answer, in my view, is to try to do what we can to hold down spending, including agriculture, if we are really concerned about the future of the American farmer and the family farm and all the other things we are talking about.

Yes, we did report this from our committee. We reported a lot of farm bills out of committees in the past. That did not mean the administration had to agree with it or we did not change those bills when they came to the floor or in conference.

I am willing to say to the Senate if we can get this farm bill back in the bottle, get the genie back in the bottle, within the figures recommended by the administration, that they are going to pledge to keep that position through the conference, and to me that means we are going to have a farm bill.

So without any disrespect to anyone who has talked on the floor, I move to table the first-degree amendment, the so-called underlying amendment, UP amendment No. 382.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the underlying amendment. The yeas and nays have been ordered.

Mr. DOLE. I would be glad to withhold that for the moment.

Mr. ZORINSKY. I would just like to briefly make a comment to my esteemed colleague from Kansas whom I respect very highly.

He has been on the Agriculture Committee with me when we have many times attempted to find what the real cost of production of a bushel of wheat or a bushel of corn was, and I do not think he or I ever did receive an answer to that question.

The point I am trying to make is these

people who throw figures around that it is going to cost $500 million here and $200 million there I feel do not have the valid numbers to begin with.

I have a Congressional Budget Office figure here effective September 17, and it says the cost will be between what came out of the Senate Agriculture Committee and what was the compromise on the compromise that was arrived at with the administration on wheat will cost $430 million; on feed grains it will cost $11 million; on cotton it will cost nothing; and on rice it will cost $120 million, and this is somewhere in the vicinity of $561 million on the restoration of the target prices. This is a figure by the Congressional Budget Office on the cost estimates.

When I read accounts in the paper about wind tunnel facilities being built in Arkansas for the Defense Department and an error is made in construction where they cannot get the compressors and piping into the building, and now it is going to cost $138 million to correct that mistake, it leads me to believe that this is a pretty good investment to save agriculture in the United States of America.

The other is an architectural or engineering error which can be covered up by throwing more tax money at it, and nothing else will be said. No one will go to jail and the taxpayers by next month will not even remember it happened. Many of them today do not even know what happened. But I guarantee there are a lot of farmers out there who know what is happening in this Chamber tonight.

So I would say this to my colleague from Kansas: I agree that there is an additional cost burden on the budget.

But I think, comparatively speaking, the costs versus the benefits—and that is what we talk about in this Chamber, the cost-benefit ratio to the taxpayer, what does the taxpayer get for their dollar—I think it is well worth spending.

As a matter of fact, some members of the Agriculture Committee told me that had this gone to the administration before we went on our August recess, this would have been a bill in law right now. But, unfortunately, it did not; it waited until we came back from the August recess. It was discovered that we need to make deeper cuts, a few billion dollars additionally, and the farmers, once again, having been caught in the grain embargo, are now caught in another fiasco.

So I would hope my colleagues will support my amendment.

I say to the Senator from Kansas, you have not requested the yeas and nays on the tabling motion.

Mr. DOLE. I intend to do that.

I wanted to say, very briefly, again, that I have great respect for both Senators from Nebraska and the Senator from Oklahoma. I do think we are suffering from an embargo that was not imposed by this President, President Reagan. But, again, we could argue that and try to point the finger of blame.

But what we are faced with, what brought it to my attention, I guess, was the statement on the HUD appropriation bill. I discussed this with the distinguished Senator from Utah. He has different figures—we all have different figures, depending on what our point of view is. He says that maybe the bill should not be vetoed because it is only $90 million over the budget. But I am convinced that if we are going to send a bill down that is $2 billion or a billion dollars or $100 million, the President is going to veto it. Maybe he should not, but I think he will, and I think the American people will appreciate it if he does.

I say to all Senators that we have taken care of tobacco, we have taken care of sugar, we have taken care of peanuts. They are all in this little thing we are putting together and this could undo it all. I would say to all of those who have been suffering through this all week to support our motion to table and we might even finish this bill tomorrow or next week sometime.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The Chair wishes to advise Senators that, in view of the resumption of debate, any previous efforts to lodge a motion have been curtailed. The Chair will now entertain the motion from the Senator from Kansas.

Mr. DOLE. Mr. President, I move to table the first-degree amendment, unprinted amendment No. 382. That is the underlying amendment?

The PRESIDING OFFICER. That is the underlying amendment.

Mr. DOLE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KASTEN. Mr. President, I support this amendment to bring the dairy price support program more in line with what the Senate Agriculture Committee originally proposed.

The word around town is that the dairy price support program is too high; that the President has threatened a veto of the farm bill if the Congress does not pass his proposal. It doesn't seem quite fair, does it—to single out one program among the many contained in this bill to threaten a veto?

But, Mr. President, I want to read to the chairman of the Agriculture Committee, and the other Members of the Senate, just a few lines from the testimony of one of his constituents who testified before his committee in March. I quote:

> Recently, I have been reading about the price support program costing the government quite a bit of money because of heavy purchases of surplus dairy products. In my judgment, these surpluses are not because milk prices are too high. First of all if they were too high, dairy farmers wouldn't be quitting. Twenty years ago there were over 3,000 dairy farmers in North Carolina. Today, there are only 1,291. Of course, those of us remaining are much bigger than 20 years ago. We have more capital invested and also get more from our cows per hour of labor.

Mr. President, that was a dairy farmer speaking. It probably says it all. Farmers have been getting out of the dairy business in large numbers. There are currently about 170,000 U.S. dairy farms, down 35 percent since 1969.

The dairy farmers in Wisconsin alone lost about $5,850 a year because of the elimination of the April 1 adjustment. Dairy farmers were singled out by the administration early this year, and now it appears they will "take their licks again"—I hope not.

Everyone knows about the price increases dairy farmers received this past year. The price farmers received increased 8 percent. But, on the other hand, the cost to farmers of commodities, interest, taxes, and labor advanced by 12 percent between December 1979 and 1980.

The sale of milk from U.S. farms in 1980 totaled about $16 billion and nearly $2 billion of these dollars went to Wisconsin farmers. At retail prices, the Wisconsin dairy industry will contribute approximately $6.5 million to the State's economy.

The level of milk prices over the years has maintained the family farm. In Wisconsin, 60 percent of farmland is owned by operators. In Illinois this figure is 40 percent and in Indiana, operators own only 37 percent. The dairy farmer has the resilience to stay in business because his labor and capital are principally the operator's. Thus, he could survive as a viable economic unit in an economic recession.

The dairy economy in Wisconsin provides a sound dollar base for the State's rural communities. The communities provide the services for the dairy farmers. The tax base is sound, thus adequate schools, roads, and public services.

Mr. President, I hope that my colleagues will see the value and wisdom of supporting this amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. BAKER. Mr. President, before the vote starts, there will be no more rollcall votes tonight after this one.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas (Mr. DOLE) to table the amendment of the Senator from Nebraska (Mr. ZORINSKY). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Alaska (Mr. MURKOWSKI) and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 60, nays 35, as follows:

[Rollcall Vote No. 265 Leg.]

YEAS—60

So the motion to lay on the table UP amendment No. 382 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 384

(Purpose: To direct the Secretary of Agriculture to review the procedures for determining quality differences in the cotton loan program and to revise such procedures to more accurately reflect actual market value)

Mr. TOWER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) for himself and Mr. BENTSEN, Mr. DOMENICI, Mr. SCHMITT, Mr. NICKLES, and Mr. BOREN, proposes an unprinted amendment numbered 384.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 182, after the first period in line 24, insert the following: "Notwithstanding the foregoing sentence, the Secretary may, prior to the announcement of loan rate differences on the 1982 crop of upland cotton, review the procedures and criteria, including those provided for in the preceding sentence, used for determining quality differences for the loan program for upland cotton and, on the basis of such review, revise such procedures and criteria to accurately reflect the actual market value of upland cotton.".

Mr. TOWER. Mr. President, I am very disturbed because the current provisions contained in S. 884 regarding the premiums and discounts for grade, staple and micronaire of upland cotton are unfair to producers of short-staple cotton.

Establishing quality differences for the loan program whereby the United States Department of Agriculture gives equal weight to: First, loan differences for the proceeding crop and second, the market differences for such crop in the nine designated United States spot markets does not allow for market fluctuations as handled in the past.

Annual State-by-State quality statistics published by the USDA clearly demonstrate that an almost minuscule volume of low micronaire, short staple cotton is traded in the Greenville, Augusta, Montgomery, Memphis, Greenwood, Phoenix, and Fresno markets. Price quotations from those markets, therefore, are nominal quotations made without the factual trading information necessary to the furnishing of legitimate price information.

Discounts quoted in non-Texas markets on the small volume of cotton traded therein are applied to longer staple, higher-grade cottons being bought for use in combed yarns for dress shirts, sheets, blouses and other fabrics in which the neeping and dyeing problems associated with the short staple, low micronaire cotton are very serious if not intolerable.

Dallas and Lubbock discounts apply almost exclusively to the shorter staple cottons grown on the Texas Plains, New Mexico, and Oklahoma and used in carded yarns for coarser fabrics in which occasional neps and/or imperfect dyeability are of much less consequence.

Over 3,800,000 bales of the 1979 U.S. crop had micronaire reading below the 3.5 minimum tenderable level, while only about 800,000 bales of the 1980 crop fell in the low micronaire category. Quality differences and unusual market situations must be considered in order to prevent undesirable year-to-year fluctuations in the loan differences for upland cotton.

Mr. President, the Department of Agriculture has written to me stating their opposition to the provision offered by my distinguished friend from Alabama (Mr. HEFLIN) and the committee because it reduces the Department's flexibility in setting loan differentials.

I ask unanimous consent that that letter be made part of the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
*Washington, D.C., June 1, 1981.*

Hon. JOHN TOWER,
*U.S. Senate, Washington, D.C.*

DEAR SENATOR TOWER: This letter is to follow up the conversations between our staffs concerning an amendment added to the omnibus farm bill (S. 884) by Senator Heflin relating to cotton loan program premiums and discounts for grade, staple and micronaire.

The Administration opposed this amendment during the committee mark-up because it would remove the discretionary authority that the Department now has in setting cotton loan program differentials. Beginning with the 1982 crop the amendment would require that equal weight be given to loan differences for the preceding crop and to the market differences for such crop in the nine designated U.S. spot markets. This would prevent taking unusual market situations into account and would result in undesirable year-to-year fluctuations in the loan differences. Also, it would result in larger discounts for short staple, low micronaire cotton, most of which is produced in west Texas.

We believe the Heflin Amendment reduces the Department's flexibility in setting loan differentials and, therefore, we do not support its adoption.

Sincerely,

RICHARD E. LYNG,
*Deputy Secretary.*

Mr. TOWER. Mr. President, my amendment would allow the Department of Agriculture to make a determination that I consider equitable to all cotton producers but not at the expense of short-staple cotton producers in Texas, Oklahoma, and New Mexico. I am joined in this effort by Senators BENTSEN, BOREN, NICKLES, DOMENICI, and SCHMITT.

Mr. JEPSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. JEPSEN. I yield to the Senator from Alabama.

Mr. HEFLIN. Mr. President, the Senator from Texas wishes to make a statement before I do.

Mr. BENTSEN. Mr. President, first, let me thank the distinguished Senator from Alabama.

I commend the Senator from Alabama for his understanding in working out this solution to a most vexing problem. The Senator from Alabama is a great friend and champion of the American farmer. I know that his true interest lies, as does mine, in assuring that our Government farm program will work as smoothly and effectively as possible to aid the farmer in getting a fair price for his products in the marketplace.

The Senator from Alabama has recognized, as I have, that our current system of computing discounts and premiums for the cotton loan program does not work as effectively as it should. The Senator from Alabama addressed this problem during the committee markup of this bill by adding section 507 to S. 884.

Unfortunately, the cotton marketing system is much different in the short staple cotton growing areas of Texas, Oklahoma, and New Mexico than it is in the long staple cotton growing area of Alabama.

Because of this, section 507 of the bill as currently written will not work for all farmers as it was intended to work.

Because cotton farmers in the short-staple growing areas of west Texas, Oklahoma, and New Mexico use a cotton marketing system which is unique to that area—a system in which settlement procedures for both cash and contract sales of cotton are based upon the discounts

specified for the Government loan program—this provision, unmodified, would have wreaked havoc with the cotton marketing system in these areas.

The Senator from Alabama is a great champion of the farmer, and I know that it was not his intention to do this harm to the farmers of Texas, Oklahoma, and New Mexico.

Section 507 of the bill appears at first glance to be a change toward a more market-oriented system, an objective with which I agree. Unfortunately, however, no hearings were held on this issue and there was no opportunity for the Senator from Texas to point out the hidden pitfall in this proposal until after it had been adopted by the Senate Agriculture Committee.

The Senator from Alabama has been a great champion of the American farmer throughout his time in the Senate. He is well known for having the best interest of the farmer at heart. I commend him for his willingness to reach this compromise in order to keep the cotton farmers of my home area from being subjected to a radical change in the cotton marketing system which would have resulted in a windfall loss to the farmer which could have amounted to millions of dollars.

Mr. President, the only objective of the cotton farmers of Texas, and of the Senator from Texas, in this issue is a system of discounts and premiums for the cotton loan program which accurately reflects the actual market value of the various types and qualities of cotton. Indeed, because of the unique dependency of their marketing system upon the accuracy of these discounts and premiums they have a greater and more immediate stake than does any other cotton growing area in assuring that this system does accurately reflect the true market value of these various types and qualities of cotton.

Mr. President, the importance and the impact of this issue is well illustrated by a letter from Mr. Calvin L. Brints, a cotton merchant from Lubbock, Tex. Cotton buyers in the Lubbock area recognize the harm that could be done to the entire cotton marketing system of the region, a system which is depended on by both buyers and sellers of cotton. I ask unanimous consent that a copy of Mr. Brint's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BRINTS COTTON MARKETING, INC.,
*Lubbock, Tex., July 24, 1981.*

Hon. LLOYD BENTSEN,
*Russell Senate Office Building,*
*Washington, D.C.*

DEAR SENATOR BENTSEN: My company sells cotton worldwide. We have handled cotton from most all the major growth areas in the United States.

The purpose for this letter is to express our opinion concerning the methods used in calculating the CCC loan differences on cotton and how the Lubbock area is effected. For illustration purposes the August USDA published quotes from three market areas are listed below for three of the most heavily produced qualities of cotton in the Lubbock area.

| Market | Grade and staple | | Price discount |
|---|---|---|---|
| Montgomery, Ala | 41 | 31 | −2181 |
| Lubbock, Tex | 41 | 31 | −678 |
| Dallas, Tex | 41 | 31 | −1083 |
| Montgomery, Ala | 42 | 32 | −2058 |
| Lubbock, Tex | 42 | 32 | −397 |
| Dallas, Tex | 42 | 32 | −912 |
| Montgomery, Ala | 42 | 31 | −2358 |
| Lubbock, Tex | 42 | 31 | −797 |
| Dallas, Tex | 42 | 31 | −1178 |

My point is this: Lubbock is the cotton market in which at least 95 percent of the above qualities are produced and traded. Therefore, to use cash price quotes from markets such as Memphis, TN, Montgomery, AL, or Dallas, TX to compute CCC loan differences is obviously improper. This is true for several reasons:

1. The above cited example qualities are not produced or traded in other than the Lubbock market except in minute quantities. I question whether price quotations on actual trades of these qualities can be found except in rare instances in these other markets, whereas cash trades can be quoted virtually daily in the Lubbock area.

2. The Lubbock market is the only market where cash prices are tied directly to the CCC loan value, hence its prices are effected more by changes in the CCC loan rate than any other market.

3. If there were indeed any of the above described cotton available in these other markets, I could gladly buy these qualities in these other markets at the quoted discount prices, ship the cotton to Lubbock for sale and ship it back to the southeastern United States and realize terrific profits.

We also strongly oppose the possible use of the 1 to 1 ratio in these calculations. The shorter the time period used in the calculation, the more drastic will be the fluctuations in the CCC loan discounts and therefore in Lubbock area prices. This price variation interrupts the orderly marketing of Lubbock cotton by preventing sound business decisions on forward crop contracts until after the CCC loan differences are created and published. If any ratio is to be used, a 5 to 1 or longer period should be used.

The above comments center around the CCC loan differences for grade and staple. The very same points apply to cotton which has micronaire values of less than 3.2.

If I may furnish further information to assist in correcting this inequitable situation, please contact me.

Sincerely,

CALVIN L. BRINTS,
*President.*

Mr. BENTSEN. Mr. President, this section of the farm bill, as amended, will direct the Secretary of Agriculture to review and revise, as necessary, the procedures used to determine the quality differences for the cotton loan program in time for the announcement of the 1982 cotton program.

However, this section does not tie the hands of the Secretary of Agriculture in this matter. It merely highlights the need for improvement in the system and gives the Secretary the discretion and flexibility necessary to see that any recommended changes are in the best interest of all cotton farmers.

The amendment added by the Senator from Alabama will set up a 10 member study commission to advise the Secretary of Agriculture with regard to this issue. I must emphasize, however, that this section makes clear that the actions taken by the Secretary are not contingent on the recommendations of the study commission.

The only requirement of this section is that the Secretary complete this review in time for the 1982 program announcement.

I must emphasize the importance of meeting this tight time schedule. Hopefully, the recommendations of this study commission will be received by the Secretary in a timely fashion.

However, the Secretary is neither required nor expected to wait for a report from this commission if such a delay will jeopardize the requirement that the Secretary make any needed changes in time for the 1982 program announcement.

Mr. President, this compromise gives the Secretary of Agriculture the discretion he needs to see that the 1982 cotton loan program meets the needs of the farmers of this country. I urge him to use this discretionary authority to make a review of the procedures and policies of all the cotton programs which bear on this issue both in the Agricultural Marketing Service and in the Agricultural Stabilization and Conservation Service as well as in other parts of the Department which may be involved.

This amendment removes the requirement that would result in great harm being done to the cotton farmers of west Texas and leaves it to the Secretary of Agriculture to come up with an equitable solution which will take into account the needs of all of the various cotton growing areas of this country. I urge its adoption by the Senate.

Mr. BAKER. Mr. President, if the Senator from Alabama will yield to me, I should like to make an announcement and then propound a unanimous-consent request with respect to the schedule of the Senate.

Mr. HEFLIN. I yield.

## ORDER FOR RECESS UNTIL 10 A.M. FRIDAY

Mr. BAKER. Mr. President, I have discussed this with the minority leader and the managers of the bill on both sides.

I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m., tomorrow, Friday.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECOGNITION OF CERTAIN SENATORS FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, there be special orders in favors of the Senator from West Virginia (Mr. ROBERT C. BYRD), for not to exceed 10 minutes, and the

Senator from Texas (Mr. BENTSEN), for not to exceed 15 minutes; that following that, there be a period for the transaction of routine morning business, not to extend beyond 11 a.m., and that Senators may be permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF S. 884

Mr. BAKER. Mr. President, I ask unanimous consent that upon the close of morning business tomorrow, as herein provided for, the Senate resume consideration of the farm bill, S. 884.

The PRESIDING OFFICER. Without objection, it is so ordered.

## UNANIMOUS-CONSENT AGREEMENT—ORDER OF PROCEDURE ON MONDAY AND TUESDAY NEXT

Mr. BAKER. Mr. President, I ask unanimous consent that on Monday, September 21, upon the completion of the voting on the nominations ordered for that day, the Senate return to legislative session and thereafter recess at the close of business; that if S. 884 has not been disposed of at the close of business on tomorrow, it be set aside until 10 a.m. on Tuesday, September 22, and that the Senate convene on Tuesday, September 22, at 9:30 a.m.

Before the Chair rules, I might say that the Senate will recall that on Monday, according to the order previously entered, the time to convene is 9:30 a.m. There is an order for the Senate to go into executive session at 10 a.m. on Monday and for the votes on certain nominations, including the nomination of Judge O'Connor to be Associate Justice of the Supreme Court, which begin at 6 p.m. on Monday.

The request I have just made will provide, in effect, that we will be in session tomorrow, beginning at 10 o'clock. We will be on this bill at 11 o'clock. I expect the Senate will continue in session, with the hope that we can complete action on this bill tomorrow, and that we will be in session for that purpose until perhaps 6 o'clock. If we have not finished this bill tomorrow by around 6 o'clock, this bill will be temporarily laid aside until Tuesday, so that we can complete the requirements of the order entered for the consideration of certain nominations on Monday.

I put that request at this time.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President. will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. President, is there an order for the recess of the Senate from Friday, at the close of business, until Monday at 9:30 a.m.? I believe there is an order for the Senate to convene at 9:30 a.m. on Monday. Is that correct?

The PRESIDING OFFICER. The majority leader is advised that there is such an order.

Mr. BAKER. Just to make doubly sure that we have no missed a stitch, I ask unanimous consent that when the Senate completes its business on Friday, it stand in recess, in accordance with the order previously entered, until 9:30 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AGRICULTURE AND FOOD ACT OF 1981

The Senate continued with the consideration of S. 884.

UP AMENDMENT NO. 385

(Purpose: To provide for a study committee to study alternative methods of establishing values of premiums and discounts for grade, staple, and micronaire for the upland cotton loan program)

Mr. HEFLIN. Mr. President, I send to the desk a substitute for the amendment offered by the distinguished Senator from Texas (Mr. TOWER), which was joined in by Senator BENTSEN and other cosponsors.

My proposal, in essence, makes no substantive change in the proposal of the distinguished Senator from Texas with one exception—under my proposal there would be established a study committee whose mission shall be to study alternative methods of establishing the cotton loan rate by fair and equitable methods of computation and procedure.

As evidenced by the action of our Senate Agriculture Committee in formulating S. 884 it spoke with one voice in opposing a loan level which creates inequalities between various cotton producing areas. As stated in my proposal the study committee "shall study alternative methods of establishing values of premiums and discounts for grade, staple, and micronaire for the upland cotton loan program that will accurately represent true relative market values and reflect actual market demand for upland cotton produced in the United States."

The findings and recommendations of the committee will be submitted to the Secretary of Agriculture for use by him in announcing the loan rate differences for the 1982 crop of upland cotton.

This proposal, Mr. President, has been discussed with the various growers and I understand that there is general acceptance of it. I should like to add that our committee will monitor the actions of the study group closely as well as the subsequent actions of the Secretary. My Alabama cotton producers strongly feel, and I strongly agree with them that the time is now for the permanent establishment and administration of an equitable and consistent market-oriented cotton loan program.

The establishment of more accurate price support differentials for differences in grade, staple, and micronaire for upland cotton will provide better stability to the cotton program and will allow these differentials to more accurately reflect their true relationship to actual market value.

Cotton is merchandised in the United States and world markets on the basis of quality, in the terms grade, staple length and micronaire. To facilitate orderly marketing, loan differentials for the various grades, staples and micronaire groups are established. In establishing the differentials, fair and objective criteria must be utilized in placing unbiased loan values on the more desirable types and discounts on the less desirable types. Properly established differentials will foster normal movement of cotton into market channels and discourage production of the less desirable qualities.

Current legislation is premised on market principles, and if production is to properly respond to market stimuli, then, the loan differences must reflect market demand. This condition does not now exist for the following reasons:

First. The USDA arbitrarily discriminates against the majority of cotton farmers who produce good quality cotton and benefits those who raise poor qualities.

Second. The loan value assigned by USDA bears no relationship to the actual market value.

Third. When these cottons are placed in the loan with falsely inflated values the CCC has insufficient collateral. If the cotton is taken over by CCC and sold, the price realized will reflect actual market values resulting in substantial losses to CCC.

Fourth. Through artificial loan premiums and discounts the USDA arbitrarily establishes a false criteria for determining the actual market value of short staple cotton produced in west Texas, thus rendering this cotton less competitive in the world market.

This is the only U.S. market which utilizes as a basis for price the criteria so much over the loan. By artificially inflating the loan value the USDA is stepping into the market place and increasing the price. Thus there is no free market in West Texas.

Fifth. The cotton program is a national program and the loan determinations should be made utilizing the entire U.S. production and price discovery system. As presently administered by USDA the cotton program is not based upon the free market principles inherent in the 1977 act.

The table appended to my remarks illustrates the USDA loan differences and the actual spot market differences for staple length and micronaire from 1975 through February 1981. This data clearly illustrates that there continues to be a wider discrepancy between actual spot market differences and the USDA loan differences for the lower grade, shorter staple, and lower micronaire cottons.

I say again, the time is now for the permanent establishment and administration of an equitable and consistent market oriented loan program. The schedule of loan differences must apply equally to all areas of the cotton belt.

Section 507 will assure the establishment of accurate price support differentials for differences in grade, staple, and micronaire for upland cotton. This policy will more closely reflect current mar-

ket conditions, and provide continuing stability to the program by giving the identical weight to the previous year's loan differentials.

I reemphasize that such action will result in the proper adjustment of national average loan rates and allow the differentials to accurately reflect their true relationship to actual market value.

Mr. President, I ask unanimous consent to have printed in the RECORD the table to which I have referred.

There being no objection, the table was ordered to be printed in the RECORD as follows:

TABLE 1.—GOVERNMENT LOAN DIFFERENCES AND ACTUAL SPOT MARKET DIFFERENCES FOR STAPLE LENGTH AND MICRONAIRE, 1975–80

| | Staple length (SLM) | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

[1] August 1980 to February 1981 spot market average.

Note: Formula to calculate loan differences: Take preceding year loan differences weighted X times against 1st 6 or 7 mo of current season actual market differences weighted 1 time. (Example—5:1 ratio for weighting.) To bring differences closer into line would need to have 1:1 type of weighing system.

Mr. HEFLIN. Mr. President, I thank the Senators from Texas for their efforts to reach an amicable settlement of this matter.

Senator BENTSEN came to me first, several months ago, after this came out of the committee, and discussed this with me. I indicated that we might work it out with the staff of Senator TOWER. Senator TOWER's conversations with me have been most cooperative, and I am delighted that this matter can be resolved amicably. I thank both Senators from Texas for their fine cooperation in this connection.

Mr. TOWER. I thank the Senator for his remarks.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. TOWER. I yield to the Senator from Mississippi.

Mr. COCHRAN. I thank the Senator for yielding.

Mr. President, I congratulate the distinguished Senators from Texas and Alabama for working out this difference of opinion about how these discounts and premiums and schedules will be calculated.

Cotton farmers in the Southeast have been concerned for some time about the schedule of premiums and discounts used by USDA for establishing loan rates.

The premiums and discounts are determined by using various weights between the market price and the previous year's loan rate differences for grade and staple—that is color, trash and length of fiberand micronaire—that is fiber fineness.

The previous year's loan rate differences have been weighted as high as five times greater than the market price.

For the 1981 loan rates, USDA used 1 to 1 ratio for grade and staple but 5 to 1 for micronaire, with the weight of 5 given to the previous year's loan differentials.

The provision contained in the bill would require USDA to weigh the previous year's loan rate differences equally with market prices differences.

I support moving toward market determination of loan rates. I believe this compromise does that, and I congratulate Senators HEFLIN and TOWER for working out this very controversial provision.

Mr. TOWER. Mr. President, I yield to my colleague from Texas.

Mr. BENTSEN. Mr. President, I again express my appreciation to the two Senators concerning their efforts in this regard. I believe it is an excellent resolution of a difficult problem, and it requires no additional expense on the part of the Treasury.

Mr. TOWER. Mr. President, I yield back the remainder of my time, so that the substitute amendment will be in order.

The PRESIDING OFFICER. All time having been yielded back on both sides, the Chair will now entertain the amendment in the second degree by the Senator from Alabama.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. HEFLIN) proposes an unprinted amendment numbered 385 to Mr. TOWER's unprinted amendment numbered 384.

Mr. HEFLIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language to be inserted by UP-384 insert the following:

On page 182, line 24, strike out the quotation marks and the second period and insert in lieu thereof the following: "The Secretary shall establish a study committee of ten members, eight of whom shall be representative of cotton producers, selected to equally represent each of the four major geographic regions which produce and market upland cotton, and one of whom shall be a representative of cotton merchants and one of whom shall be a representative of the textile manufacturers. The committee shall study alernative methods of establishing values of premiums and discounts for grade, staple, and micronaire for the upland cotton loan program that will accurately represent true relative market values and reflect actual market demand for upland cotton produced in the United States. The committee shall submit the results of such study to the Secretary at the earliest practicable date together with such recommendations as the committee considers appropriate. The Secretary may, prior to the announcement of loan rate differences for the 1982 crop of upland cotton, review the procedures and criteria, including the recommendations made by the study committee and the formula provided for in the fifth sentence of this section, used for determining quality differences, including the loan differentials for grade staples, and micronaire for the upland cotton loan program and, on the basis of such review, revise such procedures and criteria to accurately reflect the actual market value of upland cotton produced in the United States."

Mr. TOWER. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. TOWER. Mr. President, I am prepared to accept the substitute offered by the Senator from Alabama. I would, of course, prefer the Bentsen-Tower - Schmitt - Domenici - Nickles-Boren amendment in its original form. However, I recognize the facts of life.

Therefore, I express my thanks to the distinguished Senator from Alabama for his consideration in working out a very difficult problem among those of us who represent the respective cotton States. I offer my thanks to him, and I am prepared to accept the substitute.

Mr. JEPSEN. Mr. President, on behalf of the chairman of the Committee on Agriculture, Senator HELMS, I am pleased to support the compromise reached by the parties. I have been advised that Senator HUDDLESTON has no objection, and we are ready to vote.

The PRESIDING OFFICER. Is all time yielded back on the second degree amendment?

Mr. HEFLIN. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the second degree amendment of the Senator from Alabama.

The amendment (UP No. 385) was agreed to.

Mr. HEFLIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I wish to state that as chairman of the Senate Committee on Agriculture, Nutrition, and Forestry and speaking for the committee and as the bill's manager, that I am ready to accept an amendment which constitutes a compromise between section 507 of S. 884, cotton loan calculation, and the amendment sponsored by the distinguished Senator from Texas. While originally we thought that our markup process had addressed all the outstanding issues related to the cotton loan calculation, new information brought forward by the Texas delegation contested that interpretation.

Therefore, Mr. President, I am pleased to support the compromise reached by the different parties involved regarding this issue and wish to state for the record that this compromise is a fine example of the legislative process at work and proof that Senate members are committed to conduct their affairs within a spirit of compromise.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Texas.

The amendment (UP No. 384) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 386

(Purpose: To authorize the Secretary of Agriculture to release bee germ plasm to the public)

Mr. BOREN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BOREN) proposes an unprinted amendment numbered 384.

Mr. BOREN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 235, between lines 17 and 18, insert a new section as follows:

"AUTHORITY TO RELEASE BEE GERM PLASM

"SEC. 1112. Section 103 of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 283) is amended by adding immediately before the period 'and may release bee germ plasm to the public'.".

[The following proceedings occurred after 12 o'clock midnight.]

Mr. BOREN. Mr. President, my amendment to the Agriculture and Food Act of 1981 would authorize the Secretary of Agriculture to release bee germ plasm to the public.

Research has been underway since the mid-1930's to develop a strain of bees that could be used by beekeepers to increase honey production and crop pollination. The U.S. Department of Agriculture is now preparing to release honey bee germ plasm—virgin or inseminated queens and sperm—to the beekeeping public. These bees are exceptionally gentle, highly productive, and winter well in northern climates. However, the Secretary must be given the authority to release the germ plasm to the public.

Beekeepers all around the country are anxious to use the germ plasm to improve their crops. I therefore urge my colleagues to support my amendment.

Mr. President, it is my understanding that this amendment, which has no financial impact, is simply an authorization to the Department to release the product of the research by the Department over the years and has no budgetary impact. It is my understanding it has been cleared by the administration and by both managers of the bill.

Mr. JEPSEN. Mr. President, this amendment would explicitly grant authority to the Secretary of Agriculture to release bee germ plasm to members of the public. It is my understanding that the Department has developed this germ plasm and now seeks explicit authority for its release to the public. The Secretary has similar authority to release seeds and plants developed by the Department to members of the public (7 U.S.C. 2201).

Mr. President, I feel this amendment would be beneficial to beekeepers and farmers and the general public. Consequently, I would be willing to accept it and urge its adoption.

Mr. BOREN. Mr. President, if there be no further comment on the amendment I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment (UP No. 386) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 387

(Purpose: To provide for the development of an effective plan to deal with the adverse impact of suspensions on export sales of agricultural commodities)

Mr. GRASSLEY. Mr. President, I send to the desk an unprinted amendment on behalf of my self, Senator BOSCHWITZ, and Senator JEPSEN, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY), for himself, Mr. BOSCHWITZ, and Mr. JEPSEN, proposes an unprinted amendment numbered 387.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 245, between lines 2 and 3, insert the following new section:

DEVELOPMENT OF PLANS TO ALLEVIATE ADVERSE IMPACT OF EXPORT EMBARGOES ON AGRICULTURAL COMMODITIES

SEC. 1205. (a) In order to alleviate, to the maximum extent possible, the adverse impact on farmers, elevator operators, common carriers, and exporters of agricultural commodities when the President or other member of the executive branch of the Federal Government causes the export of any agricultural commodity to any country or area of the world to be suspended or restricted, the Secretary of Agriculture shall—

(1) develop a comprehensive contingency plan that includes—

(A) an assessment of existing farm programs with a view to determining whether such programs are sufficiently flexible to the Secretary to efficiently and effectively offset the adverse impact of such a suspension or restriction on farmers, elevator operators, common carriers, and exporters of commodities provided for under such programs.

(B) an evaluation of the kinds and availability of information needed to determine, on an emergency basis, the extent and severity of the impact of such a suspension or restriction on producers, elevator operators, common carriers, and exporters; and

(C) the development of criteria for determining the extent, if any, to which the impact of such a suspension or restriction should be offset in the case of each of the sectors referred to in subclause (B);

(2) for any embargo for which compensation is not provided under section 1204 of this bill, develop and submit to the Congress such recommendations for changes in existing agricultural programs, or for new programs, as the Secretary considers necessary to handle effectively; efficiently, economically, and fairly the impact of any such suspension or restriction; and

(3) for any embargo for which compensation is provided under section 1204 of this bill, develop and submit to the Congress a plan for implementing and administering section 1204;

(4) require the Commodity Credit Corporation, before such corporation purchases any contracts for the purpose of offsetting the impact of a commodity suspension or restriction, to—

(A) prepare an economic justification for each commodity involved in the suspension to determine if such a purchase is necessary;

(B) estimate any suspension-related benefits and detrimental effect to the exporters, and use both estimates in determining the extent, if any, Federal assistance is needed; and

(C) require the Commodity Credit Corporation to limit its purchases to only those types and grades of commodities suspended from shipment and to make such purchases at prices at or near the current market prices.

Mr. GRASSLEY. Mr. President, this amendment has been cleared by both sides of the aisle.

I commend the Agriculture Committee for its fine work in developing its

embargo protection provision. It is a clear reflection of the committee's insight and sensitivity to how terribly wrong selective embargoes against agriculture products can be.

Some may argue that this provision is too restrictive, that it would cost too much. These people simply miss the point. The principle reason for this provision is to make it highly unlikely that another irresponsible selective embargo against agriculture products will ever be imposed again.

If at some future date an embargo of exports is viewed to be necessary and is in our national interest, then there is no reason on Earth why it should not be imposed against all exports. There is absolutely no legitimate reason to single out our farmers to carry the burden of our foreign policy.

It may be a politically easy decision to single out farmers, since they make up only about 3 percent of our population, but that, as you all know, is a pretty poor reason.

If, on the other hand, agriculture products are proven to be an effective foreign policy tool—a highly questionable proposition in light of the dismal failure of the Soviet embargo—but if it is decided for some reason food and fiber should be utilized as a major foreign policy tool, then all Americans, not just farmers, should be willing to pay for this tool.

In summary, I see no evidence that embargo protection provision is out of line and I urge defeat of any amendment that is aimed at watering it down.

I am offering an amendment, however, that I think will nicely compliment the present provision. This amendment adopts various recommendations from a recent General Accounting Office report that I received during the latter part of July. This report, which resulted from a request of several of my colleagues and myself when I was a Member of the House last year, centers upon the Department of Agriculture's efforts to offset the impact of the Soviet grain embargo.

It should be an understatement to say that I am disturbed by what I have learned from this report. It is clear that the embargo was imposed in such haste that the USDA nad insufficient time to adequately analyze the effects and impact of the embargo on our agricultural community and to develop an effective plan to mitigate this impact. This haste led to mistakes, very questionable purchase agreements, with exporters, and inefficient administration that resulted in unnecessary cost to the Federal Government and exasperated the already tremendous burden that was forced upon the American farmer.

I am submitting the digest of this GAO report into the RECORD. I urge everyone to take a look at it. This report clearly points out the need for the USDA to develop a contingency plan to help insure that the effects of any future suspensions are offset in a more efficient and timely manner. This plan should include an assessment of existing farm programs to determine if they are flexible enough to effectively offset the impact of an embargo; an evaluation of the types and availability of necessary information to determine the extent and severity of the embargo, not only on farmers, but also elevator operators, common carriers, and exporters; and the extent to which the impact of the embargo should be offset.

Furthermore, the Secretary should develop and submit to Congress recommendations for program changes or new programs that will help with the mitigation of the impact of embargoes. My amendment requires the Commodity Credit Corporation to handle more responsibly future purchases of contracts aimed at mitigating the impact of embargoes.

Let me make it clear now, that in no way is it my intention that this amendment in any way to replace any portion of the present embargo protection provision of the farm bill. On the contrary, this amendment will help more efficiently and effectively implement the present provision. Furthermore, my amendment requires planning to cover all embargoes, whether they are selective or across the board.

I strongly urge your support for this amendment.

I ask unanimous consent that the GAO report to which I made reference be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

GAO REPORT

On January 4, 1980, the President announced that for foreign policy and national security reasons, the Federal Government was suspending the shipment of about 18 million metric tons of agricultural commodities—primarily wheat and corn—to the Soviet Union. The President directed the Department of Agriculture to take actions to offset the suspension's impact on farmers.

These offsetting actions, most of which were concerned with stabilizing market prices, included:

Removing the suspended grain from the market by increasing the wheat and corn price-support loan rates, adjusting the farmer-owned reserve program, and purchasing grain directly from farmers and country grain elevators, and

Purchasing exporters' undeliverable grain contracts with the Soviet Union.

This was the first time that the Federal Government had attempted to offset a suspension's impact on the U.S. agricultural sector. In April and May 1980 eight Members of Congress asked GAO to investigate and report on various Federal actions concerning the suspension.

Lack of time to adequately plan offsetting actions:

Because of the short time between the decision to suspend shipments and the suspension's announcement, Agriculture was not able to thoroughly analyze the suspension's potential impact and develop a comprehensive plan of offsetting actions.

The planning caused Agriculture to (1) erroneously anticipate that the farmer-owned reserve would efficiently remove the undeliverable grain, (2) purchase the exporters' Soviet contracts valued at about $2.4 billion with little documentation that such purchase was necessary, and (3) inefficiently implement the offsetting actions. It took Agriculture almost 6 months to complete these actions.

Under the Export Administration Act of 1979, any administration may suspend the export of agricultural commodities. Such action may have severe effects on the grain production and marketing industries. Accordingly, it is important that the potential effects of the various actions or combination of actions that could be taken to most efficiently offset the potential impact of any future suspensions be identified and analyzed.

Implementation of offsetting actions increased costs and losses:

Agriculture's purchase and resale of the exporters' Soviet contracts and its purchase of corn and wheat from farmers were two major actions taken to offset the supension's impact. Agriculture implemented these actions in a manner which led to Federal losses or increased Federal costs.

Agriculture's Commodity Credit Corporation purchased a total of 202 exporters' contracts involving 14.4 million metric tons of corn, wheat, soybeans, and soybean products valued at about $2.4 billion. The Corporation and exporters agreed to deductions from the contract prices for exporters' profits and short-inventory positions, if applicable. These deductions are to be made at final settlement.

The contracts called for delivery between January and August 1980; however, Agriculture negotiated delayed delivery dates with the exporters for most contracts at an additional cost of about $163 million. Between March 27 and August 7, 1980, the Corporation resold these contracts, mostly to the same exporters, for about $2.1 billion, resulting in a provisional loss to the Government of about $475 million pending final settlement.

The Corporation could have decreased this loss by about $75.5 million if it had not made a questionable purchase of soybean and soybean product contracts.

The Corporation required that an amount be deducted from the contract purchase price if an exporter had not yet purchased grain to fully cover its Soviet sales. However, this deduction does not cover the exporters' presuspension sales to countries other than the Soviet Union for which the exporters had not yet purchased grain. Because of the lower grain prices caused by the suspension, the exporters may have realized greater profits than they anticipated on these sales. In determining action to offset the suspension's impact, the Corporation should have considered all potential profits caused by the suspension.

The Corporation also entered into 43,929 separate contracts with farmers and grain elevators to purchase 4.1 million metric tons of corn and 4.2 million metric tons of wheat at a cost of about $978 million. If the Corporation continues to own much of this grain until the end of fiscal year 1981, it will spend about $141 million to store, handle, and transport the purchased grain.

The Corporation purchased grain at prices substantially above market prices, purchased some low-quality grain at high prices, and purchased wheat varieties not involved in the suspension. These actions unduly increased Federal purchase costs. It is not possible to determine if the grain purchase will result in a net gain or loss until the Corporation sells the grain.

Agriculture also experienced problems in administering the purchase program. For example, Agriculture's State and county offices could not answer farmers' questions because of the untimely dissemination of purchase instructions. Officials in most of the 4 State and 15 county offices GAO visited stressed the purchase program's administrative problems.

Recommendations to the Secretary of Agriculture:

To help ensure that the effects of any future suspensions are offset in a more orderly, systematic, and timely manner, the Secre-

tary should develop and keep current a contingency plan that would include:

An assessment of existing farm programs to determine if they are flexible enough to efficiently and effectively offset the impact of a grain sales suspension on farmers;

An evaluation of the types and availability of data needed to determine on short notice the extent and severity of a suspension's impact on farmers, grain elevators, grain transporters, and exporters; and

An analysis of the extent, if any, to which the impact on each of the agricultural sectors should be offset.

After assessing existing farm programs, the Secretary should develop and submit to the Congress any legislative recommendations for modifying the existing programs or instituting new programs that the Secretary finds are necessary in developing a contingency plan.

If the Corporation again considers purchasing exporters' contracts to offset the impact of future suspensions, the Secretary should direct it to:

Prepare an economic justification for each commodity involved in the suspension to determine if such purchase is necessary; and

Estimate any suspension-related benefits and detrimental effects to the exporters, and use both estimates in determining the extent of Federal assistance needed.

If the Corporation again considers open market purchases as an offsetting action, the Secretary should direct it to purchase only the types and grades of commodities suspended from shipment and to make such purchases at prices at or near the existing market prices.

Mr. GRASSLEY. Mr. President, in short explanation, I say that this amendment complements the existing provisions of embargo protection that are in the bill and it is an outgrowth of a report by the General Accounting Office that suggested that in the future it would be wise for the Department of Agriculture to have a contingency plan if there ever be a future embargo, and this amendment would direct the Secretary of Agriculture to do that.

The PRESIDING OFFICER. The Chair recognizes the senior Senator from Iowa.

Mr. JEPSEN. Mr. President, Senator GRASSLEY's amendment on embargo protection which stems from the recently released GAO report titled "Lessons to be Learned From Offsetting the Impact of the Soviet Grain Sales Suspension," I believe has a great deal of merit. The amendment requires the Secretary to develop a contingency plan for remedial action to be taken upon embargo promulgation. Such plan would include an assessment of existing farm programs, an evaluation of available information and the development of criteria in order to determine the extent of offset needed to protect the interest of producers, elevator operators, common carriers, and exporters. In addition, the Secretary would be required to submit to Congress recommendations for changes in existing agricultural programs to more effectively handle the impact of an embargo. Finally, the Department's Commodity Credit Corporation would have to justify any purchase of contracts prior to taking the action.

Aware of the importance that Senator GRASSLEY attaches to this amendment and my assessment that it provides a useful complement to the provisions of the bill, I endorse its inclusion into S. 884.

We have no objection.

Mr. HUDDLESTON. Mr. President, we have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the junior Senator from Iowa.

The amendment (UP No. 387) was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 388

(Purpose: To provide assistance to a farmer who removes his land from production for the purpose of installing permanent conservation measures)

Mr. GRASSLEY. Mr. President, I send to the desk a second unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY) for himself and Mr. JEPSEN proposes unprinted amendment No. 388.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 344, between lines 3 and 4, insert the following:

PAYMENTS FOR LAND REMOVED FROM PRODUCTION FOR CONSERVATION PURPOSES

SEC. 1545. The Secretary of Agriculture (referred to in this section as the "Secretary") is authorized to enter into contracts to provide financial assistance in the form of payments to owners and operators of cropland located in counties where the soil normally freezes to a depth of at least four inches annually who remove such land from agricultural production for a period not to exceed one year for the purpose of installing enduring conservation measures which involve excavation of the soil. The payments under such contracts shall be in such amounts equal to the number of acres of cropland removed from agricultural production for such purpose multiplied in an amount not to exceed 50 per centum of the typical annual rent paid for similar land in the county. Financial assistance may not be provided under this subtitle with respect to any conservation measure without approval of the soil and water conservation district board for the district in which the land is located, and may not, in the aggregate, be provided in any year with respect to more than one-half of 1 per centum of the cropland in any county.

Mr. GRASSLEY. Mr. President, this amendment is also cosponsored by my senior Senator from Iowa (Mr. JEPSEN).

This amendment provides that the Secretary of Agriculture should have discretionary authority.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. GRASSLEY. I yield.

Mr. JEPSEN. Is this amendment No. 532? What was the number again?

Mr. GRASSLEY. Since we made the changes this would be an unprinted amendment.

The PRESIDING OFFICER. The clerk advised that this is unprinted amendment No. 388.

Mr. JEPSEN. Is this the substitute for it? Did the Senator modify amendment 532?

Mr. GRASSLEY. Yes; we did modify it.

Mr. JEPSEN. Is that now UP amendment No. 388?

Mr. GRASSLEY. I am sorry. I do not have the number for it. We made the changes.

Mr. JEPSEN. We have a printed amendment.

The PRESIDING OFFICER. The Senator from Iowa is correct. Printed amendment 532, I am so advised, deals with the same subject matter.

Mr. GRASSLEY. It is a modified amendment 532.

Mr. JEPSEN. Mr. President, for our edification will the clerk please read the modification?

The only thing we have in our hands is amendment No. 532.

Mr. BAKER. Ask the clerk to state the amendment as modified.

The PRESIDING OFFICER. The Senator will withhold for a moment. The amendment is momentarily out of the Chamber being duplicated.

The clerk will now state the amendment.

The assistant legislative clerk read the amendment.

Mr. GRASSLEY. Mr. President, this amendment is to provide assistance to a farmer who removes his land from production for the purpose of installing permanent conservation measures. Payments would be made to farmers, up to, but not above one-half the average annual rental rate, for land taken out of production during the year that the conservation structures are installed.

This amendment authorizes the Secretary to provide payments to farmers, in counties where the soil normally freezes to a depth of not less than 4 inches annually, who removes his land from production to construct permanent conservation measures.

The level of the payments would be at the discretion of the Secretary—whatever he views as necessary to carry out the program; however, the payment cannot exceed one-half the average annual rental rate for similar land in the county. Furthermore, no more than one-half of 1 percent of the land in any county may be covered under this program in any year.

Assistance would require the approval of the soil and water conservation district board for the district in which the land is located.

In the past, set-aside or land diversion programs were utilized quite frequently. It was common for farmers to take land out of production that needed conservation structures. The structures could be built during the growing season as a result of these programs.

However, in recent years, set-asides and land deversion programs have been implemented less frequently. Consequently, the opportunity to do major conservation work that requires movement of soil is diminished in areas that experience heavy freezes during the winter. There are only a few short weeks following harvest and before planting that could be used in these areas for this type of conservation work, therefore, these farmers will generally have to remove land from production for the entire year if they construct these conservation structures. This limitation, unshared by Southern area farmers, has retarded the progress of soil conservation efforts in many parts of the country.

I urge support for this needed and useful amendment.

Mr. JEPSEN. Mr. President, we feel this is a good amendment.

Mr. President, I ask unanimous consent that I be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUDDLESTON. Mr. President, we have no objection.

Mr. JEPSEN. There is no objection on the other side and we are ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the junior Senator from Iowa.

The amendment (UP No. 388) was agreed to.

Mr. GRASSLEY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 389

(Purpose: To prohibit the making of deficiency payments to States and their subdivisions under the programs for wheat, feed grains, upland cotton, and rice)

Mr. LEVIN. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an unprinted amendment numbered 339.

Mr. LEVIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 223, beginning with line 24, strike out all down through line 4 on page 224 and insert in lieu thereof the following:

(6) No payment (excluding disaster payments) may be made under any of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice to any State or to any political subdivision or agency of any State.

Mr. LEVIN. Mr. President, I will be very brief. This is a relatively simple amendment and one which would close what would appear to be a loophole in the bill.

Under existing law, the States which run prison farms and county farms are eligible to receive deficiency payments. Payments totaling about $1.7 million—I say million—were received in 1978, which was the last year that such payments were made.

But this program was not intended to benefit States. It is not a revenue-sharing program.

The program of deficiency payments is intended to benefit farmers and I, therefore, in this amendment would close that loophole and make States and their subdivisions ineligible to receive these payments.

Again the amount of money is small. I am even a little bit reluctant at this hour, and having heard so much about billions today, to offer an amendment which simply saves $1.7 million. But, perhaps, if we put enough of these amendments together, we can get up into the billion-dollar range.

In any event, Mr. President, the average loss to about 30 States would be about $60,000, and I believe the amendment is acceptable to the manager of the bill and to the minority, ranking minority, member as well.

This simple amendment would correct what seems to me to be a loophole in the farm bill. Under present law, State governments are eligible to receive deficiency payments. S. 884 does not change the law and therefore would allow States and counties to continue to receive these payments.

Deficiency payments were devised to supplement farm income in bad years without raising commodity prices. Presumably, such payments give farmers the capital necessary to continue their operations, in hopes of better prices the next year.

This is not a revenue-sharing measure and I do not believe that State and local governments should be participating in this program. I was surprised to find that they are and I cannot believe that it was intended that they should qualify for payments.

Many of the payments are going to State departments of corrections and county governments. My amendment would prevent such operations from receiving deficiency payments.

My amendment is drafted, however, so that if an individual farmer leases land from a State or local unit of government that that farmer would be eligible for deficiency payments, so as to not discriminate between owners and tenants.

I believe that this is a fairly noncontroversial amendment and I hope my colleagues will join me in closing this small loophole in S. 884.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Payments to State institutions have not been large. No payments were made in 1980, payments were only $182,000 in 1979 and no payments were made in 1978.

I wonder if any payments were appropriate. Deficiency payments are a hand extended by the Government to help farmers over a difficult year. I frankly believe a State institution is in a better position to weather a poor year than a small farmer. We should not be in a position of underwriting a State operation.

I am willing to accept the Senator's amendment. This body accepted language similiar to this in the last Congress.

I believe it is acceptable now.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan (putting the question).

The amendment (UP No. 389) was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEVIN. I thank the Senator from Iowa.

There is a second amendment which I am scheduled to offer. I am going to withhold that at this time. Whether I offer it tomorrow will depend in large measure on whether I am here tomorrow.

The PRESIDING OFFICER. The Chair extends special gratitude for withholding the amendment tonight.

Who seeks recognition?

Mr. JEPSEN. Mr. President, will the Senator from Michigan yield for a question?

Mr. LEVIN. I would be happy to.

Mr. JEPSEN. Should the Senator decide not to offer it will we be notified by phone or mail or what?

Mr. LEVIN. We will do it the quick way. We will do it by mail. [Laughter.]

I thank my friend from Iowa for suggesting that. The first thing in the morning my office will notify the Senator as to whether or not I am here or not.

The PRESIDING OFFICER. The majority leader is recognized.

## ROUTINE MORNING BUSINESS

(The following routine morning business was transacted during the day:)

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 10:50 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1181. An act to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4241. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

At 11:21 a.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 325. Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes.

## HOUSE MEASURES REFERRED

The following bill and joint resolution were read twice by unanimous consent, and referred as indicated:

H.R. 4241. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

H.J. Res. 325. Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes; to the Committee on Appropriations.

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1944. A communication from the Clerk of the United States Court of Claims, transmitting pursuant to law, a report on the decision of the Court in the case of The Nez Perce Tribe of Idaho v. The United States, No. 179A; to the Committee on Appropriations.

EC–1945. A communication from the Chairman of the United States Metric Board, transmitting, pursuant to law, a report on an issue related to the voluntary metric conversion process; to the Committee on Commerce, Science, and Transportation.

EC–1946. A communication from the Secretary of the Interior, transmitting, pursuant to law, an application for repayment of excess royalty payments by Ocean Production Company; to the Committee on Energy and Natural Resources.

EC–1947. A communication from the Secretary of the Interior, transmitting, pursuant to law, an application for repayment of excess royalty payments by Shell Oil Company; to the Committee on Energy and Natural Resources.

EC–1948. A communication from the Secretary of the Interior, transmitting, pursuant to law, an application for repayment of excess royalty payments by Texaco, Incorporated; to the Committee on Energy and Natural Resources.

EC–1949. A communication from the Secretary of the Interior, transmitting, pursuant to law, an application for repayment of excess royalty payments by Shell Oil Company; to the Committee on Energy and Natural Resources.

EC–1950. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to September 10, 1981; to the Committee on Foreign Relations.

EC–1951. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Greater Use of Exemplary Education Programs Could Improve Education For Disadvantaged Children"; to the Committee on Labor and Human Resources.

## PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–417. A petition from a citizen of Mission, Texas, urging congressional cooperation with the efforts of the Reagan Administration to strengthen the Nation's military; to the Committee on Armed Services.

POM–418. A resolution adopted by the National Association of the Deaf, relating to telephone equipment for persons who wear hearing aids; to the Committee on Commerce, Science, and Transportation.

POM–419. A concurrent resolution adopted by the Legislature of the State of Mississippi; to the Committee on Energy and Natural Resources:

"SENATE CONCURRENT RESOLUTION No. 502

"Whereas, the people of the State of Mississippi have always been leaders in supporting matters involving the national interest; and

"Whereas, the people of the State of Mississippi continue to support well-documented matters of national interest; and

"Whereas, there has been much discussion regarding the storage of high-level nuclear waste from other states at sites within Mississippi; and

"Whereas, no one knows what the long-range effect of such storage will be; and

"Whereas, the Mississippi Legislature opposes the use of salt domes in Mississippi for storage of high-level radioactive waste; and

"Whereas, the Mississippi Energy and Transportation Board has been charged with the responsibility of coordinating, developing, and reviewing all high-level nuclear waste activities in the State of Mississippi; and

"Whereas, the Energy and Transportation Board has coordinated the efforts of other agencies of the state, as well as the state's institutions of higher learning, in assessing previous program efforts, including studies and subsequent reports of the Department of Energy and/or its contractors; and

"Whereas, the State of Mississippi's assessment of the studies that have been conducted to date has stated that the studies have not been totally objective, inadequate regard for sociological issues is in evidence, critical geotechnical issues have not been adequately addressed, and the published Site Peformance Criteria have not been equitably applied at critical decision points leading to subsequent plans of study; and

"Whereas, the state, through its several agencies, has been asked to concur in a plan of study which it considers inadequate to properly address in a technologically conservative time frame, critical geotechnical, environmental, and/or socio-economic issues; and

"Whereas, Mississippi endorses development of an environmentally sound, technologically conservative, and socially acceptable, comprehensive high-level nuclear waste management policy by the Congress of the United States; and

"Whereas, the United States Department of Energy is investigating geologic media in many of the contiguous states of the United States for their suitability as potential high-level nuclear waste repositories; and

"Whereas, the State of Mississippi endorses involvement of its technical community as a reviewer of any plans and as an overseer of any activities developed or conducted by the United States Department of Energy, any successor agency thereto, or any contractors thereof in the evaluation and tests of any geologic media as a potential high-level nuclear waste repository, temporary high-level radioactive waste storage facility, or facility for technological testing and evaluation; and

"Whereas, the State of Mississippi is opposed to the use of its state port facilities, highways and air transportation facilities in the transportation, receipt and delivery of nuclear and high-level radioactive waste; and

"Whereas, the State of Mississippi, through its constitutional right, reserves that right to reasonable objection for sociological, economic, environmental, technological, or institutional purposes:

*"Now, therefore, be it resolved by the Senate of the State of Mississippi, the House of Representatives concurring therein,* That the Legislature of the State of Mississippi, being unalterably opposed to the storage of high-level nuclear waste in this state and the use of our air, land and seagoing transportation facilities for the transportation of high-level radioactive waste, hereby memorializes the Congress of the United States to:

"(a) Develop and cause to be implemented a comprehensive, technologically conservative, national high-level radioactive waste management policy;

"(b) Provide, through legislation, consultation and concurrence processes to be adhered to by the United States Department of Energy, or any successor agency thereto, and any state in which the federal government is conducting or intends to conduct studies of the geologic media for their suitability as a potential high-level nuclear waste repository or a test and evaluation facility;

"(c) Authorize the involved states and the federal government to enter into consultation and concurrence agreements, such agreements containing provisions for conflict resolution;

"(d) Allow any affected state to voice reasonable objection to decisions regarding sociological, or institutional issues;

"(e) Provide for a two-house congressional override of any reasonable objection raised by an affected state;

"(f) Provide reasonable financial assistance as necessary to any state in which area characterization or subsequent phases of study are initiated; and

"(g) Provide a mechanism whereby a state,

through legally constituted authority, can oversee any activity of the Department of Energy, any successor agency thereof, or any contractor or subcontractor thereto and participate in the development of any plans regarding the National Waste Terminal Storage Program.

*"Be it further resolved*, That the Congress is hereby memorialized to adopt legislation which will treat all states equally, and if any state is granted veto power over location of a high level nuclear waste facility then all states should be granted an equal privilege.

*"Be it further resolved*, That copies of this resolution be sent to the President of the United States Senate, the Speaker of the United States House of Representatives, the members of Mississippi Congressional Delegation, Governor William Winter, and to members of the Capitol Press Corps."

---

POM–420. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"RESOLUTION CHAPTER—

"Assembly Joint Resolution No. 7—Relative to Social Security recipients.

"LEGISLATIVE COUNSEL'S DIGEST

"AJR 7, N. Waters. Social security recipients.

"This measure would memorialize the President and Congress to investigate alternatives to the imposition of an earnings ceiling for social security beneficiaries 65 years of age and older.

"Whereas, There are over 2 million persons 65 years of age or over in California; and

"Whereas, Most of these senior citizens have paid into the social security system during their working lives, and are now receiving social security benefits; and

"Whereas, The existing Social Security Act establishes an earnings ceiling, which when reached, is deducted from the monthly benefit amount; and

"Whereas, In this period of high inflation, seniors often find it necessary to continue work or return to work to afford the bare necessities of life; and

"Whereas, This earnings ceiling is discouraging to seniors who wish to continue work or who must work; now, therefore, be it

*"Resolved by the Assembly and Senate of the State of California, jointly*, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to investigate alternatives to the imposition of an earnings ceiling for all social security beneficiaries aged 65 and older; and be it further

*"Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

---

POM–421. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

"RESOLUTION CHAPTER —

"Assembly Joint Resolution No. 20—Relative to the sale of naval vessels.

"LEGISLATIVE COUNSEL'S DIGEST

"AJR 20, Felando. Naval vessels: destroyers: sale to foreign countries.

"This measure would memorialize the Congress of the United States to discontinue the sale of destroyers to any country which uses its fleet to seize and harass United States fishing boats.

"Whereas, During 1980, the countries of Costa Rica, Ecuador, Mexico, and Peru seized 22 United States flag tuna vessels, and the cost of the fines and other direct charges paid by the tuna fishermen as a condition for the release of the vessels and crews totaled $9.6 million; and

"Whereas, Another 16 vessels were harassed and detained, and the cost of charges incidental to the seizures and harassment connected with port charges, fuel, travel, and loss of fishing is estimated to exceed $2.5 million; now, therefore, be it

*"Resolved by the Assembly and Senate of the State of California, jointly*, That the Legislature of the State of California respectfully memorializes the Congress of the United States to discontinue the sale of United States destroyers to any country which uses its fleet to seize and harass United States fishing boats; and be it further

*"Resolved*, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of Defense, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM–422. A resolution adopted by the Cape May, New Jersey Chamber of Commerce, urging action to account for and return our missing servicemen and fellow Americans in Vietnam; to the Committee on Foreign Relations.

POM–423. A resolution adopted by the Episcopal Urban Caucus of Maryland, opposing the immediate decontrol of natural gas prices; to the Committee on Energy and Natural Resources.

---

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

W. Kenneth Davis, of California, to be the Representative of the United States to the 25th Session of the General Conference of the International Atomic Energy Agency; and

The following-named persons to be Alternate Representatives of the United States to the 25th Session of the General Conference of the International Atomic Energy Agency:

Richard T. Kennedy, of the District of Columbia, Roger Kirk, of the District of Columbia, and Thomas M. Roberts, of Tennessee.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

---

## INTRODUCTION OF BILLS AND JOINT RESOLLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. THURMOND (for himself, Mr. BIDEN, Mr. HATCH, Mr. KENNEDY, Mr. DENTON, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. SIMPSON, Mr. SPECTER, and Mr. LAXALT):

S. 1630. A bill to codify, revise, and reform title 18 of the United States Code, and for other purposes; to the Committee on the Judiciary.

By Mr. SPECTER:

S. 1631. A bill to establish a Presidential Commission on the Bicentennial of the U.S. Constitution; to the Committee on the Judiciary.

By Mrs. HAWKINS:

S. 1632. A bill to amend the Internal Revenue Code of 1954 to allow certain partnerships and partners to continue to report income on the cash method; to the Committee on Finance.

S. 1633. A bill to prohibit the issuance of phosphate mining leases in Osceola National Forest, Fla.; to the Committee on Energy and Natural Resources.

By Mr. COCHRAN (for himself and Mr. DOLE):

S. 1634. A bill to incorporate the National Federation of Music Clubs; to the Committee on the Judiciary.

By Mr. WEICKER (for himself, Mr. DURENBERGER, Mr. STEVENS, Mr. COHEN, Mr. D'AMATO, Mr. DIXON, Mr. DODD, Mr. PRESSLER, Mr. TSONGAS, and Mr. WARNER):

S. 1635. A bill to delay the application of Revenue Ruling 81–216 until January 1, 1983; to the Committee on Finance.

By Mr. MATHIAS:

S. 1636. A bill for the relief of Hae Ok Chung; to the Committee on the Judiciary.

By Mr. D'AMATO:

S. 1637. A bill to establish a Federal annuity program to compensate participants in private pension plans which terminated before July 1, 1974, for nonforfeitable pensions benefits which were lost by reason of the termination, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN:

S. 1638. A bill to establish a national memorial to Franklin Delano Roosevelt, and for other purposes; to the Committee on Rules and Administration.

By Mr. KENNEDY:

S.J. Res. 109. A joint resolution to designate August 30, 1982, as "Roy Wilkins Day"; to the Committee on the Judiciary.

---

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THURMOND (for himself, Mr. BIDEN, Mr. HATCH, Mr. KENNEDY, Mr. DENTON, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. SIMPSON, Mr. SPECTER, and Mr. LAXALT):

S. 1630. A bill to codify, revise, and reform title 18 of the United States Code; and for other purposes; to the Committee on the Judiciary.

(The remarks of Mr. THURMOND and Mr. BIDEN appear earlier in today's RECORD.)

---

By Mr. SPECTER:

S. 1631. A bill to establish a Presidential Commission on the Bicentennial of the U.S. Constitution; to the Committee on the Judiciary.

PRESIDENTIAL COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

Mr. SPECTER. Mr. President, I rise today to introduce a bill to establish a Presidential Commission on the Bicentennial of the U.S. Constitution. Six years from now, America will celebrate the 200th anniversary of the framing of

the U.S. Constitution. This remarkable document has served us well; it has not only defined the power and authority of Government, it has confined and limited these powers. It has protected our civil rights. It has endured through war and peace, drought and flood, good times and bad. With the single exception of the Civil War, no constitutional crisis has ever threatened its foundation.

Our Constitution has well survived the transformation of this remarkable Nation from a country of small communities with sparse population into a country of enormous complexity and diversity, which is the envy of the nations and people of the world. Our Nation's Constitution has often been copied but never equaled.

The bill I introduce today, to create a Presidential Commission on the Bicentennial of the U.S. Constitution, provides the framework for orderly planning, research, and preparing for an appropriate commemoration of all the people of this Nation in 1987, the 200th anniversary of the writing of our great Constitution. It provides for scholarly studies, convocations, seminars, and other programs to promote understanding of the contribution of the Constitution to the American political system and our entire society.

I urge early consideration and passage of this bill.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1631

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That there is established the President's Commission on the Bicentennial of the United States Constitution (hereinafter referred to as the "Commission").

MEMBERSHIP OF THE COMMISSION

SEC. 2. (a) The Commission shall be composed of seventeen members appointed by the President. No more than nine members may be identified with the same political party. Such members shall be chosen to represent the broad spectrum of the Nation's people, and one member shall be designated as the Chairman by the President.

(b) Nine members of the Commission shall constitute a quorum. Six members shall be sufficient to hold hearings.

(c) The members of the Commission shall receive no compensation for their services. Members of the Commission shall be reimbursed for all expenses incurred by them in the performance of their duties as members.

(d) Any vacancy on the Commission shall not affect its powers. Vacancies shall be filled in the same manner in which the original appointments were made.

DUTIES OF THE COMMISSION

SEC. 3. (a) The Commission shall—

(1) investigate and evaluate ways of commemorating the 200th anniversary of the framing of the Constitution of the United States;

(2) plan and coordinate observances and activities commemorating the events culminating in the framing of the Constitution, particularly in communities and locations closely associated with such events;

(3) encourage and provide educational programs to increase public understanding of the issues, problems, debates, and individuals involved in framing the Constitution; and

(4) promote through scholarly studies and other means understanding of the contributions of the Constitutional convention and the Constitution to the American political system, both as a source of governmental authority and as a limit on such authority, through study of the papers of James Madison, Alexander Hamilton and other persons involved in the framing of the Constitution.

(b) In fulfilling its responsibilities, the Commission is authorized and directed to consult, cooperate with, and seek advice and assistance from, appropriate Federal departments and agencies, State and local public bodies, learned societies, and historical, patriotic, philanthropic, civic, professional, and related organizations. Such Federal departments and agencies shall cooperate with the Commission in planning, encouraging, developing, and coordinating appropriate commemorative activities.

DIRECTOR AND PERSONNEL OF THE COMMISSION

SEC. 4. (a) The Commission shall have a Director appointed by the Commission without regard to section 5311(b) of title 5, United States Code. The Director shall be paid at a rate not to exceed the rate of basic pay in effect from time to time for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(b) The Commission may appoint, without regard to section 5311(b) of title 5, United States Code, personnel the Commission deems to be appropriate. Such personnel may be paid at a rate not to exceed the rate of basic pay in effect from time to time for grade GS–15 of the General Schedule under section 5332 of title 5, United States Code.

(c) Except as provided in subsection (a) and subsection (b), the Director of the Commission and any personnel of the Commission shall be appointed by the Commission without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates.

(d) The Commission may procure temporary or intermittent services under section 3109(b) of title 5, United States Code, at a rate of pay not to exceed the rate of basic pay in effect from time to time for grade GS–15 of the General Schedule under section 5332 of title 5, United States Code.

(e) Section 311 of the Civil Service Reform Act of 1978 shall not apply with respect to the employment of individuals by the Commission.

POWERS OF THE COMMISSION

SEC. 5. (a) The Commission or, on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this Act take such action as is authorized by the Act.

(b) The Commission may accept, use, and dispose of donations of property or services.

(c) The Commission may procure supplies, services, and property, and make contracts.

(d) For purposes of transmitting official mail, members of the Commission shall be deemed to be officers of the United States.

(e) The Administrator of General Services shall provide to the Commission, on a reimbursable basis, such administrative support services as the Commission may request.

REPORT AND TERMINATION OF THE COMMISSION

SEC. 6. (a) Not later than two years after the date of enactment of this Act, the Commission shall submit to the President and to each House of Congress a comprehensive report incorporating a plan for commemorating the framing of the Constitution and related events. This report may recommend—

(1) the production, publication, and distribution of books, pamphlets, films, and other educational materials focusing on the history, culture, and political thought of the period of the United States Constitution;

(2) bibliographical and documentary projects and publications;

(3) conferences, convocations, lectures, seminars, and other programs;

(4) the development of libraries, museums, historic sites, and exhibits, including mobile exhibits;

(5) ceremonies and celebrations commemorating specific events;

(6) programs and activities focusing on the national and international significance of the United States Constitution, and its implications for present and future generations;

(7) the issuance of commemorative coins, medals, certificates of recognition, and stamps; and

(8) any other programs and activities appropriate to the achievement of the objectives set forth in subsection (a) of section 3.

(b) The Commission shall terminate thirty days after the submission of the report required by subsection (a).

AUTHORIZATION

SEC. 7. There are authorized to be appropriated without fiscal year limitations $1,000,000 to carry out the purposes of this Act.

---

By Mrs. HAWKINS:

S. 1632. A bill to amend the Internal Revenue Code of 1954 to allow certain partnerships and partners to continue to report import on the cash method; to the Committee on Finance.

RELIEF FOR FARM PARTNERSHIPS

● Mrs. HAWKINS. Mr. President, I am introducing today a bill to provide relief from some burdens unnecessarily imposed on citrus-grove and other farm partnerships by the Internal Revenue Code. This bill amends a section of the tax code which currently creates inequities among individual partners engaged in farming and which may encourage some partners who own citrus groves to sell the groves to condominium or other developers.

Most citrus-grove and other farm partnerships are permitted to and do use a cash method of accounting. However, section 447 provides that any farm partnership that happens to have among its partners a certain type of corporate partner, must use an accrual method. A partnership could be forced to convert from a cash to an accrual method if a corporate partner's gross receipts increase above a certain level, if a corporate partner loses its status as a small business corporation because of the death of a shareholder or an internal dispute, or if a corporate partner is no longer owned by a family because of the death of a family member. These are changes over which individual farmers who are also members of the farm partnership have no control, yet these individuals suffer the consequences of a change in method of accounting.

The conversion to an accrual method

results in an acceleration of income and a deferral of deductions. This creates an added tax burden for each partner, distorts cash flow, and may make participation in the farm partnership no longer an economically worthwhile venture. The partners may force the partnership to sell its land to condominium or other developers. This is of great concern to us in Florida.

Even if the partnership does not sell its land, its partners are at a disadvantage with respect to partners in partnerships that have no corporate partners. That is a form of unfair discrimination.

The bill that I propose today would rectify these problems. First, this bill allows a partnership to continue to use the cash method, provided the corporate partner disposes of its partnership interest within a grace period. Second, the legislation does not require individual partners to convert to an accrual method following a change in a corporate partner's status; instead, the corporate partner reports its share of income determined on the accrual basis while the individual partners continue to report their shares of income determined on the cash basis.

This legislation provides a fair solution to a problem that inflation or death may bring upon citrus-grove and other farm partnerships. Moreover, the legislation rectifies the problem without disturbing any of the rationale underlying the enactment of section 447 of the Internal Revenue Code.

I invite the support of my colleagues on this legislation, and ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1632

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. GRACE-PERIOD RULE.

Section 447 of the Internal Revenue Code of 1954 (relating to method of accounting for corporations engaged in farming) is amended by adding after subsection (h) the following new subsection:

"(i) EXCEPTION FOR CERTAIN PARTNERSHIPS.—Subsection (a) shall not apply to a partnership if—

"(1) on October 4, 1976, and at all times thereafter, the partnership was engaged in the trade or business of farming;

"(2) subsection (a) did not apply to the partnership for its first taxable year beginning after December 31, 1976; and

"(3) prior to the end of the first taxable year of the partnership which begins on or after the end of the first taxable year of a corporate partner in which such corporate partner is no longer described in subsection (c), the corporate partner transfers its full partnership interest to one or more persons other than corporations (except for corporations which are described in subsection (c)). For purposes of the preceding sentence, such transfer shall include a transfer to a corporation whose stock is distributed in a transaction qualifying under section 355."

SEC. 2. DOUBLE METHOD OF ACCOUNTING.

Section 447 of the Internal Revenue Code of 1954 (relating to method of accounting for corporations engaged in farming) is amended by adding after subsection (i) (as added by section 1 of this Act) the following new subsection:

"(j) SPECIAL RULE FOR ELECTING PARTNERSHIPS.—

"(1) ELIGIBILITY FOR ELECTION.—A partnership shall be permitted to make an election under this subsection only if—

"(A) on October 4, 1976, and at all times thereafter, the partnership was engaged in the trade or business of farming; and

"(B) subsection (a) would apply (but for this subsection) solely because a corporation which was a partner on October 4, 1976, and at that time was described in subsection (c), is no longer so described.

"(2) TIME FOR ELECTION.—A partnership must make the election under this subsection on or before the return date for the first taxable year of the partnership which begins on or after the end of the first taxable year of the corporate partner in which it is no longer described in section (c).

"(3) METHOD OF MAKING ELECTION.—A partnership shall make an election under this subsection using a method prescribed by the Secretary in regulations.

"(4) ELECTION.—A partnership may elect to compute its income under both the method specified in subsection (a) and the method used in the year preceding the year when subsection (a) became applicable. An electing partnership shall file returns reporting income under each method and shall keep such records as the Secretary may prescribe. If a partnership makes an election under this subsection—

"(A) a partner which is a corporation which is not described in subsection (c) shall report its distributive share of income and credits (including the distributive share of any section 481 adjustments resulting from a change in accounting method) based upon the partnership computation of income under the method specified in subsection (a), and

"(B) the remaining partners shall report their distributive shares of income and credits based upon the partnership computation of income under the method used in the year preceding the year when subsection (a) became applicable."

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall apply to taxable years ending after December 31, 1980.●

---

By Mrs. HAWKINS:

S. 1633. A bill to prohibit the issuance of phosphate mining leases in Osceola National Forest, Florida; to the Committee on Energy and Natural Resources.

OSCEOLA NATIONAL FOREST

● Mrs. HAWKINS. Mr. President, I am today introducing legislation to settle a controversy over mining activities in the Osceola National Forest. It is a controversy that has gone on for over 10 years, and one that should be settled now. There is no reason for it to drag on longer.

At issue are preference right lease applications filed by four companies under the 1920 Mineral Leasing Act in the Osceola National Forest. Although the lease applications were filed as far back as 1969, no leases have been issued by the Department of Interior. The State of Florida and the Florida public expressed opposition to mining within the boundaries of the forest, and this has delayed the issuance of the leases.

Since 1969, the National Environmental Policy Act was enacted; accordingly, the Department of Interior revised its rules for the issuance of leases. Although the Department still has the lease applications under review, passage of the act has reduced the likelihood that the companies will get the leases for which they applied when less extensive requirements were in effect.

I would like to emphasize, Mr. President, that I am not at this time taking a position on the environmental issues raised by this dispute. The companies claim that the mineral deposits, mostly phosphate and coal, can be developed without damage to the environment. Environmentalist groups contend otherwise, and I do not know that the question will ever be settled.

It is legal to mine in national forests under the Mineral Leasing Act, and four companies have invested considerable money in locating the minerals and filing lease applications. It is my position that their efforts have earned them property rights in the lease applications, rights that can be satisfied only by either issuing the leases, or by compensating the companies in some way. It is the purpose of my legislation to provide a mechanism for compensation.

It may well be asked why my legislation does not clarify the right of the companies to the leases for which they applied. The answer is twofold: I am not convinced that the resource is unique. There are, I believe, other deposits of phosphate that could be developed before there is any need to consider the question of development of the Osceola deposits. The same can be said for coal.

The second part of the answer is the degree of opposition to mining within the forest. There is a strong move afoot to have the forest designated wilderness, which would prohibit all mining. Legislation creating the Osceola wilderness passed the House of Representatives last year. That legislation would not extinguish the claims of the companies with lease applications, but it does indicate the intensity of the opposition to mining, at least on the part of some individuals.

It is evident that any move to issue the actual leases and permit the start of mineral development would be met with dogged resistance in the courts, costing the public and the companies millions of dollars, and not resulting in any immediate action. Under the circumstances, it seemed better to me to seek a mechanism for compensation that was acceptable on all sides. That is what my legislation would do.

Now as to the actual provisions of my bill. To begin with, my bill does not create a wilderness in the Osceola. My bill does prohibit mining in the forest. It also prohibits any prospecting permits from being issued and invalidates all permits issued after September 29, 1967. These prohibitions being statutory, they can be changed by later statute, and that fact is stated in the bill.

The most important provision deals with the exchange of lands. The lease applications in question are specified,

and the Secretary of the Interior is given 3 years to exchange the lease applications for leases covering other minerals under the Mineral Leasing Act. These leases are to be of substantially equal value, and the details of the negotiation and exchange are to be submitted to the relevant committees of Congress for 120 days before they become final.

In the event that an exchange cannot be negotiated that is satisfactory to all parties, the Secretary of Interior is authorized to acquire the preference right lease applications by purchase or condemnation.

Two questions need to be addressed, Mr. President. The first is the use of an exchange mechanism rather than direct purchase. There are two reasons. One is that the budget is tight now, and we do not need any further drain on the Treasury. The second is that it is imperative that the Federal Government get used to using land exchange mechanisms if we are ever to be able to settle some of the questions of land use in our Western States. This Florida exchange can be used to give us practice and smooth out the procedures.

It is the second question, smoothing out exchange procedures, that is of national significance. My bill uses the word "substantially" to describe the value of exchanged assets. The bill does not say that the exchange of preference right lease applications has to be for leases of "equal value," but for leases of "substantially equal value."

The reason for the use of this word, Mr. President, is an effort to find a way to break the impasse over Federal land exchanges. It is impossible to ascertain equal value, and the inability to do so is one of the stumbling blocks to a comprehensive exchange of Federal lands throughout the United States that would allow for the consolidation of scattered State school sections, the establishment of logical mining units, and a number of other desirable developments. The Federal Land Planning and Management Act of 1976, or FLPMA, permits the equalization of exchanges through money payments, but it does nothing to help us determine when values are equal or not equal.

In studying this question, Mr. President, I noticed that, in early versions of the bill that eventually became FLPMA, Senator JACKSON from Washington, then chairman of the Senate Energy Committee, used the word "approximately" equal in value. He apparently realized the difficulty in measuring values of land which has not always been thoroughly explored, and sought a way out of the impasse that then existed. The word "approximately" was dropped from later versions of the bill, and it is not in the present law. I would like to return to his concept, using the word "substantially."

It is important to note that the Secretary of Interior is not left entirely free to make decisions on "substantially equal value" unchecked. Any agreement he negotiates will have to be submitted to the Senate Energy Committee, the House Committee on the Interior and Insular Affairs, and the House Agriculture Committee. It will rest with those committees for 120 days before becoming final. That will give the committees ample time to take action overturning the Secretary's action.

It is possible that companies will get out of this procedure a lease that is slightly better than the ones which they had on application in the Osceola. I say "slightly" because that is what I mean. I have no reason whatever to think that somebody is going to get an enormous windfall. I feel that we have to worry less about the possibility that some individual will make some money somewhere than we do about where we are going to get the mineral and energy base upon which this country depends. It is not only those companies that are going to benefit.

The American people will benefit by having a more assured supply of needed minerals. The delays in getting minerals out of the ground while we worry about who is going to make how much have contributed significantly to our unfortunate dependence on foreign oil and strategic minerals. The American people have an interest in rational, orderly, and expeditious development of the Nation's mineral resources. That is what an exchange provision geared to "substantially equal values" is designed to give them.

Mr. President, there have been other bills introduced dealing with mining in the Osceola, and hearings have been requested. I urge the Energy Committee to move ahead on this legislation and stand ready to help in any way I can.●

---

By Mr. COCHRAN (for himself and Mr. DOLE):

S. 1634. A bill to incorporate the National Federation of Music Clubs; to the Committee on the Judiciary.

NATIONAL FEDERATION OF MUSIC CLUBS

● Mr. COCHRAN. Mr. President, today, Senator DOLE and I are introducing legislation to grant to the National Federation of Music Clubs a congressional charter. This organization has made many valuable contributions to the development and appreciation of American music and to the musical education of our citizens. Its influence has been felt not only in this country but internationally as well.

The National Federation of Music Clubs was founded in 1898 and has grown into the largest philanthropical musical organization in the world, with 600,000 members. Approximately 6,000 organizations, including the Music Teachers National Association, the American Symphony Orchestra League, and the National Association of Schools of Music, are affiliated with the National Federation of Music Clubs.

The purposes of the federation include the support and encouragement of music education, the promotion of American musicians, and the enhancement of the public's knowledge and appreciation of the arts. The federation views as its primary objective the promotion of American music—composers and performers. The federation awards scholarships to young artists, veterans, and blind musicians.

Approximately 15,000 awards have been made to member organizations and the communications media in recognition of their efforts to promote American music. Through the federation, the American Society of Composers, Authors, and Publishers makes available cash awards to educational institutions, summer music festivals and centers, and music clubs.

In support of symphony orchestras, the National Federation of Music Clubs sponsors string groups, supplies instruments, and awards scholarships through its crusade for strings program.

The national federation is also dedicated to the promotion of international music appreciation through its International Music Relations Department. When the Athens, Greece, symphony needed money to replace strings which had rusted on their instruments when hidden in caves from the Nazis, the National Federation of Music Clubs purchased and delivered $1,500 worth of replacement parts to the Greek Minister of Information.

Other projects include the promotion of dance, the music in hospitals program, and the sacred music program.

Among advisers to the American Music Department have been such well known musicians as John Tasker Howard, Douglas Moore, and Samuel Barber. Internationally acclaimed soprano Beverly Sills serves as the adviser to the opera department. National Federation of Music Club winners who have achieved international fame include Van Cliburn, Shirley Verrett, Donald Gramm, Martha Lipton, and Carol Glenn. Composers who have won national federation prizes include Deems Taylor, Paul Creston, Peter Mennin, and Horatio Parker.

For its leadership in making music an important part of our national and international life and for encouraging excellence in all fields of music, the National Federation of Music Clubs should be recognized. Passage of this legislation to grant a congressional charter will honor those many individuals who have dedicated their time and talents unceasingly so that all can enjoy the beauty of music.

Please join with Senator DOLE and me in paying tribute to this worthy organization.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1634

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Congress finds and declares that—

(1) the influence of the National Federation of Music Clubs is felt throughout the United States and throughout the world;

(2) the National Federation of Music Clubs has provided leadership in making the fine arts an important part of our national and international life; and

(3) the National Federation of Music Clubs is devoted to encouraging excellence in all fields of music.

SEC. 2. Mrs. Jack C. Ward, Mrs. Dwight D. Robinson, Mrs. Clifford Allison, Mrs. William Millard, Mrs. R. E. L. Freeman, Mrs. Alan W. Trorey, Mrs. Joe Ince, Miss Mary Heininger, and Mrs. Maurice Honigman; and their successors, are hereby created and declared to be a body corporate by the name of the National Federation of Music Clubs (hereinafter referred to as the "corporation"), and by such name shall be known and have perpetual successsion, and the powers, limitations, and restrictions herein contained.

SEC. 3. The persons named in section 2 of this Act shall be the incorporators of the corporation and a majority of such persons are authorized to complete the organization of the corporation by the selection of officers and employees, the adoption of the constitution and bylaws, not inconsistent with this Act, and the doing of such other acts as may be necessary for such purpose.

SEC. 4. This corporation is formed for fraternal, patriotic, historical, and educational purposes; to bring into working relations with one another, music clubs and other musical organizations and individuals directly or indirectly associated with musical activity for the purpose of developing and maintaining high musical standards; to aid and encourage musical education; and to promote American music and American artists throughout the United States of America and other nations.

SEC. 5. The corporation shall have power—

(1) to sue and be sued, complain, and defend in any court of competent jurisdiction;

(2) to adopt, alter, and use a corporate seal;

(3) to appoint and fix the compensation of such officers, employees, managers, and agents, as its business may require, and define their authority and duties;

(4) to adopt, amend, and alter bylaws and regulations not inconsistent with the laws of the United States or any State, or the District of Columbia, in which such corporation is to operate, for the management of its property and the regulation of its affairs;

(5) to make and carry out contracts;

(6) to charge and collect membership dues, subscription fees, and receive contributions or grants of money to be devoted to the carrying out of its purposes;

(7) to take and hold by lease, gift, purchase, grant, devise, or bequest any property, real, personal, or mixed, necessary for attaining the objects and carrying into effect the purposes of the corporation, subject, however, to applicable provisions of law of any State or the District of Columbia (A) governing the amount or kind of real and personal property which may be held by or (B) otherwise limiting or controlling the ownership of real and personal property by, a corporation operating in such State, or the District of Columbia;

(8) to transfer, convey, lease, sublease, mortgage, encumber, and otherwise alienate real, personal, or mixed property;

(9) to borrow money for the purpose of the corporation, issue bonds or other evidences of indebtedness therefor, and secure the same by mortgage, deed of trust, pledge, or otherwise, subject in every case to all applicable provisions of the Federal and State laws or of the laws of the District of Columbia; and

(10) to do any and all lawful acts and things necessary and proper to carry out the objects and purposes of the corporation.

SEC. 6. Eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be determined as the constitution and bylaws of the corporation may provide.

SEC. 7. (a) Upon the enactment of this Act and for not more than one year thereafter, the membership of the initial board of directors of the corporation shall consist of those persons named in section 2 of this Act.

(b) Thereafter, the board of directors of the corporation shall consist of such number, shall be selected in such manner, and shall serve for such term as may be prescribed in the constitution and bylaws of the corporation.

(c) The board of directors shall be the governing board of the corporation, and shall be responsible for the general policies and program of the corporation and for the control of all funds of the corporation.

(d) The board of directors may establish an executive committee and other committees to exercise such power as may be prescribed in the bylaws.

SEC. 8. The officers of the corporation shall be those provided in its bylaws. Such officers shall be elected in such manner, for such term, and with such duties, as may be prescribed in such bylaws.

SEC. 9. (a) The principal office of the corporation shall be located at 1336 North Delaware Street, Indianapolis, Indiana 46202, or in such other place as may later be determined by the board of directors, but the activities of the corporation shall not be confined to that place but may be conducted throughout the United States and each territory, possession, and dependency of the United States.

(b) The corporation shall maintain at all times in the District of Columbia a designated agent authorized to accept service of process for the corporation, and notice to or service upon such agent, or mailed to the business address of such agent, shall be deemed notice to, or service upon, the corporation.

SEC. 10. (a) No part of the income or assets of the corporation shall insure to any member, officer, employee, or member of the board of directors, executive board, or committees, or be distributable to any such person during the life of the corporation or upon its dissolution or final liquidation. Nothing in this subsection, however, shall be construed to prevent the payment of reasonable compensation to officers of the corporation or reimbursement for actual expenses in amounts approved by the corporation's board of directors.

(b) The corporation shall not make loans to its members, officers, employees, or members of the board of directors, executive board, or committees. Any member of the board of directors who votes for or assents to the making of such loan, and any officer who participates in the making of a loan, shall be jointly and severally liable to the corporation for the amount of such a loan until the repayment thereof.

SEC. 11. The corporation shall be liable for the acts of its officers, agents, managers, and employees when acting within the scope of their authority or employment.

SEC. 12. The corporation and its officers and members of the board of directors as such shall not contribute to or otherwise support or assist any political party or candidate for office.

SEC. 13. The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

SEC. 14. The corporation shall keep correct and complete books and records of account. It shall also keep minutes of the proceedings of its members and board of directors and executive board and committee authorized by the board of directors. The corporation shall keep at its principal office a record of the names and addresses of its members entitled to vote. All books and records of the corporation may be inspected by any member, or his agent or attorney, for any proper purpose, at any reasonable time.

SEC. 15. Upon dissolution or final liquidation of the corporation, after discharge or satisfaction of all outstanding obligations and liabilities, the remaining assets of the corporation may be distributed in accordance with the determination of the board of directors of the corporation and in compliance with this Act, the bylaws of the corporation, and all other Federal and State laws of the District of Columbia applicable thereto.

SEC. 16. The corporation shall have the sole and exclusive right to use and allow or refuse to others the use of the name "National Federation of Music Clubs", and to have and to use such distinctive insignia, emblems, seals, and badges, descriptive or designating marks, and words or phrases as may be required to carry out the purpose of the corporation. No powers or privileges hereby granted shall, however, interfere or conflict with established or vested rights.

SEC. 17. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved Augst 30, 1964 (78 Stat. 635; 36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(49) National Federation of Music Clubs".

SEC. 18. The right to alter, amend, or repeal this Act is hereby expressly reserved to the Congress.●

---

By Mr. WEICKER (for himself, Mr. DURENBERGER, Mr. STEVENS, Mr. ANDREWS, Mr. COHEN, Mr. D'AMATO, Mr. DIXON, Mr. DODD, Mr. PRESSLER, Mr. PRYOR, Mr. TSONGAS, and Mr. WARNER):

S. 1635. A bill to delay the application of Revenue Ruling 81–216 until January 3, 1983; to the Committee on Finance.

APPLICATION OF REVENUE RULING 81–216

● Mr. WEICKER. Mr. President, I am sending to the desk legislation to postpone the effective date of Revenue Ruling 81–216 until January 1, 1983. I am pleased to be joined on this bill by my colleagues, Senators DURENBERGER, STEVENS, ANDREWS, COHEN, D'AMATO, DIXON, DODD, PRESSLER, PRYOR, TSONGAS, and WARNER.

This precipitate ruling by the IRS has eliminated an important source of funding for small businesses and farms, and in so doing, has threatened their very survival. Indeed, it is one of the most counterproductive, wrongheaded, and illtimed revenue rulings I have seen in my tenure as a U.S. Senator.

On August 24, 1981, the Internal Revenue Service issued, and made effective immediately, their decision on Revenue Ruling 81–216, which denies tax exemption for multiple lots of bonds of $1 million or less that are pooled and issued as one bond. This ruling reverses a long standing practice and revokes three previous revenue rulings allowing States to run so-called "umbrella" bond programs.

A number of States have established agencies which issue "umbrella" bonds

that have assisted farmers and owners of small businesses. For example, my State, through the Connecticut Development Authority (CDA), has operated an umbrella bond program specifically to help healthy small businesses to expand.

In Connecticut, this program has been responsible for making loans totaling more than $195 million to growing small businesses since 1973. Those bonds went to over 518 companies and created 9,400 new jobs. In addition, they allowed another 19,500 jobs to be retained. Needless to say, this program has been very important to Connecticut's economy and has been an enormous source of Federal tax revenues.

Since the IRS issued Revenue Ruling 81–216, CDA has had to close its doors to small businesses. And Connecticut is not alone. Other State programs—more than 20 of them—that used these small issue, tax-exempt, industrial or agricultural bonds to run productive programs must also be closed down.

Without the State authority's assistance, individual farmers and small business owners aided by these programs will be deprived of a valuable source of affordable credit. The rule of thumb for most small businesses today is that they are offered conventional financing at two points over prime. Under the umbrella bond program, CDA has been able to make loans to small businesses at approximately 60 percent of prime.

Mr. President, this ruling could not have been more ill-timed. Interest rates right now are at an all-time high, conventional small business and farm development assistance programs are being cut back, and more and more responsibility for local economic development is being placed on State governments. Let us make no mistake: Small businesses and farmers are the frontline troops in the anti-inflation battle. They are already bearing the brunt of our economic programs. This ruling will only make matters worse.

As I mentioned, this ruling reverses a 9-year practice and revokes three previous revenue rulings allowing States to issue these agricultural and industrial bonds. A policy change of this magnitude ought to be considered and decided by the Congress.

Although they had not specifically addressed this issue members of the House Ways and Means Committee are expected to continue their consideration of the use of small industrial development bonds. This ruling completely prejudges congressional determination, and is prejudiced against small enterprises. Furthermore, it preempts and may very well foreclose Congress' opportunity to take contrary action.

Finally, by overturning the long standing practice, the IRS has caught States that relied on previous rulings with commitments in the pipeline.

In Connecticut, these commitments amounted to $88 million, due to be distributed to some 222 small firms. Recognizing that many of these businesses had already begun building in anticipation of the money, the IRS this week granted an exemption for my State, in effect "grandfathering" these loans so the expansion can take place as planned.

This action removes the very serious, immediate problem that faced my State, and I am pleased about that. However, it does nothing to address the long-term consequences of this counterproductive ruling.

In Connecticut, and in at least 20 other States, the very valuable and needed programs that administered these loans will be closing their doors unless something is done to halt this IRS ruling.

I think it is also important to point out that one of the central themes of this administration has been the need to return decisionmaking to the local and State level. This action by the IRS takes away an important tool used by States to promote local economic development. In so doing, it is contradictory to the principles espoused over the past several month.

Mr. President, my colleagues and I today sent a letter to Treasury Secretary Regan urging him to postpone this ruling on his own initiative.

Farmers will lose, small businesses will lose, and in the end, we all will lose if this ruling is allowed to stand.

I urge my colleagues to adopt this legislation to postpone the effective date of this ruling until January 1, 1983, to allow Congress an opportunity to decide this issue.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1635

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That with respect to obligations issued after August 24, 1981, and before January 1, 1983, section 103 of the Internal Revenue Code of 1954 shall be applied without regard to Revenue Ruling 81–216 (and without regard to any other regulation, ruling, or decision reaching the same result as, or a result similar to, the result set forth in such Revenue Ruling).●

---

By Mr. D'AMATO:

S. 1637. A bill to establish a Federal annuity program to compensate participants in private pension plans which terminated before July 1, 1974, for nonforfeitable pension benefits which were lost by reason of the terminations, and for other purposes; to the Committee on Labor and Human Resources.

TERMINATED PENSIONERS' SURVIVAL ACT

● Mr. D'AMATO. Mr. President, a man or woman who has worked throughout an entire lifetime should retire with dignity. A man or a woman who has been promised and may have contributed to a retirement plan should not spend his or her retired life unable to afford the necessities of life.

I come before you today to speak on behalf of those hardworking Americans who through no fault of their own have retired or will retire pensionless. I would like to read a letter from one "pension loser," Mr. Michael Fletutor of Hudson, N.Y., whose situation is by no means unique:

> I worked for Gifford-Wood Inc. from October 1, 1940 until 1972, or for 32 years. I had vested rights, but received nothing . . . I belonged to the United Steel Workers Union, Local 3487 of Hudson, New York.
>
> The Gifford-Wood Company Inc. of Hudson, New York was used as an example for the United States Congress—the pension law was passed, but we were not included in the plan.
>
> If you can help us, "God Bless You." Thank you. Please respond. Any help you can offer would be much appreciated.

Mr. Fletutor is not alone. There are over 60,000 whose lives have been shattered by lost pensions. They built their hopes and dreams for a decent retirement on the promise of a pension—a pension which they had earned. That promise was broken. I am shocked that this situation has been implicitly sanctioned by the Federal Government.

Congress saw the need to protect pensioners from the plight which these Americans have suffered when it enacted the Employee Retirement Income Security Act of 1974 (ERISA). However, the pension insurance program under ERISA does not apply to these people. It is indeed astounding that these same Americans who exposed the flagrant injustices of the pension system as it existed prior to 1974 were not covered by the act.

Today I am introducing legislation which will help these older Americans make ends meet. This legislation, the Terminated Pensioners' Survival Act will will give these workers who built America hope. It will help them pay the food, gas, and electric bills. In short, it will help them survive. This bill will provide annually $75 for every year a "pension loser" worked toward his or her pension which was later terminated. For example, a person who worked 20 years for one company would receive $1,500 a year. The payments which they will receive are small in comparison to the amounts which these individuals contributed to their plans and what these plans would have paid out had they remained solvent.

This important piece of legislation provides compensation to those Americans who gave their blood and sweat to their employers and country, only to be told that they could not have what rightfully belonged to them. Similar legislation has been introduced in the House by Congressman WOLPE. This is not a partisan issue. Republicans and Democrats alike can support this legislation knowing full well that there are "pension losers" in every State who are leading meager existences.

The U.S. Department of Labor has estimated that over 13,000 pension plans terminated between the years of 1942 and 1974 without paying out promised benefits. The companies associated with these plans include Art Metal (New York), Studebaker-Packard (Michigan and Indiana), Hazel Atlas Glass (West

Virginia and Pennsylvania), Black, Sivalls, and Bryson Steel (Oklahoma), and SCOA Industries (Wisconsin). There are many, many more.

This proposal takes into account the current Federal budget. Unlike much legislation, the Terminated Pensioners' Survival Act has built-in limitations both as to the number of recipients and the size of Federal expenditures. The qualified beneficiaries are a finite group which can only decrease with time. The annual cost of benefits paid out through this program will be, at its highest point, approximately $33 million at the end of the century.

Mr. President, I am shocked that these older Americans have been stripped of what they had earned. I am shocked that these older American workers are being treated like second-class citizens. I am shocked that we have allowed this situation to continue. I implore my colleagues to take action on this vital bill. Because of the advanced age of many of the "pension losers" we must take immediate action. Many of these people are desperate. Each day we delay prolongs their misery. This legislation offers them the hope that, at last Congress will recognize and rectify this past injustice.

I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1637

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Terminated Pensioners' Survival Act."

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) The terms "State" and "United States" have the meanings set forth for such terms in paragraph (10) of section 3 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002).

(2) The terms "participant", "beneficiary", "nonforfeitable", and "defined benefit plan" have the meanings set forth in paragraphs (7), (8), (19), and (35), respectively, of section 3 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002).

(3) The term "early terminated plan" means a defined benefit plan—

(A) which is described in subsection (a) of section 4 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1003) and is not described in subsection (b) of that section, and

(B) the termination date of which (as determined by Secretary of Labor) was before July 1, 1974.

(4) The term "qualified participant" means an individual who—

(A) was a participant in an early terminated plan,

(B) had immediately before the termination a nonforfeitable benefit under the plan, and

(C) has not received payment in full of such benefit by reason of the termination of the plan.

(5) The term "qualified spouse" means an individual who is the widow (within the meaning of section 216(c) of the Social Security Act (42 U.S.C. 416(c)) or the widower (within the meaning of section 216(g) of such Act (42 U.S.C. 416(g)) of a qualified participant.

ENTITLEMENT TO ANNUITY

SEC. 3. (a) A qualified participant who is alive on the effective date set forth in section 13 is entitled, subject to subsection (d), and upon approval under this Act of a claim therefor, to an annuity computed under section 4(a).

(b) A qualified spouse who is alive on the effective date set forth in section 13 is entitled, subject to subsection (d), and upon approval under this Act of a claim therefor, to an annuity computed under section 4(b).

(c)(1)(A) The annuity of a qualified participant commences on the day after the later of—

(i) the effective date set forth in section 13, or

(ii) the date on which the qualified participant attains sixty-five years of age.

(B) The annuity of a qualified participant and the right thereto terminate at the end of the last calendar month preceding the day on which the qualified participant dies.

(2)(A) The annuity of a qualified spouse of a qualified participant commences on the latest of—

(i) the effective date set forth in section 13,

(ii) the first day of the month in which the qualified participant dies, or

(iii) if the qualified participant dies before attaining 65 years of age, the first day of the month in which the qualified participant would have attained such age but for the qualified participant's death.

(B) The annuity of a qualified spouse and the right thereto terminate at the end of the last calendar month preceding the day on which the qualified spouse dies.

(d) Entitlements to annuities under this section shall take effect only to such extent or in such amounts as are provided in advance in appropriation Acts.

COMPUTATION OF ANNUITY

SEC. 4. (a) The annuity computed under this subsection (relating to a qualified participant) in connection with any early terminated plan is equal to—

(1) the product of $75 and the number of years of service of the qualified participant under the plan, reduced by

(2) the amount of nonforfeitable pension benefits under the plan (if any)—

(A) to which the qualified participant is entitled, and

(B) which remain payable as of the effective date set forth in section 13 or any later date.

(b) The annuity computed under this subsection (relating to the qualified spouse of a qualified participant) in connection with an early terminated plan is equal to the greater of—

(1) 50 percent of the amount determined under paragraph (1) of subsection (a) in connection with such qualified participant, reduced by

(2) the amount of nonforfeitable pension benefits under the plan (if any)—

(A) to which the qualified spouse is entitled, and

(B) which remain payable as of such date or any later date.

CLAIM REQUIREMENTS

SEC. 5. (a) Claims for annuities under this Act shall be in such form as the Secretary of Labor shall by regulation prescribe.

(b) Claim forms shall be made available to the public by the Social Security Administration in local offices of the Administration, and completed claim forms may be filed at such local offices. The Administration shall promptly forward any such completed claim forms to the Secretary of Labor. The Secretary of Labor shall provide the Administration with claim forms necessary to carry out this subsection.

(c)(1) Claims for annuities under this Act which meet the requirements of subsection (a) and of paragraph (2) of this subsection shall be approved by the Secretary.

(2)(A) A claim meets the requirements of this paragraph if the claim includes evidence sufficient to establish that the claimant is a qualified participant or qualified spouse.

(B) Evidence which may be relevant for purposes of subparagraph (A) includes, but is not limited to—

(i) employment and payroll records of the applicable employer who, alone or together with others, maintained the early terminated plan,

(ii) documents and records of the early terminated plan,

(iii) relevant correspondence, and

(iv) affidavits.

(C) In considering claims for annuities under this Act, the Secretary of Labor shall consider, on the request of a claimant or the claimant's representative, in addition to any other relevant evidence—

(i) a comparison of employment and payroll records which were maintained under chapter 21 of the Internal Revenue Code of 1954 (relating to Federal Insurance Contributions Act) or under the Social Security Act (42 U.S.C. 301 et seq.) with records maintained by the Internal Revenue Service relating to the qualifications status of trusts forming part of a stock bonus, pension, or profit-sharing plan under part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to pension, profit-sharing, stock bonus plant, etc.), and

(ii) records maintained under the Welfare and Pension Plans Disclosure Act of 1958.

ADMINISTRATIVE APPEALS

SEC. 6. (a)(1) The Secretary of Labor shall send any individual whose claim under this Act is denied by the Secretary a written notice of the denial. Such notice shall include the reason for the denial and shall set forth the procedures required to be followed in order to obtain review under this Act.

(2) Any such individual whose claim is denied is entitled to—

(A) a reasonable time, but not less than thirty days after receipt of the written notice of denial described in paragraph (1), to request a review and to furnish affidavits and other documentary evidence in support of the request;

(B) be represented by an attorney or other representative; and

(C) unless a hearing is undertaken under subsection (b), a written decision and the specific reasons therefor at the earliest practicable date.

(b)(1) The Secretary may, and, upon the request (made within fifteen days after receipt of the notice referred to in subsection (a)(1)) of any individual entitled to such notice, shall, provide by regulation for a hearing which shall be before an administrative law judge appointed under section 3105 of title 5, United States Code, or any other employee of the Department of Labor designated by the Secretary (hereinafter in this subsection referred to as the "presiding official") and which may be in lieu of or in addition to the review requested under subsection (a). Any such hearing shall be conducted in accordance with the requirements of this subsection and sections 554 and 555 of title 5, United States Code.

(2) The presiding official shall, on the basis of evidence presented at the hearing, affirm, modify, or reverse any earlier applicable findings of fact and decision under this Act.

(3) In the course of any such hearing, the presiding official may administer oaths and affirmations, examine witnesses, and receive evidence. Evidence may be received at any such hearing even though inadmissible under rules of evidence applicable to court procedure.

(4)(A) For the purpose of any such hearing, the presiding official may issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence which relates to any matter under investigation or in question before such official.

(B) The attendance of witnesses and production of evidence at the designated place of the hearing may be required from any place in the United States or in any territory or possession thereof.

(C) Subpenas issued by the presiding official shall be served by anyone authorized by such official—

(i) by deliving a copy thereof to the individual named therein, or

(ii) by registered mail or by certified mail addressed to such individual or at such individual's last dwelling place or principal place of business.

(D) A verified return by the individual so serving the subpena setting forth the manner of service or, in the case of service by registered mail or by certified mail, the return post office receipt therefor signed by the individual so served shall be proof of service.

(E) Witnesses so subpenaed shall be paid the same fees and mileage as are paid witnesses in the district courts of the United States.

(5) In the case of contumacy by, or refusal to obey a subpena duly served upon, any person, any district court of the United States for the judicial district in which the person charged with contumacy or refusal to obey is found or resides or transacts business, upon application by the Secretary, shall have jurisdiction to issue an order requiring the person to appear and give testimony, or to appear and produce evidence, or both. Any failure to obey such order of the court may be punished by the court as contempt thereof.

(c)(1) The findings and decisions of the presiding official under subsection (a) or (b) shall be binding upon all individuals involved.

(2) No finding of fact or decision of the presiding official shall be reviewed by any person, tribunal, or governmental agency except as provided in section 7.

(3) No action against the United States, the Secretary of Labor, or any officer or employee thereof shall be brought under section 1331 or 1346 of title 28, United States Code, to recover on any claim arising under this Act.

JUDICIAL REVIEW

SEC. 7. (a) Any individual, after any final decision made after a hearing under section 6(b), irrespective of the amount in controversy, may obtain a review of the decision by a civil action commenced within sixty days after the mailing to the individual of notice of such decision or within such further time as the Secretary of Labor may allow.

(b) Any action commenced under this section shall be brought in—

(1) the district court of the United States for the judicial district in which the plaintiff resides, or in the judicial district in which is located the plaintiff's principal place of business, or

(2) if the plaintiff does not reside within any such judicial district and the plaintiff's principal place of business is not located in any such district, in the United States District Court for the District of Columbia.

(c) As part of any answer by the Secretary of Labor, the Secretary shall file a certified copy of the transcript of the record, including the evidence upon which the findings and decision complained of are based.

(d) The court shall enter, upon the pleading and transcript of the record a judgment affirming, modifying, or reversing the decision, with or without remanding the case for a rehearing.

(e) The findings under section 6(b) as to any fact, if supported by substantial evidence, shall be conclusive. In any case in which a claim has been denied because of failure of the claimant to submit proof in conformity with any regulation prescribed under section 4, the court shall review only the question of conformity with such regulations and the validity of the regulations.

(f)(1) The court shall, on the motion of the Secretary made before the Secretary files the Secretary's answer, remand the case to the Secretary for further action by the Secretary. The court may, at any time, on good cause shown, order additional evidence to be taken before the Secretary.

(2) The Secretary shall, after the case is remanded, and after hearing such additional evidence if so ordered—

(A) modify or affirm the earlier findings of fact or decision, or both, under section 6(b), and

(B) file with the court any such additional and modified findings of fact and decision, and a transcript of the additional record and testimony upon which the Secretary's action in modifying or affirming was based.

(3) Any such additional or modified finding of fact or decision shall be reviewable only to the extent provided for review of the original finding of fact or decision.

(g) The judgment of the court shall be final except that it shall be subject to review in the same manner as a judgment in other civil actions.

(h) Any action instituted in accordance with this section shall survive notwithstanding any change in the person occupying the office of Secretary or any vacancy in such office.

PAYMENT OF ANNUITIES

SEC. 8. (a)(1) Each annuity is stated as an annual amount, one-twelfth of which, fixed to the nearest dollar, constitutes the monthly rate payable during the month after the month or other period for which it had accrued.

(2) Any individual whose claim for an annuity under this Act is approved after the date on which the annuity commences under paragraph (1)(A) or (2)(A) of section 3(c) shall be paid the total amount of the annuity payments for months before the date on which the claim is approved in the form of a lump-sum payment.

(b) Upon a final decision under section 6, or upon the final judgment of any court of competent jurisdiction under section 7, that any individual is entitled to one or more annuity payments under this Act—

(1) The Secretary of Labor shall certify to the Secretary of the Treasury—

(A) the name, address, and social security account number of the individual so entitled to receive such payments,

(B) the amount of such payments, and

(C) the time at which such payments should be made, and

(2) the Secretary of the Treasury, through the Division of Disbursement of the Department of the Treasury, shall make such payments—

(A) in accordance with the certification of the Secretary of Labor, and

(B) to the extent practicable, together with any payments of benefits made to the individual under the Social Security Act through such Division.

(c)(1) The Secretary of the Treasury shall promptly notify the Secretary of Labor of each annuity under this Act which terminates.

(2) The Secretary of the Treasury shall transmit quarterly to the Secretary of Labor a report setting forth the following information in connection with the last quarter:

(A) the number of annuities in pay status as of the end of the last quarter;

(B) the number of annuities which terminated during the last quarter; and

(C) the total amount paid as annuity payments under this Act during the last quarter.

(d)(1) Payment due an individual mentally incompetent or under other legal disability may be made to the person who is constituted guardian or other fiduciary by the law of the State of residence of the claimant or is otherwise legally vested with the care of the claimant or the claimant's estate. If a guardian or other fiduciary of the individual under legal disability has not been appointed under the law of the State of residence of the claimant, payment may be made to any person who is responsible for the care of the claimant, and the payment bars recovery by any other person.

(2) Determinations under paragraph (1) shall be made by the Secretary of Labor and certified to the Secretary of the Treasury.

(e)(1) Payments under this Act which would otherwise be made to a person under this Act shall be made (in whole or in part) to another person if and to the extent expressly provided for in the terms of any court decree of divorce, annulment, or legal separation, or the terms of any court order or court-approved property settlement agreement incident to any court decree of divorce, annulment, or legal separation. Any payment under this paragraph to a person bars recovery by any other person.

(2) Paragraph (1) shall only apply to payments made by the Secretary of the Treasury under this Act after the date of receipt by both the Secretary of the Treasury and the Secretary of Labor of written notice of such decree, order, or agreement, and such additional information and documentation as the Secretary of Labor may prescribe.

(3) As used in this subsection, the term "court" means any court of any State.

(f)(1) Amounts payable under this Act are not assignable, either in law or equity, or subject to execution, levy, attachment, garnishment, or other legal process, except as otherwise may be provided by Federal law.

(2) Recovery of payments under this Act may not be made from an individual in any case in which the Secretary of Labor determines that the individual is without fault and recovery would be against equity and good conscience.

INTERAGENCY COORDINATION AND COOPERATION

SEC. 9. (a) The Secretary of Labor may make such arrangements or agreements with other departments, agencies, or establishments of the United States for cooperation or mutual assistance in the performance of their respective functions under this Act as are necessary and appropriate to avoid unnecessary expense and duplication of functions.

(b) The Secretary of Labor may use, as appropriate, on a reimbursable or other basis, the facilities or services of any department, agency, or establishment of the United States or of any State or political subdivision thereof, including the services of any of its employees, with the lawful consent of such department, agency, or establishment.

(c)(1) Each department, agency, or establishment of the United States shall co-

operate with the Secretary of Labor and, to the extent necessary and appropriate, provide such information and facilities as the Secretary may request for his assistance in the performance of the Secretary's functions under this Act.

(2) The Secretary of Health and Human Services shall provide the Secretary of Labor with such records, determined by the Secretary of Labor to be necessary to carry out the purposes of this Act, as the Secretary of Labor may request.

(3) Section 6103(j) of the Internal Revenue Code of 1954 (relating to statistical use of returns and return information) is amended—

(A) by redesignating paragraph (4) as paragraph (5); and

(B) by inserting after paragraph (3) the following new paragraph:

"(4) DEPARTMENT OF LABOR.—Returns and return information shall be open to inspection by or disclosure to officers and employees of the Department of Labor whose official duties require such inspection or disclosure for the purpose of, but only to the extent necessary in, considering such returns and return information pursuant to section 5(c)(2)(C) of the Terminated Employee Pension Restoration Act of 1980. Such inspection or disclosure shall be permitted only upon written request which sets forth the specific reason or reasons why such inspection or disclosure is necessary and which is signed by the head of the bureau or office of the Department of Labor requesting the inspection or disclosure.".

DELEGATION OF POWERS AND DUTIES

SEC. 10. The Secretary of Labor may delegate to any officer or employee of the Department of Labor designated by the Secretary any of the powers and duties conferred upon the Secretary by this Act to the extent necessary to effectively carry out the purposes of this Act.

REGULATIONS

SEC. 11. The Secretary of Labor shall, before the effective date set forth in section 13, prescribe the initial regulations necessary to carry out the provisions of this Act. Regulations under this Act shall be prescribed by the Secretary of Labor in consultation, as appropriate, with the Secretary of the Treasury and the Secretary of Health and Human Services.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. (a) There is authorized to be appropriated for the fiscal year beginning October 1, 1981, to the Department of Labor such sums as are necessary for the purpose of carrying out its functions under this Act (including reimbursable expenses incurred by any other department, agency, or instrumentality of the United States or of any State or political subdivision thereof).

(b) There are authorized to be appropriated to the Department of the Treasury for the purpose of making annuity payments under this Act such sums as are necessary to make such payments beginning with the fiscal year beginning on October 1, 1981, and continuing until the last such payment is made.

EFFECTIVE DATE

SEC. 13. The preceding provisions of this Act (other than sections 11 and 12) shall take effect 180 days after the date of the enactment of the Act.●

---

By Mr. MOYNIHAN:

S. 1638. A bill to establish a national memorial to Franklin Delano Roosevelt, and for other purposes; to the Committee on Rules and Administration.

FRANKLIN D. ROOSEVELT MEMORIAL ACT

● Mr. MOYNIHAN. Mr. President, I am reintroducing today a bill to establish a national memorial to Franklin D. Roosevelt. The memorial would be built on Roosevelt Island in the city of New York according to the plans for a Roosevelt Memorial on that site prepared by the late, preeminent American architect, Louis I. Kahn.

January 30, 1982, will mark the 100th anniversary of the birth of Franklin Delano Roosevelt. Unless we act this year, by that date this Nation will not even have begun work on a fitting memorial to one of our greatest Presidents. Since 1955, when Congress first authorized study of a memorial to F.D.R., plans have been proposed, criticized, and discarded for a memorial in Washington, D.C. In its latest version, the Washington memorial to F.D.R. would cost about $23 million and would appropriate several acres of public parkland between the Jefferson and Lincoln Memorials.

This inordinate delay is an extreme disservice to the memory of a man who led this Nation decisively and steadfastly in his campaigns against destitution at home and tyranny abroad. In 100 days he carried through a plan to rescue our society; in 25 years we have been unable to plan a memorial to his achievements.

A memorial in New York is fitting and proper. Franklin Roosevelt was a great New Yorker before he lent his greatness to the Nation. He served his State as State senator and Governor. Many of his achievements in the State presaged his accomplishments in Washington. For example, under his administration, New York established its first programs providing relief of the unemployed and pensions for the elderly.

The memorial design by Louis Kahn is focused on the realization of one of Franklin D. Roosevelt's greatest dreams—the dream of peaceful world order, embodied in the United Nations headquarters building in Manhattan. The memorial incorporates a formal garden, tree-shaded lanes, sculpture, and a columned court at the southern tip of Roosevelt Island, an island transformed into a residential community. From the court, enclosed on three sides by granite columns inscribed with statements by or about F. D. R., visitors view the nearby U.N. buildings or look beyond them to the open sea.

Franklin D. Roosevelt would have approved of this location and design. It reflects his concern for decent housing, his love of the sea, and his penchant for great architecture. The legislation I am introducing would require that the memorial be made accessible to handicapped persons, for whom the life of Franklin Roosevelt is an inspiration.

This bill would authorize the Secretary of the Interior to execute the design for this memorial and would authorize the Secretary to accept private and public contributions. The Four Freedoms Foundation in New York City, a private foundation established in the memory of F. D. R., is prepared to assist in soliciting contributions so that the memorial may truly reflect the continuing devotion of Americans and others to the memory of Franklin D. Roosevelt.

I urge my colleagues to pass this legislation expeditiously and decisively, in the spirit of the man whose birth centenary would go unmarked to our shame.

I ask unanimous consent that a copy of the bill be inserted in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1638

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Franklin D. Roosevelt Memorial Act."

SEC. 2. The Congress hereby finds and declares that—

Franklin Delano Roosevelt, thirty-second President of the United States, was one of the nation's greatest presidents;

Franklin Delano Roosevelt led the nation with vision, forthrightness, courage, and dignity through perilous times both of economic depression and world war;

Franklin Delano Roosevelt was stricken in his adult years with a crippling illness that caused him to be physically handicapped such that his career serves as an example to handicapped people everywhere;

There exists no national memorial appropriately symbolizing the gratitude, devotion, and everlasting respect of the American people for the life and memory of Franklin Delano Roosevelt.

SEC. 3. (a) The Secretary of the Interior is authorized and directed to acquire a site, design, construct, and maintain as a National Memorial, a memorial to Franklin Delano Roosevelt, on the southern end of Franklin D. Roosevelt Island in the City and State of New York.

(b) The memorial designed and constructed pursuant to subsection (a) of this section shall, to the maximum extent possible, conform to the plan for a memorial to Franklin D. Roosevelt prepared by the late American architect Louis I. Kahn; said memorial shall include such improvements to the land and buildings surrounding the memorial as the Secretary of the Interior may deem appropriate and shall be fully accessible to handicapped persons.

(c) In carrying out the provisions of this section, the Secretary of the Interior shall consult with the New York State Urban Development Corporation, a public benefit corporation organized under the laws of New York State.

SEC. 4. The Secretary of the Interior is authorized, out of funds available to him in any fiscal year, the sum of fifteen million dollars to be available until expended, to acquire a site and to design and construct the memorial described in section 3 of this Act.

SEC. 5. The Secretary of the Interior is authorized to accept, and is authorized and directed to expend for the purposes of section 3 of this Act, gifts, bequests, devices of money and securities or other property from any person or non-governmental entity, and contributions of money or property from state, local, and foreign governments.

SEC. 6. (a) The maintenance and care of the memorial authorized under section 3 of this Act shall be the responsibility of the Secretary of the Interior.

(b) There are authorized to be appropriated for the fiscal year beginning on October 1, 1981, and each fiscal year thereafter, such sums as may be necessary to carry out the provisions of subsection (a) of this section.●

---

By Mr. KENNEDY:

S.J. Res. 109. Joint resolution designating August 30, 1982, as "Roy Wilkins Day"; to the Committee on the Judiciary.

ROY WILKINS DAY

● Mr. KENNEDY. Mr. President, I send to the desk a joint resolution to honor Roy Wilkins by designating August 30, 1982, as "Roy Wilkins Day."

With the death of Roy Wilkins last week, America lost one of its greatest leaders in the struggle to overcome the prejudice of the past and the discrimination that still blights our present day. The patient, persistent prodding of our national conscience by Roy Wilkins led us far on the road toward equal justice under law for all our people. President Kennedy looked to Roy Wilkins for leadership during the civil rights struggle of the 1960's. In my own life Roy Wilkins has been a trusted adviser, a voice of hope, and a steadfast colleague in countless battles for equality.

Those in our society who are poor or disadvantaged or victims of discrimination have lost a strong advocate with the death of Roy Wilkins. But in a larger sense, all Americans will feel the loss of his voice and the stilling of this powerful force for reason and human dignity.

Mr. President, I ask unanimous consent that the text of the joint resolution designating next August 30 as "Roy Wilkins Day" may be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 109

Whereas Roy Wilkins was one of the outstanding leaders of the Civil Rights Movement in the United States during the 1960's, serving as an inspiration to Black America to continue the struggle for equality as citizens;

Whereas Roy Wilkins was a key supporter and organizer of the March on Washington on August 28, 1963, which dramatized the responsibility of this country, by virtue of the Constitution, to recognize all American citizens with equal status;

Whereas Roy Wilkins was one of the political forces behind the successful passage of the 1964 Civil Rights Act, which made voting rights, equal employment, and equal access to public accommodations a matter of Federal law;

Whereas Roy Wilkins was Administrator for the National Association for the Advancement of Colored People in 1954 when that organization won the historic Brown v. Board of Education decision in which the Supreme Court struck down the "separate but equal" doctrine, which had justified the existence of racially segregated schools; and

Whereas Roy Wilkins was born in St. Louis, Missouri, on August 30, 1901: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That August 30, 1982, is designated as "Roy Wilkins Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.●

---

## ADDITIONAL COSPONSORS

S. 290

At the request of Mr. MELCHER, the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of S. 290, a bill entitled the "Reye's Syndrome Act of 1981."

S. 498

At the request of Mr. HART, the Senator from Connecticut (Mr. DODD), the Senator from New Hampshire (Mr. RUDMAN), the Senator from Washington (Mr. GORTON), the Senator from Connecticut (Mr. WEICKER), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of S. 498, a bill to amend the Internal Revenue Code of 1954 to provide a tax credit to homebuilders for the construction of residences incorporating certain solar energy utilization characteristics.

S. 888

At the request of Mr. DURENBERGER, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor to S. 888, a bill to provide effective programs to assure equality of economic opportunities for women and men, and for other purposes.

S. 1025

At the request of Mr. GRASSLEY, the Senator from Hawaii (Mr. INOUYE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Wyoming (Mr. SIMPSON), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors to S. 1025, a bill to provide for penalties for persons who obtain or attempt to obtain narcotics or other controlled substances from any pharmacist by terror, force, or violence, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1229

At the request of Mr. MOYNIHAN, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 1229, a bill to continue through December 31, 1982, the existing prohibition on the issuance of fringe benefit regulations.

S. 1310

At the request of Mr. BOSCHWITZ, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 1310, a bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas.

S. 1422

At the request of Mr. GRASSLEY, the Senator from Mississippi (Mr. COCHRAN), the Senator from New Mexico (Mr. DOMENICI), the Senator from New York (Mr. MOYNIHAN), the Senator from Washington (Mr. JACKSON), and the Senator from Washington (Mr. GORTON) were added as cosponsors of S. 1422, a bill to authorize the donation of surplus property to any State for the construction and modernization of criminal justice facilities.

S. 1451

At the request of Mr. CANNON, the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 1451, a bill to amend the Internal Revenue Code of 1954 with respect to the exemption from tax of veterans' organizations.

S. 1564

At the request of Mr. WEICKER, the Senator from Maine (Mr. MITCHELL), the Senator from Maine (Mr. COHEN), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of S. 1564, a bill entitled the "American Tuna Protection Act."

S. 1607

At the request of Mr. D'AMATO, the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 1607, a bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of $200 for each individual.

SENATE JOINT RESOLUTION 107

At the request of Mr. ROBERT C. BYRD, the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from Maine (Mr. COHEN), the Senator from New Mexico (Mr. DOMENICI), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Mississippi (Mr. COCHRAN), the Senator from Illinois (Mr. DIXON), the Senator from Massachusetts (Mr. TSONGAS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Texas (Mr. BENTSEN), the Senator from Montana (Mr. MELCHER), the Senator from Georgia (Mr. NUNN), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of Senate Joint Resolution 107, a joint resolution to designate the 7th day of October, 1981, as "National Guard Day."

SENATE RESOLUTION 175

At the request of Mr. BOREN, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its "Diamond Jubilee."

SENATE RESOLUTION 211

At the request of Mr. BENTSEN, the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of Senate Resolution 211, a resolution calling on the Governors of the Federal Reserve System to encourage banks to make loans available for productive uses while eliminating loans for speculative and unproductive uses.

AMENDMENT NO. 105

At the request of Mr. KASTEN, his name was added as a cosponsor of amendment No. 105 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

AMENDMENT NO. 534

At the request of Mr. KASTEN, the Senator from South Dakota (Mr. PRESSLER), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Wisconsin (Mr. PROXMIRE) were added as cosponsors of amendment No. 534 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

AMENDMENT NO. 539

At the request of Mr. GRASSLEY, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of amendment No. 539 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

AMENDMENT NO. 542

At the request of Mr. ARMSTRONG, the Senator from Minnesota (Mr. DURENBERGER), the Senator from Nevada (Mr. CANNON), the Senator from North Dakota (Mr. BURDICK), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Minnesota (Mr. BOSCHWITZ) were added as cosponsors of amendment No. 542 proposed to S. 884, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

## SENATE CONCURRENT RESOLUTION 34—CONCURRENT RESOLUTION RELATING TO SOCIAL SECURITY COST-OF-LIVING INCREASES

Mr. SASSER submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 34

Whereas, 36 million Americans depend on a stable and equitable Social Security System for their basic retirement and disability benefits;

Whereas, it is imperative that the real value of Social Security benefits not be eroded by rising inflation;

Whereas, present and future Social Security recipients have a solemn contract with the Federal Government to provide equitable Social Security benefits that are derived from the Social Security taxes paid by American workers and business; and

Whereas, the Reagan Administration has repeatedly indicated that it will not alter the basic benefits of Social Security recipients: Now, therefore be it

*Resolved by the Senate (the House of Representatives concurring) that—*

(1) The President should refrain from transmitting to Congress any budgetary or legislative proposal which would delay the cost of living increases for Social Security recipients; and

(2) the Congress in its consideration of any future proposals to revise Social Security financing not approve any Social Security legislation which provides for delays in cost of living increases for Social Security recipients.

## SENATE CONCURRENT RESOLUTION 35—CONCURRENT RESOLUTION OF DISAPPROVAL OF CERTAIN DEFENSE ARTICLES

Mr. PACKWOOD (for himself, Mr. JACKSON, Mr. CRANSTON, Mr. JEPSEN, Mr. BOSCHWITZ, Mr. PRYOR, Mr. BRADLEY, Mr. DANFORTH, Mr. ROTH, Mr. BIDEN, Mr. INOUYE, Mr. D'AMATO, Mr. ANDREWS, Mr. BAUCUS, Mr. BENTSEN, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. COHEN, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. FORD, Mr. GORTON, Mr. HART, Mr. HATCH, Mrs. HAWKINS, Mr. HEFLIN, Mr. HEINZ, Mr. KASTEN, Mr. KENNEDY, Mr. LEVIN, Mr. MATSUNAGA, Mr. MITCHELL, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SIMPSON, Mr. SPECTER, Mr. TSONGAS, Mr. WEICKER, Mr. WILLIAMS, and Mr. ZORINSKY), submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations.

S. CON. RES. 35

*Resolved by the Senate (the House of Representatives concurring)*, That, pursuant to section 36(b) of the Arms Export Control Act, the Congress objects to the proposed sale (the numbered certifications with respect to which were transmitted by the President to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate on , 1981) to the Kingdom of Saudi Arabia of the following defense articles, together with associated spare parts and equipment and related defense services:

(1) Five E-3A Airborne Warning and Control System (AWACS) aircraft (advance notification transmittal number 81-CU; certification transmittal number 81- ).

(2) 101 ship sets of conformal fuel tanks (advance notification transmittal number 81-CQ; certification transmittal number 81- ).

(3) 1,177 AIM-9L Sidewinder air-to-air missiles (advance notification transmittal number 81-CT; certification transmittal number 81- ).

(4) Eight KC-707 aerial refueling aircraft (advance notification transmittal number 81-CV; certification transmittal number 81- ).

DISAPPROVAL OF ARMS SALES TO SAUDI ARABIA

Mr. PACKWOOD. Mr. President, today I am submitting a concurrent resolution of disapproval regarding the sales of the F-15 enhancement/AWACS package to Saudi Arabia.

The purpose of this concurrent resolution is very simple. It is my belief, and that of many of my colleagues from both sides of the aisle, that this armaments sale is not in the interest of this country's national security.

In 1978, after extensive debate on the floor of this body, the Senate agreed to President Carter's request to sell Saudi Arabia the F-15 airplanes. We were told this sale would demonstrate our willingness to solidify our friendship to Saudi Arabia. In exchange, it was my hope, and that of many of my colleagues, that Saudi Arabia would provide a moderate balance in the Middle East. We hoped that if we sold them the planes we might have some leverage to encourage them to further the peace process and the stability of the Middle East.

It is now 1981, some 3 years later, and we know now what I felt deep in my own heart in 1978. Saudi Arabia had no interest in furthering the Middle East peace process and, in fact, would do everything possible to undermine the peace process.

Since 1978, Saudi Arabia has:

Condemned the Israeli-Egypt peace treaty;

Opposed Israeli ships in the Suez Canal;

Led the Arab political and economic boycott of Egypt;

Broken relations with Egpyt;

Financed the PLO;

Called for a holy war against Israel;

Refused to negotiate for peace with Israel; and

Increased its price of oil from $12 to $30 a barrel.

Even though the Saudis assured us in 1978 that all they wanted were the F-15's, we are now being told by this administration that the Saudis now need the F-15 enhancement package and, more importantly, the AWACS, our most sophisticated technology. But, I emphasize to my colleagues, the Saudis have not said what they are going to give the United States in return. In fact, the administration has been unusually quiet on the subject.

Mr. President, the issue before us goes beyond my concern over the selling of AWACS to Saudi Arabia. On April 2, 1981, 12 F-15 pilots sent a letter to Congressman LANTOS of California expressing their objection to the sale of the AIM-9L sidewinder air-to-air missiles. Their objection is based on the fact that the AIM-9L missile thrusts the American fighter pilot a very large step ahead in air combat over any other military force. Mr. President, I ask unanimous consent that the text of the letter from the F-15 pilots to Congressman LANTOS be printed in full at the end of my remarks.

Mr. President, there are many more issues that I could raise, arguments against this sale. Instead, however, I will wait until the current resolution of disapproval comes before the Senate for a vote. At that time, I intend to present further arguments that should convince those of my colleagues who are undecided on this issue.

The final point, Mr. President, that I would like to make is this: We as Ameri-

cans must realize sooner rather than later, that we cannot trade integrity and national security for Arabian oil. America has the ability and the resources to develop alternate energy sources, and it is our responsibility to pursue that path—not the path of Arabian blackmail.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 2, 1981.

Representative TOM LANTOS,
*House of Representatives,*
*Washington, D.C.*

DEAR REPRESENTATIVE LANTOS: We are writing this letter to strongly object to the sale of the AIM 9L Supersidewinder air-to-air missile to Saudi Arabia. We primarily object to this sale because it compromises the classified AIM 9L construction. The unstable political situation in Iran and throughout the Middle East led to the compromising of our F-14 aircraft, Phoenix air-to-air missile, and our Hawk surface-to-air missile. We do not want the technology of the AIM 9L to leak to the Soviets through lack of security in Saudi Arabia or through some closed door bargaining session. We at the user level can attest that the AIM 9L thrusts the American Fighter Pilot a very large step ahead in air combat over any other military force. The AIM 9L is superior because it is a point and shoot weapon with excellent probabilities of success. The AIM 9L is so superior that it gives the American Fighter Pilot a believable chance of survival when confronted with the overwhelming numbers of Soviet aircraft we must face.

If we, as a military force, are to maintain a credible deterrent defensive posture with a minimum of dollars, why give our technological edge away? Certainly, we as pilots cannot be expected to fight against the overwhelming numbers of Soviet aircraft equipped with a compromised version of our AIM 9L when we know how effective the missile is. We object to the sale of the AIM 9L to Saudi Arabia.

RESOLUTION OF DISAPPROVAL FOR ARMS SALES TO SAUDI ARABIA

Mr. KENNEDY. Mr. President, I am proud to join in submitting a concurrent resolution of disapproval to the administration's proposed $8.5 billion arms package for Saudi Arabia. I strongly urge my Senate colleagues to cosponsor this concurrent resolution, which is in our best national interests. In my judgment, this is one of the worst and most dangerous arms sales ever proposed. It is bad for the United States, bad for Israel, and bad for the Middle East.

In 1978, I voted against the sale of 62 sophisticated F-15 fighter aircraft to Saudi Arabia because they would endanger the security of Israel, America's surest friend and strongest ally in the Middle East. In fact, that sale generated so much concern that the Carter administration promised to draw the line there—and never to increase the offensive capability of the Saudi aircraft.

In proposing this arms package for Saudi Arabia, the Reagan administration is repudiating the solemn obligations of the United States. We are not talking about some mere technical enhancement of the F-15. We are talking about advanced Sidewinder missiles, modern aircraft fuel tankers and sophisticated AWACS planes that will give Saudi Arabia an air command platform to guide attacks against the territory of Israel.

The Reagan administration claims to America's allies that it is a firm and reliable partner. Yet if this administration truly looked out for the security of its friends, It would not repudiate the obligations of its predecessor, and it would never give the Saudis or any other nation the power to overwhelm Israel's air defenses.

The Reagan administration claims that this arms sale is an important component of its Middle East policy. If the administration wants peace in the Middle East, then let them stop selling offensive arms to Saudi Arabia, which considers Israel to be its primary enemy, which has called for a holy war against Israel, and which fiercely opposes the Camp David path to peace. Moreover, Saudi Arabia spends nearly $400 million a year to finance the PLO, which remains dedicated to the destruction of the State of Israel.

Any American policy directed to the Middle East which fails to recognize these realities is a recipe for disaster.

I also fail to see how providing a government of questionable stability with sophisticated American technology is in the interest of either the United States or that government. I remind my colleagues of the past congressional debate about providing Iran with AWACS. How secure would the United States—and our NATO allies who will depend on AWACS to enhance their security—feel if we had accepted the special pleading of the previous administration and sold AWACS aircraft to Iran only to find them in hostile hands today? In considering the Reagan administration's proposed Saudi arms package, the Congress should take a good long look at the great risks for future United States and NATO security that providing Saudi Arabia with AWACS could raise.

Even at this late stage, I call upon the Reagan administration to withdraw this proposed arms sale. A majority of the House and the Senate believe it is wrong. Instead of promoting an arms race and increasing the risks of war in the Middle East, the United States should be a force for lasting peace and true security in this strife-torn region of the world.

Mr. President, since the earliest indications of the proposal to sell AWACS planes and advanced military equipment to the Saudi Government, I am proud to have expressed my strongest opposition and to have urged the Congress and the American people to oppose this dangerous arms sale. Today, I reaffirm my opposition and my commitment to vote and speak and work against the administration's proposed Saudi arms package. Only by defeating this shortsighted and dangerous arms sale can the American people be assured that our Nation's security is guaranteed and our Nation's interest in peace and stability in the Middle East is preserved.

THE F-15 ENHANCEMENT/AWACS PACKAGE SALE TO SAUDI ARABIA

Mr. CHILES. Mr. President, I join in sponsoring the proposed concurrent resolution of disapproval of the F-15 enhancement/AWACS package sale to Saudi Arabia. I believe the Senate has a clear and pressing responsibility to reject this ill-advised arms sale. The proposed sale is not in the best interests of the United States, the continued security of Israel, or the cause of peace in the Middle East. The Congress has an important oversight role in the case of major arms sales and in this instance we must exercise that role by turning down the administration package.

This sale must be viewed from several different perspectives. The initial question must be whether the proposal would serve to advance the foreign policy and national security interests of the United States. The administration maintains that this sale will make a substantial contribution to the security of U.S. interests in the Middle East. I cannot agree.

I do not believe that our national security interests would be advanced by the sale of the sophisticated AWACS aircraft to any nation and in particular to Saudi Arabia. The introduction of this highly advanced technology into the volatile Middle East threatens to jeopardize the security of the vital technical data associated with the airborne warning and command aircraft. One only has to look at the Iranian experience to appreciate that this risk is very real. It would be a devastating blow to our defense posture if the AWACS technology were to fall into unfriendly hands.

The administration points out the seriousness of the Soviet threat in the Middle East and I fully agree that this threat should be a primary concern for the United States. I also agree that we want to help friendly nations in their ability to counter hostile moves in the region. However, the AWACS planes with their sensitive and secret equipment are not essential to Saudi Arabia's air defense efforts.

If anything, Saudi oilfields are much more vulnerable to ground attack or sabotage than an air strike. It makes little sense to provide the Saudis with this complex equipment, which is of marginal usefulness in terms of the most likely threats to Saudi Arabia, and run the very real risk of compromising AWACS technology which is essential to both American security and the defense of Western Europe. From the standpoint of U.S. security interests, the control and protection of AWACS must remain in U.S. hands.

The F-15 enhancement/AWACS package sale is an equally wrongheaded policy from the perspective of our longstanding commitment to the security of Israel. Israeli defense problems will be compounded by the sale of AWACS aircraft and aerial tankers to Saudi Arabia and by the sale of conformal fuel tanks and AIM-9L Sidewinder missiles for the Saudi F-15's. It must be remembered that while Saudi Arabia has entered into a cooperative relationship with the United States, it is no friend of Israel and remains committed to the destruction of the State of Israel.

The United States would in effect renege on its commitment to Israel by strengthening the offensive military capability of Saudi Arabia. The introduction of AWACS alone in the Middle East would dramatically alter the present balance of power. By giving the Saudis the ability to monitor Israeli defenses we

would be laying naked the entire air defense system of Israel.

The F–15 enhancement items must also be seen as posing a potential threat to Israel. In 1978, the administration proposed to the Congress the sale of 62 F–15 planes to Saudi Arabia. These planes were to be equipped with the AIM–7 Sparrow missile and the AIM–9P3 Sidewinder missile, all alleged to be defensive weapons. At that time, the then Secretary of Defense, Harold Brown, affirmed that Saudi Arabia would not seek to upgrade these planes, nor did the United States intend to sell them anything in the future to improve their range or capabilities. After heated debate and in the hope that this action might plant a seed toward better United States-Saudi relations, and therefore a move to the peace table, the Senate approved the sale.

I opposed the F–15 sale in 1978. I was doubtful they would remain defensive weapons. However, I never expected that it would be the United States proposing to give the Saudi F–15's an offensive capability. I feel this represents the breaking of a solemn promise, not only to the U.S. Senate, but to the Government and people of Israel. Our friends deserve better treatment.

Mr. President, it is not often that the Senate feels compelled to differ with the President in his formulation of American foreign policy. I believe that the President does have the primary role in the development and implementation of our relationships with other nations. If at all possible, I believe we should support the President in his conduct of foreign affairs. In this particular instance, it is not possible.

The Congress itself has the responsibility and authority to review major arms sales and it would abrogate that responsibility if we agreed to a proposal that is not in the best interests of the United States. The fact that a majority of the Senate has sponsored this resolution of disapproval points to the compelling nature of the arguments against this sale and the concern it has engendered on the part of so many Senators. I hope and expect that the Senate will live up to its responsibility and adopt the concurrent resolution of disapproval.

MILITARY SALES TO SAUDI ARABIA

● Mr. TOWER. Mr. President, consideration of the administration's decision to sell the aircraft warning and control system and other military equipment to Saudi Arabia is of vital importance to U.S. interests.

My distinguished colleague from South Carolina, Senator THURMOND, has articulately expressed his support for this proposal.

Mr. President, I respectfully request that the text of the Senator's statement be printed in the RECORD.

The statement follows:

STATEMENT OF SENATOR THURMOND

My decision to support the sale of the AWACS aircraft is based upon a number of reasons, but the bottom line is that this sale to Saudi Arabia is vital to the national security interests of the United States and to the securtiy of Israel.

To properly evaluate this issue, it must be understood by the American public that AWACS is a defensive system. It is not an offensive weapon system. It is not a spy plane. It cannot see anything on the ground. It is an airborne, early warning system which would detect an air attack against Saudi Arabia.

Primary among my reasons for supporting this sale are the following three points:

1. The key reason is that if the United States does not sell AWACS to Saudi Arabia, the Saudis can buy similar aircraft elsewhere. In that event, the U.S. would have no control over their use. If we sell to them, we can exercise some control and thereby help protect Israel.

2. Saudi Arabia is one of the largest suppliers of oil to the United States and the Free World. Our economy would be wrecked if this and other oil from the Middle East would fall under the control of the Soviet Union or be subject to political concessions. We must help the Saudis protect their nation. By so doing we would greatly enhance our ties of friendship, provide a United States military presence through Air Force and contractor support of AWACS, and thereby create a base to insure greater stability in this crucial part of the world.

3. Saudi Arabia has invested billions of its dollars in American securities and there is a strong prospect of additional purchases. This support for our financial system will strengthen our economic recovery program, help enable us to lower interest rates, control inflation and generally improve the health of our economy.

Over the years I have consistently supported aid to Israel. I believe this sale will enhance the security of Israel because in supporting AWACS the U.S. will exercise some control over its use. In addition, we will enhance Israel's security by maintaining our friendship with a key Arab nation in the Middle East and thus help prevent a shift in the world balance of power in that vital region. Such a shift would pose unacceptable security risks to the United States, Israel and the Free World.●

## AMENDMENTS SUBMITTED FOR PRINTING

### INTERNATIONAL DEVELOPMENT AND SECURITY COOPERATION ACT OF 1981

AMENDMENT NO. 551

(Ordered to be printed and to lie on the table.)

Mr. PROXMIRE submitted an amendment intended to be proposed by him to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

## NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Budget Committee will hold 2 days of hearings on Tuesday, September 22 and Thursday, September 24. On Tuesday, the committee will meet in executive session with Secretary of Defense Caspar Weinberger to discuss the fiscal year 1982–84 defense budget. The session will convene at 10 a.m. in room 6202 of the Dirksen Senate Office Building.

On Thursday, the committee will meet in open session with OMB Director David Stockman to discuss matters relating to the second concurrent budget resolution for fiscal year 1982. The meeting will begin at 2 p.m. in room 6202 of the Dirksen Senate Office Building.

For further information, contact Lynn Pearson of the Senate Budget Committee staff at 224–0544.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the hearings being held by the Senate Small Business Committee on "interest rates and business credit needs" on September 23 and 24, 1981, have been rescheduled to convene at 9 a.m. in room 424 Russell Senate Office Building.

For additional information please contact Jim O'Connell of the committee staff at 224–5175.

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy Conservation and Supply to consider the Department of Interior's proposed 5-year plan for oil and gas development in the Outer Continental Shelf. This oversight hearing will be held on Tuesday, October 6, beginning at 8:30 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Conservation and Supply, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Gary Barbour of the subcommittee staff at 224–0613.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, for the information of the Senate and the public, I would like to announce the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider the nomination of Henry E. Thomas IV, of Virginia, to be an Assistant Secretary of Energy for International Affairs. The hearing will be held on Thursday, September 24, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Charles Trabandt of the committee staff at 224–7141.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, I would like to announce for the information of the

Senate and the public that the Committee on Governmental Affairs will hold a hearing on the nominations of Charles M. Girard of Virginia to be Associate Director for Resource Management and Administration of the Federal Emergency Management Agency, and of Bruce Chapman of Washington to be Director of the Bureau of the Census. The hearing will be held on Tuesday, September 22, 1981, at 2 p.m. in room 3302 of the Dirksen Senate Office Building.

For further information please contact Margaret Hecht at 224–4751.

Mr. President, the Committee on Governmental Affairs will hold a hearing on S. 1417, the Presidential Protection Commission Act of 1981, on Tuesday, September 22, 1981, at 10 a.m. in room 3302 of the Dirksen Senate Office Building. For further information, please contact Darryl Fountain at 224–4751.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate today, September 17, at 2 p.m., to hold a hearing on the nomination of John Bohn to be U.S. Director of the Asian Development Bank, and Nyle Brady to be Assistant Administrator of Science and Technology at AID.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### I BELIEVE IN AMERICA

● Mr. DURENBERGER. Mr. President, it cannot be often enough that we take the time to think about why we are so special and so privileged to live in the United States of America; what it is that makes us in this country different and more fortunate than so many others.

I had the opportunity to meet with a very special Minnesotan who was in Washington recently because she won a trip for an essay she wrote for a contest. In her essay, "I Believe in America," Linda Hill Norway expressed so eloquently the privilege and responsibility that is ours as citizens of this great country.

Mr. President, I submit for the RECORD the words of Miss Norway so that I may share them with my colleagues.

WHY I BELIEVE IN AMERICA—
AMERICA SPEAKS

I believe in America because I am America. I am black, white, yellow, and red. I am a grocery clerk, an accountant, a housewife, and a soldier. I am German, Swedish, Norwegian, Polish and Indian. I am Jewish, Catholic, Protestant, and Muslim. I'm liberal, conservative, Republican, Democrat, and Independent.

Above all, I'm optimistic. I have fought wars of words and might, in order to keep my people free, and I have withstood internal strife fierce enough to crush lesser nations.

My people have disagreed with each other about politics and ideals, but they respected each other's opinions.

I am a country which holds respect for the ideals of "life, liberty, and the pursuit of happiness." My citizens have the right and the responsibility to let me know when they're either dissatisfied or supportive.

My people can, without fear of retribution or harassment, disagree or chastise their Government through a free election system or by single protest. I am a nation of independent thought. Even through my verbal and military confrontations, my people have stood together as the United States of America. They have demonstrated the Nation's character with honor, dignity, pride, and regard for the basic rights of all persons, regardless of their race, color or national origin.

I am a country to be proud of and I believe in America.

LINDA E. HILL NORWAY.●

## EDITORIAL REACTION TO THE ADMINISTRATION'S CLEAN AIR PROPOSAL

● Mr. HART. Mr. President, I wish to share with my colleagues recent editorials from newspapers around the country commenting on the administration's position on the upcoming revision of the Clean Air Act.

These 18 editorials demonstrate convincingly that the American people continue to want strong, effective Federal clean air legislation. Unfortunately, as the editorials point out, the administration's position goes far beyond the updating and moderate streamlining of the act which is appropriate. Instead, the 11 principles approved by the President would undercut the decade of air quality improvement which has occurred under a strong bipartisan commitment to clean, healthful air.

I ask that the editorials be printed in the RECORD.

The editorials are as follows:

[From the Austin American Statesman, Aug. 10, 1981]

NOT-SO-CLEAN AIR

The Reagan administration has backed off a smidgeon on its proposal to change the Clean Air Act, but the latest version still raises questions.

For example, the administration declares that by easing the standards for auto emissions, American automakers will be helped. But Environmental Protection Agency Administrator Anne Gorsuch admitted the cost savings would be a mere $100 per car. That isn't going to help the automakers compete against the foreign manufacturers, as all will adjust to meet less strict standards.

What would suffer would be human lungs. Surely most Americans would rather cough up $100 rather than cough, and cough, and cough.

The administration says easing of auto emission standards won't result in dirty air, but when pressed, Gorsuch said progress toward clean air would come "at a more reasoned pace," meaning, in plain American, it will be longer before the air gets as clean as it ought to be.

It is consistent with the administration's views on big government to recommend giving more responsibility for clean air to the states. But air moves around without regard to state borders, or national borders for that matter. It's a national problem.

The congressional committees now working on bills to reauthorize the Clean Air Act have been interested in fine-tuning the law, not drastically altering it. The Reagan proposal should meet swift opposition.

[From the Boise Statesman, Aug. 10, 1981]

BETTER, BUT NOT GOOD

The Reagan administration's recommendations for renewal of the Clean Air Act have gotten better, but they still include proposals that would slow the struggle to clean up the nation's air.

First the good: In a draft proposal circulated in Washington earlier this summer, the administration suggested that the states be allowed to set their own standards on air quality. That's gone, and good riddance. The country depended on state standards before the Clean Air Act was passed in 1970, and that experience showed most states will not set tough standards, particularly for industry, when they cannot be assured that other states will do the same thing.

Also, the administration has dropped a proposal pushed by presidential advisers who wanted to quit basing pollution standards on their effect upon human health. Their idea was to give more weight to the argument that achieving those health standards might not be worth the cost.

That stance may sound reasonable, but it's not. The costs of cleaning up the air may be great, but studies have shown that the costs of unhealthy air are far greater, even if all you consider is the price of medical care and not human suffering.

Now the bad: The administration wants to lower the standard for coal-fired power plants. The principle it espouses is called "uniformity" of standards. The idea is that new power plants ought to be approved if they could use low-sulfur coal to achieve the same air quality that plants burning high-sulfur coal achieve through technology.

Congress considered this concept several years ago and rejected it, reasoning that if plants burning low-sulfur coal could use technology to make their emissions that much cleaner, then so much the better.

We agree. The country should not settle for second best, particularly when there is compelling evidence that coal-fired plants are the big contributors of not only sulfur oxides, but also nitrous oxides that create acid rain, a severe problem to which the Reagan administration is giving only lip service.

The administration also suggests that air pollution controls should not be so strict in areas where the air is already cleaner than required by health standards. There is legitimate debate about the complexity of regulations governing such areas. For that reason the regulations should be examined with an eye toward more efficient administration, but not toward weakening them.

Finally, though, the most worrisome part of the administration's clean air proposals is the general attitude they reflect. Environmental Protection Agency Director Anne M. Gorsuch expressed that attitude when she admitted to reporters that the Reagan proposal would mean improvement of air would continue "at a more reasoned pace." Translate that as slower.

Such an approach is not only wrong, but it also goes against the will of the people. A recent Harris poll showed that 86 percent of those interviewed opposed relaxing the Clean Air Act. We hope Congress gets that message and not Reagan's.

[From the Chicago Sun-Times, Aug. 9, 1981]

TAKE CARE ON CLEAN AIR ACT

The Reagan administration is well aware that there's widespread support for the Clean Air Act among the public and in Congress. So it has cloaked in positive terms its "broad proposals" to change the law. But beware.

The words are reassuring but vague: "The air will continue to improve under the broad principles that we have adopted." And behind them lie some worrisome hard facts:

The administration failed to meet its self-imposed June 30 deadline to reveal what changes it wants in the law that expires Sept. 30. Some environmentalists fear a last-minute blitz in Congress that would preclude a full, careful debate on revising the act.

One major amendment to the act being pushed by a pro-administration House member would drastically weaken the law.

The administration's most specific "broad principle" would loosen clean air standards for autos to save consumers $100 on each new car. That's in keeping with Reagan's interest in reducing federal regulations and tying standards to cost-benefit concepts.

But that won't do in this issue.

Sen. Gary Hart (D-Colo.), chairman of the National Commission on Air Quality, is right: Concern for cost should be a factor in deciding when and how to meet clean air standards, "but not in setting the standards."

In other words, anti-pollution standards should be set at levels needed to protect health. Costs are to be considered, as Hart rightly says, in setting timetables and in devising controls to meet those standards.

(That was done, for instance, in June when Congress gave steelmakers three more years to meet pollution cleanup deadlines.)

Environmental Protection Administrator Anne M. Gorsuch said last week that Reagan's plans call for keeping health-based standards. But there's no hard evidence so far.

That's why the League of Women Voters, the Lake Michigan Federation, the Illinois Coalition Against Reagan Economics and others warned here last week that gutting the law would sharply increase health risks. Even the Illinois Coal Association protested an administration call to drop a requirement for "scrubbing" devices on new coal-fired plants.

The 1970 Clean Air Act is our oldest and most successful environmental law. A Harris poll found 86 percent of the public supports it. And Congress has regularly blocked moves to weaken it—with good reason. It works.

Red tape can and should be cut. And other shortcomings, such as needless delays, can be removed. But the act is basically sound. Extend it until next year when there can be full debate. Then fine-tune it, don't gut it.

---

[From the Chicago Tribune, Aug. 11, 1981]

MR. REAGAN VS. CLEAN AIR

The best thing that can be said about the changes in the 1970 Clean Air Act just proposed by Environmental Protection Agency Director Anne Gorsuch is that they are not as bad as everyone expected.

The Reagan administration did not ask, as had been feared, that the clean air standards for allowable concentrations of sulphur dioxide, nitrogen oxide, carbon monoxide, and other nasty pollutants be set by the states instead of the federal government.

It did not, as feared, try to remove the cut-off of federal funds as a weapon in controlling new sources of industrial pollution. It did not attempt to remove the special margin of safety for people with asthma and other respiratory ailments as a factor in setting clean air standards. Hooray.

Otherwise, the Reagan administration is proposing an assault on clean air.

Claiming that the phenomenon of acid rain is insufficiently understood the administration calls for intensified research instead of intensified action. Our neighbors in Canada, where some 4,000 lakes can no longer support life because of acid rain inundation, understand the phenomenon perfectly, as do people in the afflicted areas of our own country. They want government to reduce the levels of acid in the air—most of it coming from auto exhausts and coal burning. Yet, while Reagan, would accelerate research, his Secretary of the Interior, James Watt, is clamoring for more and more coal mining and burning.

Under the plan announced by Mrs. Gorsuch, the government would postpone the deadline from 1985 to 1987 for improved pollution control in troubled areas like Los Angeles. The administration would weaken the requirements for coal plant scrubbing devices. It is reluctant to enforce standards keeping state and national park lands pollution free.

As regards automobile exhaust, the administration is being positively idiotic.

Under its plan, the amount of nitrogen oxide and carbon monoxide auto pollution now allowed under 1981 standards would be doubled, for what the Reagan administration claims would be a $1 billion savings to the auto industry or some $100 in the average price of a car.

Though the $1 billion figure sounds nice for propaganda purposes, new car sales have been far below 10 million a year. And, with the price of mid-size cars now running at $8,000 or more, the $100 savings is not going to be a significant sales factor.

Not when there's another price to pay. Nitrogen oxide and carbon monoxide from auto exhaust are the principal causes of acid rain and killer smog. The auto manufacturers are already meeting today's pollution control standards. Why on earth relax them? Mrs. Gorsuch said the administration's plan still seeks cleaner air, but at "a reasoned pace."

The pace may be reasoned, but the direction is backward.

Mrs. Gorsuch seems to have been recruited for her job largely on the basis of the stridency of her opposition to toxic waste control legislation as a member of the Colorado legislature.

Her sponsor and mentor, James Watt, has been called an archfiend by many environmentalists, and justly so. But the time has come to point out that Mr. Watt and Mrs. Gorsuch are not the true villains of this piece: That role is being played by the man who sought them out and hired them, and hundreds like them; the man who stated for the record that ocean oil slicks are good for your health and that trees cause more pollution than man; the man who never uses the word "environmentalist" without adding "extremist."

For an otherwise adept politician, President Reagan has been missing a lot of signals lately. Poll after post-election poll has shown that the overwhelming majority of Americans, by margins as large as 80 per cent, do not want environmental protection laws relaxed or weakened.

Similar polls show that the largest post-election drop in Mr. Reagan's popularity has been in the environmentally sensitive West. The Republican chairman in California says his state party is now in serious trouble because of Mr. Reagan's environmental policies. The National Wildlife Federation, a predominantly Republican and conservative organization composed mostly of hunters, has come out strongly against Mr. Watt.

Mr. Reagan's style has been winning, and many of the things he's trying to do to improve our defense posture and restore fiscal and administrative sanity to federal government deserve support. But as far as the environment is concerned, Mr. Reagan is a menace.

---

[From the Gary (Ind.) Post-Tribune, Aug. 14, 1981]

LET'S NOT FOG THE ISSUE OF CLEANING UP THE AIR

This country indicated its intent to clean up its air and keep it clean when Congress passed the Clean Air Act 10 years ago. Now there is a move to dilute that intent.

Last week the Reagan administration announced plans to relax portions of the Clean Air Act that deal with auto emissions, coal-burning utilities and urban industries. The proposed changes were carefully wrapped in a promise to clean the nation's air "at a more reasoned pace."

This was met with glee by the world of industry, but called a "sugar-coated prescription for dirty, unhealthy air" by the National Clean Air Coalition, which represents about a dozen environmental groups.

Neither reaction was surprising. Barring innate divergent interests of the two groups, it seems that the country's official position now weakens its commitment on clean air.

That's not to say that any given act shouldn't be evaluated periodically. The many obsolete laws floating around indicate the wisdom in updating when necessary. Some people say that certain provisions in the Clean Air Act have contributed more to paperwork than to improving the air. Changes that would cut red tape, ease delays in meeting Environmental Protection Agency regulations and eliminate the confusion about regulations would be welcome. And given the present economic climate, cost reductions must be considered.

But nothing should interfere with retaining high standards for air quality.

Among general guidelines that President Reagan endorsed was that the basic standard for clean air should be health and should not include cost-benefit analysis. Yet he also endorsed raising allowable levels for nitrogen oxides and carbon monoxides from auto exhausts and making the standards the same for coal-fired plants in both the East and the West, which are not comparable since western coal is much cleaner burning than eastern.

When and how to meet clean air standards, not the standards themselves, seems to be the place to attack cost factors. Even environmental groups went along with the steel industry on a bill passed by Congress in June and signed by Reagan July 17 which gives steelmakers three more years to meet pollution cleanup deadlines.

All such reasonable requests should be considered. But even this has a hazardous pitfall. It is human nature to need a deadline to get anything done.

The people of Northwest Indiana, of all places, should value the effort to clean up the air. How many jokes have you heard this week on the "dirty air" in the area? How many people do you know who ran first chance they got to find some fresh clean air? Yet how many people do you know who deliberately sabotaged their car's anti-pollution equipment? And how many complaints have been made about prices rising because of pollution controls?

It's obviously a job that requires cooperation at all levels. That's why it's good to hear that the Northwest Indiana Clean Air Coalition is back in existence. The group plans to keep tabs on what's happening with the Clean Air Act, offering information for those interested, and to lobby against any proposals it feels would weaken the act.

Some people like to point out that the air is "cleaner today than it was 30 years ago." That is well and good, but not much consolation to today's children. Cleaning up the air isn't something that can stop when it gets better; it must be a continual process.

---

[From the Hartford Courant, Aug. 14, 1981]

KEEP AIR STANDARDS HIGH . . .

The specifics of the administration's proposed revision of the Clean Air Act are not yet known but its general direction is toward a relaxation of air quality rules for business and industry.

The administration's approach, outlined last week by Anne M. Gorsuch, administrator of the Environmental Protection Agency, could have been literally prepared by the

U.S. auto industry or the National Association of Manufacturers.

Ms. Gorsuch, for example, said the administration would probably recommend raising emission standards for autos from 3.4 to 7 grams per mile of carbon monoxide, and from 1 to 2 grams per mile of nitrogen oxides.

Those are precisely the levels recommended by the Big Three automakers before a Senate committee in June.

She said the administration also would give more say to the states in setting air pollution rules, ease the rules for new coal-fired plants and weaken protection for clean air outside national parklands—all of which are in line with recommendations made by the manufacturers' association.

It could have been worse. The administration could have pressed for application of a "cost-benefit" test to national air quality standards, rather than basing them strictly on public health considerations. But it was apparently deterred by expected congressional opposition.

The administration has argued that the Clean Air Act needs to be "simplified" and "streamlined," which it does need. But why does that always translate to making it easier, rather than more difficult, to pollute?

The Clean Air Act, the nation's principal means to control air pollution, has had some astounding successes over the past decade.

According to the Council on Environmental Quality, the air has become increasingly clean, with the total number of days in which the air was unhealthful or worse decreasing each year. Further, 93 percent of industry is now in compliance with air quality regulations.

But there are still substantial problems. The air quality levels in the New York and Los Angeles areas, where about 8 percent of the nation's population lives, are unhealthy more than two-thirds of the year.

In Connecticut, the air was declared "unhealthful" or "very unhealthful" in at least one monitoring site on 50 days between April 15 and Sept. 15 of last year. There are also a number of air quality problems, such as acid rain and many toxic air pollutants that are not addressed at all in the act.

By all means, Congress should streamline and simplify the act, which nearly everyone will admit is sometimes overly complicated and onerous.

But it should not retard the pace of cleaning up the air, nor ignore new and vexing pollution problems. Reauthorization of the Clean Air Act should be an opportunity to recommit the nation to make itself a better place in which to breathe.

---

[From the Huntington Beach, Calif. Pilot, Aug. 9, 1981]

FEDERAL CLEAN AIR ACT SHOULD NOT BE RELAXED

Orange County Supervisor Bruce Nestande assures us the Reagan Administration's proposed modifications of the 1977 federal Clean Air Act will have no detrimental effect in California because we'll still be permitted to write our own strict anti-pollution rules without interference from the federal government.

Indeed, says Nestande, the trend to balance envronmental controls with needed economic development will be a blessing for the whole nation.

The supervisor, who served in the Reagan administration in Sacramento, also is a director of the South Coast Air Quality Management District and in that role appeared before a Senate committee hearing on renewal of the Clean Air Act.

Reagan appointee Anne Gorsuch, new head of the Environmental Protection Agency, insists the administration remains committed to "steady progress toward clean air." But California Rep. Henry Waxman calls the administration's 11-point program to modify the act "nothing less than a blueprint for the destruction of our clean air law."

The program would greatly relax federal environmental controls, leaving them largely up to the states so that statutes could be formed in keeping with local needs—stricter in heavily polluted urban centers, lighter in now-clean rural areas.

Contrary to earlier fears, it still would place health benefit considerations ahead of cost considerations, but with the requirement that solid scientific data be used to determine where air quality carries health risks.

It would substantially relax auto emission control standards, eliminate requirements that polluted areas show steady progress toward meeting national air quality standards and eliminate provisions designed to protect air quality in areas not yet polluted.

The only areas in which preventive restrictions would be retained would be in the national parks and wilderness areas. (Could this have something to do with Reagan's campaign assertion that trees are among the worst polluters?)

Supervisor Nestande is convinced California will be just fine so long as we keep our own rules strict enough. How the state Legislature could be persuaded to do that in the face of substantially relaxed national rules is open to question.

We hope Nestande is right. But the nature of recent appointments to the federal Environmental Protection Agency stirs some niggling doubts. They include, for example, former lobbyists for the paper, auto, oil and coal industries. In their former posts their task was to lobby against environmental rules that would involve too much expense for their industries. Now they're using their expertise to help write the new rule book.

What's that about setting the foxes to watch the chicken coop?

The unfortunate fact about cleaning up pollution and keeping it cleaned up—as many other nations have discovered—is that it takes so long to get effective rules in place and see that they are enforced so that the results are visible. In many areas we haven't yet arrived at that point. But once the rules are relaxed it could take still more years to undo the damage. Congress should not be too easily swayed on these proposals.

---

[From the Philadelphia Inquirer, Aug. 9, 1981]

CLEARING THE AIR ON CLEAN AIR ACT

With the tax and budget bills out of the way, the Reagan administration and conservative members of the Congress are now able to move on to another item on their agenda: revisions in the federal Clean Air Act. During the presidential campaign last year, Mr. Reagan frequently cited the act as a major factor in the nation's poor economic and industrial growth, despite data to the contrary.

Last week, the administration released its recommendations for changes in the Clean Air Act, six weeks after they had been promised. That delay, according to knowledgeable insiders, was due to sharp disagreements among administration officials about the form the changes should take. It's still not clear where the administration stands.

The package made public by Anne M. Gorsuch, administrator of the Environmental Protection Agency, surprised some people in Washington. The administration at the last minute opted to issue a broad list of principles it would like to see included in the act, as opposed to specific legislative changes. In the words of Sen. Robert Stafford (R., Vt.), the administration's tactic represented a "shrewd political move" which will give the White House considerable latitude in its public and private lobbying efforts.

The Clean Air Act expires on Sept. 30 unless the Congress reauthorizes it. The reauthorization process is expected to be a bitter fight, pitting supporters of the environmental community against those of the business community. At stake is a law which the vast majority of Americans do not want to see weakened, but which business and industry vigorously oppose.

Mrs. Gorsuch outlined a plan that called for drastically relaxing automobile emission standards, eliminating most of the program designed to prevent deterioration of air-quality in areas with little or no pollution now and extending clean-air goal deadlines by as much as eight years. She declared that the administration's proposals would continue the national effort toward achieving cleaner air but "at a more reasoned pace."

It wasn't what the administration publicly proposed as much as what it didn't propose that should worry those who want a strong, effective Clean Air Act. Early versions of the administration's position leaked out and those revisions effectively gutted the act, stripping away about 70 of its most crucial elements. That list of changes still exists in the White House, and many supporters of the act express concern that it will be this document, not the broad principles outlined by Mrs. Gorsuch, that will be the basis for the administration's lobbying campaign on Capitol Hill. "We really fear a private and a public Clean Air Act campaign from this administration," said one environmental lobbyist. "And the American people won't know that they've been sold out."

Hearings are to begin next month. Chairing them will be Sen. Stafford, who has promised a "15-round political prizefight" if the administration attempts to gut the act, and Rep. Henry A. Waxman (D., Calif.), also a strong supporter of the act. At that time, the administration must make clear its specific intentions.

---

[From the Philadelphia News, Aug. 8, 1981]

SMOKE SCREENS

President Reagan is careful how he appears to us. He is an emperor wearing only the finest clothes, a master of the smile. Grace radiates from his presence.

Reagan treats bad publicity like a spraying match with a skunk. Sometimes he makes sure to perfume the air first—like the way he's sending new standards for the Clean Air Act to Capitol Hill.

Unlike the time Reagan came out swinging on Social Security and wound up on his tail, he is playing this one mildly. After all, granting a huge break to industry at the expense of American lungs is not the stuff of the conservative mandate. People, unlike barons of industry don't relish the sight of stacks belching smoke.

So when Anne Gorsuch, administrator of the Environmental Protection Agency, appeared on Capitol Hill, she brought "guidelines" for reform of the Clean Air Act. Nothing to rattle the voters: no specifics about how much more sulfur Reagan wants in our spacious skies or which restrictions will be lifted from factories near federal parklands.

There is no mystery about what Reagan intends. The Clean Air Act, while making the air a whole lot more healthy for us, hurts businessmen who are forced to clean up their wastes before emitting them. The guild of self-made millionaires in which Reagan travels gets to breathe those ocean breezes off the Pacific anyway.

Behind the sweet-smelling "framework" Reagan sent to Capitol Hill the other day is a sophisticated agenda for the poisoning of our oxygen.

Behind the sweet smile with which the president has won the public is a calculating, and cynical, estimation of what we're worth.

[From the Portsmouth, (N.H.) Herald, Aug. 10, 1981]

CLEAN AIR ATTACK

Now it's clean air that's under attack by the Reagan Administration.

The Reaganites want to loosen the Clear Air Act for auto emissions, so we can all save $100 per car, or so goes the sales pitch.

That sounds wonderful but we can't help being suspicious, and would bet a bottom dollar the proposal will really benefit the car manufacturers far more than us car buyers.

EPA Administrator Ann M. Gorsuch introduced the administration's "broad proposals" for amending the law, and that, too, worries us precisely because of the word "broad."

She admitted the plan contains few specifics, so we can't help feeling the environmentalists are right in viewing the vague proposals as dangerous.

One Republican politician said the very vagueness of the plan is a "shrewd political move." Maybe that is true, but we don't want to wind up choking on the emissions.

The new proposals would also give individual states more say in setting pollution standards. That sounds all right at first glance, but really in this mobile age are state boundaries any barrier to pollution transmission?

Perhaps there is room for some modification, but we hope the Congress studies the proposals with utmost care, and makes sure of the specifics, when and if there are specifics.

Certainly no one is against removing unnecessary restrictions, but the definition of unnecessary by the Reaganites may be too elastic.

There is also concern that if the clean air act is to be amended at all, it shouldn't be done on a piecemeal basis and merely on monetary considerations, but should be accomplished after thorough review of all aspects, because it isn't a simple act at all.

Concern has been expressed by a number of people over a proposed amendment to put a one-year moratorium on the auto inspection provision of the act, which seems wrong.

Although we love our automobiles, we all of us know that auto emissions contribute heavily to smog. One auto pollutant, sulfur dioxide, contributes to the real problem of acid rain, which is hurting New Hampshire and Maine and most of the Northeast.

There should be a really tough study of this subject, and Congress should not be stampeded into rash action that could be harmful to the health of all of us.

---

[From the Little Rock Gazette, Aug. 14, 1981]

KEEPING CLEAN AIR CLEAN

This was supposed to be the year that Congress would review the Clean Air Act of 1970 and decide whether to change some of its provisions in the process of re-enactment. Two committees have held some hearings and would like to get along with the assignment, but their progress has been hampered by the Reagan administration's failure to submit a proposed bill.

Considering the quality of the informal proposals that were leaked in some detail earlier this summer, the administration's hesitancy may have been a hidden blessing. The outline of "principles"—not a formal bill—that the administration presented last week indicates an attitude not quite as radical as that reflected in the earlier version, but if accepted whole they would seriously weaken the Clean Air Act.

There is no good reason, in any case, why the Senate Environment and Public Works Committee and a House Energy and Commerce subcommittee cannot push ahead on their own considerable momentum when Congress reconvenes next month.

The impression persists, even after Anne M. Gorsuch, administrator of the Environmental Protection Agency, presented the "principles," that administration ideologues would like nothing better than to destroy the effectiveness of the Clean Air Act if they thought they could get by with the foul deed. A spokesman for the National Clean Air Coalition calls the principles "a sugar-coated prescription for dirty, unhealthy air" and his summation seems to be squarely on the mark. The administration, it should be noted, already has guided through to enactment an amendment giving the steel industry three more years to meet clean air standards. Perhaps steel does present a special case, but the administration, in its principles, reflects a similar soft spot for the automobile industry as well.

Motor vehicle emission standards would be substantially relaxed under the administration's plans, a point that has not been missed by Representative Henry Waxman, chairman of the House subcommittee reviewing the Clean Air Act, who says: "I have reason to disbelieve the administration's commitment to steady progress toward cleaner air when it is still persisting in turning back the clock on auto pollution standards by actually allowing cars in the future to poison the air more than many of those today."

All of the implications of the technical principles presented by the administration are not immediately apparent, awaiting full-scale hearings, but already it is fair enough to reach several general conclusions about the administration plan. It would generally weaken public health protection, virtually eliminate air quality standards outside national park and wilderness areas, relax pollution controls on new coal-fired power plants and allow existing acid rain damage to continue unabated.

These are general attacks on clean air that the American public is not likely to accept, once the attacks are explained for what they are. It is one thing to "fine-tune" the Clean Air Act by reshaping some provisions requiring onerous administration. Even environmental organizations have felt that some revision in mechanics of the act is in order. Their reasonableness, however, is not matched by the attitudes of many in certain basic industries. Their rigidity is apparent in the administration's principles.

Those in Congress and the administration that feel in need of guidance could well heed the results of a Harris Survey in June showing that 86 per cent of the American public opposes weakening the Clean Air Act. The American people made a fundamental commitment to clean air in the late '60s and early '70s and there is no reason to believe that they have changed their minds, regardless of who occupies the White House.

---

[From the Louisville Courier-Journal, Aug 8, 1981]

VAGUE CLEAN-AIR "PRINCIPLES" IMPERIL POLLUTION PROGRESS

The "principles" that Environmental Protection Agency administrator Anne Gorsuch announced Wednesday as guidelines for amending the federal Clean Air Act were about as obscure as the view of downtown Louisville that same day. But the idea of breathing as a high-risk activity loomed large in the haze.

One major concession is designed to head off congressional opposition to weakening the law. The administration claims to have abandoned the patently impossible notion of applying rigid cost-benefit tests to all pollution standards. So any new ones, at least in theory, would be based on health considerations, instead. But at the same time, there's talk of a "risk-assessment" factor that may be used to water down protection for those most vulnerable to air pollution—children, the elderly, and those with heart and respiratory ailments.

Yet the "New Federalism" notion of dividing the U.S. into 50 semi-independent principalities may be the most disturbing part of the picture. The administration, says Mrs. Gorsuch, won't eliminate national standards for pollution. But she questions the idea of sanctions against non-complying states.

ENFORCEMENT IS IMPERATIVE

With non-enforcement, of course, all states would face powerful arguments from their own industries against pollution rules. Companies would say they couldn't afford to meet standards higher than those for competitors across the state line. Often, they'd be right. The nation will have national standards or meaningless ones.

The "principles" also indicate a weakening, rather than strengthening, of the fight against acid rain produced by generating plants and industrial smokestacks. Acid rain already has decimated aquatic life in hundreds of American and Canadian lakes, and has damaged water quality and crops in many parts of the country.

Some utility interests, defying most scientific opinion, claim that nitrous oxides from automobiles contribute heavily to acid rain. But acid rain would win there, too. The administration proposes to double the amount of nitrous oxides that cars may emit. The proposed answer to the acid rain problem, it seems, will be more research while irreversible damage goes on.

(Not quite incidentally, leniency toward acid rain also threatens the Eastern coal industry. New power plants wouldn't have to use scrubbers to clean their stack gases if they used low-sulfur coal. Many would find it cheaper to burn Western coal than to burn higher-sulfur Eastern coal safely.)

Meantime, the administration proposes to more than double the allowable standards for carbon monoxide from auto tailpipes. Future cars would emit more pollution than new ones now sold in President Reagan's home state of California, and more than about one-third of those sold elsewhere. Mrs. Gorsuch is unlikely to find much agreement that this wouldn't affect air-quality goals.

Announcement of the "principles" seems to be a trial balloon to see how much the public—and congressional partisans of clean air—will stand for. The specifics of the administration's long-awaited package of dirty-air legislation aren't expected until September.

FEW WANT WEAKER LAWS

Admittedly, there is room for improvement in the present Clean Air Act and how it's interpreted. But the EPA has been showing encouraging flexibility on some issues. There's really nothing urgent about amending the Clean Air Act right away.

The bottom line, as the latest Harris Survey shows, is that only 12 percent of the public wants weaker pollution standards. That's not surprising, since more than 170 million Americans breathe unhealthful air much of the time. But the Reagan administration's "principles" could reverse the progress that has been made, especially if enforcement is curtailed.

---

[From the Memphis Commercial-Appeal, Aug. 7, 1981]

NEW FEDERALISM'S BOUNDARY

If there were cheers from business quarters and cries from environmental groups when the Reagan administration finally issued its "broad proposals" on the Clean Air Act, no one should breathe much easier because of these suggestions.

They are sufficiently vague to leave Con-

gress considerable latitude in cleaning up the law. Where they get specific is where they get in trouble.

Take, for example, the proposal to ease federal auto emission standards. This, says Environmental Protection Administrator Anne M. Gorsuch, will save Americans as much as $100 on each new car purchased and save the car companies, as well.

It almost goes without saying that prospective car buyers will be skeptical of her promise. Consumers know only too well that prices can be "sticky" for cars or anything else, and they've seen just how responsive the car makers can be. When the public isn't buying because the prices are too high, the auto manufacturers respond by raising the price again.

As for the car companies, themselves, the savings likewise could be elusive when another Reagan proposal is cranked in. The administration wants to turn over more responsibility to the states by giving them more say in setting air pollution standards and by removing strict rules on clean-air areas outside the national parks.

What happens then? Will all states do what California did and adopt their own emission standards? If they do, how will it save the car makers to face 50 sets of rules and regulations instead of one nationwide test? How will their foreign competitors react?

If the states do nothing at all, what happens to the quality of their air, not to mention their quality of life?

And that is the basic problem. Air, like water, doesn't abide by state lines or national boundaries, for that matter. What one neighbor does affects another, as Canada has made plain on controlling acid rain, which is causing problems for the nation to our north and for us, as well. The rain's damage to lakes and land and buildings is also being felt along our East Coast and as far south as Tennessee.

However much Washington's new conservatives may preach power to the states, they must recognize that clean air isn't a proper test of faith for the new federalism. Clean air is a national concern, not a matter of states' rights. The states and everyone else are wronged when told otherwise.

---

[From the Salt Lake City Tribune, Aug. 16, 1981]

IMPRECISE CLEAN AIR "PRINCIPLES" DEMANDS GO-SLOW APPROACH

It has been frequently noted that many of life's pleasures are little ones.

Evidence supporting that is the chance to stand almost anywhere on the east side of the Salt Lake Valley in the relatively early hours of the morning, when the sun has just topped the Wasatch Mountains, and look toward the west and the Oquirrh Mountains.

Today a person can pick out roads winding up the range's east slopes, easily locate the television transmission towers and revel in the sharply outlined ridgeline of the range's crest.

It hasn't always been that way. For that matter, it has been in just the past two or three years that a person could see the distant details of the Oguirrhs so clearly.

What has made all this possible? The Clean Air Act and its various amendments. If it hadn't been for the Clean Air Act the major air polluter of the west side of the valley, Kennecott Corp., would still be producing the haze of pollutants that perpetually obscured the details of the Oquirrh Mountains.

Aesthetics aside, and recognizing the definitive "numbers" aren't yet available, the fact that East Bench viewers now have a better view of the mountain range to the west nevertheless means also that health conditions in the Salt Lake Valley are vastly better than they were a relatively short time ago.

This is the reason the Reagan administration's presentation of its 11 "principles" for revising the Clean Air Act create a certain uneasiness, namely because the Salt Lake Valley is still a "nonattainment" area, according to current standards. A "nonattainment" area, essentially, is one where the level of pollutants exceeds healthy minimums.

The basic reason for this "nonattainment" status is now attributable to the automobile. And that is why the Reagan administration's "principles" for readjustment of the Clean Air Act are worrisome.

Prominent among the "principles" is one that would relax the current standard for automobile emissions for carbon monoxide and nitrogen oxide from 1 gram per driven mile to 2 grams. Strictly on the basis of arithmetic that would mean a doubling of the permissible emissions of those pollutants.

This suggests that the air in the Salt Lake Valley, if the administration's "principles" are eventually written into the statute, will continue to be unhealthy for some indefinite time into the future.

Many persons, particularly representatives of industry, have argued with a certain validity that the current provisions of the Clean Air Act are needlessly restrictive and overly burdensome; that they are not cost-beneficial, from either the standpoint of the ledger sheet or the health benefits they produce. Those arguments are, to a degree, persuasive.

One notable one is the provision demanding "best available technology" be used in providing pollution control equipment on coal-fired electrical generating plants. That means the installation of needlessly expensive scrubbers, even if the plants are burning very low sulfur coal.

Under the Reagan "principles" this provision would be modified. In a parochial sense, this a potential boon to Utah and its low-sulfur coal producing industry. It also bodes well for electrical power consumers in the state, which now have to bear the cost of those scrubbers.

This study in opposites in the Reagan "principles" demands a very careful and slow approach to any revision of the Clean Air Act. There may be need for a "mid course correction," but it had better be one that is going to get the ship of clean air into port with everyone on board well and healthy.

---

[From the San Diego Tribune, Aug. 8, 1981]

NO TIME FOR TRUCE IN SMOG FIGHT

The U.S. Clean Air Act expires next month.

The Reagan administration, through the Environmental Protection Agency, has proposed that Congress reauthorize the historic act along 11 new guidelines—one of which lessens auto emission standards.

We commend the president's support for extension of the Clean Air Act, but question some of the proposed guidelines.

The administration pledges to make steady progress toward cleaner air, and to maintain the health-based standard of compliance. This commitment is vital to America, which has breathed better in the 1970s.

The facts are clear. A study by the Council on Environmental Quality shows car emissions have dropped 50 percent since 1968. Unhealthful days, as measured by the standard pollution index quoted in weather reports, decreased 18 percent in 23 urban areas over a five-year period. The national average concentration of carbon monoxide, sulfur dioxide and particulates dropped between 1973 and 1978. Fewer than 5 percent of reporting counties had 10 or more days over the standard pollution index.

But for San Diego, which suffered an average of 52 days a year of unhealthful air during the three years, the facts reveal that the Clean Air Act has not done enough. Although our air pollution is not nearly as serious as our northern neighbor, Los Angeles, which suffered 242 bad air days during the same period, it is worse than more than half the U.S. urban areas measured in the Council study.

That is why our representatives in Congress must oppose any weakening of auto smog standards.

As a plum to Detroit, the Reagan proposals would weaken carbon dioxide standards for auto emissions, raising the allowable level from 2 units to 7, on a scale which reached 87 in the exhaust-polluted days before the Clean Air Act. That would be progress in the wrong direction. We see no reason to aid U.S. automakers at the expense of the health of the American people, especially when Detroit's foreign competitors would also relax their standards.

The Reagan proposals come down hard on administrative abuses of the Clean Air Act—construction delays lasting years because of deferred air pollution rulings, bureaucratic inconsistencies, and technicalities. To reverse this process, the president proposes making uniform air pollution standards for new industries constructed in developed areas.

Good, but the generality of the guidelines may leave room for construction of polluting industries, at the expense of health.

San Diego, like America, walks a tightrope between pollution and economic stagnation. The Reagan proposals for the Clean Air Act add balance in the direction of economic development. We too want a country that is forging ahead economically. But we ask for more specific proposals to insure that, in the name of progress, we don't suffer the undeniable health hazards of dirty air.

Time is short. Positive action has been postponed too long. Now Congress must move quickly to renew the act and to keep it strong.

---

[From the San Jose (Calif.) Mercury, Aug. 7, 1981]

A BREATH OF FOULED AIR

The Reagan administration, after long delay and many premonitory rumblings, has finally emitted its proposals for revising the Clean Air Act. Environmentalists feel like a man who was expecting a life prison sentence and got 99 years instead: Things could be worse, but they're bad enough.

The 11 general proposals for "reforming" the act which were released by EPA Wednesday with the administration's imprimatur aren't as horrendous as the preliminary draft that Rep. Henry Waxman of California got hold of and began circulating last spring.

There's no recommendation to scrap secondary air quality standards (those designed to protect things like agriculture, wildlife and buildings, rather than human life) or to substitute cost-benefit analysis for the principle that health effects should be the sole criterion in determining primary standards. The administration also wants to retain the present system for preventing significant deterioration of air quality in national parks and wilderness, and to increase the regulatory offensive against toxic emissions.

Still, there's plenty in the EPA package to alarm and dismay the environmentalists—or, for that matter, all of us who have gotten into the habit of breathing.

Most dismaying is the proposal that automobile emissions standards "should be adjusted to more reasonable levels." Pressed to explain what "more reasonable" meant, EPA Administrator Anne Gorsuch said the administration was, in effect, proposing to cut emissions standards in half. It would like to see Congress roll back the 1983 standard for carbon monoxide emissions, 3.4 grams per mile, to the 1981 level of 7 grams a mile, and relax the present 1-gram-per-mile limit on nitrogen oxide to 2 grams per mile.

Such a change would have no immediate effect on California, which has its own, tougher emissions standards. But it would widen the gap between California and federal requirements, thereby making it harder for car makers to supply the California market and no doubt increasing the pressure on this state to relax its standards.

The White House also wants to be more "reasonable" toward pollution from coal-fired power plants. EPA proposed that all such plants should be subject to "uniform emissions standards" regardless of the type of coal they use. This evidently means that plants burning high-sulfur coal would no longer have to install costly special emissions control equipment. The effect, according to Richard Ayres of the Clean Air Coalition, would be to pump 3 million more tons a year of sulfur compounds into the air and greatly exacerbate the "acid rain" problem that is killing aquatic life and vegetation in the Northeastern United States and Canada.

Reaction to the EPA's proposals was completely predictable. The Clean Air Coalition and other environmental types deplored while the National Association of Manufacturers, the Business Roundtable, the National Coal Association and (surprise, surprise) General Motors applauded.

Gorsuch carefully emphasized that the EPA-proposed changes would save car-buyers $1 billion a year, or a walloping $100 on the purchase price of a new car. The sum to be saved by the manufacturers and power utilities was not specified, but the cheering from the industrial sector indicates that it is not inconsiderable.

Breathing twice as much air pollution—and running the attendant risk of lung, circulatory and heaven knows what other health problems—in order to save $100 on a car every few years and maybe trim a couple of cents off the monthly electric bill may look like a good deal to the administration and its Big Business mentors, but to those who will have to do the breathing the cost-benefit ratio looks distinctly unappetizing. We hope Congress will support genuine clean air reforms instead of the administration's blueprint for clean air destruction.

---

[From the Seattle Post-Intelligencer, Aug. 7, 1981]

NO COMPROMISE ON CLEAN AIR ACT

The notion that the dollar is the only way to measure cost seems to be at the root of the Reagan administration's plans to gut the Clean Air Act, a benign piece of legislation which will emit its last gasp Sept. 30, if it isn't renewed before then by Congress.

Air pollution still exists in the United States but significant improvements have resulted because of the Clean Air Act. Studies in 23 urban areas show that overall the number of days in violation of the National Ambient Air Quality Standards decreased by 18 percent between 1974 and 1978. Even if progress continued at this pace—which isn't likely—it would take more than 20 years to achieve minimum air quality in this country on a fulltime basis.

Apparently that's too soon for the Reagan administration. Before Congress moves to renew the Clean Air Act, the administration would like to make some sweeping changes. Specifics aren't spelled out yet but indications are that the most controversial of these would:

Eliminate any federal requirement to show progress toward meeting national air quality standards (states would judge their own progress).

Relax auto pollution control standards by increasing the legal amount of carbon monoxide and nitrogen oxide permitted in auto exhausts.

Eliminate most provisions designed to protect air quality in areas that are not yet polluted (pollution in these areas would be allowed to increase to national standards.)

Allow the cost of pollution controls to be weighed against health risks in a no-contest confrontation between your lungs and someone else's factory.

The intent of these changes is clearly to remove the teeth from the Clean Air Act, particularly those sections which conflict with corporate profit statements. But if industry isn't required to pay for removing the pollutants it broadcasts, that doesn't mean the bill won't fall due.

And it will be paid. The currency will take the form of cancers, respiratory illnesses, acid rains and thus, ironically, long-term economic and political damage compared to which, investments now in pollution control might seem inexpensive indeed.

Already Canada is threatening severely strained relations with the U.S. if the problem isn't addressed. Thanks to weather patterns and prevailing wind currents, our neighbors to the north fall heir to much of our pollution in the form of acid rain. Deputy environmental minister Blair Seaborn, Canada's top environmental civil servant, recently spoke before the 36th annual meeting of the Soil Conservation Society of America. He said more than half the acid rain in Eastern Canada—which kills lakes, erodes buildings and damages soils and forests—comes from the sulfur dioxide and nitrogen emissions of U.S. industry.

"It is essential," he said, "that Canada and the U.S. develop an effective mechanism to deal with the long-range transport of . . . airborne pollutants. We are moving on this problem now and we expect you to do the same. Failure to come to grips with this problem will, I assure you, place a (severe strain) on overall relations between our two countries."

It is unfortunate that the health and well being of its citizens may not be sufficient motivation for our government to ensure clean air. If it isn't, those of us who still find breathing necessary must point to the threat of drastic political and economic consequences by our closest neighbor—and our most prominent trading partner—to demonstrate to the Reagan administration where its best interests truly lie.

---

[From the St. Louis Post-Dispatch, Aug. 9, 1981]

GUIDELINES FOR DIRTY AIR

In an apparent effort to blunt criticism of its objective of weakening the 1970 Clean Air Act, the Reagan administration has announced guidelines for revising the law rather than a set of specific legislative proposals. But the guidelines have already prompted deserved denunciation by clean air supporters, as did some administration draft proposals that were made public in June.

Richard Ayres, chairman of the National Clean Air Coalition—representing environmental, health and civic groups—said the guidelines are a "sugar-coated prescription for dirty, unhealthy air." A spokesman for the National Association of Manufacturers applauded the guidelines. The guidelines call for, among other things, relaxing standards for vehicle emissions, making it easier for utilities to burn more coal in their plants, abolishing requirements that polluted areas show progress in meeting national air quality standards, leaving more enforcement to the states.

The administration's support for what it calls "a more reasoned pace" in achieving cleaner air largely ignores the social and dollar costs of dirty air in order to reduce costs for polluting industries. The Federal Interagency Toxic Substances Strategy Committee reported last year that, of "all urban dwellers, one in five—more than 35 million people—are at special risk from such illnesses as emphysema and bronchitis as a result of exposure to air pollution." The President's Council on Environmental Quality said last year that in 1978 the benefits—in reduced damage to health, crops, forests, vegetation and property—of air pollution control amounted to about $21.4 billion, $5 billion more than the cost of complying with the law.

If the Reagan administration shuns such findings, it will be ignoring the wishes of the American people, who have shown repeatedly in polls that they strongly support the Clean Air Act.●

---

## GEOPOLITICS OF OIL: ANOTHER WARNING

● Mr. JACKSON. Mr. President, the spotlight of the first 8 months of the Reagan administration has been focused almost entirely on the budget. The headlines and painful discussions of the last few months have all but obscured other problems.

The energy crisis, which stared at us for weeks and months in every newspaper, on every radio station, and on every television station, has vanished from the public eye. One might think that we have solved the energy crisis simply because it appears to have gone away. The old adage, "Out of sight, out of mind," is unfortunately particularly apt in this instance.

We read about a world oil surplus. The OPEC nations are in disarray; they cannot agree on a uniform price policy. It is tempting to sit by complacently and to ignore the fundamental problem lurking just beneath the surface.

There is, however, a fundamental problem that is not getting the attention it so richly deserves. That problem was aptly summarized recently by one of the world's leading petroleum analysts, Walter J. Levy. As he put it:

In sum, although it now appears that conservation and alternate energy supplies will combine to make oil demand a significantly smaller percentage of total energy use than it has been in the past two decades, the projections still indicate a major oil requirement and continued substantial dependence on OPEC oil. Even if the total oil demand should fall by 1990 substantially below that projected by Exxon, there is no realistic prospect that either the major industrialized countries or the LDCs can become anywhere near self-sufficient or reliant on non-OPEC sources.

With this cautionary note in mind, the author discusses some thought-provoking ideas about the consequences of our dependence on the Persian Gulf producers, and what we might do about it. I commend the article to my colleagues and suggest it be made mandatory reading for anyone who thinks we can afford to ignore the problem posed by the free world's dependence on a few nations for this most basic commodity.

Mr. President, I ask that Dr. Levy's article from the summer 1981, issue of Foreign Affairs, be printed in the RECORD.

The article follows:

OIL: AN AGENDA FOR THE 1980's

(By Walter J. Levy)

A year ago, in reviewing the problems of oil supplies and Western security, I focused on the deplorable developments that had occurred during 1979, and emphasized the grave dangers involved if most of the oil-consuming nations remained dependent on oil from

the Organization of Petroleum Exporting Countries, and were unable to achieve effective international coordination of their energy policies.[1] It now appears appropriate to examine how circumstances have changed—or remained unchanged—during the intervening year, and to suggest lines of action, for both the short and medium term, that should be pursued vigorously.

Events since the spring of 1980 continue to make apparent the inherent dangers for the non-communist world of dependence on insecure sources of oil supplies. Despite generally abundant oil availability, OPEC nations raised official crude oil prices from an average of $20 per barrel in September 1979 to $32 per barrel by August 1980. In the following month came yet another major oil supply disruption, this time the result of the outbreak of war between two OPEC nations, Iraq and Iran. This war, which still continues, brought about a sudden reduction of approximately four million barrels daily (b/d) in available world oil supplies, and for a while threatened an upheaval of the same magnitude as followed the 1978–79 Iranian Revolution.

However, this time the major oil-consuming nations and their oil companies were in a considerably stronger position. Very substantial oil inventories had been accumulated in response to events of the previous year. Through the availability of these stocks, weak oil demand, and the prompt Saudi Arabian action of increasing its production to partially offset lost Iranian and Iraqi oil exports, the importing nations managed to avoid the disastrous spot-market competition which had done so much to cause the price explosion of 1979. Nevertheless, in December 1980 the OPEC nations imposed still further price increases, bringing the level of permitted "maximum" official sales prices up to $41 per barrel. And, by January 1981, the average of official OPEC sales prices had risen to $35 per barrel.

The ensuing world oil glut and accompanying price weakness served to highlight the crucial role of Saudi Arabia within OPEC. The Saudi decision to increase its production from a "normal" level of 8.5 to 10.2 million b/d and to maintain its "marker" crude price at $32 per barrel represented a determined effort to persuade other OPEC nations to moderate their price increases. These Saudi actions helped the major oil-consuming countries to fare much better than might have been expected in the face of the Iraqi and Iranian supply reductions.

Meanwhile, the combination of three factors—economic recession in the industrialized nations, the progressive removal of price controls on oil produced in the United States, and the response of international oil markets in general to substantially higher oil prices—began to have a major impact on oil demand. Oil consumption dropped significantly in Western Europe, Japan and especially the United States—where the required level of oil imports declined to 6.5 million b/d in the first quarter of 1981 from 7.9 million b/d over the same period a year earlier. It began to appear that improved energy conservation together with the expansion of non-oil energy sources might lead to a situation where future requirements for OPEC oil would be very substantially lower than had been generally forecast prior to 1981.

At the same time, the position of OPEC countries was beginning to show signs of fundamental change. The Iranian Revolution had brought home to all of them the grave dangers of forced-draft economic development, with all its difficult political and social implications. Most of these nations also were concerned about the drastic impact of worldwide inflation on the value of investments they were continuing to make in the industrialized world. Thus, many OPEC nations increasingly emphasized the desirability of limiting output, so as to produce only the amounts of revenue needed for their national economic needs. Moreover, they increasingly realized that if in fact they limited production and exports, they could in many circumstances expect to see substantial price rises in the resulting tight oil market. And they might be able to cover their revenue needs even with lower levels of production.

In contrast, other OPEC members, Saudi Arabia in particular, demonstrated an acute awareness of the potential damage that would be inflicted on both major industrialized nations and less developed countries by a policy of limiting output in order to raise real (inflation-discounted) oil prices. The Saudis also realized that such higher prices, by accelerating the pace of conservation and production of oil and non-oil energy substitutes outside OPEC countries, could seriously restrict current, and even more so future, levels of demand for OPEC oil. But, with the first group of OPEC countries strongly resisting the Saudi policy of price moderation, the Saudis have been unable to achieve their goal of a unified pricing structure for OPEC. The OPEC meeting at Geneva in May 1981 again failed to reach agreement, with both sides maintaining their price positions, stabilizing prices for the time being, possibly for the rest of 1981, the majority of the participants agreeing on a ten percent reduction in output, but the Saudis adhering to their present production level of 10.2 million b/d. The continuing conflict within OPEC underscores how difficult and complex a task it remains for consuming nations to reach any meaningful accord with OPEC on long-term pricing and supply policies.

These latest developments, following the major structural changes of the international oil industry from the early 1970s, raise questions which must be addressed from a long-term perspective. In the following analysis, I will review the problems posed for the world oil economy during the 1980s—a period for which the strategic economic and physical preconditions are, to a substantial degree, already apparent. The main thrust of this analysis will be directed toward the issues posed in achieving a balanced accommodation between the vital interests of oil importers and exporters, and the consequences that might ensure if such efforts should unfortunately fail.

First we must consider the outlook for oil in the non-communist world. Do the circumstances of the present oil glut indicate that the world's oil importers will cease to be perilously dependent on OPEC oil exports?

Second, how can the oil-consuming nations better marshal their existing and potential energy resources in an effort to ease the extent and consequences of continued dependence on imported oil? This has to do not only with massive production and conservation efforts but with much more effective coordination of policies to deal with potential disruptions of oil supplies.

Third, assuming that the oil-importing countries are able to achieve comprehensive energy policies, how might such policies assist in moving toward an essential accommodation with the oil-exporting countries, and what are the realistic prospects for such an accommodation?

And finally, what actions are needed to contain and possibly deter contingencies which could disrupt the vital flow of oil from the OPEC countries, esptcially those in the Persian Gulf? In this regard, what must be considered are not only the dangers of Soviet actions, but also intraregional conflicts, political turbulence or changes of regime in individual producing countries, and the threats that might be posed by drastic changes in the oil policy of one or more producing countries.

The experience of the past 18 months is clearly reflected in the latest authoritative projections of world energy balances in the 1980s. Taking acconut both of the sharp decline of oil demand that has already taken place and of the continued stimulus of higher real oil prices on energy conservation and production of oil and non-oil energy resources outside OPEC, most forecasts now generally anticipate only slight, if any, expansion in non-communist world oil demand over the decade. In contrast, forecasts made as recently as the late 1970s, although projecting only a moderate rate of oil demand growth, nevertheless typically projected a substantial increase in the volume of oil required.

Thus, the latest comprehensive projection by Exxon concludes that oil demand in the non-communist world, excluding OPEC countries, will remain approximately unchanged at 50 million barrels per day through the decade, with the demand of OPEC countries themselves raising the overall total from 53 to 56 million b/d by 1990.[2]

These Exxon projections are predicated on only moderate real growth of the non-communist world's gross national product, (GNP)—three percent per year versus five percent over the 1960s, but roughly comparable to the economically troubled 1970s—and on very substantial further improvements in the efficiency of energy utilization. (In the case of the United States, for instance, there would be a projected decline of energy required per thousand dollars of GNP from 5.9 barrels per day of oil equivalent in 1979 to 4.8 barrels by 1990—in terms of constant 1979 dollars.) On these assumptions, but taking account of substantial increases in consumption among the less developed countries (LDCS), total non-communist world energy consumption would increase from 98 to 125 million barrels per day of oil equivalent (b/doe) over this period, or an average annual rate of growth of 2.2 percent.

Exxon anticipates massive development of non-oil energy resources between 1979 and 1990. Total non-oil energy supplies would increase from 45 to 69 million b/doe and their share in meeting non-communist world energy demand would increase from 46 percent in 1979 to 55 percent by 1990. For example:

Gas supply would rise from 18 to 23 million b/doe despite the effects of sharply declining production from current sources of supply.

Coal output would advance from 17 to 26 million b/doe even excluding expanding volumes of coal used in the production of synthetic oil and gas.

The combined contribution of nuclear, hydro, geothermal, solar, gasohol, and other miscellaneous sources of commercial energy would rise from ten to just under million b/doe, acconuting for the large part of the non-communist world's incremental energy supply.

Reflecting the increased incentives provided by higher real oil prices on efforts for exploration and development of new sources of oil supply, total oil production outside OPEC is forecast to advance from 21 million b/d in 1979 to 26 million in 1990. This increase would include a rapid commercial expansion of synthetic liquids production (from such sources as shale oil, tar sands and coal), which would rise from current fractional amounts to upwards of two million b/d. To meet the non-communist world's oil needs of 56 million b/d, the level of OPEC production required would still be 30 million b/d, less than the 32 million b/d OPEC produced in 1979 but five million b/d above the currently depressed OPEC production level of approximately 25 million b/d.

Footnotes at end of article.

The Exxon projections also indicate that during the present decade annual non-communist world oil production will exceed new discoveries, and accordingly, the reserves-to-production ratio will decline from 29 years to about 24 years by 1990. This is predicated on the assumption that OPEC countries maintain their oil output at levels that accommodate the future needs of the oil-importing countries and do not restrict production in order to stretch the life of their reserves.

In sum, although it now appears that conservation and alternate energy supplies will combine to make oil demand a significantly smaller percentage of total energy use than it has been in the past two decades, the projections still indicate a major oil requirement and continued substantial dependence on OPEC oil. Even if the total oil demand should fall by 1990 substantially below that projected by Exxon, there is no realistic prospect that either the major industrialized countries or the LDCS can become anywhere near self-sufficient or reliant on non-OPEC sources.

Moreover, as the current world oil surplus well illustrates, the world remains enormously dependent on the production policies followed by one key OPEC country, Saudi Arabia. However, the Saudi policy of maintaining its oil production well in excess of market requirements and at prices well below the general OPEC level provides no realistic basis for anticipating long-term oil market weakness. In an interview on U.S. television, Saudi Oil Minister Yamani bluntly described the 1981 oil situation as a glut that "we engineered . . . in order to stabilize the price of oil." Sheikh Yamani also indicated that the Saudis could "live happily" by reducing their production from over ten million b/d to as little as six million b/d if such a reduction were required to support a unified OPEC pricing policy.

If world oil demand should remain depressed and if surplus production should continue (reflecting either a continuation of current Saudi production policies or the effects of possible restoration of Iranian and Iraqi production, or both), real oil prices will tend to decline as long as such conditions prevail. However, it is extremely unlikely that the Saudis would continue their present policy if oil prices were to tumble below the current Saudi level. Moreover, protracted oil market weakness and declining real oil prices would inevitably retard energy conservation, slow the pace of development of non-OPEC energy resources and thereby detract from efforts by oil importers to decrease dependence on OPEC oil.

Up to now we have focused our review of prospects for world energy balances on the distribution of oil supply and demand for oil-importing countries as a whole, rather than for individual countries. There are, however, widely divergent degrees of dependence on imported oil as between the United States (37 percent of oil supply in 1980), Western Europe (81 percent) and Japan (virtually 100 percent). But all of us have become so interdependent in our political, economic and strategic exposure that there is no individual salvation for any one country. If the United States, for instance, were able to achieve a substantial degree of energy independence, it would of course be an extremely welcome development. However, the less fortunate circumstances of our allies would, nevertheless, still dangerously impinge upon us.

Moreover, even if oil-importing countries do their utmost to reduce their import dependency, and OPEC countries maintain levels of oil production as needed by oil importers and establish a pricing and development policy which (at least from their viewpoint) might be described as moderate, the potential financial effects on the overall well-being of the oil-importing world could still be grievous. For the poorer industrialized and less developed countries, it could be even crushing.

In addition to the continuing economic vulnerability of the importers, the events of the past 18 months have again underscored the variety and depth of the political and strategic problems which affect the Persian Gulf. These could, at practically any time and any place, interrupt oil production and thus supplies to importing countries—as they have now done three separate times in the past eight years. Contingencies could arise from the Soviet threat, regional fighting, internal upheavals, terrorism, the festering Arab-Israeli issue, or a sudden shift in the production and pricing policy of one or more OPEC countries. It is nearly certain that we will have to cope with one or even several of these contingencies in the years ahead.

The overriding conclusion is thus inevitable. Even in the short-to-medium term no firm reliance can safely be placed on the future availability of the required volumes of Middle East oil at manageable prices. If nothing else, the experience of the 1970s should have taught us this. In spite of the present world oil glut, the outlook for most of the 1980s still looks to be highly precarious, and, accordingly, it would be extremely imprudent if oil importers were to base their planning for the future on current market conditions.

III

In facing the prospects of long-term dependence on imported oil and uncertain oil balances, the consumer nations must redouble their efforts toward instituting a comprehensive, coordinated energy policy. The consumer nations must deal with two types of problems which require close cooperation—improving their energy resources position and coping with oil supply contingencies. It would be the height of folly if efforts to cope with these problems were relaxed because of current easing of world oil balances. These issues should be confronted now in the calm of loose world oil balances rather than later in the storm of some future crisis.

Once in place, a coordinated policy is essential for an effective accommodation between importers and exporters. Except during the present phase of a supply glut, individual importing countries and their oil companies have in the past acquiesced in practically any demand by OPEC countries regarding the volume and price of oil supply and even certain political terms as well. They have been inclined to do so out of fear that refusal to submit to the stipulated terms and conditions might jeopardize their ongoing oil supply position. It is not surprising that oil producers have acquired an unrealistic sense of their own power. Unfortunately, they have thus acted as if they could afford to ignore the real degree of interdependence between the political, economic and strategic welfare of the importing and producing countries.

During the 1970s, the essential failure of oil importers to achieve effective cooperation among themselves can be traced, to a considerable extent, to the major shortcomings of U.S. energy policy and the consequent inability of the United States to provide world leadership. After the 1973–74 oil price shock, artifically low oil prices and a rapid buildup of oil imports made it extremely difficult for the United States to assume a constructive role vis-a-vis the rest of the oil-importing world in the coordination of international energy policy initiatives. However, as a result of decontrol of oil prices, sharply declining oil imports, and a revived commitment to building the Strategic Petroleum Reserve, the United States is now in a much stronger position to induce, if not insist on, cooperation among consumer nations.

A comprehensive resources policy on the part of consumer nations must deal with a number of complex issues. Concerted endeavors are vital on the following fronts:

An optimum energy conservation effort must be pursued through the operation of the price mechanism, tax incentives and other suitable measures. It should be noted, however, that there are obvious limits to how far conservation can successfully be carried before the cost of achieving additional energy savings would exceed the benefits to be derived. Equally, economic vulnerability to any future supply shortfall would increase as conservation progresses because there would be that much less "conservation fat" left.

A sustained program for oil and gas exploration and development must be put into place, supported by the necessary price and tax incentives. Wherever possible, the creation of a surge productive capacity that would only be available during supply emergencies should be encouraged. In addition, technological and financial assistance for oil projects of LDCS should be extended.

A policy to replace oil and gas by coal, wherever feasible, should be pursued through investment, tax and other incentives. But if this should prove to be insufficient, direct government involvement may be required; mere market forces may not in all instances be effective, as in the case where electric utilities are able automatically to pass on higher oil costs to their customers. Additionally, an internationally coordinated research effort should be undertaken to cope with the environmental hazards of expanded coal use such as air pollution, acid rain, and the problems that might be posed by the possible "greenhouse effect" (i.e., a warming of the earth's atmosphere with a potentially dangerous rise in the level of ocean waters, bringing possible detrimental consequences for coastal areas and also for agriculture).

The production of synthetic oil and gas should be established and expanded as a matter of highest priority. In addition to a multinational cooperative effort on synthetic fuels research, joint efforts may also be necessary for the commercial development of new productive facilities because of the concentration of coal, shale oil, tar sands and very heavy crude oil in relatively few countries. In this respect, curtailment of the operations of the newly created U.S. Synthetic Fuels Corporation may well prove to be counterproductive. Because of unresolved technological problems, the huge financial cost involved, and the long-deferred and uncertain payout from investment, it is highly questionable whether private industry will launch as massive an effort in this field as is required without substantial government support.

International cooperation in nuclear research and development is essential, with the problems of waste disposal, nuclear proliferation and plant safety deserving particular attention. In light of the uncertain nature of future energy balances, a large contribution of nuclear energy would be most helpful, if not essential, especially for the many oil-importing countries with a small or virtually non-existent national energy resource base. Accordingly, the development of atomic energy should only be curtailed if the reasons for doing so, after the most exhaustive inquiry, are overwhelming. And even then, international efforts to curtail nuclear energy would probably fail, not only because the Soviet Union would be unlikely to subscribe to such an effort, but also because many of the energy-starved countries might not agree.

Finally, a major research effort on a coordinated international basis is warranted for the development of energy from so-called exotic sources (e.g., solar, wind and tidal water power) despite the very limited early contribution to energy supplies that can be

Footnotes at end of article.

expected. There is always the chance of a technological breakthrough that could change future prospects.

In addition to establishing a mutually cooperative and progressive energy resources policy, consumer nations must move to develop more effective means of coping with oil supply disruptions. The absence of effective oil importer coordination greatly contributed to the 1973–74 and 1979 oil price explosions. A responsible policy for energy coordination among oil importers must reflect the underlying likelihood of future supply emergencies.

First, the major importing countries should continue to pursue aggressive stockpiling of substantial oil reserves that would be available for use during future crises. The management of oil stocks must be made subject to a joint or coordinated policy as agreed upon by the relevant oil-importing countries. Past experience has demonstrated that the actions of individual nations or companies can easily run counter to the common good. For instance, the special interests of countries or companies in assuring their future supply availability, or in benefiting from an appreciation of the value of their oil stocks as a result of crisis, might induce them to add to rather than withdraw from their reserves during an emergency. Such a course of action would increase the severity of the crisis and contribute to the upward pressure on prices, as occurred during the Iranian upheaval in 1979.

Second, the oil-importing countries and their companies must agree not to purchase oil at above OPEC official sales prices during a crisis period, or at least be penalized if they should do so. This is necessary because importing countries and their companies are tempted to purchase oil at excessive spot-market prices during periods of actual or even feared future supply shortages. Such transactions do not increase total oil supplies but only serve to redistribute such supplies among importers, forcing countries that are thereby deprived of imports into the spot market at ever-escalating prices. In due course, such higher prices tend to establish a new official level of prices as established by OPEC. All of this has occurred in the past and will continue to do so if there is no policy in place for pre-crisis and crisis cooperation.

Third, there is a need for a policy of equitable sharing of oil supplies among the various importing countries during periods of actual shortages. As presently constituted, the International Energy Agency's oil sharing mechanism is only triggered by a seven percent shortfall. This is clearly inadequate inasmuch as an oil price explosion can occur well before the trigger-level is reached. The terms of reference for the IEA should thus be revised to permit an earlier response to an oil supply crisis. An effective policy for the international sharing of supplies would also tend to reduce the pressure on importing countries and oil companies to obtain their requirements on the spot market at whatever cost.

Since the dismal 1979 experience, which pointed up the need for further oil-importer coordination, the IEA Secretariat has been endeavoring to obtain approval from member countries for more responsive crisis management policies. Unfortunately, some of the important IEA countries have continued to resist such changes. It would be most unfortunate for all concerend if such disagreements could not be resolved before the world is confronted by a new supply emergency.

In addition to the energy problems facing oil-importing countries, there are also massive difficulties that confront oil exporters. Oil importers can ignore these only at their own peril. Cooperation, however, can provide a basis for an effective reconciliation of their diverse interests.

To assess the main lines of action for potential importer-exporter accommodation, I will draw upon the underlying assumptions, pricing proposals and policy suggestions contained in the thoughtful report prepared by OPEC's Long-Term Strategy Committee. This committee of OPEC specialists (under the chairmanship of Saudi Oil Minister Yamani since its inception in 1978) presented its recommendations at a special conference of OPEC ministers in May 1980. Although it has become increasingly uncertain whether these specific proposals will be implemented (Sheikh Yamani himself now indicates that some of the committee's proposals may be inappropriate because of changed oil market conditions), the Strategy Report still provides an excellent basis for consideration of issues which must be addressed in order for oil importers and exporters to reach a realistic understanding.[3]

In its outlook for future world oil balances, the Strategy Report cited the growing reluctance of producing countries to produce oil at rates higher than needed for internal development. Fundamentally, this reflects OPEC's preference, if completely uninhibited, to produce only as much oil as needed for its local demand plus a level of exports that would provide for its revenue requirements. Producing countries would, obviously, be very much interested in extending the life of their reserves and the time span during which they could count on substantial oil revenues. With the nagging doubts about the success of efforts to build up viable national economies (not primarily dependent on oil revenues) and concerns about the many economic and social problems that rapid and forced industrial development pose, many OPEC officials would consider a lower rate of oil production and economic development as more responsive to their national welfare and interest. The maintenance by OPEC of higher levels of output than their national economies require thus imposes distinct obligations on the oil-importing world which it cannot afford to ignore—provided that importing countries, in turn, are able to secure adequate suppliers of OPEC oil at prices they can afford to pay.

Steps by oil importers to assist OPEC in achieving its long-term objectives for industrialization must cover a wider range of issues. Oil-importing countries must not consider OPEC purchases mainly as a means for recouping as fast as possible their petrodollar outlays. While it might be difficult to discourage some OPEC countries from engaging in uneconomic or otherwise unsound projects, it should at least be tried, especially where the ultimate futility of such expenditures is only too obvious. However, as long as importing countries and companies compete among themselves for lucrative OPEC contracts without any coordination, each one would feel that if it did not get the order, some competing firm would. Similar consideration should apply to the sales of military equipment which can either not effectively be used by the oil-exporting country, or which might lead to overmilitarization, and provoke adventurism and regional conflict. Such self-restraint by Western suppliers can obviously not be achieved easily—if at all—especially as individual OPEC countries may be determined to proceed with certain industrial or military purchases. But a coordinated effort to establish a rational approach to this problem must at least be attempted.

Importing countries must also be prepared to accept the output of new OPEC industrial facilities without discrimination. Admittedly, this might present problems when such output would replace production from existing facilities within the oil-importing world, or when, as is frequently the case, such output is subsidized by non-commercial local supply of energy or feedstock for, say, petrochemical production, or is financed by non-commercial loans. In the latter type of situation, depending on the circumstances, the imposition of some countervailing duties may have to be considered. Nevertheless, to reach a mutual accommodation of long-term economic interests for both sides, constructive and determined efforts must be made to deal with these issues.

Oil exporters must also be provided non-discriminatory access to investment opportunities for their surplus funds within importer countries. This would lead to an increase of OPEC ownership in the importers' domestic means of production, including equity interest in corporations, real estate and so on. Where exclusion from such ownership are necessary for security or other essential national interests, they must be applied only on a non-discriminatory basis. Moreover, consideration might also be given by appropriate international institutions to make available to producing countries non-transferable, no- or low-interest bearing bonds that are indexed against inflation.[4]

A closely related area requiring exporter-importer cooperation is the establishment of effective mechanisms to provide financing for oil-related deficits of the weaker oil-importing countries. Private financial institutions which up to now have handled a substantial part of this transfer may over a period of time not be able to continue at the levels that would be required. Also, there may be a need for arranging for a lender of last resort to supplement, or perhaps even to replace, a sizable part of the private recycling flows.

In dealing with the oil-related financial problems of the less developed oil-importing nations, the OPEC strategy document proposed that an international aid program be set up to provide LDCS with financial assistance through loans or grants for balance-of-payments and development purposes. To accomplish this objective, OPEC suggested that a new international organization be established jointly by OPEC and industrialized countries to provide financial aid and technical expertise for the development of the LDCS' energy resources.[5]

OPEC countries with large financial accumulations must be brought increasingly into the international financial support network. Since their own prospects for economic development depend on the solvency of their oil customers, it is obviously very much in their own interests that OPEC countries increasingly cooperate with the financially strong oil-importing countries and international financial institutions. In this way a financing and transfer program could be established that would extend over a number of years, rather than operate on an uncoordinated short-term or ad hoc basis. The implementation of such a financial assistance program, however, would pose many negotiating problems such as that of respective OPEC–OECD financial contributions. In this connection, it should also be noted that the World Bank last year proposed to set up an energy affiliate, to be jointly financed by OPEC, the OECD and the Bank. This effort, it was hoped, would lead to a doubling of energy production by the oil-importing LDCS from the current 7.8 million b/d oil equivalent to over 15 million b/d by 1990, resulting in gross foreign exchange savings at present prices of about $90 billion. It is to be regretted that the United States recently announced that it will neither support the creation of such an organization nor participate in it; I hope this decision will be reconsidered.

The pivotal issue of oil pricing must also be directly confronted as part of the framework for eventual exporter-importer accommodation. OPEC's Strategy Report suggested that oil prices should increase in line with

Footnotes at end of article.

the impact of inflation on international trade and with changes in certain currencies. There also would be a gradual rise in real oil prices—related to the real growth of GNP in OECD countries.[6]

The Strategy Report's pricing position, however, does not answer the key question of what oil price level would provide a reasonable and acceptable base for future escalation under a long-term pricing formula. During the period between 1978 and May 1980, when the OPEC committee prepared its strategy document, crude oil prices rose from about $13 per barrel to some $30 per barrel—a rate of increase far in excess of the committee's own pricing policy proposal. Moreover, OPEC itself stated that "oil prices should in the long-term approximate the cost level of alternative energy supply" and, as Sheikh Yamani explained, this ultimate level should be attained "gradually, not all at once."

Present OPEC prices have even as of now substantially reached the estimated cost of some alternative supplies.[7] Moreover, any realistic approach to oil pricing must provide for a decline as well as for an increase of the real and also the nominal price of OPEC oil when circumstances warrant it. At this time, there is clearly no valid reason for an advance in the real price of OPEC oil. Rather—in line with the Report's own stated policy goals—real oil prices should decline, as it will take many years before substantial quantities of alternative energy can become available. This issue is a proper subject for review by OPEC countries and the importing nations.

In dealing with the problems posed by oil shortages, the OPEC strategy document made a number of recommendations. For the financially weak less developed oil-importing nations, the Report advocated, as a general policy, preferential treatment for the security of oil supplies on the basis of an internal agreement among all OPEC members.[8] The Report also suggested that some price restraint may be called for during shortages because the "bulk of crude and demand for petroleum products is influenced more by the policies of producing and consuming governments than by a free market equilibrium." Once a shortage is over, it considerd the possibility of two options—either freezing prices in real terms until the floor price catches up or, alternatively, establishing a new floor price and moving forward from there.

This suggestion for price restraint during future supply disruptions—if it could be implemented—is most constructive. What OPEC countries need for this purpose is the ability to draw on a substantial reserve productive capacity for dampening price increases during a period of oil shortage. Such a reserve could also provide for an unexpected surge in demand so as to make certain that it can be covered without discontinuities. Experience has shown that a mere supply/demand balance is not enough to eliminate upward pressure on prices. With a very uncertain future, maximum availability of oil should at least exceed world demand by several million b/d; otherwise the markets will get nervous. As asserted by the Report, "all risks in supply forecasts are on the downside." Accordingly, the industrialized countries would require an OPEC assurance of secure oil supplies at manageable prices. Only then will it be possible to establish the confidence of importers in future oil availability.

Finally, how then to establish workable arrangements for future oil exporter/importer dialogues? The OPEC paper recommended starting with informal talks on selected issues with experts from a few countries on each side, to be followed, if successful, by formal OPEC-OECD discussions. This would appear to represent a realistic approach that should be acceptable to the importing countries. It is especially welcome that the strategy paper does not insist that oil discussions must also include all the outstanding issues between the industrialized world and the LDCs.

In practice, initial discussions should include those countries in the two groupings that would in fact have substantial capability to carry out the decisions reached, and would also possess sufficient influence to ensure that such decisions would be implemented by at least most of the other relevant members of their group. This might involve, as lead nations, Saudi Arabia, Kuwait, Venezuela, and, perhaps, Iraq on the side of OPEC; and the United States, Great Britain, Germany, France, Japan, and possibly Italy on the side of OECD.

v

Despite efforts to reach a balanced accommodation with the oil exporters and despite efforts to cope more effectively with oil supply disruptions, the oil-importing countries may nevertheless be confronted by contingencies that could endanger at any time the oil fields and transport routes to the importing countries. Even with Iraqi and Iranian production cut back to a very low level as a result of the war between the two countries, perhaps as much as 15 million b/d or about two-thirds of OPEC's current exports would potentially be at risk. The threat to Persian Gulf oil supplies can come, as we have already noted, not only from Soviet overt or covert operations, but also from the Arab-Israeli conflict, intraregional disputes, internal upheavals or revolutions in major producing countries, and terrorist attacks on oil facilities.

Indeed, the ultimate political, economic and strategic destiny of the importing countries is held hostage in the Persian Gulf, particularly in Saudi Arabia. U.S. Secretary of State Alexander Haig has warned that a potential disruption of access to Persian Gulf oil "would constitute a grave threat to the vital national interest. That must be dealt with, and that does not exclude the use of force if that is necessary."

To keep the threats to oil supply under some measure of control, the diplomatic and economic policies of the major importing countries must be carefully balanced and coordinated. It will not be easy to reconcile the diverse interests and positions of the various members of the Western alliance, including Japan, but the underlying common concern in assuring secure access to Persian Gulf oil on manageable terms is overwhelming. What is at issue is the survival of NATO and the whole alliance as an effective and cohesive world power group. Because the stakes are of such magnitude, it should be possible to reach an agreement on a coordinated policy aimed at containing potential threats to the continued availability of Persian Gulf oil.

Such a coordinated policy should include not only the necessary measures for continuing close consultation, but contingent agreement on a limited direct or indirect military contribution by U.S. allies. But the major responsibility for any potential response by force by oil-importing nations falls on the United States because no other Western power can match U.S. military resources. Moreover, no other Western country has the means to check Russia, which would certainly be sorely tempted to interfere in any confrontation affecting oil-importing and producing countries. It is self-evident that a struggle over oil might easily trigger hostilities between the two superpowers. But if the United States is prepared, as it must be, to intercede against a Soviet move into the oil-producing areas of the Persian Gulf, it must equally be prepared to respond to a non-Soviet event, or one not traceable to the Soviets, which threatens the essential flow of oil.

There are many problems which stand in the way of gaining effective regional support for U.S. efforts to defend the Persian Gulf. Even though the Sauds and other producing countries must be aware that they would need protection against hostile Soviet moves, they somehow hope not to be drawn into any East-West conflict. Nearly all of the Persian Gulf nations desire to keep our military power at best at an "over the horizon" distance, and for it to be at their call only when they have become directly involved. They thus ignore that when help finally arrives, it may be too late to save them. They apparently fear that a U.S. military presence in their countries would threaten their internal and external security rather than enhance it.

The likelihood that Saudi Arabia or other relevant Middle East countries will give the United States substantial military-related facilities is remote. Such Western facilities, as Prince Saud, the Saudi Foreign Minister, has put it, would be like "lightning rods" that would provoke the Soviets to ask for the same rights. In the meantime, the United States is confronted by the hostility of Iran, Syria, Libya and others in the general area. Colonel Muammar Qaddafi, Chief of the State of Libya, only recently advocated an escalation of Pan-Arab activity in order to launch a strategic counteroffensive against U.S. imperialism in the Middle East.

Under these conditions, the military potential of the United States in the area must necessarily depend on rapid deployment forces and limited base or supply facilities in Oman, Bahrain, Somalia, Kenya and the Indian Ocean island of Diego Garcia. Even a limited military presence in the area could well have the character of a tripwire.

In countries where our supply facilities are located, we would apparently be prepared to strengthen their internal security forces. In many instances, the entrance fee for obtaining access to facilities would involve supplying military hardware to the country concerned. While this can provide only very limited, if any, capabilities for these countries to resist Soviet incursion, it might well strengthen their position against internal opposition—but it might also tempt them to engage in military adventures against their neighbors to settle old debts. As a matter of fact, the United States may have to contend with a host of problems in those nations where it has been able to obtain facility or supply rights. These problems could affect not only the security and dependability of U.S. tenure, but draw the United States into these nations' internal and external problems—with many potentially difficult and unpredictable consequences.

The recently formed Gulf Cooperation Council may improve some aspects of Persian Gulf security, but it certainly lacks the ability to cope with Soviet incursions. The Council (whose members are Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Bahrain and Oman) aims to promote economic harmonization, and perhaps very gradual political integration and eventually cooperation on defense and internal security. Apparently, as indicated by the UAE Minister of Petroleum, the group also plans to improve and coordinate the land, sea and air defense of oil fields and terminals. However, many of the member states of the Gulf Cooperation Council lack critical elements of the necessary political, military, educational and human assets. None of them possesses more than a symbolic navy and small land and air forces—which even in the case of Saudi Arabia depend on massive foreign assistance.

In case of a terrorist attack or of regional fighting that would endanger oil installations, an effective joint oil defense and a rapid repair capacity for oil facilities, if and when implemented, could prove to be invaluable. There remain, however, some nagging doubts about the staying power and operating capability of regional organizations. Past experience has not been too com-

Footnotes at end of article.

forting in the light of national jealousies and fears.

It is noteworthy that the new organization does not include Iraq. While one of the reasons for this omission might be Iraq's war with Iran, there probably is also a substantial amount of distrust and fear about potential Iraqi ambitions for hegemony over Arab Gulf states.

Meanwhile, the Iraq-Iran War continues to pose a wide array of problems which could severely endanger the security of oil supply. The longer the war lasts, and the more remote the chances for a settlement that restores Iranian sovereignty to the thalweg line of the Shatt al Arab, the more likely is the risk of the distintegration of Iran. Iran is threatened by separatist efforts by is large Arab, Kurdish, Azerbaijani and Baluchi minorities and by conflicts between moderates and radicals in the political as well as religious arena.

Clearly, the distintegration of Iran would be a disaster both for the region and for Western interests. It could involve a danger of confrontation with the Soviet Union, a breakdown of the country into various ethnic units, or a takover by a radical faction, such as the communist Tudeh Party. Any Iraqi takeover of or control over the oil-producing Arab populated area of Khuzistan would not only strengthen the Iraqi goal of hegemony over Persian Gulf countries but would also leave the remaining parts of Iran without oil production. They would in fact become international basket cases that would be up for grabs by the Soviet Union or by other neighbors. A takover of the government by the Tudeh Party would put the western shore of the Persian Gulf under communist control.

If, on the other hand, Iraq should be unable to achieve the main objectives that caused it to enter the war, its government might be in jeopardy, with an extremely uncertain outcome for its own political future. In any case, as of now, Iran is trying its best to unseat the present Iraqi government by inciting its Shita majority against the ruling Sunni minority.

If the war should continue indefinitely into the future, the possibility cannot be excluded that Iranian and Iraqi oil facilities would again become targets for attack. Worse still, as a desperate and last gesture, the country threatened with defeat might also try to destroy other oil facilities in the region or attempt to sabotage the flow of oil through the Strait of Hormuz.

In light of these contingencies, what can or should be done? There are at this stage of the game very few options available. But the deep concern of the United States and its allies about the possible consequences of the war must be made clear to all parties concerned, and especially to the Soviet Union. In particular, we should state that we would not acquiesce in any spreading of the war to other areas; nor would we recognize a takeover of the Iranian government by the minority Soviet-inspired or perhaps even Soviet-directed Tudeh Party.

We must, of course, be prepared to face Soviet opposition to such a policy. This is a risk we may have to take, because the consequences of doing nothing might be even worse. The basis for any actions that may have to be taken would be the actual or implied prohibition against aggression under international law or under the U.N. Charter.

The present situation concerning Iran and Iraq illustrates the dangers that may arise either from a regional war or from an internal insurrection. The most obvious justification for Western intervention in either case would be a request for assistance by an involved party.[9] In the case of an insurrection, it would be easiest if the existing government were to ask for help. But even without such a request, intervention would most likely be considered if the revolutionaries receive military or other support from outside hostile forces such as the Soviet Union or any of its proxies. Such outside support would tend to transform the internal struggle into an external one.

If the revolutionaries do not receive any open foreign help, and the threatened government has not been able to ask for Western support, we would still have to consider how best to protect our vital interests if revolutionaries, once in power, cut off essential oil exports. If we are prepared to act in the event of an internal upheaval which jeopardizes our security and is supported by some Soviet assistance, we might equally not be able to afford to remain passive if a link to the Soviets is not self-evident. The basis for action would be the inherent right of every nation of self-preservation.

In addition, there remains the possibility of a nonviolent event that drastically reduces the supply of oil from the Persian Gulf. Even a peaceful change of government or an abrupt shift in the oil policy of major producers could disastrously interfere with the flow of oil if this were to result in a sudden substantial cutback in oil exports or a massive price increase that importers are just not able to pay. As Sheikh Yamani put it, "Saudi Arabia . . . alone is in a position to inflict very severe damage on the world economy as a whole or a selected group of nations. . . . If the Saudis simply cut production to the level needed to meet their own development plans there would be a depression in the United States in which the rate of unemployment would at least double, the price of oil would double again and the inflation rate would rise."

It should be stressed, however, that as of now major producing countries in general and Saudi Arabia in particular have not been pursuing policies that would confront the importing countries with such stark issues. Saudi Arabia especially has, wherever possible, followed a course of moderation and has exercised its influence to temper the policies of the more radical oil-exporting countries. There is reason to hope that this moderation will continue inasmuch as oil-producing countries must be aware that an unlimited capacity to destroy cannot be safely used without also incurring the risk of being destroyed. Over the past eight years the major oil-importing nations have accepted very great increases in the price of oil; they have responded fully to the economic and financial demands of OPEC nations and are now well along on programs for conservation and alternate energy production that are enabling the OPEC nations to limit their production and to stretch out the period in which their oil resources will be of enormous importance for the long-term development of the OPEC nations. What they cannot accept is any abrupt change of policy, by one or more major OPEC countries, that would have the effect of reducing production or increasing prices beyond bearable limits.

Clearly, forceful intervention can only be the absolutely last recourse after everything possible to achieve a peaceful settlement has failed, and force should only be used when the most vital interests of the importing countries are in jeopardy. From a realistic point of view, for any military intervention to be acceptable or, at least, to be tolerated by the international community, the case for self-preservation must be obvious and self-evident. Such a response must not give the appearance of being merely the brutal or frivolous application of overwhelming power. It is also important that any intervention quickly succeed, not only to retain public support, but to ensure the effective protection of the jeopardized oil resource.

Obviously, any decision on foreign intervention must take account of all military possibilities, especially since such intervention could trigger a preemptive strike on oil facilities by any one of the warring parties or others. Moreover, it is quite possible that during the 1980s there might be a cluster of small nuclear powers in the volatile Middle East-Indian Ocean area, including perhaps Israel, Iraq, Pakistan and India. Contingency planning must certainly address itself to all of these risks. We must also entertain no illusions about the difficulties of maintaining the flow of oil production and exports in war-torn areas in the face of a possible hostile population, or so to speak, of producing oil while sitting on bayonets.

The issues posed here are as serious in their implications for world peace and stability as are those involved in the ultimate nuclear responsibility of the United States for the defense of the Free World. But it is important that everybody concerned be on notice that under extreme conditions, and after all possibilities to resolve a crisis peacefully have been exhausted, the application of power cannot be excluded. No nation can be expected to accept its demise without counteractions.

Whether or not a military response could effectively reestablish access to oil is in many instances by no means certain. However, the willingness, if necessary, to make use of one's deterrent capabilities is the major guarantee, or at least hope, that these capabilities will not have to be tested. The awareness that there exists a risk of a serious confrontation is an essential if unspoken element in establishing bargaining limits between oil exporters and importers.

In this article I have tried to face up frankly to issues that are sometimes put to one side, or discussed only in the internal policy councils of the major nations concerned. I do so in the belief that an honest presentation of positions that would be virtually inevitable in the event of crisis can help to mitigate the chances of any such crisis arising. The importance to the world economy of assured supplies of oil at bearable prices is so great—so essentially unique—that I believe it best to discuss the issues now, at a time when a supply emergency may not appear imminent.

But the main thrust of the article is on the constructive possibilities of the present decade. The world does remain heavily dependent on OPEC oil, and especially on oil from the Persian Gulf. For at least the next ten years that dependence will persist even if the importing nations continue—as they must—to take massive action to conserve energy and use it more efficiently and to expand the production of oil outside OPEC and the production of non-oil energy sources. What has happened to oil prices in the last decade should be ample incentive to maintain and increase these efforts.

Given such policies, and the other actions outlined in this article, however, the way could be open for a realistic long-term accommodation between the interests of oil-producing countries and those of all oil-importing countries. Both in terms of world economic progress and world peace, such a goal is worthy of the greatest possible effort by all concerned.

[2] Exxon, "World Energy Outlook," December 1980.

[3] Although the text of the report has not been officially released, its key recommendations have been widely summarized both in trade and general publications. My specific point of reference is the summary contained in a special supplement to Platt's Oilgram, May 6, 1980. It is noteworthy that the May

1981 Geneva meeting of OPEC directed the Committee to conduct a "further review of OPEC's long-term strategy and present a report to the conference as soon as possible." New York Times, May 27, 1981, page D13.

[4] For further details, see my "Recycling Surplus Petrodollars via Internationally Issued Indexed Energy Bonds," *Middle East Economic Survey*, April 7, 1980, and *The Institutional Investor*, July 1980.

[5] According to the strategy paper, OPEC's contribution would be based on the cost to LDCs of future oil price increases, put at $3.4 billion per year; and that of the industrialized countries would be related to the rate of inflation of goods exported by them to the LDCs, estimated by OPEC at $9.3 billion annually.

[6] According to OPEC's tentative estimates, the inflation adjustment might be six to nine percent a year, and if the GNP of OECD countries were to advance on the average by three percent per annum, this would result in an average floor price increase of some ten percent a year. In nominal terms, prices would thus double every seven years. If this kind of adjustment had been applied between 1974 and 1980, OPEC prices would have risen from $10.84 to $24.26 per barrel. In fact, prices now are some 50 percent above this level, largely because during the 1979 oil supply crisis spot prices increased wildly, followed by a substantial jump in OPEC prices.

[7] For example, one major oil company recently stated that shale oil and intermediate Btu gas from coal appear to be competitive with oil at current prices.

[8] As LDC oil demand (as also OPEC's own domestic requirements) is expanding much more rapidly than that of the industrialized world, the satisfaction of LDC consumption would require an ever-increasing proportion of total oil availabilities.

## RE-USE OF ATOM FUEL

● Mr. HART. Mr. President, last Friday, the New York Times published an article describing a plan, under consideration by the Department of Energy, to reprocess spent nuclear fuel from commercial nuclear powerplants to obtain plutonium for manufacturing nuclear weapons. This plan, if implemented, would represent a drastic departure from current U.S. policy of strictly separating the commercial and military applications of nuclear energy technology. Indeed, the statement attributed to Mr. Paul Leventhal of the Nuclear Club is precisely on point: Such a plan would break down the final barrier between atoms for peace and atoms for war.

Because this plan raises such disturbing questions about the effectiveness of the U.S. nuclear nonproliferation policy and the future of the commercial nuclear power program, I submit for printing in the RECORD both the New York Times article and a letter I have written to Secretary of Energy Edwards in response to it.

The material follows:

[From the New York Times, Sept. 11, 1981]

U.S. SAID TO PLAN ATOM FUEL RE-USE

(By Robert D. Hershey, Jr.)

WASHINGTON.—The Reagan Administration is devising a plan under which the Government would reprocess spent fuel from nuclear power plants for its own use, including making weapons, Administration sources and other officials said today.

Such a move would relieve utilities of the growing problem of storing this material and would give the Government a new source of plutonium, which it has said may be in short supply later in the decade.

The plan, however, was portrayed by a Department of Energy official as merely the revival of an idea that has been raised periodically, and it is apparently not part of the formal statement of nuclear policy that is expected in the next several weeks.

"What I would call it would be contingency planning," declared Benard C. Rusche, special assistant to Energy Secretary James B. Edwards.

"It's one of a dozen things to consider," Mr. Rusche added, but "it's not tomorrow or this year."

PLAN OPPOSED FROM 2 SIDES

Nonetheless, even tentative consideration of using commercial nuclear material for military purposes brought a quick denunciation both from critics of nuclear weapons and from the industry itself.

"Any move by the Federal Government to use commercial nuclear power spent fuel for making nuclear weapons would break down the final barrier between atoms for peace and atoms for war," said Paul Leventhal, president of the Nuclear Club, a new organization opposing the spread of nuclear weapons.

"It would set a dangerous example for other nations to follow, especially non-weapons states like India who we're trying to persuade against this very type of action," Mr. Leventhal said.

An official of the American Nuclear Energy Council, a lobbying group, said that the industry "would prefer that the Government not rely," on commercial fuel.

Supporters of nuclear power generally believe in keeping the programs separate on the tactical ground that combining them involves utilities in unnecessary controversies.

REPORTS OF PROPOSED PLAN

It is understood that the plan being developed calls for the Department of Energy to take spent fuel directly from utility plants and to send it to a Government plant for reprocessing.

One of these is in South Carolina along the Savannah River, where work is said to be under way on a new device using lasers that would produce weapons-grade plutonium from fuel used in utility reactors.

President Carter ordered commercial reprocessing halted in 1977 because he feared the plutonium would find its way into the hands of nonnuclear powers or terrorists.

The Reagan Administration, however, has said it wants to lift this ban as part of its strategy to revive the nuclear power industry.

If the Energy Department put the "contingency" plan into effect it would in effect supersede the authority of the Nuclear Regulatory Commission, which, along with the Department of Transportation, now governs the shipment of nuclear materials.

THEY HAVE NOT HEARD OF PLAN

Neither Victor Gilinsky nor Peter A. Bradford, commissioners of the regulatory agency, were aware of the Administration's proposal, they said.

It was also believed that plutonium the Government could get from utility fuel would be used for initial loadings of the proposed Clinch River breeder reactor, which is to be built in Tennessee. Breeders are designed to produce more fuel than they consume.

Mr. Rusche, in response to questions, noted that military planners had recently told Congress of a looming shortage of plutonium, essential for weapons, but said he could not specify when this might come.

He also noted that there are "rather well defined" international agreements to control the spread of nuclear weapons but that "our national security" must take priority. As for the barrier between commercial and military uses of atomic energy, he added, "that separation may be more psychological than real."

U.S. SENATE,
*Washington, D.C., September 17, 1981.*

Hon. JAMES B. EDWARDS,
*James Forrestal Building,*
*Washington, D.C.*

DEAR MR. SECRETARY: In an article appearing Friday, September 11, 1981, the New York Times reported that the Administration is devising a plan under which the Federal government would reprocess spent fuel from commercial nuclear powerplants for its own use, including the manufacture of nuclear weapons. Such a proposal raises disturbing implications for both the United States' nuclear proliferation policy and the continued viability of the commercial nuclear power program.

First, the very consideration of such a plan undermines the historic basic assumption of the Atoms for Peace program: that a clear distinction exists between the military and commercial applications of nuclear energy technology.

Second, implementation of this plan would set an example that could render virtually ineffective any efforts of the United States to discourage nonweapons countries from using their commercial nuclear power programs to develop a nuclear weapons capability.

Finally, this plan, if implemented, raises an additional question about the Administration's determination to promote commercial nuclear power to a far greater degree than alternative energy technologies.

I would appreciate a clarification of the Department of Energy's policy on the reprocessing of spent nuclear fuel as well as available information on the plan your department is reportedly preparing. In particular, I would appreciate your views on the following issues:

(1) How will the DOE plan affect the United States' nonproliferation policy of discouraging other countries from using commercial nuclear technology, particularly spent fuel reprocessing, for weapons purposes?

(2) Given the quantities and hazards to public health and safety of the high-level liquid radioactive wastes that will result from spent fuel reprocessing, how does this plan help solve the problem of disposing of commercial nuclear wastes in a safe, technologically sound manner?

(3) Would the plutonium separated under this plan be available for use in the Clinch River Breeder Reactor or any other nuclear reactor?

(4) How much plutonium has been set aside or procured for use in the Clinch River Breeder Reactor? Please specify the source(s) of the plutonium. Is this plutonium still designated for use in the Clinch River Breeder Reactor?

(5) What, if any, shortfall exists in the amount of plutonium currently needed by the Federal government for producing new nuclear weapons? If a shortfall does exists, how does the Department plan to meet its plutonium needs?

(6) Is the Federal government currently using its plutonium production and separation facilities to full capacity, particularly at the Hanford Reservation? If not, please explain.

Thank you for your attention to this matter.

Sincerely.

GARY HART.●

## SOCIAL SECURITY CUTS

● Mr. MOYNIHAN. Mr. President, headlines in newspapers across America yes-

terday read in a manner starkly similar to the one which appeared on the front page of the Washington Post—"Reagan Rules Out Social Security Cut To Reduce Deficit."

But a close reading of all the stories which appeared beneath those headlines indicates that the President has only said that he will not propose cuts in benefits greater than those he has already advocated. That is, Mr. President, greater than $280.1 billion. That is the level of cuts this administration has proposed for the period 1981–90. And that is too much.

Mr. President, this point was made brilliantly on the floor of the House of Representatives this morning by the distinguished chairman of the House Subcommittee on Social Security, J. J. PICKLE. No Member of Congress has more experience in this matter than Chairman PICKLE. We can all benefit from his thoughts and therefore I ask that a copy of his remarks this morning be made part of our RECORD.

The remarks follow:

THE PRESIDENT'S FURTHER SOCIAL SECURITY CUTS

Mr. Speaker, I realize that the President has said he will not cut social security benefits further than what he has already proposed. I think that this ought to be pointed out, because what he has already proposed are cuts in social security amounting to $280.1 billion between now and 1990.

Through the Gramm-Latta II budget reconciliation, based almost entirely on the President's recommendations, we have cut some $4 billion out of social security in 1982—and some $90 billion out of social security between now and 1990. But in addition, the President has already sent to the Congress proposals for further cuts in social security benefits amounting to an additional $4.8 billion in 1982—and at least $190.1 billion between now and 1990. He has not backed off these proposals for cutbacks, which include severe penalties for early retirement and which eliminate approximately one-third of the entire disability program.

I think it should be clear that when the President says he is not proposing more cuts in social security, he means no more than the $280.1 billion he has already proposed. This is how he proposes to make social security solvent and this is how he proposes to balance his budget.

I have proposed instead that we recognize the fact that we will not make these enormous cuts in social security and that we go ahead and recognize we must guarantee social security payments over the short-run with some general revenues directly or indirectly. This is not a decision I came to easily, but I am not afraid of that decision either. Our choices are simple. We can hope that the economy has no downturns for the rest of the decade and we can therefore scrape by with little more than we have done now. We can enact deep cuts either all together or piece by piece through the budget process as each year the fund is in trouble once again. Or we can go ahead and shore up the social security reserves with general funds and let the public have some piece of mind on this issue.

I hope the members will consider this carefully as they decide what to do on this issue in the coming months.

Mr. MOYNIHAN. So, Mr. President, as Chairman PICKLE notes, this administration hopes to make social security solvent by cutting $280.1 billion in benefits. But today we wake up only to find that even those $280.1 billion in cuts will apparently not be enough since the administration is now, for the first time, confirming the point many of us have argued all along which is that this administration now wishes to make further cuts in social security benefits in order to balance the budget. They are desperate to find some way to pay for their ill-conceived endorsement of the enormous tax cut and to pay the bill for the auction of the Treasury and orgy of special interest concessions in which they indulged as they sought to get the tax bill passed.

Mr. President, the New York Times this morning carries a story entitled "Reagan Weighing New Benefit Cuts." Now that alone is surprising given the headlines from Wednesday, but the most interesting part of today's tale is found buried in that paragraph where aides to President Reagan say that the President has become convinced that he cannot meet his new budget-cutting goals without reducing benefits in the so-called entitlement programs. Later a White House official, unnamed, is quoted directly saying:

It's hard for most of us here to figure out how we can find the dollars we need without looking at entitlements.

I ask that the text of this article, from the New York Times of September 17, 1981, be printed in the RECORD.

The article follows:

REAGAN WEIGHING NEW BENEFITS CUTS

DELAY IN SOCIAL SECURITY RAISES FOR 1982 IS RECONSIDERED

(By Martin Tolchin)

WASHINGTON, Sept. 16.—President Reagan is considering proposals for new cuts in Federal benefit programs, including a one-time, three-month postponement of cost-of-living raises for recipients of Social Security beginning Oct. 1, 1982, Administration officials said today.

The officials said Mr. Reagan was also considering a similar three-month deferral of cost-of-living raises in civilian and military pay, food stamps, pensions and some other automatic benefit programs. These and other steps would be aimed at saving "several billion dollars" in the fiscal years 1983 and 1984, and would also slightly reduce the surging Federal budget deficit in 1982, an official said.

Aides to Mr. Reagan said the President had opposed making changes now in Social Security or other benefit programs for fear of provoking new fights in Congress. But the aides said today that the President had become convinced that he could not meet his new budget-cutting goals without reducing benefits in the so-called entitlement programs.

Those are programs in which recipients receive benefits, such as Medicare or food stamps, on the basis of meeting certain qualifications, rather than by virtue of a specific authorization by the Congress.

Meanwhile, the House of Representatives, in a holding action, today approved by a vote of 281 to 107 a one-month extension in Government funding, giving the Administration additional time to press for a new round of budget cuts for the fiscal year 1982, which begins Oct. 1.

The action was needed to keep the Government operating beyond Sept. 30, when the current fiscal year expires, because not one of the 13 individual appropriations bills for the next fiscal year has been approved by both houses of Congress.

"We ought to have things kind of on hold up here until we see what the White House sends up," said Representative Robert H. Michel of Illinois, the Republican leader, after the vote. The White House has said it would seek an additional $9 billion to $16 billion beyond the $35 billion trimmed by Congress earlier this year.

It was a day of intensive negotiations between Republican leaders in Congress and Administration officials, who trooped to Capitol Hill for meetings. The visitors included David A. Stockman, director of the Office of Management and Budget and chief architect of the budget cuts; Treasury Secretary Donald T. Regan; James H. Baker, 3d, the White House chief of staff, and Max Friedersdorf, the White House assistant for Congressional liaison.

Mr. Stockman told a group of Republican Senators that the White House would not object it they took the initiative in proposing deeper cuts in military spending. The Administration has proposed a $2 billion reduction from the $188.8 billion proposed in the 1982 budget. The Senators had urged an additional $2 billion to $3 billion in trims.

DEFICIT COULD RISE SHARPLY

The entitlement programs are now being closely looked at by the Administration because of projections that the budget deficit for 1982, projected at $12.5 billion by Mr. Reagan in July, could soar to as high as $80 billion if additional cuts are not made.

"It's hard for most of us here to figure out how we can find the dollars we need without looking at entitlements," said a White House official, echoing the point made in recent days by the Senate Republican leaders.

Additional reductions is entitlements were opposed by the Administration because, after last summer's bruising budget battles, it was reluctant to return to Congress to ask for additional changes in existing laws to restrict eligibility and reduce benefits.

One possible way to circumvent the need for such legislation would be to postpone for three months a cost-of-living increase for Social Security recipients. This would produce a savings of $2.8 billion, according to White House officials. Although Mr. Reagan has said that he would not propose new cuts in Social Security, the proposal for a three-month delay was one that he had already sent to Congress.

DIFFERENCES IN VOTING APPROACH

In addition to differing with the White House on where the cuts should be made, Republican legislators also disagree on the legislative vehicle. The White House had actively considered placing the new budget cuts in an omnibus appropriations bill, which would allow for an all-or-nothing vote. This strategy, similar to the one used to obtain passage of the budget and tax-cutting packages earlier this year, would free the legislators from pressures by single-issue constituents.

Republican leaders in Congress, however, regarded that strategy as a circumvention of the appropriations committees in both houses and a threat to Congress as an institution. They urged that the White House seek to make the cuts in the 13 separate appropriations bills for 1982. While the budget set spending ceilings, the appropriations bills provide departments or agencies the actual funds.

Representative Michel said that yesterday's close vote on the appropriation bill for Housing and Urban Development funds meant that the Democrats lacked the votes to override a threatened Presidential veto. Mr. Reagan has said he would veto appropriations bills that he felt were out of line with his ideas on spending.

"That vote yesterday was a pretty good bellwether," Mr. Michel said. I don't want warfare between the White House and in-

dividual members of the Appropriations Committee."

Mr. MOYNIHAN. Mr. President, can this veiled assault on entitlement programs be anything but an attack on social security? Officials in the administration knew since May 12 when cuts in social security were proposed what they were after—a budget balanced at the expense of the elderly. They certainly knew that such massive cuts were not designed to save the social security system. I remind the Senate that on March 5, 1981, the President's Budget Director, David Stockman, testified before the House Banking Committee that the near-term solvency of social security could be assured. Mr. Stockman said at that hearing:

In the short run, though, I would suggest to you that for the next 3 or 4 years, a combination of improved real economic growth, the kind of inflation reductions that are radical but that we foresee, and some interfund transfers of existing tax revenues that can avert any near-term solvency problem.

Cuts of $280.1 billion in social security benefits are quite apart from this moderate path toward near-term solvency for the system. Mr. Stockman agreed that a combination of economic factors with some interfund transfers of existing tax revenues could avert the short-run financial problem.

Nothing about social security's finances has changed since Mr. Stockman's statement on March 5. In fact, in a booklet published this week by the Senate Finance Committee, under the direction of our esteemed chairman, the distinguished Senator from Kansas (Mr. DOLE), we find that between 1980 and 1986, the reserves in the three social security funds from which benefits are paid actually increase by $75 billion. Projected assets at the beginning of each of the years between 1980 and 1990 never fall below the percentage needed to cover benefits.

Mr. President, I ask that the relevant portion of this enlightening document, entitled "Staff Data and Materials Relating to Social Security Financing" and printed for the use of the Committee on Finance, be printed in the RECORD.

The material follows:

| .4 | 63.4 | 63.7 | 53.4 | 117.1 | −1 | 183 | 18 | 78 | 31 |

Mr. MOYNIHAN. And so, Mr. President, nothing has changed since Mr. Stockman's statement of March 5 as far as the financial condition of the social security system is concerned. What has changed is that this Congress had passed the Reagan-Kemp-Roth tax plan, loaded with a vast array of special interest giveaways, and as a result of this excess the bond market has neared collapse and the stock market plummeted.

Mr. President, Chairman DOLE has informed us that he intends to have the Finance Committee begin marking up a social security bill next week. I know that he and the other members of the committee will keep in mind that it would be folly to embark on a course of financing the tax cut by slashing the benefits of social security recipients.

Further, I call on the President to stop telling us what he wants to do with social security through newspaper stories in which policy decisions are attributed to his aides. He should send us a bill and send it to us before we start our markup next week. And he should do so before the discrepancies between his public statements and his aides' off-the-record pronouncements become something of a scandal and before the faith Americans have in their social security system, and, indeed, Government itself is further shaken.●

## THE AWACS SALE

● Mr. HART. Mr. President, the AWACS resolution of disapproval introduced today and signed by 46 Senators underscores the burden the administration now has to explain in a more precise and specific way its arguments in behalf of the sale and the numerous contradictions that have emerged in the administration's case so far. The strength of the opposition alone indicates that if the administration goes on to wage an all out effort to gain congressional approval it will be done only at a very high price.

The administration has still not satisfactorily addressed the fundamental question posed by those of us who strongly oppose the AWACS sale: In what specific ways does the proposed arms package serve the interests of either the United States, Saudi Arabia, or our most important strategic ally in the Middle East, Israel?

The contradictions which have emerged in the administration's arguments seriously undermine its own proposal. For example, although the State Department argues that the proposed sale would strengthen our hand in the Persian Gulf relative to the Soviet Union, we offer the Soviets a potential windfall in military intelligence through the potential compromise of the AWACS technology that we risk by entrusting such sophisticated equipment to a government whose principal concerns for stability arise domestically, not from across Transcaucasia.

The administration's intention of preparing the Saudi Government to defend against external threats will be frustrated by the AWACS sale, which prepares the Saudis for the wrong threat. The most likely threats to Saudi Arabia are internal disorder or rebellion and guerrilla warfare, encouraged and supported by its neighbors. The Saudis do not need AWACS nearly as much as they need other forms of military equipment and training.

The real question now is what price the administration is willing to pay to secure congressional approval of this sale. If the proposed sale goes through as originally described with complete transfer to the Saudis of our most sophisticated military equipment we will clearly damage relations with our most important ally in the Middle East, Israel. If on the other hand the proposed sale is modified to reduce the threat to Israel and the dangers of exposing American technology to other governments, the sale will become less attractive to Saudi Arabia and that Government will become increasingly alienated over the manner in which the sale was handled.

In addition, it is unlikely that the bargaining engaged in and the commitments made in exchange for the last few votes to secure approval will be in the public interest. This is the dilemma facing the administration if it proceeds to force this issue to a vote.●

## PENSION BENEFITS IN DIVORCE PROPERTY SETTLEMENTS

● Mr. PACKWOOD. Mr. President, on June 26, the Supreme Court ruled in McCarty against McCarty, that pension

benefits may not become part of a divorce property settlement.

For many military families the service member's pension is the single largest economic asset. This Supreme Court decision places a significant limit on the financial rights of divorced spouses of military personnel—the overwhelming majority of whom are women.

But in this decision, as in the Supreme Court's previous ruling in Hisquierdo against Hisquierdo on Railroad Retirement Act benefits, the Court left open the topic for final resolution by Congress.

The Durenberger-Packwood-Hatfield Economic Equity Act (S. 888), is one piece of legislation which addresses this important issue.

Congress began to address the issue in 1977 by providing that a wife is entitled to a portion of her husband's social security benefit if the couple is married 10 years or more. Congress extended this provision in 1980 to include spouses of Foreign Service personnel.

The Economic Equity Act would extend to courts the right to view military and civil service pensions as a valid property right in divorce settlements. However, the courts would still have the final say in settling divorce cases.

In a recent Newsweek article, Jane Bryant Quinn commented on the Supreme Court decisions and what they may mean if Congress does not take action. I believe her thoughtful comments will be of interest to my colleagues.

I ask that the article be printed in the RECORD.

The article follows:

[From Newsweek, Sept. 14, 1981]

A HOUSEWIFE'S LOT

(By Jane Bryant Quinn)

When husbands and wives approach divorce, the thing they argue most about is property. And the most troublesome property before the courts is pensions.

Is a divorced wife entitled to a piece of the pension that her husband accumulated during the marriage, or is she not?

Most state courts say that she is, and state law supposedly rules. But in the only pension cases to reach the U.S. Supreme Court—one on railroad retirement, one on military pensions—the Court overrode traditional state supremacy in family law. It held that Federal law took precedence, and the main body of Federal law reserves pensions solely for the worker who earned them.

Cut Out: These two decisions cut only military and railroad wives out of their husbands' pensions. States continue to divide other, private-company pensions as they see fit, and that's where most of the money is. But for housewives demanding economic recognition, these rulings are a bad precedent. If the Supreme Court ever extends them to private pensions, marriage—for women—will become an even risker choice of career.

The importance of pensions to housewives cannot be overestimated. Divorce, in most states, is easy to get, even if one partner opposes the split. Alimony, when awarded at all, may last only a few years, until the housewife learns to support herself. All she can expect to take away from her failed marriage is a share of the property accumulated while she and her husband were together.

In the recent past, there was no legal concept of mutual accumulation, except in the eight community-property states. But most states have evolved an economic-partnership theory of marriage, under which a wife who cooks, cleans and raises the children is "earning" a share in the marital assets as a matter of right. And what the law creates in the way of property rights, no man shall put asunder.

When a marriage crumbles, all the marital property is put into a kitty and divided up. A few states, like California, split the assets 50–50. Others split them according to such guidelines as how long the marriage lasted and how much each partner contributed with housework counted as a contribution.

To a wife who works outside the home, and who has established a pension of her own, a share in her husband's pension may not matter very much. But a housewife is more vulnerable. In many marriages, the husband's pension is the major asset. If it is taken out of the marital kitty, there isn't much property left to divide.

In the view of most state courts, dividing the pension amounts to simple economic justice. But the Supreme Court's decisions cast marital law back to the days when a husband's money was all his and a housewife's work wasn't worth a dime.

A deciding clause in the Railroad Retirement Act says that a third party cannot normally be assigned any right to the worker's pension. Most state courts say that that clause applies only to outside creditors who are suing for a judgment. But the Supreme Court held that it also cuts out any property rights claimed by a spouse. (All private pensions insured by the Employee Retirement Income Security Act are covered by that same, spouse-denying clause.)

In the military case, the court said that the wife is entitled to part of the pension only if Congress specifically grants it.

Special Cases: Howard Lipsey, chairman of the family-law section of the Association of Trial Lawyers, thinks that these two decisions will not spread to private pensions. "These are special cases," he argues. The military-pension decision, for example, was linked to Congress' right to regulate armies. But Doris Freed, who heads the research committee of the American Bar Association's family-law section, disagrees, calling the decisions "a clear and present danger" to the equitable property division established by state law.

Bills introduced in Congress would guarantee wives the pension rights called into question by the Supreme Court. (Congress permits civil-service and foreign-service pensions to be divided in divorce.) But Rep. Pat Schroeder says the bills face tough going, "partly because some opponents have been through bitter divorces and can't look at the issue objectively."

If Congress and the courts deny a wife her stake in what was expected to be the couple's pension, the message is clear; a housewife is not worthy of her hire. Given the high divorce rate, her only security may lie in quitting full-time housework and finding another occupation.●

## FOCUS ON PHOTOVOLTAICS: AN OPTIMISTIC VIEW FROM MAYCOCK AND STIREWALT

● Mr. HART. Mr. President, I want to commend to my colleagues an important new book entitled "Photovoltaics—Sunlight to Electricity in One Step." The book's writing is straightforward and its theme is simple, well-documented and, to this Senator, persuasive: Photovoltaics, which are solid-state solar cells made from silicon, offer the promise of clean, renewable, efficient, and affordable electricity. Implicit in that promise is an exciting, and what should be an engaging prospect; it is a prospect we can ill-afford to ignore.

The prospect to which I refer is no panacea for any problem domestic or foreign, though its implications are potentially far-reaching. Its compelling quality is to make our inexorably linked problems of economic stagflation, health- and environmentally-threatening pollution and national security threats somewhat more manageable. It is the prospect of minimizing the need for so-called tradeoffs—fundamentally, no-win tradeoffs—which some purveyors of the conventional wisdom would have us make all too quickly. In short, it is the prospect of promoting both a stronger economy and a safer environment—which, after all, are really twin essentials for a healthy, stable, and secure society.

Mr. President, photovoltaic cells can be produced using a variety of materials in ready supply, but most often are made from cheap, plentiful silicon, a major constituent of sand. As solid-state devices, they have no moving parts, are silent in operation, can function unattended for years, and produce only electricity. They are not, in and of themselves, very glamorous. Yet, as Maycock and Stirewalt, the authors of "Photovoltaics," point out, from the standpoint of the benefits they offer humanity, they are elegant.

Set forth in "Photovoltaics," are the many benefits associated with this form of solar energy. Chief among these are security of supply, evolving scale economies of production, increasing efficiency in operation, and growing price competitiveness with electricity supplied by oil, gas, coal, and nuclear powerplants. Also notable are the contributions an emerging photovoltaics industry can make to job creation and to international trade and development. Of course, a very significant benefit is that photovoltaic systems consume no fuel—other than sunlight—and, as a result, create no pollution.

To those familiar with the space program, photovoltaics are nothing new, having helped power our space satellites since the early 1960's. Fortunately, due to rapid advances in the state of the art, photovoltaics is a technology on the doorstep of widespread application. By the latter part of this decade, as Maycock and Stirewalt predict, photovoltaics will be an affordable way for many Americans to both heat and cool their homes, stores, and offices.

Mr. President, one especially interesting issue addressed in "Photovoltaics" is the potential for electric automobiles. We have known for some time that electric cars are technically feasible, and that the benefits—both in terms of reducing city smog and the amount of oil we consume—would be substantial. One factor inhibiting their introduction in large numbers has been the need to conserve electric energy. While we would do well to increase our energy efficiency—finding ways to do more with less—the technology of electric cars, with the advent of photovoltaics and the renewable electricity they will provide, can be allowed to develop free from the straitjacket of conservation.

Herein lies the beauty of "Photovoltaics." The book provides a rich ex-

amination of this one among many of the options we as a nation can elect so that related national policies—policies on economic development, on resource conservation, on energy production, on environmental protection—are reconciled, rather than at cross-purposes. Commonsense dictates that we give due consideration to any such alternative; "Photovoltaics" contains more than sufficient information to provide a basis for reasoned conclusions regarding the uses and limitations of this technology.

Mr. President, I urge my colleagues to read this book, and I congratulate Paul Maycock and Edward Stirewalt for their research.●

## BUDGET STATUS REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1981 pursuant to section 311 of the Congressional Budget Act. Since my last report the Congress has cleared for the President's signature H.R. 4416, permitting the Secretary of Agriculture to assist on an emergency basis in the eradication of plant pests. This action increases outlay estimates by $6 million.

[Report No. 81–7 to the President of the U.S. Senate from the Committee on the Budget]

STATUS OF THE FY 1981 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 115, REFLECTING COMPLETED ACTION AS OF SEPTEMBER 11, 1981

[In millions of dollars]

| | Budget authority | Outlays | Revenues |
|---|---|---|---|
| Revised Second Budget Resolution level | 717,500 | 661,350 | 603,300 |
| Current level | 715,461 | 661,217 | 610,335 |
| Amount remaining | 2,039 | 133 | 7,035 |

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $2,039 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 115 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $133 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 115 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $7,035 million for fiscal year 1981, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 115.●

## ECONOMIC POLICIES

● Mr. HARRY F. BYRD, JR. Mr. President, the September 14 edition of Washington Report, published by the U.S. Chamber of Commerce, includes an excellent editorial entitled "Defeatist Attitude," which addresses itself to criticism now being voiced of the Reagan administration's economic policies.

The editorial correctly points out that there has not yet been a test of the Reagan program.

Not a single tax reduction takes effect until October 1, and the full measure of tax cuts will not be effective for 33 months.

Only relatively small reductions were made in the budget for the current fiscal year, so we are essentially now in an environment created by the policies of the Carter administration.

On October 1, a number of significant budget cuts will be implemented, but their full impact is many months away.

There is widespread concern about the continued high level of interest rates, and certainly this is a matter of legitimate concern. But to pronounce the Reagan program a failure, and to blame the interest rates on that program, is to speak without any foundation in the facts.

I ask that the text of the editorial "Defeatist Attitude" be printed at this point in the RECORD.

The editorial follows:

[From the Washington Report, Sept. 14, 1981]

DEFEATIST ATTITUDE

President Reagan signed the Economic Recovery Tax Act of 1981 only a month ago yesterday. But too many people already appear to have forgotten why that historic measure was passed and what it is intended to achieve.

There are allegations that the Reagan economic program is failing and that continuing high interest rates and the prospect of a higher-than-anticipated deficit next fiscal year portend serious economic difficulties, not recovery.

We submit that much of the hostility that has flared up against the Reagan fiscal policies is unwarranted and even defeatist.

This view does not ignore current interest levels and the havoc they have caused in financial, housing and other markets. Of course, they are serious problems.

But they are certainly not grounds for claiming that the Reagan economic program, which won in those grim battles on Capitol Hill this summer, has failed.

That program is still to be tested.

Today's defeatists must remember that the first increment of the individual tax relief provided in the Reagan plan does not take effect until Oct. 1. The full relief will not be felt for 33 months.

Those parts of the plan designed to stimulate savings and investment will also be felt gradually. In this process, supply-side economists point out, the level of increased savings becomes a more significant figure than the federal deficit.

Those savings will move into financial markets, providing the capital for homes, new plants, new equipment and new jobs.

And the administration is moving ahead on further budget cuts designed to hold down the deficit and the federal government's claim on capital markets.

In the meantime, there are highly welcome signs that interest rates are at or near their peak and that the problem will soon be contained. The various savings incentives provided in the Reagan tax plan will begin increasing the supply of funds available for lending, thereby sending interest rates down in a classic supply-and-demand cycle.

The problems that have erupted on Wall Street and elsewhere this summer are a further demonstration of how badly the new economic policies are needed.●

## JUST LIKE RICHMOND

● Mr. HARRY F. BYRD, JR. Mr. President, a recent editorial in the Richmond Times-Dispatch noted that the city of New York, where primary elections for municipal officers were to be held September 10, has sadly run afoul of the Voting Rights Act of 1964.

Following a protest filed under that act, a special three-judge Federal court held that no elections may be held until the U.S. Department of Justice has approved a city redistricting plan.

The Times-Dispatch noted the understandable outrage expressed by New York officials, who contend that the court-imposed cancellations represent a "mass disenfranchisement" of city voters.

And even the New York Times, which has not been too sympathetic to complaints about the effects of the Voting Rights Act on certain other jurisdictions, such as Richmond, joined the chorus of complaints.

The fact is, Mr. President, that Federal interference in local elections is as unwarranted and unfair in New York as it is in Richmond. I ask that the Times-Dispatch editorial, entitled "Just Like Richmond," be printed in the RECORD.

The editorial follows:

[From the Richmond (Va.) Times-Dispatch, Sept. 11, 1981]

JUST LIKE RICHMOND

There is this community that was supposed to have held primary elections for a number of municipal offices, including city council, on Thursday. But lawyers representing blacks and Hispanics went into federal court to prevent the elections on grounds that the city's councilmanic redistricting plan discriminates against minorities and is therefore invalid. They filed the protest under the federal Voting Rights Act of 1965, which effectively gives the federal government a veto over certain political jurisdictions' actions that might adversely affect the voting power or rights of minorities. This particular city's councilmanic redistricting plan had not been approved by federal authorities.

Well, a special three-judge federal court ruled that the primary elections could not be held; and the United States Supreme Court supported that ruling. Many of the city's officials were incensed. The city's leading morning newspaper sputtered its indignation in an editorial that accused the federal courts of interfering in the city's electoral process to an extreme and unjustified degree.

Can you name the city? Richmond? Jackson, Mississippi? Selma, Alabama? No, the city is New York, a bastion of racial enlightment from which has flowed in recent years much criticism of the wicked South's racial attitudes. The outraged newspaper is The New York Times, a pious oracle when it comes to advising the South on the Proper Treatment of Minorities.

You see, certain sections of New York City, notably the boroughs of Manhattan, Brooklyn and the Bronx, were brought under the Voting Rights Act by the formula that the act's architects originally concocted to snare mainly the South. This means that the city's new councilmanic redistricting plan, a plan that was required by population changes revealed by the 1980 census, is subject to review and approval by the United States Department of Justice. But the city proceeded with preparations for the primary elections before the Justice Department had completed its examination of the redistricting

plan. Uh-uh, said the three-judge court. Until the Justice Department has acted, there can be no primaries. The judges canceled not only the councilmanic contests but the elections for mayor, city comptroller and all other offices as well.

The city's official position is that the court's ruling constitutes an appalling "mass disenfranchisement" of city voters. The Times complained that the court went too far in canceling primaries for those offices—such as mayor—that were not involved in the minorities' complaint. And, moreover, it expressed deep resentment about New York City's being treated as if it were "Birmingham 20 years ago."

Let us try to enlighten the Times. New York is not being treated as if it were Birmingham 20 years ago; it is being treated as if it were Richmond today. The Voting Right Act was used, unjustifiably we think, to disenfranchise Richmond voters 10 years ago. Richmonders can now vote in municipal elections, but only on terms the federal government dictates. Citizens of this city have in effect lost the right of local self-government that most other cities in the United States enjoy.

New York City, and The New York Times, now know that the Voting Rights Act can be absurdly applied. Will that knowledge inspire them to support those of us who believe the law should either be repealed or be made fairer and more sensible? We won't hold our breath until they do.●

## OUR UNCONTROLLED IMMIGRATION POLICY

● Mr. CHILES. Mr. President, earlier this week 176 Haitians landed on the shores of Florida bringing to 19,307 the number who have arrived since last October. The processing center where Haitians and other aliens are sent to await their deportation hearings is an old missile site on the edge of the Everglades called Krome North. The design capacity of the site is 524, and I learned this morning that there are presently 1,068 at the facility.

The overcrowding at Krome has created serious health problems. Malfunctioning water and sewer systems have resulted in extremely unsanitary conditions and are a public health hazard to the Haitian population, the staff, as well as to the general south Florida community. After repeated pleadings to the President and the Attorney General, Governor Bob Graham filed a lawsuit on July 17 against the Federal Government that the water, sewer, and related infrastructures at Krome meet Dade County and State of Florida health standards. The lawsuit is still in court, and recommendations made to improve the water and sewer systems have not been implemented.

As the overcrowding continues, strain is also placed on INS personnel and resources. There are 15 detention officers at Krome who have been detailed from their normal duties at the Miami INS office, and an additional 10 to 12 detailed from other INS offices across the country. Twenty security guards have been hired to assist the overworked INS personnel.

While Florida continues to bear the brunt of illegal immigration from the Caribbean, our uncontrolled immigration policy affects every State in the Union. It has been 6 weeks since the administration presented its proposals for coping with our country's immigration crisis, yet Congress has yet to receive the legislative package or request for money to back up those proposals. The frustration among INS personnel is evidenced in every INS office across the country.

The Christian Science Monitor of September 16 contains a commentary from three concerned INS officials in Boston. The article expresses very well the need for immediate action to regain control of our country's borders, and what steps can and should be taken to do that. I ask that the article be placed in the RECORD.

The article follows:

THE IMMIGRATION CRISIS: AN INSIDE VIEW

(By Joel Dorfman, Gerard Casale, and Charles Pappas)

"We have lost control of our borders. We have pursued unrealistic policies. We have failed to enforce our law effectively."—Attorney General William French Smith.

Unfortunately, the administration's prescription for this problem is a palliative, apparently designed to placate the 91 percent of Americans wanting an all-out effort to stop illegal immigration and the 80 percent favoring lower legal quotas, without fundamentally altering the status quo.

Over 800,000 legal immigrants and "refugees" were permitted to enter the United States in 1980, a rate which may exceed the record decade 1901–10. In 1979, 1,076,418 deportable aliens were located, yet the attorney general estimates that the ranks of the three million to six million still at large are increasing. Meanwhile, aliens submit over two million applications per year. Political asylum claims alone have zoomed from 3,800 in 1978 to over 60,000 in 1981.

Facing this onslaught is the tiny US Immigration and Naturalization Service (INS). The 1980 government outlay of over $2 billion for refugee expenses was seven times greater than the entire INS budget. The service is everywhere short of personnel and logistical support. Most of its offices lack even detention facilities to hold illegals.

Once past the airports or land borders, illegal aliens are virtually immune from detection, since INS has only 700 investigators nationwide. Its present cumbersome appeal procedures guarantee that few illegals who are apprehended will be ultimately removed. Little wonder that last year only 150 were deported from a district covering Massachusetts, New Hampshire, and Rhode Island.

As working immigration officers, we are discouraged because we are denied the resources to enforce the law and are being officially induced to finesse it (admitting "refugees" and "asylees" who do not meet legal definitions, overlooking visa fraud and perjury, granting residence on the basis of dubious marriages and "paper families," etc.) in a cynical pursuit of "approval statistics" to appease special interests.

As concerned citizens, we cannot fathom how, in an era of scarcity, unemployment, persistent domestic poverty, and an incipient cultural and linguistic crisis between Spanish and English speakers, such huge legal and illegal immigration can be tolerated. We believe the administration's proposals must be purged of some major flaws.

1. Presently the Reagan plan includes no overall cap on the total number of legal immigrants and refugees. Immigrant visas are not free goods; they have budgetary and societal costs to be weighed against the benefits. We suggest that the annual "immigration budget" of 350,000 proposed in Sen. Walter Huddleston's bill (S–776) would retain America's position as the world's most generous receiver of immigrants, while returning legal immigration to manageable levels.

2. A complicated conditional amnesty would be unworkable for INS, an invitation for fraud and further illegal influxes, and a demographic bombshell. If three million aliens are "legalized" and each asserts his right to confer residence on only three to five foreign relatives, this "multiplier effect" will push nine million to 15 million extra people into the US immigration system.

We already grant de facto amnesty to tens of thousands within the existing immigration act. Under Section 245, for example, contracting marriage to a lawful resident expunges nearly all immigration violations.

3. "Guestworkers" have been a proven failure in Europe and during the US "bracero program" of 1942–64. The workers, who cannot be effectively monitored, tend to stay and bring their families, seek "middle class" jobs, and attract more migrants. The importation of such a foreign "underclass" distorts the economy by inhibiting modernization, a true valuation of goods and services, and fair wages to domestic workers. What major industrial nation is planning to ride into the 21st century on the backs of unskilled laborers? Is the hidden agenda merely to "legalize" illegals for the benefit of certain employers—the traditional exploiters?

4. Employer sanctions won't be effective unless (a) a means of identifying legal workers is created; (b) investigators and prosecutors are specifically assigned; and (c) violators are actually prosecuted.

5. If the President is serious about reforming our immigration system, he must overcome years of neglect by staffing, funding and modernizing the INS. It is essential that the commissioner's post, vacant for two years, be filled by an outstanding nominee, dedicated to enforcement and protected from political interference.

It is time to act, for a nation which cannot control the number or character of aliens within its borders and has sacrificed a good measure of its sovereignty and command of its future.

## AMERICAN TUNA PROTECTION ACT

● Mr. MITCHELL. Mr. President, today I am pleased to cosponsor legislation (S. 1564), introduced recently by Senator WEICKER, which would bring "highly migratory species" under the jurisdiction of the Magnuson Fisheries Conservation and Management Act (MFCMA). The MFCMA, known in Maine as the "Two Hundred Mile Limit Act," was passed in 1976 and went into effect in early 1977. It established a fisheries management and conservation structure which enables our Federal Government to regulate the harvesting of marine resources in an exclusively American maritime economic zone which extends 200 miles from our coasts.

When the MFCMA was enacted, highly migratory species of fish, such as Atlantic bluefin tuna, were exempt from its coverage. The reason for this exemption was that fishermen—primarily on the west coast—feared that coverage of highly migratory species would invite similar action by nations off whose shores American vessels have traditionally fished.

The Congress recognized this concern in drafting the MFCMA and its members believed at the time that other nations contemplating the establishment of "200

mile limits" would write similar exemptions into their enabling legislation.

This occurred in a few instances but not in all. Now, Canada, Mexico, and a sizable number of Central and South American states have asserted their jurisdiction over fisheries resources for 200 miles, and do not exempt highly migratory species.

This situation has endangered the Atlantic bluefin tuna which migrate from spawning grounds in the Gulf of Mexico to North Atlantic waters off New England and the maritime provinces of Canada.

The threat to bluefin are longline fishermen from Japan who, between 1975 and 1978, each year took over 800 fish. Japanese vessels operate off our coasts because they are strictly regulated when they operate off the coasts of Mexico and Canada.

Despite promises to reduce the size of their bluefin catch, the Japanese longliners continue to deplete the stock. Recreational and commercial tuna fishermen in northern New England are particularly concerned about this situation because they have witnessed a substantial drop in the number of bluefin reaching New England waters each summer.

The Weicker bill, by eliminating the exemption for highly migratory species, would remedy the bluefin tuna problem. Once enacted, regional fishery management councils established under the MFCMA could devise a fishery management plan under which the species could be preserved and its maximum potential realized by American recreational and commercial fishermen.●

## GOV. MICHAEL V. DiSALLE

● Mr. KENNEDY. Mr. President, I was deeply saddened to learn of the death of former Gov. Michael DiSalle of Ohio. He died Tuesday while visiting Italy, from where his immigrant parents came at the turn of the century.

Ohio has lost one of its most distinguished citizens and public servants. From being the energetic mayor of Toledo, to National Director of the Office of Price Stabilization in the Korean war, he was elected Governor of Ohio in 1958.

Mike DiSalle always mixed his hard work and 16-hour days with humor and a wonderfully contagious laugh. His political opinions were proudly and firmly held, even as his manner was easy and unpretentious.

My family came to know him during my brother's campaign for the Presidency, when he threw his strong support and that of the Ohio delegation behind President Kennedy at the 1960 convention. Through the years we have stayed in close touch, and I deeply valued his counsel and support.

Mr. President, a great man and a fine Governor has passed from us, and I extend my deep sympathy to his family.●

## DEPUTY ASSISTANT ATTORNEY GENERAL ROBERT J. D'AGOSTINO

● Mr. LEVIN. Mr. President, I wanted to take a brief moment to call to the attention of my colleagues one of those anomalies that occasionally arise, anomalies that in their own curious way may explain what sometimes seems inexplicable.

A week ago today there appeared in the Washington Post an article that quoted from a memorandum by Robert J. D'Agostino, the Deputy Assistant Attorney General in the Civil Rights Division. Mr. D'Agostino, according to the Post article, disputed a Government claim that blacks had been "improperly classified as emotionally disturbed," saying that blacks as a group are more disruptive on the average and would benefit from programs for the emotionally disturbed.

Today, Mr. President, there appeared another article in the Washington Post. Again I quote from the Post:

A top Justice Department civil rights official hit a law school secretary in the head three years ago after an argument, then paid the woman's medical expenses in return for her agreement not to press criminal charges, according to the woman and school officials.

The official, Deputy Assistant Attorney General Robert J. D'Agostino, was at the time a law professor at Delaware Law School of Widener University in Wilmington. The school's dean at the time, Arthur A. Weeks, investigated the incident and determined that D'Agostino had no cause for hitting the woman, according to a letter Weeks wrote to the woman.

I think, Mr. President, the articles require no additional comment from me. I ask that they be printed in the RECORD.

The articles follow:

[From the Washington Post, Sept. 10, 1981]

JUSTICE OFFICIAL'S MEMO ON YONKERS BIAS SUIT STIRS CONTROVERSY

(By Charles R. Babcock)

A top Justice Department civil rights official has recommended that his department drop a landmark school-housing discrimination suit against Yonkers, N.Y.

The Yonkers suit was filed last December. It was the first to combine challenges to a city's school and housing practices.

In a July 21 memo that some department lawyers consider insensitive, if not racist, Robert J. D'Agostino, deputy assistant attorney general in the Civil Rights Division, criticized previous department statements about the case.

At one point in the memo to William Bradford, head of the Civil Rights Division, D'Agostino disputed a government claim that blacks had been "improperly classified as emotionally disturbed."

"Why improperly?" he asked. He went on to say that "blacks, because of their family, cultural and economic background, are more disruptive in the classroom on the average. It seems they would benefit" from programs for the emotionally disturbed.

At another point he questioned the Justice contention that a "disproportionate number" of minority students were steered to vocational programs and then general high school programs. "Disproportionate to their school achievement?" D'Agostino wrote. "Disproportionate to their needs?"

He attacked the case generally as "the end result of a mind-set in the educational area and one of the opening shots in a new attempt to remake America through coerced residential integration."

D'Agostino also said the suit found segregative intent in virtualy any act that didn't lead "to the ultimate good as defined by the Justice Department, racial mixing."

The memo has been circulating in the Civil Rights Division in recent days, and is viewed by several attorneys as the latest sign of the Reagan administration's shift in civil rights enforcement.

One attorney who has read it said, "The general tone of the memo is an insult to black people worldwide." Another called it "outrageous and appalling." A third said D'Agostino's comments "are not appropriate characterizations for someone who does civil rights work."

D'Agostino, 38, a former dean at the Delaware law school and a Reagan campaign aide, defended his memo. "I write a lot of provocative memos," he said in a telephone interview yesterday. "It's one of my jobs around here to get people to take fresh looks at things. . . . One of the reasons Ronald Reagan was elected was that people wanted a fresh look at things."

D'Agostino denied that the memo was racist, although he said he understood how some people might consider it insensitive. He said his academic specialty was bankruptcy law. He has found Civil Rights Division lawyers competent but "committed to a certain point of view," he said. "I think they're wrong on some of those views. I want them to stop and question what they're doing."

The Yonkers case is one of three filed in the final months of the Carter administration that Reynolds is reviewing to determine whether they should be continued. No decision has been reached on the Yonkers case.

Yonkers, north of New York City in Westchester County, has a population of about 200,000. Its school system has approximately 23,000 students, 32 percent of whom are black or Hispanic.

The Justice suit said the local school board, city officials and the local community development agency discriminated against minorities by a pattern of school construction and closings, alteration of attendance lines, assignment of teachers and selection of sites for subsidized housing in heavily minority areas.

D'Agostino criticized the department's housing allegations by noting that Yonkers had built subsidized housing on sites approved by the Department of Housing and Urban Development. "What is the nature of Yonkers' violation? They were stupid enough or altruistic enough to voluntarily participate . . .," he said.

D'Agostino concluded his memo by saying, "I see absolutely no reason to pursue this case in its present form. If it is the Reagan administration's position to attempt to create law that will mandate the building of low-income housing projects when communities do not want such projects, then we should proceed; otherwise we should not."

[From the Washington Post, Sept. 17, 1981]

JUSTICE DEPT. OFFICIAL HIT SECRETARY IN '78

(By Benjamin Weiser)

A top Justice Department civil rights official hit a law school secretary in the head three years ago after an argument, then paid the woman's medical expenses in return for her agreement not to press criminal charges, according to the woman and school officials.

The official, Deputy Assistant Attorney General Robert J. D'Agostino, was at the time a law professor at Delaware Law School of Widener University in Wilmington. The school's dean at the time, Arthur A. Weeks, investigated the incident and determined that D'Agostino had no cause for hitting the woman, according to a letter Weeks wrote to the woman.

"I have told Professor D'Agostino that he did not have sufficient provocation to justify even the loud shouting at you much less striking you," Weeks wrote to Shirley M. Endicott. "In my reprimand I am emphasizing to him that it is expected that the faculty will set the tone for high professional conduct in this institution."

The 38-year-old D'Agostino, whose duties include reviewing civil rights laws involving sex discrimination, said in an interview yes-

terday that he hit Endicott in self-defense after she attacked him "fingernails first."

"I defensively swung my arms," D'Agostino said, striking Endicott "below the ear" with four fingers of his open hand. "I just don't duck. One should duck obviously when you have a woman going after you. You should duck [but] your reflexes are not to duck.

"I'm telling you I don't know for sure if she meant to rip my eyes out, [her] fingernails were in front of my face. When that happens suddenly, what do you do? If my reach were two inches less, I wouldn't come near her neck."

Endicott, now a secretary at Drexel University, said D'Agostino had asked her to type for him while she was typing for another professor. "I explained to him that I was in the midst of this job. . . . He continued to shout at me, and I said, "With that attitude,' or words to that effect, 'I do refuse to do it.' I ripped it up and threw it into the corner. . . . He swung at me from across my desk . . . hit me, and knocked me against the file cabinet."

Weeks' letter to Endicott, who was 48 years old at the time, was verified for The Post by the present Delaware Law School dean, J. Kirkland Grant, who declined further comment.

D'Agostino later wrote Endicott expressing regret that the incident occurred, and paid her about $150 to cover her medical and legal expenses. He said yesterday that he did not consider that letter to be an apology, and denied that he had ever been reprimanded. Weeks, in an interview yesterday, said he could not recall whether he reprimanded D'Agostino and said he considered the incident "overblown."

A Justice Department official said yesterday that the department was unaware of the incident. Loren Smith, a member of President Reagan's transition team and also a Delaware law professor, said that he knew of the incident when he recommended D'Agostino for the job and considered it insignificant.●

## MYRNA LOY

● Mr. METZENBAUM. Mr. President, it is not common to find an actress or actor who is a true classic—someone who excels in each and every role and who is able to conquer the fickleness of the movie fans.

Myrna Loy, however, is one of those classics. Ms. Loy, who perhaps is best known for her portrayal of the aristocratic wife of detective Nick Charles in "The Thin Man" series, says her method of acting is simple: "To be as real as possible." Anyone who has seen Ms. Loy in one of her many roles knows she carries that methodology to the limit. The sensitivity she injects into her characters is tremendous. Most recently, Ms. Loy appears with Henry Fonda in the made-for-TV movie, "Summer Solstice."

But beyond Ms. Loy's talent as an actress, Mr. President, I believe she is a remarkable woman. She is thoughtful and intelligent; she is a woman who has the courage to stand up for her convictions, and she is a woman whose energy is awe-inspiring—she fights for her political causes, she continues her acting career.

Mr. President, I ask your permission to submit in the RECORD the following story that appeared in the magazine "W" and which I believe captures the essence of Ms. Loy's unflappable spirit.

The article follows:

MYRNA LOY: BEYOND "THE THIN MAN"

(By Ron Cohen)

NEW YORK.—"I've led a fascinating life, in case you didn't know it," said Myrna Loy with an infectiously teasing laugh, explaining why she decided to embark on her memoirs, "I've done something besides 'The Thin Man.' "

It has been almost 35 years since the last of the six "Thin Man" films was made, with William Powell and Myrna Loy playing urbane detective Nick Charles and his debutante wife, Nora. But the image is indelible, and Loy—with only some of those years evident under the straw cloche and short red hair—seems ready to exchange again all that spirited repartee with the underworld denizens and upper-crust socialites who inhabited Nick and Nora's world.

Marking her 76th birthday this month, Loy remains incredibly active, working on her memoirs, which she expects will be out in a year; continuing her career as an actress, after more than 100 films and numerous stage and television roles, and maintaining her long involvement with politics.

"Montana, where I was born, has a small population, and you were supposed to be interested in your government," Loy noted, over a midsummer lunch of cold salmon and hot tea at La Cote Basque, as she talked about past and present with equal vigor.

Holding to her reputation as a liberal Democrat, Loy has little admiration for the administration of former actor Ronald Reagan. "He has lived up to my expectations, which were not very great. He did tell us everything he was going to do before he got elected.

"Can you imagine how all of us, who worked all those years with Mrs. Roosevelt for her social programs, feel now to see those programs wiped off the map?"

She is reserving judgment, though, on Reagan's nominee to the Supreme Court, Sandra Day O'Connor. "I haven't heard what she's really for," said Loy, who once played a judge in the 1947 comedy "The Bachelor and the Bobby-Soxer." "I think it's marvelous that he's finally nominated a woman. And I certainly would like her to be intelligent enough to be for abortion and for ERA."

Whatever O'Connor's feelings are on the Equal Rights Amendment, however, Loy has doubts that it will ever make it to the Constitution. "When you see people like Phyllis Schlafly emerge, you begin to realize the kind of forces that are against you."

As for the controversy surrounding O'Connor's stand on abortion. Loy doubts whether the conservative forces would have made it an issue at all if O'Connor weren't a woman. "They just must be shocked that Reagan actually nominated a woman. So, they have to start making noise about something. They just don't trust women."

Loy also is more than uneasy about the Moral Majority—"I think it's terrifying"—and she has joined the counter group, "People for the American Way," established by television producer Norman Lear.

"It's not political," Loy explained. "He's basing it on protecting our liberty, the American way of life."

Outside the political arena, Loy joined those who met with hotel developer John Portman to oppose his threatened destruction of two venerable New York theaters, the Morosco and the Helen Hayes. Broadway needs these smaller theaters, Loy pointed out. "The new theaters are too big. You can't play a play in them. And everything is miked. You don't hear a human voice anymore."

She recalled an incident when she was in a 1973 revival on Broadway of "The Women." "I asked what the noise was I kept hearing. I was told: 'That's your voice coming back to you from the mike.' Oh, great."

Loy's latest performance is in a television movie, "Summer Solstice," in which she co-stars with Henry Fonda. It was made by the ABC affiliate television station in Boston and has been bought by ABC for the forth coming season.

This marks the first time she has worked with Fonda. "Politically, we're great friends. He's one of the stalwarts. Whenever I would ask him to do anything, he would do it.

"But never having worked with him, I was scared. I think he was, too. But it was as easy as falling off a log. I think we both have the same approach to acting . . . to be as real as possible, which he certainly is."

Loy and Fonda portray a married couple, celebrating 50 years together with an annual picnic on Cape Cod. Loy wears a snow white wig. It's a role in the tradition of her long-time screen image as the "perfect wife," fostered not only by her many films with William Powell, but also by those with other leading men, such as Cary Grant, Fredric March and Clifton Webb.

"I don't know how it started," she said of the "perfect wife" label, "but I saved more marriages than you can imagine. I was a fantasy, but I was never really around, never a real threat."

Off-screen, Loy has had four marriages—to film producer Arthur Hornblow Jr.; John Hertz Jr. of the auto rental family; producer Gene Markey, and Howland Sargeant, who was a State Department official. She dismisses any thought of marrying again. "I don't want to put up with anyone else. I wasn't very good at it when I was younger, but now . . . No, I'll go to bed alone with my hair in curlers and plugs in my ears."

Loy is working on her memoirs with writer James Kotsilibas-Davis, who, about four years ago, turned out a biography of Maurice Barrymore, father of John, Ethel and Lionel. "It was one of the most marvelous biographies I ever read, because it was so filled with details. That's the way I want my book to be. I don't want one of those bed-to-bed things, thank you very much."

She noted that while she hasn't been reading much of the recent crop of Hollywood biographies, she has heard about them. "And so much of it is lies, but there doesn't seem to be much anyone can do about it.

"The Crawford book is just awful," she added, referring to "Mommie Dearest," the book about Joan Crawford. "I read bits and pieces of it, enough to know it's really scandalous."

Davis is working with 50 hours of tape of Loy alone, and they recently returned from a six-week trip to the West Coast, where others were interviewed for the Loy book.

"Hollywood's kind of sad to me now," Loy mused, "but of course I saw Bill—Bill Powell." Powell, now 89 years old, lives in Palm Springs with his wife, former actress Diana Lewis, Loy noted.

"I see him about once a year, whenever I'm out there. He's still a wonderfully funny man. I asked him: 'How you doin', honey?' He said: 'I'm doing pretty well for a 100-year-old man.' It was wonderful, and I knew he still had his sense of humor."

While on the West Coast, Loy was given a luncheon at the commissary of MGM, where she was one of the reigning stars in the Thirties and early Forties. "I was very reassured to see MGM. I hadn't wanted to go back before, for fear it would be a mess. But it looked pretty good."

Recalling her parting with MGM in the mid-Forties, she related: "They released me. I asked them for it, because I had a feeling they were going to start giving me inferior things. They were making a fuss over that English redhead—Greer Garson. L. B. Mayer said I shouldn't leave, but I did and made 'Best Years of Our Lives,' and that really made them all mad."

That celebrated drama of World War II veterans coming home—produced by Samuel Goldwyn—continues to move Loy deeply. She told of having seen it not long ago at a revival movie house. "I was supposed to

speak after it. But I cried so much I was just a mess. All I could do was wave a wet handkerchief."

Loy continues to live in the New York penthouse—"it's two rooms"—that she has rented for about 20 years and says she has no inclination to live again in Hollywood. She enjoys a circle of young friends here and also is close to her stepson and his family. He is a neurologist in Hartford, Conn., and the son of Arthur Hornblow Jr., who was Loy's first husband.

As for clothes, Loy said she is happy to be able to find again what she calls "lady clothes." Her luncheon dress is a black-on-spice two-piece silk print, which carries the Jack Mulqueen label. As for shopping, "I go to Lord & Taylor, where I can get lady clothes."

She also shops at Bloomingdale's "for a lot of things I need, such as cosmetics." And, with the lunch over, she got into a cab alone, still undecided as to whether she would head home or to Bloomingdale's.

And it's conceivable, too, somewhere uptown, Nick Charles awaits with a new set of clues and a shakerful of late-afternoon cocktails.●

## DEATH OF HAL DAVIES

Mr. BURDICK. Mr. President, I take a few moments to bring to the attention of the Senate the passing of a great American, Hal Davies, of Minot, N. Dak.

Calling someone a "great American" may be using an overworked phrase, but Hal Davies truly deserved the title. For decades he was chairman of the board and wrote for the Minot Daily News. His pen provided factual, interesting, and provocative news to the people of North Dakota. He was of the tough, old-fashioned school of journalism, one who sought the truth and stated what he found with bold determination. He was a community leader who was proud to serve and continued his service to the end of his days. A devoted admirer of Theodore Roosevelt, he worked tirelessly to develop the Theodore Roosevelt National Memorial Park in western North Dakota.

I am sure the entire Senate will join me in expressing sympathy to the Davies family. Those who loved him must take comfort in knowing that although he was old in years, he was always young in his outlook, attitudes, and actions. Hal Davies was a great American, and I salute him.

## TENNESSEE LOSES A GREAT LEADER

Mr. SASSER. Mr. President, 2 days ago the people of Tennessee lost a very good friend and citizen—Matt Lynch.

Matt Lynch was born in Tennessee in 1912. His grandfather came from New England where he was an early organizer for the shoe workers. So Matt, from his early years, had a special understanding and compassion for working men and women. He became a member of the Amalgamated Clothing and Textile Workers in 1932—when he was 19 years old. Although he received an education as a lawyer, he spent his years right out of law school—and up until his death—fighting for the rights of Tennessee workers.

He became a symbol of organized labor in Tennessee. His life was dedicated to the working people and because of his dedication, great progress has been achieved. So firmly did he hold his convictions that he withstood beatings, assaults, gunshots, and jailings. But he refused to back away from his beliefs.

Matt was an active leader in the progress made by working men and women. He defended the rights of all workers—regardless of race or social standing. He left a legacy which will, I believe, provide a strong foundation for continued growth and progress in the labor movement. In short, Matt Lynch will be sorely missed.

Mr. President I ask unanimous consent that two editorials and an article on Matt Lynch's passing be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Tennessean, Sept. 16, 1981]

MR. LYNCH: CITIZEN, LABOR LEADER

Mr. Matt Lynch, for many years the driving force of organized labor in Tennessee, is dead at the age of 68.

A veteran of many a labor battle in the formative years of unionism in the state, Mr. Lynch was president of the Tennessee State Labor Council from 1946 to 1979 when he becamo president-emeritus to permit the election of Mr. James Neely as president.

During his 33 years at the helm of the council, Mr. Lynch was highly popular with the rank and file union members and with most of the state's political leaders of that period. His advice was widely sought by office holders and office seekers and his influence was deeply felt on most legislative matters which in any way involved the well being of working people.

However, he had not always been so welcome. As a young union organizer in the textile towns of East Tennessee during the 1930s he was often subjected to ill treatment. He had been physically attacked, shot at, kidnaped, jailed numerous times and threatened with death. But he survived and went on to become known as the guardian of unionism in Tennessee.

Mr. Lynch was a loyal, devoted citizen, as well as labor leader. He was interested in all aspects of civic and political life and not just those that affected his immediate area of expertise.

He trained as a lawyer but switched careers to fight the battles of the working men and women of the state. The state can be thankful that he did. His gentle, dignified manner added class and respect to the union movement as he did more perhaps than any other labor leader has done to break down the barriers between employers and employees.

His service in the cause of unionism and justice for the laboring person will long be remembered in Tennessee.

[From the Nashville Banner, Sept. 16, 1981]

MATT LYNCH, TRUE SYMBOL OF LABOR

Matthew Lynch, who died yesterday at the age of 68, was truly symbolic of organized labor in Tennessee throughout the almost half a century in which he served as its prime mover.

It could be said that Matt Lynch and organized labor in Tennessee literally grew up together. During the early years there were rough battles and Mr. Lynch was in the thick of them. As the labor movement matured and became more circumspect, so did Matt Lynch.

Through it all, Mr. Lynch was a man of courage and of honor, respected no less by his foes than by his most loyal followers.

When Mr. Lynch retired as president of the Tennessee Labor Council in 1979—after 33 years in that position—it wasn't because the old firehorse was ready to quit. A battle was brewing with other, younger leaders and the venerable "Mr. Labor" himself, in a tear-filled address, told delegates to the council's convention that he was doing so in the interest of labor unity.

Ironically, the election from which he withdrew took place just two years ago tomorrow—Sept. 17, 1979.

Matt Lynch got his first union card at the age of 19, joining the textile workers union while working in a Chattanooga hosiery mill. It was the Depression year of 1932.

During the intervening years, he saw the character of labor change from the traditional hardline division that separated the backshop from the front office. And he saw the labor movement nationally peak at 19 million members in the early 1950s and fall to some 16 million members in later years.

But his deep faith in the cause of organized labor never wavered and he saw the future of labor and the sometimes uphill nature of its cause as nothing more than a challenge that men and women of his ability and determination could successfully meet.

During his years of leadership he championed such causes as repeal of the poll tax and simplification of voter registration, and he fought consistently for higher minimum wages and elimination of the state's right-to-work law.

There are many in Tennessee who differed with Matt Lynch's philosophy but no one ever accused him of being anything but a fair fighter, a worthy opponent and a gentleman. The entire state of Tennessee will miss Matt Lynch.

[From the Tennessean, Sept. 16, 1981]

SERVICES TOMORROW FOR MATT LYNCH

(By Frank Ritter)

Fly casting from a boat on Center Hill Lake, Matt Lynch used to entertain his fishing buddies for hours with stories about the early days of the labor movement in Tennessee.

With a prodigious memory for names and places and dates, he would weave a story by building suspense and then use his wry Irish wit to break the tension. He often would conclude with a philosophical comment from, say, Karl Marx about the endless struggle between the workers and the boss.

When the conversation lagged, Lynch would bring out his battery-powered radio and tune it to a station playing classical music.

His buddies might be drinking beer or complaining that the fish weren't biting. But Lynch, his long, lanky legs hanging over the side of the boat, would be silently planning strategy for his newest political protege, or the next step in his latest labor campaign.

Matt Lynch, 68, a symbol of organized labor in Tennessee by virtue of more than half a century as union organizer, lobbyist and potent political force in the Democratic Party, died yesterday morning in St. Thomas Hospital.

Services will be at noon tomorrow at St. Joseph's Church on Gallatin Road in Madison. The Rev. Michael Sweeney will officiate. Burial will be in National Cemetery. The body is at Phillipe-Robinson Funeral Home where a rosary will be recited at 7:30 tonight.

"Matt's productive life has left a legacy that benefits all," said Mayor Richard Fulton, one of those who got their political start through Lynch's efforts. "His understanding, concern and compassion for people—young and old, white and black, poor and prosperous—made him a great person.

"He was my friend, my teacher and my adviser. No one can ever take his place."

Fulton, who served in Congress before becoming mayor of Nashville, was among those fishing buddies who often accom-

panied Lynch to places like Center Hill Lake. And the mayor said they used to spend a lot of time remembering their rough-and-tumble early days together—the days when Lynch headed the most powerful labor organization in Tennessee and Fulton was an aspiring politician with considerable ambition and little else.

"In those days, Matt wrote most of my speeches for me," Fulton recalled. "He would stay up all night working and I slept on the floor."

Others from both sides of the labor-management fence, recall Lynch in equally fond terms.

"Organized labor has lost a friend," said Jim Neely, the man who succeeded Lynch in 1979 as president of the Tennessee State Labor Council. "It is a sad day for the working man in Tennessee."

Neely, recalling the 1930s when Lynch was beaten repeatedly, shot at, jailed and even kidnapped by anti-union thugs, said things have improved for organized labor since then "primarily because of those giants of labor like Matt Lynch."

"The working man has things a little easier today because of the sacrifices that Matt Lynch made," Neely said. "Not many people would have done—not many could have done—the things he did. We will miss him a lot."

Sen. Jim Sasser, who said he first met Lynch in 1961 at a meeting in Memphis on a civil rights issue, said it was typical of Lynch to work for the improvement of all mankind.

"His life was dedicated to the working people and because of his dedication great progress has been achieved. His legacy provides a strong foundation for continued progress in the labor movement.

"He was not only a symbol of organized labor in Tennessee, but an active leader in the progress made by working men and women in Tennessee," Sasser said.

Gov. Lamar Alexander said Lynch "understood Tennessee's working men and women and worked hard to improve their lives. He was both tough and kind, and we will miss him."

Lynch, president emeritus of the state Labor Council, had been in ill health for several years, suffering from emphysema. He became critically ill Sunday night with respiratory failure and had been kept alive largely by machines until his heart gave out early yesterday morning.

A tall man with a rugged Irish face and a ready chuckle, Lynch devoted his life to the labor movement. He was involved in a lot of activities—politics being foremost among them—but his efforts always were aimed at one objective; improving the lot of the working man.

"He fought all his life for labor," his wife, Maude Lynch, recalled yesterday. "He did so, many times, at the expense of neglecting his own affairs."

A native of Chattanooga, Lynch was born Sept. 30, 1912, the son of Francis Michael and Pearl Childress Lynch. His grandfather was an early organizer of the shoe workers in New England and Lynch grew up with strong liberal beliefs.

He graduated from Notre Dame High School in Chattanooga and earned a degree from the Chattanooga College of Law. Asked why he decided to become a union organizer instead of a high-priced attorney, he once said:

"Economically, you can't figure it. The wages didn't amount to much for an organizer. And in those days, there was a pretty good chance you'd get the hell knocked out of you."

Lynch, in the early days, frequently got the hell knocked out of him.

Once, on a deserted mountain road in Roane County in 1936, three thugs kidnapped him one night and beat on him for hours in an effort—unsuccessful as it turned out—to convince him to change his pro-union ways.

Then, in Loudon County, Lynch once made the mistake of stepping out of a lighted doorway while on an organizing mission. Someone shot at him from the darkness, the bullet passing between his legs before richocheting into the night.

One day he was riding down a mountain road when rifle bullets slammed into his automobile. He ducked his head, floorboarded the accelerator and put distance between himself and the rifleman.

"There have been some long, hard times," he said recently, in an understatement. "There were beatings, insults, people spitting in your face. I was in jail over 60 times. But it's been worth it."

Lynch started his career in the Chattanooga textile factories in the early 1930s while still in high school, and joined the Amalgamated Clothing and Textile Workers union. Later, he joined the hosiery workers union there.

He spent the next decade organizing plants in the hostile atmosphere of the times and rose in the ranks to head the Tennessee State Labor Council as the uncontested top labor man in Tennessee.

From that position, Lynch worked tirelessly—publicly and behind the scenes—to advance the cause of labor and the Democratic Party. A number of people who credit Lynch with helping them get started in their careers is large. People like Nashville Labor lawyer George Barrett, who said yesterday:

"He meant a great deal to me personally because he urged me to go to law school and to practice labor law. To the community, he meant a great deal more than that. His contributions not only to the labor movement but also to civil rights and civil liberties have made Nashville and Tennessee a better place to live."

"Matt was everybody's father-confessor," said Joey Ellis, a long-time friend. "He was a friend to everybody who sought him out—from young people on up."

Since his retirement, Lynch maintained his interest in several civic organizations. A veteran of the Navy in World War II, he was honorary commander of the Disabled American Veterans, having served for many years as state adjutant treasurer.

He also was on the board of the Hank Snow Foundation, an organization which combats child abuse, and he was a volunteer for the Muscular Dystrophy Telethon for many years.

And, of course, he kept up his friendships during the last months of his life, ready to talk to anyone who came by his home at 1108 Sunnymeade Drive.

Survivors in addition to his wife, whom he married in 1939, include two daughters, Misses Virginia and Mary Lynch; four sons, Kendall, Joseph and Thomas Lynch, all of Nashville, and Patrick Lynch, Tullahoma and a brother, John Lynch, Chattanooga.

Active pallbearers will be Fulton, Greer Wiggins, Linton O'Brien, Charles Ray, C. T. Friar, Barrett, Victor Ellis, and Mickey Krietner.

Memorial contributions in lieu of flowers may be sent to the Hank Snow Foundation for Child Abuse in Madison.

## TAIWAN'S UNITED DAILY NEWS CELEBRATES ITS 30TH ANNIVERSARY

Mr. MATSUNAGA. Mr. President, it has been said by wiser men than I that a free press is an indispensable ingredient of a democratic society. It is most heartening, therefore, to note that the United Daily News, Taiwan's largest independent newspaper is today celebrating its 30th anniversary of its publication. It is with extreme pleasure that I rise to extend heartiest congratulations and best wishes for continued success to my dear friend, Mr. Tih-wu Wang, founder of the newspaper and chairman of the board of United Daily News, Ltd., and to his dedicated staff.

Since its first edition was published on September 16, 1951, the United Daily News has pursued an editorial policy which promotes democracy, national unity, and social progress. Its daily circulation now exceeds 1 million and its staff has increased from 120 in 1951 to 1,427 today. In 1967, Mr. Wang launched a sister publication, the Economic Daily News, and in 1976, he published the first edition of the World Journal in New York City. With a daily circulation of 50,000, the World Journal is the largest Chinese-language newspaper in America.

The United Daily News and its sister publications are highly respected throughout Taiwan and abroad for objective reporting, progressive editorial policies, and service to the community. The incredible success which they have enjoyed is also due in part to the progressive employment policies implemented from the very beginning by Mr. Wang.

One-fourth of the United Daily News stock is owned by employees who have worked for the newspaper for 4 years or longer. Employees have always been rewarded for increases in circulation and advertising and, in 1976, this bonus program was expanded and improved. One-fourth of the monthly profits of the United Daily News are set aside for employee bonuses. An employees welfare fund provides special grants for weddings, funerals, hospitalization, children's education, retirement, and other special needs and, since 1974, employees of the United Daily News have been covered by labor insurance. Finally, the United Daily News has responded vigorously to technological advances. It has the best equipped teletype wire facilities in Taiwan, receiving news on a 24-hour basis from the Associated Press (AP), United Press International (UPI), and Reuters. The installation of two new Harris 1660 presses earlier this year brought its total printing capacity up to 7.2 million pages per hour.

Mr. President, I am sure that all of my colleagues will join me in extending congratulations to an enlightened publisher, Mr. Wang, and his excellent staff of journalists as they celebrate the 30th anniversary of the United Daily News. Together they have done what we wish we could do.

## AGRICULTURE AND FOOD ACT OF 1981 (S. 884)

Mr. BAKER. I would like to ask whether there are other amendments that Senators wish to bring up this evening? If not, I will yield the floor.

The PRESIDING OFFICER. Who seeks recognition?

Mr. BAKER. Mr. President, I gather there are no other amendments that managers may wish to present tonight.

Before we recess over I think it might be of interest to Senators to know that so far on this bill we have disposed of, according to my count, 43 amendments, 37 of those amendments today. Twenty-nine hours have been consumed in consideration and debate on this measure, on this bill, and there remain 16 amendments on which there are time agreements that have not yet been disposed of.

I think it is clear, Mr. President, that if we proceed diligently and with some luck that this bill can be finished tomorrow, and I really sincerely hope the Senate will dispose of this measure by final passage during the course of the legislative session on tomorrow.

I take this opportunity, Mr. President, to commend the distinguished managers of the bill on both sides of the aisle and all the members of the committee who participated so diligently.

I especially wish to express my appreciation to the Senator from North Carolina (Mr. HELMS) and the Senator from Kentucky (Mr. HUDDLESTON) for their unfailing attention to the management of this bill during a very long day indeed.

## RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. It is now 12:14 a.m. on Friday, and I am prepared, Mr. President, at this point, unless there is other business to transact, to move that the Senate go into recess. I have consulted with the minority leader, and I believe he is agreeable to that, and as I see no other Senator rising to seek recognition, I move now, Mr. President, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10 a.m. on this day.

The motion was agreed to; and at 12:15 a.m., the Senate recessed until Friday, September 18, 1981, at 10 a.m.

## NOMINATIONS

Executive nominations received by the Senate September 17, 1981:

THE JUDICIARY

William L. Garwood, of Texas, to be U.S. circuit judge for the fifth circuit vice a new position created by Public Law 95-486 approved October 20, 1978.

Hayden Wilson Head, Jr., of Texas, to be U.S. district judge for the southern district of Texas vice Owen D. Cox, retired.

James R. Nowlin, of Texas, to be U.S. district judge for the western district of Texas vice Jack Roberts, retired.

DEPARTMENT OF JUSTICE

William H. Kennedy, of California, to be U.S. attorney for the southern district of California for the term of 4 years vice Michael H. Walsh, resigned.

Guy Gordon Hurlbutt, of Idaho, to be U.S. attorney for the district of Idaho for the term of 4 years vice M. Karl Shurtliff, resigned.

Jim J. Marquez, of Kansas, to be U.S. attorney for the district of Kansas for the term of 4 years vice James P. Buchele, resigned.

John A. Smietanka, of Michigan, to be U.S. attorney for the western district of Michigan for the term of 4 years vice James S. Brady, resigned.

Kenneth W. McAllister, of North Carolina, to be U.S. attorney for the middle district of North Carolina for the term of 4 years vice Henry M. Michaux, Jr., resigned.

Samuel T. Currin, of North Carolina, to be U.S. attorney for the eastern district of North Carolina for the term of 4 years vice George M. Anderson, resigned.

Rodney Scott Webb, of North Dakota, to be U.S. attorney for the district of North Dakota for the term of 4 years, vice James R. Briton, resigned.

Brent D. Ward, of Utah, to be U.S. attorney for the district of Utah for the term of 4 years, vice Ronald L. Rencher, resigned.

George W. F. Cook, of Vermont, to be U.S. attorney for the district of Vermont for the term of 4 years, vice William B. Gray, resigned.

Thomas C. Greene, of Alabama, to be U.S. Marshal for the northern district of Alabama for the term of 4 years, vice Ralph C. Bishop.

Melvin E. Jones, of Alabama, to be U.S. Marshal for the middle district of Alabama for the term of 4 years, vice Rufus A. Lewis, resigning.

P. A. Mangini, of Connecticut, to be U.S. Marshal for the district of Connecticut for the term of 4 years, vice Anthony G. Dirienzo, resigned.

Lynn H. Duncan, of Georgia, to be U.S. Marshal for the northern district of Georgia for the term of 4 years, vice Ronald E. Angel, resigned.

Ralph D. Morgan, of Indiana, to be U.S. Marshal for the southern district of Indiana for the term of 4 years, vice Frank J. Anderson, resigning.

IN THE ARMY

The following officer for appointment as a Reserve Commissioned Officer in the Adjutant General's Corps, Army National Guard of the United States, Reserve of the Army, under the provisions of title 10, United States Code, section 593(a) and 3392:

*To be major general*

Brig. Gen. Harold L. Gwatney, 431-38-7814.

# EXTENSIONS OF REMARKS

## NATIONAL PRO-LIFE POLITICAL ACTION COMMITTEE—A STUDY IN INTEGRITY

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. McDONALD. Mr. Speaker, on September 11, 1981, Rev. Charles Fiore, O.P., testified before the Judiciary Committee of the U.S. Senate in opposition to the nomination of Judge Sandra Day O'Connor to the U.S. Supreme Court. Father Fiore is chairman of the National Pro-Life Political Action Committee (PAC), a role that he and his Washington representative, Peter Gemma, have filled with integrity and honor.

I have been, and will continue to be, privileged to serve on that organization's advisory board. It was not too long ago that this organization faced a storm of protest because they had targeted proabortion advocates for defeat, irregardless of political party affiliation. The heat was on in the kitchen, but this organization stuck to its guns. My own position with regard to this "storm" could only be, both as a physician and a Member of this body, that where the murder of the unborn is concerned—it is just that—murder—and politics goes out the window.

Although Judge O'Connor will probably be confirmed, the National Pro-Life PAC once again took the position of honor and integrity. That is why, for all to know, that I take this opportunity to share Father Fiore's testimony with my colleagues. Testimony follows:

TESTIMONY OF THE REV. CHARLES FIORE, O.P., CHAIRMAN, NATIONAL PRO-LIFE POLITICAL ACTION COMMITTEE

Mr. Chairman and Members of the Committee: I thank you for this opportunity to appear before you as founder and Chairman of the National Pro-Life Political Action Committee, and on behalf of tens of thousands of our supporters in all states and right-to-lifers everywhere, who oppose the nomination of Judge Sandra Day O'Connor to the U.S. Supreme Court.

Mrs. O'Connor's nomination by President Reagan has been the occasion of virtually unanimous disappointment on the part of rank-and-file pro-lifers, because it represents a breach of the 1980 Republican Platform on which he ran (and which he more than once privately and publicly affirmed as a candidate), and on the basis of which he convinced millions of blue-collar, traditionally Democratic voters—ethnic Catholics and fundamentalist-evangelical Protestants—to switch parties and vote for him.

As a result, in the first six months of his incumbency, President Reagan may have seriously alienated major portions of the "social issues conservatives" who comprised the pro-life/pro-family coalition that helped elect him last November. Those same voters are intently watching these hearings, and will long remember and note well the final "ayes" and "nays" as the full Senate determines Judge O'Connor's qualifications to sit with the Court. As voters they perceive the members of the House and Senate not as party functionaries, but as their representatives first of all; just as they also perceive party platforms and election pledges not as "litmus tests," but as implied contracts to be fulfilled by those elected.

I say these things at the outset, not because they have bearing on Mrs. O'Connor's qualifications, but because they have very much to do with the larger processes of representative government, which are also at stake in these hearings.

The facts of Judge O'Connor's legislative and judicial careers are matters of public record, even though it appears that the Administration paid scant attention to them when evaluating her qualifications for the Supreme Court, even as late as the now-infamous Starr Justice Department memorandum hurriedly complied a day or so before the nomination was made.

Briefly, as they pertain to the abortion issue, the facts are:

1. As a State Senator in 1970, Mrs. O'Connor twice voted for HB 20, to repeal Arizona's existing abortion statutes—three years before the U.S. Supreme Court legalized abortion-on-demand, throughout the nine months of pregnancy, in all 50 states.

2. In 1973, Senator O'Connor co-sponsored a so-called "family planning" Act (SB 1190) which would have allowed abortions for minors without the consent of parents or guardians. The bill was considered by all observers in Arizona to be an abortion measure, and the Arizona Republic (3/5/73) editorialized, "The bill appears gratuitous—unless energetic promotion of abortion is the eventual goal."

3. In 1974, Senator O'Connor voted against a bill (HCM 2002) to "memorialize" Congress on behalf of passage of a Human Life Amendment to the Constitution protecting the unborn.

4. In 1974, she voted against an amendment to a University of Arizona funding bill that prohibited use of tax-funds for abortions at University hospital, because Mrs. O'Connor claimed it was "non germane" and thus violated the state constitution. However, the bill passed with the amendment, and its constitutionality was upheld by the State Supreme Court.

It seems rather peculiar to us that Mrs. O'Connor, in discussing her legislative record on abortion with Mr. Starr of the Justice Department, could not remember her position on the first three votes, since they all represented dramatic departures from the existing laws and aroused national media attention. Yet she was apparently able to recall the far less significant fourth vote and her precise reason for it. Stranger still, was her attempt in the Starr memorandum to portray herself as a friend and intimate of Dr. Carolyn Gerster, M.D., Phoenix, titular head of the state right-to-life organization, when Dr. Gerster says it was well-know that she and Mrs. O'Connor had long been in heated opposition on these very votes.

The question looms large over Mrs. O'Connor's qualifications to sit as a member of the Supreme Court: Did she deliberately seek to mislead investigators for the Justice Department and/or the President as to the facts of her legislative record on this vital issue; did she give false or selective information in an attempt to portray her clearly pro-abortion legislative record as something else?

And if she did, what does that say about her ambition to accede to the high Court . . . and her moral strengths once part of it? What price glory?

I raise these blunt and impolite questions because the matter of the right to life of the unborn is fundamental and critical to the health of our society. "The right to life," as also the rights to "liberty and the pursuit of happiness" are *not* "minor" or peripheral issues in our political process. Nor are they "private" any more than homicide is a "private" act if the unborn are human, as indeed every medico-scientific test affirms.

Because of the complicated and sensitive issues involved, at the very least we expect you to fully explore her philosophy and opinions on this issue of life versus death. If this judge be not guilty of the pro-abortion charge, let her proclaim her innocense loudly and clearly. Indeed, if she has changed her views, National Pro-Life PAC would be first in line to reconsider our opposition to this nomination.

As Professor William Bentley Ball, former Chairman of the Federal Bar Association's Committee on Constitutional Law, and one who has argued a number of religious liberty cases before the U.S. Supreme Court, recently wrote apropos of Mrs. O'Connor's nomination:

*"Some zealous supporters of the O'Connor nomination • • • have made the astonishing statement that, on the Supreme Court of the United States, ideology doesn't count. They say . . . that it would be of no significance that a candidate would have an actual and proved record of having voted or acted on behalf of racism or anti-Semitism or any other philosophic point of view profoundly opposed by million of Americans. These concerns are not dispelled by a recital that the candidate is 'personally' opposed to such a point of view. Why the qualifying adverb? Does that not imply that, while the candidate may harbor private disgust over certain practices, he or she does not intend to forgo support of those practices?*

*"Philosophy is everything in dealing with the spacious provisions of the First Amendment, the due process clauses, equal protection, and much else in the Constitution. It is perfect nonsense to praise a candidate as a 'strict constructionist' when, in these vital areas of the Constitution, there is really very little language to 'strictly' construe • • •*

*"It is likewise meaningless to advance a given candidate as a 'conservative' (or as a 'liberal'). In the matter of Mrs. O'Connor, the label 'conservative' has unfortunately been so employed as to obfuscate a very real issue. The scenario goes like this:*

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

*"Comment: 'Mrs. O'Connor is said to be pro-abortion.'*

*Response: 'Really? But she is a staunch conservative.'*

*"Just as meaningful would be:*

*Comment: 'John Smith is said to be a mathematician.'*

*Response: 'Really? But he is from Chicago.'*

*"Whether Mrs. O'Connor is labeled a 'conservative' is irrelevant to the question respecting her views on abortion. So would it be on any other subject."* (Emphasis added. Cf. Appendix for complete text, "The O'Connor Supreme Court Nomination: A Constitutional Lawyer Comments," from THE WANDERER, St. Paul, MN, Vol. 114, No. 31; July 30, 1981).

"Philosophy is everything . . ." says Professor Ball. And we concur. With these facts of her record in mind, and in the light of President Reagan's pro-life promises before, during and after the campaign, logically only three conclusions can be drawn:

1. Either Sandra Day O'Connor has changed her views, and is no longer a pro-abortion advocate ("personal opposition" does not necessarily translate into "public" opposition to abortion), or

2. President Reagan appointed Mrs. O'Connor without full knowledge about her public record, or

3. President Reagan was fully informed about Mrs. O'Connor's public record as pro-abortion, but chose to disregard it and the solemn pro-life promises he had made.

If, as it appears, Judge O'Connor and some of her supporters have attempted to cloud over or to minimize the importance of her pro-abortion record for the sake of these hearings, what does that say about her record? More, what does it say about her probity and candor?

Far from being unimportant, these questions are absolutely essential in judging the qualifications of one nominated to the Supreme Court of our land.

Mrs. O'Connor, although she has already testified and submitted herself to your queries, technically is still before this Committee, and may be recalled for further questioning by yourselves or other Senators.

She must be asked directly if she has changed her views on abortion since her votes in the Arizona State Senate. She must be asked specifically about each of those votes. She must be asked about *Roe vs. Wade* and *Doe vs. Bolton*, about parental consent to medical procedures on minors, and the other excellent questions Professor Ball raises in his article (*op. cit.*).

Should this Committee and the Senate fail to raise these questions with Judge O'Connor now, as previous Judiciary Committees did not hesitate to question Judges Hanesworth and Carswell on their records and philosophies, her nomination if confirmed will always be tainted, and history will record that the Senate rushed to confirm her for specious reasons and not her legitimate qualifications for the job.

Mr. Chairman and Members of the Committee, we see no evidence of a change of heart or mind on the part of Judge O'Connor from the pro-abortion stance that dominates her public record. We do not know what questions President Reagan asked Mrs. O'Connor in his private meeting with her, and so we do not know the practical value, if any, of her newfound "personal opposition" to abortion. On the contrary, we find evidence that one week after her conversation with the President (and before her nomination) she gave partial and misleading information on these very issues as they arise in her record, to an investigator for the Attorney General of the United States, at a time when she knew full well that she was being considered among the finalists for this nomination.

I understand Mrs. O'Connor's ambition and desire to become the first woman Justice of the Supreme Court of the United States.

I find her philosophy as exemplified in her record as a legislator and leader in the State Senate of Arizona clearly pro-abortion and so, on the basis of criteria set forth by the Platform of the majority party in the Senate, and by the President who nominated her, she is unqualified.

But all of us in public life must realize at times like these that our judgments are subject to re-examination, first of all by the public record which follows, and ultimately by the one Judge who alone is just, and to whom all of us must finally submit our thoughts, hopes, our words, our deeds, our very lives—all of which and each part of which will be "germane."

Quite simply, gentlemen, abortion goes beyond partisan platforms and political promises—it is morally unjustifiable. For that fundamental reason, we urge all of you—Democrats and Republicans alike—to vote against the nomination of Sandra Day O'Connor to the U.S. Supreme Court.

---

[From the Wanderer, July 30, 1981]

THE O'CONNOR SUPREME COURT NOMINATION: A CONSTITUTIONAL LAWYER COMMENTS

(By William Bentley Ball)

As one whose practice is in the field of constitutional law, one thing stands out supremely when a vacancy on the Supreme Court occurs: the replacement should be deliberate, not impulsive. The public interest is not served by a fait accompli, however politically brilliant. The most careful probing and the most measured deliberations are what are called for. Confirm in haste, and we may repent at leisure.

Unhappily, the atmosphere surrounding the nomination of Sandra Day O'Connor to the Supreme Court is one almost of panic. Considering that the liberties of the American people can ride on a single vote in the Supreme Court, any politically or ideologically motivated impatience should be thrust aside and time taken to do the job right. Plainly, there is no need for instananeous confirmation hearings, and the most painstaking effort should be made to fully know the qualifications—including philosophy—of the candidate. My first plea would be, therefore: Don't rush this nomination through.

My second relates indeed to the matter of "philosophy." Some zealous supporters of the O'Connor nomination (who themselves have notoriety as ideologues) have made the astonishing statement that, on the Supreme Court of the United States, ideology doesn't count. They say, in other words, that it would be of no significance that a candidate would have an actual and proved record of having voted or acted on behalf of racism or anti-Semitism or any other philosophic point of view profoundly opposed by millions of Americans. These concerns are not dispelled by a recital that the candidate is "personally" opposed to such a point of view. Why the qualifying adverb? Does that not imply that, while the candidate may harbor private disgust over certain practices, he or she does not intend to forego support of those practices?

Philosophy is everything in dealing with the spacious provisions of the First Amendment, the due process clauses, equal protection, and much else in the Consititution. It is perfect nonsense to praise a candidate as a "strict constructionist" when, in these vital areas of the Constitution, there is really very little language to "strictly" construe. As to other areas of the Constitution (e.g., Article I, Sect. 4—"The Congress shall assemble at least once in every year . . ."), to speak of "strict construction" is also absurd, since everything is already "constructed."

It is likewise meaningless to advance a given candidate as a "conservative" (or as a "liberal"). In the matter of Mrs. O'Connor, the label "conservative" has unfortunately been so employed as to obfuscate a very real issue. The scenario goes like this:

Comment: "Mrs. O'Connor is said to be pro-abortion."

Response: "Really? But she is a staunch conservative." Just as meaningful would be:

Comment: "John Smith is said to be a mathematician."

Response: "Really? But he is from Chicage."

Whether Mrs. O'Connor is labeled a "conservative" is irrelevant to the question respecting her views on abortion. So would it be on many another subject.

The New York Times editorialized July 12th on "What To Ask Judge O'Connor." The four questions it posed (all "philosophical," by the way) were good. To these many another question need be added. For example:

What are the candidate's views on:

The proper role of administrative agencies and the assumption by them of powers not clearly delegated?

The use by IRS of the tax power in order to mold social views and practices?

The allowable reach of governmental control respecting family life?

Busing for desegregation?

The proper role of government with respect to non-tax-supported private religious schools?

Sex differentiation in private employment?

Freedom of religion and church-state separation?

Broad and bland answers could of course by given to each of these questions, but lack of knowledge or lack of specificity in answers would obviously be useful indices of the capabilities or candor of the candiate. Fair, too—and important—would be questions to the candidate calling for agreement with, disagreement with, and discussion of, major prior decisions of the Supreme Court. Not the slightest impropriety would be involved in, and much could be gained by, public exposition of the candidate's fund of information on these cases, interest in the problems they have posed, and reaction to the judgments made.

Even these few considerations make it clear that the Senate's next job is not to confirm Mrs. O'Connor but instead to find out who she really is—that is, what convictions she possesses on great issues. I thus return to my theme that deliberativeness, not haste, should be the watchword respecting the confirmation inquiry. The fact that a woman is the present candidate must not (as Justice Stewart indicated) be dispositive of choice. It should certainly not jackknife basic and normal processes of selection. At this point, no prejudgment—either way—is thinkable.

Other vacancies may soon arise. The precedent of lightning-fast decisions in the

matter of choosing our Supreme Court Justices would be a bad precedent indeed.

Responses of Mrs. O'Connor to questions posed to her very recently give rise to additional concerns: (a) re Mrs. O'Connor's views concerning overruling of prior decisions, (b) her candor.

As to (a): She takes what appears like a "conservative" position of saying that she would not vote to disturb prior decisions of the court (including the abortion decisions). If it is a fixed principle with her, that prior decisions may not be overruled, then she should be asked whether she would have voted in Brown v. Board of Education, to overturn the "separate but equal" doctrine of Plessy v. Ferguson (or, as far as that goes, the Dred Scott decision). If her answer is "yes," then she does not have the above fixed principle. Then she should be asked: "Since you do not, after all, have any real principle against overruling prior decisions, then would you not vote to overrule Roe v. Wade (the abortion decision) since you say you are opposed to abortion?"

If her answer is "no," she is plainly not qualified to go on the court because no one should be a Justice of the Supreme Court (as contrasted with lower courts) who would declare himself absolutely bound to follow old prior Supreme Court decisions however bad they may have been.

As to (b): Mrs. O'Connor has seemed to perform, in her Washington interviews, with somewhat less than the candor which the public deserves when it is choosing a Supreme Court Justice. Understandably she should not be asked to commit, in advance, her vote on a particular hypothetical or actual case. But where a candidate for the bench has already taken a public position on an issue of great significance nationally, it is plainly the public's right to know whether the candidate continues to hold that view. If, for example, Mrs. O'Connor had several times voted, in Arizona, in favor of racial segregation, would it be deemed improper to require her to say whether she does, or does not, today repudiate that position? (Not with quibbling about "personally" being opposed to segregation.)

There should be no sense of inevitability about the O'Connor nomination. The nation is not bankrupt in men—or women—of qualifications for the Supreme Court. There are many candidates with unimpeachable qualifications in the United States—with better legal experience, far superior judicial qualifications, and with no blemish on their records of having even remotely supported violations of rights to liberty or to life. This is especially the case when we consider that the lifetime appointment may mean that the appointee will be on the bench for decades.

Finally, a note of mystery on the O'Connor matter. Let us suppose that President Reagan had nominated a person who had had relatively limited law practice experience, had never argued a case before the Supreme Court of the United States, had not in fact ever handled a case of significance, had no heavy trial experience, had no high scholarly qualifications, had a few years as one of a multitude of politicians holding a seat in a state senate, and a few years as a judge (not even on a state supreme court but in a state intermediate appellate court, where political hacks abound) and had never written a noteworthy opinion as such. Would anyone venture to say that here was Supreme Court material? In this case, the media have acclaimed just such a candidate—and one must wonder why. Suppose that, instead of having had a record indicating acceptance of abortion, such a candidate had a record the other way around—was known as a Moral Majority type? Would the mediocrity—indeed the poverty—of legal background then have been ignored by the media?●

## HONORING LOS ANGELES BICENTENNIAL

### HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. DE LA GARZA. Mr. Speaker, I speak today to honor the 200th anniversary of the founding of the great city of Los Angeles, Calif. The city, originally named "El Pueblo de la Reina de los Angeles"—the pueblo of the Queen of Angels—has come a long way since it was first settled on September 4, 1781, by a band of 44 travelers who spent over 7 months in journey from Mexico. Originally a part of a Spanish colony, and then of Mexico, the city was a Mexican provincial capital, then a frontier boom town, and now the U.S. major commercial center on the west coast.

The city of Los Angeles is truly an international city providing opportunity to Asians, Hispanics of many nationalities, and persons from virtually every part of the globe. Today, as we concern ourselves with the future of our country's immigration policy, it is worthwhile to consider that many of the oldest families in Los Angeles can trace their lineage, as I can, to a time before the West was part of the United States.

A visitor to Los Angeles cannot escape the cultural diversity of the city and its heritage, from the Spanish architecture, and red tile roofs, to the many languages heard on the streets. One need only travel from Olvera Street, famous for its Mexican restaurants and shops, to Century City, a sparkling shopping and office complex of glass, steel, and concrete in order to appreciate the variety.

Los Angeles has not only drawn people from all over the world, but from all over the United States as well, yet they all share the common heritage of looking for greater opportunity. Whether they be actors, engineers, businessmen, electronics specialists, seeking political asylum due to political upheavals, or simply looking for a better life for their children, Los Angeles has offered opportunity to all.

Two hundred years after it was first founded, it is still a young city, willing to try new things and new ways of doing them. We should all raise our sombreros to the people of Los Angeles, for through them we can learn to prosper from cultural diversity. Where else can one buy a kosher burrito from a street stand run by a Korean immigrant.●

## MARITIME DRY BULK TRADE ACT

### HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SNYDER. Mr. Speaker, today I am introducing a bill to be known as the Maritime Dry Bulk Trade Act.

The purpose of this bill is to promote the U.S.-flag, dry-bulk fleet. Currently, U.S.-flag vessels carry only 1.2 percent of this country's import-export dry-bulk commodities. There are only 19 U.S.-flag, dry-bulk vessels in our fleet. Most of these vessels are over 30 years old. The United States cannot afford to rely totally upon foreign sources to provide the transportation services needed to maintain the flow of such essential dry bulk imports and exports

The bill directs the Secretary of Transportation to take immediate and positive actions to promote the orderly and rapid growth of the U.S.-flag, dry-bulk fleet in order to transport 40 percent of our dry-bulk imports and exports within 10 years.

The attainment of this 40-percent goal is to be accomplished by directing the Secretary to negotiate bilateral shipping agreements with our trading partners. Included within such agreements will be a requirement that a certain percentage of such cargo, for example 40 percent, must be carried in U.S.-built, U.S.-flag vessels, 40 percent in vessels designated by the trading partner and the remaining 20 percent may be carried by vessels registered in any other country. The Secretary may negotiate a percentage above or below 40 percent, so long as it does not fall below 33⅓ percent. The 40-40-20 cargo allocation scheme envisioned in this bill is the same as the formula currently being promoted by the United Nations Conference on Trade and Development [UNCTAD]. Whether we like it or not, the rest of the world practices cargo preference. If the interests of this Nation's maritime fleet are to be protected, then some positive action must be taken immediately.

I believe that the bill I am introducing today attempts to promote the U.S.-flag fleet in a reasonable manner. Under my proposal, waivers may be granted during the first 10 years of an agreement so as to allow cross-traders to carry a percentage in excess of their allocated share if the fleets of the trading partners are not yet able to carry their portion of the cargo.

I have also included within this bill the requirement that in order to qualify as a U.S.-flag vessel, the vessel

must not be built or operated with Government subsidy. Although such a requirement may not be popular with some segments of the industry, I believe that the subsidy system has clearly failed to adequately promote our merchant marine and that Congress should not be asked to act favorably upon this legislation without requiring that the industry give something up in exchange.●

## SMALL BUSINESS HURT MOST BY GOVERNMENT SLOW PAY PRACTICES

### HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. IRELAND. Mr. Speaker, as chairman of the Small Business Subcommittee on Export Opportunities and Special Small Business Problems, one of the most frequent complaints I have heard from small businessmen in my district and around the country is that the Federal Government does not pay its bills on time. Small firms are often forced to wait 90 to 120 days or more for payment of goods and services delivered to Federal agencies. This causes severe cash flow problems for firms already struggling in our current economic climate. It is for this reason that I am cosponsoring H.R. 2036, a bill introduced by my distinguished colleague from California, Representative ROBERT LAGOMARSINO, to correct this important problem.

The basic goal of H.R. 2036 is to require the Federal Government to pay its bills within 30 days after receipt of invoice. If an agency fails to do this, interest charges would be assessed on the amount past due. For meat, groceries and other perishables, payment would be due in less than 30 days as is common practice in those industries. The legislation, therefore, merely requires the Government to do what is standard practice in the private sector. It is important to note that these firms are not looking for additional revenue through the payment of interest. They want their invoices paid on time, and the threat of interest charges is the "stick" that will force Federal money managers to do this.

The need for such legislation has been clearly established. A 1978 report by the General Accounting Office found that the Government paid 39 percent of its bills late. The average delay ran 74 days. While large business firms may be able to carry the Government for this length of time, most small firms cannot. Stories abound of small businessmen and women forced to borrow money to pay their bills to meet their payrolls while owed thousands by the Feds. It is little wonder that many of these firms ultimately conclude that it is just not worth it to sell to the Federal Government. In the end, it is the Government and the taxpayers who will end up the loser through reduced competition.

Mr. Speaker, the time has come to reverse this trend in irresponsible payment practices on the part of the Federal agencies. I believe that H.R. 2036 and similar bills introduced in the House and Senate will do this. It will also send a loud and clear message to small businessmen and women across the Nation that this Congress is responsive to their concerns. I strongly urge my colleagues who have not already done so to support H.R. 2036 and work for its speedy enactment.

Also, I would like to share with my colleagues a recent initiative from Jim Boren. As usual, in his own satiric way, Mr. Boren hits the nail on the head.

[From Jim Boren's Mumblepeg: The Voice of the Bureaucrat]

FEDSLOPPP: A FEDERAL SLOW-PAYMENT PENALTY PLAN

Federal Float, the orbital movement of past-due bills in the federal government, is a matter of major concern to small businesses throughout the country, and Mumblepeg has a suggestion for bringing an end to the problem. It is Fedsloppp, a Federal Slow-Payment Penalty Plan. It could be tagged with the slogan, "Stop FedFloat with Fedsloppp."

Agencies of the United States Government now owe small businesses many billions of dollars for goods and services provided in good faith and in a timely and proper manner. According to one study, 39 percent of federal bills are paid late, and the average late bill is 74 days past due. The Bureau of Indian Affairs has been floating one small company's bill for five years. In another case a company faced a long delay because the federal agency had simply changed its name but would not respond to billings made out in the agency's old name.

Why are the payments so slow? The fault is not with the payment centers—many of whom can turn out checks within twenty-four hours of receiving authorization. It is for a wide variety of reasons: "Our offices were moved . . .", "The computer was down . . .", "The clearance people were on leave . . .", "Payment authority has been delegated to another office. . . ." The file's been lost. Can you resubmit all the documents?"

Mumblepeg finds such a wide application of its principles of creative nonresponsiveness that it is having difficulty in determining who might best merit the Inataprobu Order of the Bird, its not-so-coveted sculpture of a potbellied featherless bird. While Inataprobu's Twenty-Nine Coordinating Committees are studying the problem of Federal Float, Mumblepeg is proposing the immediate establishment of Fedsloppp (Federal Slow-Payment Penalty Plan).

Under Fedsloppp, small business would bow to sloppy bill handling by federal agencies for a period of thirty days. After a bill is past due for thirty days, however, the slow-payment penalty plan would go into effect. Bills past due for thirty to sixty days would automatically be increased by "Ten Per Cent Plus Prime". Prime would be based on the established prime rate on the day the check was finally written. Bills sixty to 180 days past due would be increased each thirty days at the same "Ten Per Cent Plus Prime." When a bill was past due for 180 days, a letter of reprimand would be placed in the personnel file of all persons in the chain of command from the first payment office to and including the head of the agency. Upon receiving the third reprimand, the person would be transferred to a reduced in grade and transferred to some other type of work if such were available.

Mumblepeg may wish to refine its proposal as more research is completed, but it believes that Fedsloppp for sloppy bill handling is at least a timid beginning.●

## OPPOSE THE AWACS SALE

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. FLORIO. Mr. Speaker, the proposed sale of the F-15 enhancement and AWACS package to Saudi Arabia is contrary to the best interests of the United States and represents a dangerous threat to the Middle East peace process. As I have stated before, the arguments against the sale are compelling.

I would like to share with my colleagues the following address by Patrick Cosgrave. Dr. Cosgrave was the former special adviser to Margaret Thatcher. His observation that "Israel cannot afford to lose a war" has profound implications, and must be considered during the congressional review of the proposed arms sale to the Saudis:

THE WEST CONFUSES ISRAEL'S INTERESTS WITH ITS OWN DESIRES

(By Patrick Cosgrave)

Before 1967 a great many people in this country perceived Israel as a weak, small, and very vulnerable power. It held the sympathy of the American people because of the Holocaust that led to its creation, and our admiration as well for maintaining a fight as a Jewish David against an Arab Goliath. American support for Israel, therefore, was based almost entirely on sentimental, emotional, and even moral reasons.

But after Israel's stunning victory in the 1967 war, we no longer felt toward Israel in the same warm way, with the same feelings of paternalism. this development, perhaps even more so than the later 1973 Arab oil embargo, marked the decline of the West's feelings of intimacy with Israel.

This perception has significantly colored American and European reactions to the actions of the Menachem Begin government in recent months. But it is my fear that in criticizing Israel, we are often confusing two entirely different things: The logic, or perhaps lack of logic, of the policy Israel follows—from its own perspective, and the interests of the Atlantic alliance. We see this, for example, when a Western politician speaks out against the Israeli attack on South Lebanon or on the nuclear reactor in Iraq.

Israel has highly mobilized, standing military forces, and the Arabs know Israel as a country to be a highly effective and highly efficient fighting force. But as one arguing

Israel's case, I would like to emphasize the sheer enormity of the fire power assembled against them, even discounting the military capability of Egypt.

In almost every category—manpower, armored divisions, mechanized infantry divisions, tanks and combat aircraft—the firepower assembled on or near Israel's Eastern border is more or less equivalent to the power that is assembled in the Western European theater.

Israel cannot lose a war. If Britain had lost World War II to Germany, there would still be a Britain—Britain under German domination, but a Britain whose citizens could imagine that in the foreseeable future, an uprising might restore their independence. Moral and power considerations aside, we cannot deny that after the fall of France, there remained a France of sorts. Even if Germany had won the war, the Vichy government might have negotiated with its conquerors for the restoration of France, and France very much limited in power but still culturally, racially, religiously and identifiably a unit.

But to an Israeli, the loss of a single battle would mean The End—the end of the state, with no further possibility of resuscitation. And more than likely, it would also mean the death of practically every one of its Jewish inhabitants.

I remember talking to Prime Minister Begin just after Sadat's visit to Jerusalem in 1977, and Begin was irritated by the fact that all the praise in the Western newspapers was for Sadat. Begin said in effect that all Sadat risked when he came there was his life. "So what? Any man would risk his life for his country. But in any decision I make about concessions with Sadat, I risk the country."

The Israelis have a very different geopolitical perspective of the world than those of us in London or Washington because their lives are so much more closely on the line. That is why I think it is very dangerous to push Israel too far.

I think it's worth observing that no single one of the Arab-Israeli wars materially affected the interests of the West and the Middle East. They have in their different ways affected the balance of power locally, and of course that balance is of considerable interest and concern to the rest of the world. But none of the wars altered the situation in the Arab world in the way that the fall of the Shah of Iran did.

It seems to me that when we look at recent developments in the Middle East—the war between Iran and Iraq, the fall of the Shah, the transformation of Yemen into a Soviet fortress, and other events which have almost nothing to do with the West Bank—solving the Palestinian problem becomes comparatively less important. Moreover, we see in fact that the only element in the Middle East which is inherently stable is Israel itself.

Therefore any weakening of Israel that does not produce a very definite and tangible return to the West is dangerous—pressing the Israelis to agree with the Egyptians on the West Bank issue, for example.

We complain when Israel strikes pre-emptively, but a country in its strategic situation has no chance of survival unless it strikes pre-emptively.

Take the Iraqi nuclear reactor. The uranium the French provided for that reactor was 93 percent enriched—the fissile material for making bombs. The chemical facilities the Italians provided were exactly the facilities required to turn that into the plutonium required to make bombs.

The United Nations and the British Foreign Office both told the Israelis that the Iraqis were not, as the Israelis thought they were, on the verge of making a bomb. They said that a United Nations inspectorate had been there and studied it and knew that it was a "peaceful" reactor. You simply cannot expect the Israelis to believe that, though. This is the same United Nations which provided an interim force in Lebanon that is a front for the Palestinian Liberation Organization.

Israel will always strike pre-emptively because it cannot risk the first battle. And that is even more true now, since 1973, when Israel had to bear the brunt of the first battle.

So when Israel attacks a nuclear reactor in Iraq or attacks Beirut, it is simply illogical to not take into account the strategic and tactical reasoning behind it, before making value judgments. Israel is not the United States, and we should stop confusing Israel's best interest with our own.

What I fear above all is that in attempting to bring about solutions that are not available and not achievable in the Middle East, we will either weaken Israel to an extent that is profoundly dangerous for our own interests, or secondly, that we will foster excessive optimism in Arab states as Western sympathy for Israel declines. The Arabs could either launch another attack on Israel of its own volition, or the despair created in Israel by a Western-forced withdrawal could prompt her to start a war pre-emptively. Such a war could being down the entire Middle East.●

## TRIBUTE TO DR. JAMES APPEL

### HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WALKER. Mr. Speaker, I rise today to pay tribute to the late Dr. James Ziegler Appel, an internationally esteemed physician, past president of the American Medical Association and family doctor to many of my constituents in Pennsylvania's 16th Congressional District. On September 7, Dr. Appel passed away after a long and distinguished career that spanned nearly 50 years. At the time of his death he still maintained his medical office at the address where he joined his father's practice in 1933.

His life and career were dedicated to the idea that physicians owe more to their community than good medical care. Dr. Appel's community was the world.

During his term as president of the American Medical Association in the mid-1960's, Dr. Appel conferred with President Johnson about the medicare program, which went into effect a few days after his term ended. Dr. Appel was a firm believer that medical treatment should not be denied to those who cannot afford it. In his hometown he ministered to many elderly and indigent, free of charge.

He reported to President Johnson on health care in Southeast Asia after traveling to Vietnam during the height of the crisis. While serving in a leadership role in the World Health Organization he participated in efforts to wipe out smallpox around the world.

Mr. Speaker, Dr. Appel was a leader in his profession who was respected by his colleagues both locally and nationally. He will be missed, but he will not be forgotten. From his inaugural address before the American Medical Association in 1965 he left us with these words:

We cannot have happiness or a fruitful life, and we cannot have freedom unless we pay the price. The price is the acceptance of responsibility.

Sue joins me in expressing our deepest sympathies to his wife and family.●

## FORGIVE AND FORGET—LIBERAL STYLE

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ASHBROOK. Mr. Speaker, liberals in the Senate have for a long time played a peculiar form of forgive and forget with their constituents. Once they were elected to the Senate, liberals would forget their constituents for 5½ years. They would then come home for a 6-months' campaign and persuade their constituents to forgive them. Then those same liberals would come back to Washington to work for the Washington liberal establishment for another 5½ years.

After each election, each liberal Senator would vote for more taxes on his constituents, more regulation of their lives, and more bureaucrats to enforce them. Then they would go back to their constituents, and spend 6 months telling them how much they hated rising taxes, bureaucratic and judicial tyranny, and all the rest. Above all, they would promise that, the next 6 years, they would stop supporting the establishment, and start fighting it. Once again, the voters would forgive them their past errors and send them back to Washington.

This year, a large number of liberals discovered the game was over: The people refused to forgive, because they refused to be forgotten again. In 1980, the American people said that they will no longer forgive a Senator who forgets them.

But some Senators are still playing the same old liberal game. The Cleveland school system is being ruled by a judicial tyrant, Judge Battisti, who is enforcing a busing program opposed by every segment of that city's population and this Congress. The Justice Department has been using taxpayers' money to support and extend Judge Battisti's tyranny. But on November

13, when the Senate voted to deny funds to the Justice Department to push busing, the roll was called and many in the other body voted against the people. They voted for Judge Battisti, and against Cleveland. Fortunately, the Senate witnessed 61 votes to break the probusing filibuster. The people won yesterday.

The lesson of the 1980 landslide was simple: You can no longer vote against the people while serving here in Congress and expect them to vote for you at election time. I was embarrassed to note that it was not only Democrats who ignored this lesson in the November 13 vote. The leader of the probusing forces was a liberal Republican, who insisted that to oppose busing was somehow a violation of the 1964 Civil Rights Act, which specifically condemns busing.

In every State in the Union, the overwhelming majority opposes busing. These gentlemen have chosen to forget that. It will be interesting to see, over the next few years, whether the voters choose to forgive them again.●

## PERSONAL ANNOUNCEMENT

### HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. MARRIOTT. Mr. Speaker, I was unable to be present on the floor of the House of Representatives yesterday for rollcall Nos. 206 and 207. Had I been present I would have voted "yea" on both H.J. Res. 325, continuing appropriations for fiscal year 1982, and H.R. 4241, military construction appropriations for fiscal year 1982.●

## NATIONAL HOME HEALTH CARE WEEK

### HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. PANETTA. Mr. Speaker, today I am introducing a resolution along with Representative BARBER CONABLE, to designate the week beginning October 4, 1981, as "National Home Health Care Week." The home health industry has become a vital and important element in our Nation's health care system, and I think this resolution is an appropriate way to recognize the contributions and encourage further development of home health care.

I am sure that my colleagues are aware that we face a crisis with respect to developing cost-effective, humane, long-term care for our older citizens. This need has never been greater. The 65-and-over population continues to grow faster than the younger population, and by the year 2000, there will be almost 32 million elderly, and from then on the numbers and proportion of the elderly will rise sharply as the baby-boom population matures. In addressing the health care needs of the elderly population, home health care has been recognized far and wide as an effective and economical alternative to unnecessary institutionalization. At present, there are approximately 5 percent or about 1.2 million persons 65 years of age and older that reside in various types of institutions. These statistics represent an estimated $10 million being spent in each year for institutionalization, and reports by the General Accounting Office have supported the opinions of many health care authorities that approximately 25 percent of the patient population is treated in facilities excessive to their need. The current economic realities make it imperative that we maximize the utilization of scarce Federal resources. This situation points to the need to avoid the expending of Federal resources for unnecessary institutionalization.

Oddly enough, in view of the budget reductions that we in Congress have enacted over the past few years, provisions have been enacted which expand Federal benefits for home health care. I think this is a positive sign, and I believe Congress is realizing that home health care can be a cost-effective approach in meeting the health care needs of older Americans.

Since the passage of Federal programs which allowed for patients to receive health care in-home, home health care agencies have increased from less than 500 to more than 3,000. Studies have been initiated to try and obtain data to indicate the cost savings attributed to in-home care, but no hard statistics are available. Surely, though, the desire to remain at home is a choice that many elderly persons in need of health care will choose. I applaud those home health care agencies that are making the choice of home health care an available option. I urge your support of this resolution.

H.J. RES. 332 —

Whereas organized home health care services to the elderly and disabled have existed in this country since the last quarter of the 18th century;

Whereas home health care is recognized as an effective and economical alternative to unnecessary institutionalization;

Whereas caring for the ill and disabled in their homes places emphasis on the dignity and independence of the individual receiving these services;

Whereas since the enactment of the Medicare program including skilled nursing services, physical therapy, speech therapy, social services, occupational therapy, and home health aide services, the number of home health agencies providing these services has increased from less than 500 to more than 3,000; and

Whereas many private and charitable organizations provide these and similar services to millions of patients each year preventing, postponing and limiting the need for institutionalization: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the week beginning October 4, 1981, hereby is designated "National Home Health Care Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.●

## TURKEY IS MAKING A CONTRIBUTION TO PEACE

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SOLARZ. Mr. Speaker, I would like to call to the attention of my colleagues a brief but important article which recently appeared in the New York Times entitled "Turkish Leader in Plea for Peace with Greece." In a speech delivered last week at a Liberation Day celebration in Izmir, Gen. Kenan Evren, the chief of the National Security Council and the head of state, stated that Turkey "does not claim an inch of its neighbors' land." He stressed his desire for peace with Greece, and expressed his hope that the Aegean Sea "not * * * be a sea of enmity but a sea of peace, which approaches and binds us to each other."

This conciliatory statement is just the latest in a series of positive actions that Turkey has taken in the past few months to promote stability in the eastern Mediterranean. Turkey agreed to arrangements that allowed Greece to return to NATO's military command. Turkey has also strongly encouraged the Turkish Cypriots to be forthcoming in the ongoing intercommunal talks in Cyprus. Only last month, the Turkish Cypriots came forward with an important new proposal that could prove to be the basis for resolving the differences between the Greek and Turkish Cypriot communities.

Within Turkey itself, the Evren government has taken strong and effective measures to eliminate the senseless violence and terrorism that had taken thousands of lives and caused havoc in the economy. In the more stable climate that now prevails, Turkey has made substantial progress, including reducing its inflation rate from over 100 percent to an estimated level of 40 to 50 percent. Clearly, the stronger Turkey is economically, the more able it will be to play its essential role within NATO.

Finally, I would be remiss If I did not point out the Turkish Government's commitment to democracy. General Evren and other senior Turk-

ish officials have repeatedly indicated their intention to return Turkey to civilian rule as soon as possible.

In view of all of these encouraging developments, I believe it is entirely appropriate that the administration has requested a substantial increase in aid to Turkey. Whereas the United States provided a total of $450 million in aid to Turkey in fiscal year 1981—$250 million in military aid and $200 million in economic support fund assistance—the administration has proposed that this amount be increased to $700 million in fiscal year 1982, including $400 million in military aid and $300 million in economic support fund assistance. The United States certainly has an important interest in assisting Turkey's economic recovery, and I therefore urge my colleagues to support these higher aid levels when they vote on the foreign aid bill later this month:

[From the New York Times, Thursday, Sept. 10, 1981]

TURKISH LEADER IN PLEA FOR PEACE WITH GREECE

ANKARA, Sept. 9.—Gen. Kenan Evren, the chief of state, declared today that Turkey "does not claim an inch of its neighbors' land" and wants to live in peace with Greece.

Speaking at Izmir, during Liberation Day celebrations, marking the 59th anniversary of the defeat of the Greek forces by Kemal Ataturk, General Evren said: "We would like this Aegean Sea before us, and where the two countries have common interests, not to be a sea of enmity but a sea of peace, which approaches and binds us to each other."

His speech appeared to be a signal of support for Greece's governing New Democracy Party and a warning to the Socialist opposition party, known as Pasok, in advance of Greek general elections on Oct. 18.

General Evren said that "foreign powers" and "some internal forces, even some politicians acting parallel, with the foreign powers," were responsible for actions aimed at promoting hostility between Greece and Turkey. In Turkey, the term "foreign powers" is generally a euphemism for the Communist bloc or the Soviet Union itself.●

## THE PLIGHT OF VIKTOR AND BATSHEVA YELISTRATOV

### HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. PARRIS. Mr. Speaker, I am honored today to participate in the Congressional Vigil for Soviet Jews this year in an effort that I hope will assist families and individuals who wish to emigrate from the Soviet Union to the country of their choice.

I call the attention of my colleagues to the plight of Viktor and Batsheva Yelistratov. The Yelistratovs first applied for exist visas in 1972 and were denied by the Soviet Government on the grounds that Viktor held a job with a secret classification. Viktor, consequently, lost his job as a communications engineer and he and Batsheva have been subjected to continued harassment because of their desire to emigrate to the free world.

I have written to Mr. Jack Matlock, Charg d'Affaires at the American Embassy in Moscow and to Anatoly Dobrynin, Ambassador to the United States from the Soviet Union expressing my deep concern about the emigration and political persecution of the Yelistratovs. The State Department is aware of the Yelistratov's situation and they are on their list of persons who have been denied emigration on numerous occasions. I am hopeful that through these efforts and through the efforts of this Congress that families such as the Yelistratovs will be able to emigrate freely to the Western world.

I encourage all of my colleagues to participate in this Congressional Vigil for Soviet Jews in the hope that this vigil will have a positive effect on human rights in the Soviet Union.●

## MONEY MARKET FUNDS

### HON. CARROLL HUBBARD, Jr.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HUBBARD. Mr. Speaker, in reference to the debate regarding money market mutual funds and whether or not they should be restricted, Mrs. Henry W. Bryan of 618 Kathleen Avenue, Louisville, Ky., has written to me expressing her opposition to two bills which would restrict the use of these funds. With your permission, I would like to insert in the RECORD, Mrs. Bryan's remarks on this issue now facing Members of Congress. The letter follows:

DEAR MR. HUBBARD:

Two bills which will place restrictions on money market funds have recently been introduced in the House of Representatives. They are H.R. 1916, introduced by Congressman Jim Leach, and H.R. 2591, introduced by Congressman Walter Fauntroy.

I consider these two bills anti-competitive and contrary to the American system of free enterprise. The funds make important contributions to American investors and our entire economy.

For the first time in our history, Americans of diverse economic backgrounds have equal access to the highest available money market returns. Formerly, only those with a minimum of $100,000 have had that advantage. Isn't this economic discrimination?

The funds are a great incentive to save money and are inflation fighters, especially for widows with modest estates such as I. Over $100 billion invested in money market funds contributes to meeting America's capital needs. Why take this away?

I do not have a lobby as do the banks and saving and loan associations. But, I am one of the approximate 6 million Americans who are angry and frustrated by the influence of the powerful lobbies in Washington.

Please use your influence to prevent these proposed bills from being adopted.

Sincerely,

(MRS. HENRY W.) FRANCES S. BRYAN.●

## USDA KIDDIE CUISINE

### HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. FORD of Michigan. Mr. Speaker, the budget reconciliation process forced us to make some very difficult choices. One of the most far-reaching of those was carried out by the House Committee on Education and Labor in slashing the authorizations of many of the child nutrition programs. The summer cuts have brought about accelerating costs forcing local schools to charge as much as $1.20 per lunch. Now, to bring about still more "savings," the administration is proposing a regulatory plan of reduced portion sizes and diminished dietary standards. While I can support a child nutrition plan which gives local school districts more flexibility, I do not think it should be instituted at the expense of our children's health.

I am looking forward to participating in the debate now before the Subcommittee on Elementary, Secondary, and Vocational Education on these meal pattern changes. It is my hope that the administration will be willing to accept the subcommittee's recommendations on the regulations which are worth keeping and those which would merely swap economic advantage for sound nutritional standards.

Ellen Goodman outlines very well the dilemma we face in our review of these proposed standards. Her article appeared in the Washington Post on Tuesday, September 15, 1981, and it appears below.

REAGAN'S NOUVELLE CUISINE FOR KIDS

(By Ellen Goodman)

BOSTON.—The luncheon was arranged rather neatly. A discreet hamburger sat on half a roll. Six longish French fries lay beside it. Nine green grapes lolled nearby. To the side stood half a glass of milk.

It sounded to me like some forlorn menu for overweight executives. But it wasn't. It was, rather, a prototype of a school lunch, or what may remain of it, after the budget cuts.

We are about to see the full-fledged Nouvelle Reagan Cuisine for Kiddies. Higher costs and smaller portions. No stars, please.

As you may have heard, dinner with the Reagans in the White House has definitely improved these days. When the Reagans dine with the Anwar Sadats on the federal tab, they eat smoked fillet of mountain trout, a roast supreme of duckling a l'orange, a touch of wild rice with raisins, a bit of Brie and chevre, followed by the palate-cleansing melon glacé and fresh raspberries.

But under Reagan, lunch in the school cafeteria is quite another affair: an ounce-and-a-half of meat or meat alternatives, a

half-cup of fruit and vegetables, one serving of bread, six ounces of milk. Yummy in the empty tummy.

FRAC, the Food Research and Action Centers, cooked up the lean-and-hungry lunch described above, by carefully following the new proposals that have come out of the Department of Agriculture.

According to FRAC's Nancy Amidei, the Agriculture people were assigned the task of cutting fat from the budget "without impairing the nutritional value of the meals." But they ended up cutting food.

Under the old requirements, more food was served to older grammar-school kids than younger ones. But under the proposed new rules, the 11-year-olds will get the same amount of meat and vegetables as the 5-year-olds. Even the bread and milk are cut, from eight pieces a week to five, from eight ounces a day to six.

The other changes in rules are even more curious. Ketchup and pickles now qualify as vegetables; tofu (try that on your second grader) now qualifies as a meat; and any school can put its eggs in a cake instead of on a plate.

According to Amidei, the lunches would supply less than one-third of the daily nutritional value and only 17 percent of the calories needed. "We feel this is compromising children's health," she says flatly.

The motto of the Nouvelle Reagan Cuisine—"Eat Light and Like It"—would be fine for the statesmen passing up the Brie. But the Department of Agriculture's own study shows that poor kids get anywhere from one-third to one-half of all their daily nutrients from school lunch.

Of the 27 million children who eat school lunches, 12.6 million get a free or reduced rate. If the meal shrinks just when food stamps are being cut and food prices are on the rise, these kids can't make up the difference at home.

There is also a social effect of the Nouvelle Reagan Cuisine, Middle-class parents, who pay the full amount for lunch, are going to balk at paying more for a snack. As a 10-year-old visitor to FRAC said when she spied the prototype meal, "Yuk! Where's the rest of it?"

In our house, after the price went up last week, the brown bags came back. But if these proposals are approved, there could be a national two-track lunchroom, with only the poorest students going through a highly stigmatized free-lunch line. The end result of that is higher costs, fewer schools in the system, and a program goes on the skids.

There is the taste of irony sprinkled over all this food talk. The lunch program started back in 1946 because of the military. During World War II, the draft board had to reject an enormous number of men suffering from poor nutrition. When the School Lunch Act was passed in 1946, they wrote: "It is declared to be the policy of Congress as a measure of national security to safeguard the health and well-being of the nation's children."

Today we have another administration that is worried about the Army, worried that an Army of illiterates will end up operating sophisticated multi-billion dollar military equipment. But as Amidei notes, "At this rate we'll have an Army of anemic illiterates."

If the Reagans will pass me a glass of their Domaine Chandon Blanc de Noir, I'll drink to that.●

## HONORING THE LOS ANGELES BICENTENNIAL

### HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. MOORHEAD. Mr. Speaker, I want to thank the gentleman from California for calling this special order on behalf of the city of Los Angeles and its residents as the celebration of the city's 200th birthday comes to an end.

As a native son of the area, I have a great affection for the city and an active interest in its continued growth and prosperity. Los Angeles is a grand community with a history as festive and colorful as the city is today. No metropolis in the Nation can boast of the qualities that make Los Angeles so special.

The city of Angels is unique in its people, in its industry, in its geography, in its climate and in its lifestyle. Throughout its life, this unique mixture of traits has made it a romatic and magic place.

I believe as we look toward the beginning of the city's third century, we should commit again to working together in a spirit of charity and optimism for the future well-being of the city and its residents. Failure to do so would be to abandon those virtues of the past that made the city what it is today.

Again, I want to thank the gentleman from California, Mr. DIXON, for inviting me to participate in this special order honoring the Los Angeles Bicentennial.●

## DIABLO CANYON

### HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SHUMWAY. Mr. Speaker, the current attempt to occupy Diablo Canyon reflects the well-meaning but misguided concern of certain environmentalists and other antinuclear residents. The time has come to distinguish between emotional reaction and logical facts.

As the nuclear energy debate drags on—and the energy crunch continues—California faces a potential dilemma. On the one hand, we have our insatiable energy needs which, if not addressed in timely fashion, will affect our economic well-being. On the other hand, our concerns for the environment and human life have led us to demand that every justifiable safety precaution be taken before allowing a nuclear reactor to operate. Have these sometimes competing considerations been resolved correctly in the case of Diablo Canyon? I think so.

As we examine the issues responsible for this dilemma, let us first address the safety factor. The NRC has reviewed almost every conceivable aspect of the plant during its 8-year review. Before approving the plant, the Commission conducted numerous studies and public hearings on the effect of the nearby Hosgri Fault. Incredibly exhaustive records and inquires have been made regarding earthquake activity over the past million years, and the plant has been built to withstand the greatest possible quake. The hearing record alone on this plant is over 100,000 pages.

The need for this plant is apparent upon an examination of the economic issues involved. Consumers in California already pay electrical bills 30 percent higher than the national average, primarily because of our heavy dependence on oil. The operation of the two Diablo Canyon units would eliminate the use of 57,000 barrels daily and would reduce consumers' electric bills $5 billion in the next 5 years alone.

Further delays, as we examine what undoubtedly would be a series of unending questions raised by those who are opposed philosophically to the use of nuclear power, could have serious adverse consequences.

The Department of Energy estimates that electrical reserve margins will be extremely low throughout the West for the remainder of the decade. Even with Diablo Canyon, a drought which affects our hydroelectric capacity could very well mean that our lights will not work. This possibility already has made industry extremely skittish about settling in California. Those companies already here, especially in the Santa Clara Valley and bay area, are expressing increasing concerns over the availability of adequate electrical supplies in the future. If something is not done to alleviate these concerns, we could be facing an economic and social disaster.

When we recognize that the safety issues have been thoroughly examined by leading authorities and contemplate, if we can, the consequences of inadequate electrical supplies, we cannot allow a small group of antinuclear activists to thwart illegally the operation of a plant which is necessary for the greater good.

Diablo Canyon is in compliance with the current rigidly high safety standards and it can save us huge sums each year. Let's get on with it.●

## DANGER OF OPPOSING SOUTH AFRICA'S RUGBY TEAM

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. McDONALD. Mr. Speaker, the campaign of protest against sporting events that involve South African athletes demonstrates the depth to which South Africa's enemies stoop. Do we really expect to promote peaceful change and true progress in a friendly country by taking aim at its rugby football players? Those who support the campaigns to isolate South Africa are not supporting true progress; they are supporting knowingly or unknowingly, the foreign policy goals of the Soviet Union.

Therefore, I oppose this motion to condemn the rugby tour and would draw your attention to the fact that the campaign against the American appearances of the Springbok team is being coordinated by some of the most active support groups for the Soviet-trained revolutionary terrorists in South Africa.●

## SUPPORT FOR HAIG'S TOUGH STANCE

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. LAGOMARSINO. Mr. Speaker, a recent editorial in the Lompoc Record, a respected newspaper in my district, expresses its support for the tough stance Secretary of State Haig adopted for United States-Soviet relations. As the editorial points out, Secretary Haig laid out a specific, and meaningful, approach for improving relations between our two countries. As the Lompoc Record states, it is "A policy of reason."

A POLICY OF REASON

Only supporters of the concept of "Soviet hegemony" can rationally take issue with Secretary of State Alexander Haig's program for improving relations between the United States and the Soviet Union. That does not mean that there will not be many who attack it. There is seldom much rationality these days in foreign affairs. Too often such emotions as fear, greed and pride prevent rational thought.

General Haig offered the Soviet Union four "incentives" which would result from changes in its international wheeling and dealing. The incentives include a reduction in world tensions, a benefit to all nations; diplomatic alternatives to the pursuit of violent change; fair and balanced agreement on arms control; and the possibility of western trade and technology.

From the Kremlin, he said, the U.S. wants "greater Soviet restraint on the use of force . . . greater Soviet respect for the independence of others . . . the Soviets to abide by their reciprocal obligations, such as those undertaken in the Helsinki accord."

"These are no more than we demand of any state," Gen. Haig pointed out, "and these are no less than required by the United Nations Charter and international law."

He also pointed out that "the most persistent troubles in U.S.-Soviet relations arise from Soviet intervention in regional conflicts, aggravating tensions and hampering the search for peaceful solutions. Unless we can come to grips with this dimension of Soviet behavior, everything else in our bilateral relationship will be undermined . . ."

Although our Secretary of State adopted a tough stance in his speech, which had been reviewed prior to delivery by both the White House and the Department of Defense, he called no names and made no unsupported charges. In the long run and after finding face-saving ways to appear to the world, the realists in the Kremlin can live with the foreign policy announced for the U.S. Let's hope that there are still realists there.●

## REVENUE RULING 81-216

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DOWNEY. Mr. Speaker, today I am introducing a bill which will delay the implementation of IRS Revenue Ruling 81-216 which severally limits the use of multiple lots of small issue revenue bonds of less than $1,000,000. Issues structured in this manner are used in my State and others to provide loans for small- and medium-sized businesses. This translates to more jobs. With interest rates as high as they are, I do not want to cut off any mechanism which may help these businesses.

I want to make it clear, however, that this bill is being introduced to provide time for wider discussion of the issue. I want to preserve the good programs but I do not want to protect abusive ones. I know of successful programs in New York State, New Jersey, Connecticut, and Missouri. These would be disallowed under the ruling.

My intent is to provide an opportunity for Members to enter the debate, to find out what programs exist in their States, and for Congress to discuss the issue further with the Internal Revenue Service before valuable jobs programs are eliminated.

The IRS has drawn the ruling too widely. During the moratorium period prescribed by this bill, I am sure we will be able to work out a more equitable rule which will protect public purpose issues and curb those motivated only by greed for they may indeed exist.

I look forward to receiving cosponsors from the many States affected by this unwise revenue ruling.●

## ROULHAC HAMILTON

### HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WYLIE. Mr. Speaker, the death of Roulhac Hamilton was noted in the Washington Post today, which reminded me that I want to express publicly my personal feeling of loss on the passing of a good friend and my former, very valued employee.

Roulhac Hamilton was one of the truly great newspaper writers I have ever known. He could take what would otherwise be a very routine news story and make it seem exciting, momentous, and informative. One such story comes to mind when our daughter Jackie represented Ohio as its Cherry Blossom Princess. His colorful reporting of the various events including the selection of the Ohio float as the best in the parade that year was creative and meaningful, especially to our family.

After Roulhac's retirement from the Columbus Dispatch in 1976, I asked him to come to work for me as my press aide. It was a rare privilege to work with a man as talented as Roulhac and one who was certainly skilled in his profession.

Following his graduation from the University of North Carolina in 1932, Roulhac worked as a reporter for the Raleigh, N.C., News and Observer and for the Charleston, S.C., News and Courier. With the outbreak of World War II, he enlisted in the Marines and became a combat correspondent, filing stories from such noted battle sites as Guam and Iwo Jima before being transferred to Tientsen, China.

At the conclusion of World War II, Roulhac came to Washington, D.C., where he worked as a correspondent for a number of out-of-town newspapers and radio stations. In Washington, he established Hamilton-Means Associates, an independent news service. When the Columbus Dispatch set up a Washington bureau, Roulhac was hired as bureau chief and chief correspondent.

Following his retirement from the Dispatch in 1976, Roulhac agreed to join my staff. He displayed a remarkable writing ability and acute insight into congressional affairs. Roulhac worked for me until deteriorating health made it impossible for him to continue his duties in May of this year. He died on Friday, September 11 in the National Orthopaedic Hospital in Arlington, Va.

Roulhac and his wife, Lillian, became good friends of my wife, Marjorie, and me. Roulhac will be missed by us. We extend our heartfelt sympathy and condolences to his lovely wife, Lillian, and to his daughter, Fay Hamil-

ton Gwynn of Decatur, Ga.; his brother, Dr. Alfred T. Hamilton of Raleigh, N.C.; his grandchildren, John H. and Stacy Ann Gwynn; and his several nieces and nephews.●

## CONDOMINIUM CONVERSION FUELS INFLATION

### HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ROSENTHAL. Mr. Speaker, I rise to bring to my colleagues' attention another example of how the proliferation of condominium conversion contributes to the inflationary cycle in the housing market.

On September 16, 1981, the Washington Post reported on the effects of a Virginia State law which mandates that real estate be assessed, for property tax purposes, according to its highest and best use. Thus, under this law a rental apartment complex would be assessed at its higher market value as a condominium, rather than as a rental building.

This law, in effect, provides new incentive for building owners to convert rental buildings as well as to increase the cost of converted units and continue the displacement of those persons who do not have either the financial means or the inclination to purchase a condominium apartment. Alternatively, if the owner refuses the temptation to convert his building, his only recourse is to increase his tenants' rents to cover the higher tax assessments. Either way, consumers lose out to escalating inflation.

The disastrous effects of this particular State law illustrates the absolute necessity for Federal regulation of the conversion fever now spreading throughout the country. I urge each of my colleagues to closely examine the two bills I recently introduced to remedy the national crisis caused by condominium-cooperative conversions: H.R. 3840 and H.R. 3841.

The Washington Post article follows:

[From the Washington Post, Sept. 16, 1981]

APARTMENT TAXES SOAR TO CONDO RATES IN ARLINGTON

(By Celestine Bohlen)

Arlington has become the first Washington area municipality to tax most rental apartment complexes at higher condominium values, making it still more costly for landlords to resist the profits of condominium conversion.

The change, which is mandated by state law, has increased assessments on some Arlington rental apartments between 30 and 47 percent, compared with an average 18 percent rise in county assessments this year. Some landlords said they will take the county assessor to court, while county politicians who said they are powerless to stop the trend are considering going to the state legislature for special tax breaks for apartment owners.

The condominium craze that has swept Washington and its suburbs in recent years has created a serious housing problem in many communities, as elderly and moderate-income tenants find themselves forced out of their apartments. Maryland, Montgomery County in particular, has enacted legislation to protect tenants. But in Virginia the power of local government is limited, and relatively few restrictions are placed on condominium developers. In Arlington, which has so far lost 20 percent of its rental stock to condos, the new higher assessments come at a particularly difficult time.

"It's causing a serious problem," said County Board Chairman Stephen Detwiler. "It can only encourage landlords to sell to condo converters. It may not be the only factor, but it is one more contributing factor."

"We feel that those projects that wish to continue renting are being penalized," said Elliott Burka, manager of the Fillmore Gardens, where the assessed value jumped from $7.9 million to $11.2 million.

"They either have to pass it on to the tenants and raise rents or convert," said Hugh Cregger, attorney for the Fillmore. "It's Catch-22."

The sudden assessment increases came about this year after the Arlington assessor began to appraise apartment complexes on the basis of prices paid in recent years for buildings bought for condominium conversion. The traditional method of valuing rental property relies on the income produced by rents.

By relying on recent sales data, the assessor's office insisted it is conforming to a state law requiring that property be assessed according to its "highest and best use." And if a market is created that directly tests the value of a property—such as a concentration of building sales for condominium conversions—then the assessor is obligated to follow the market trends. The apartment assessments are based on the market value of a comparable building about to be sold to a condominium developer.

So far, the phenomenon of skyrocketing increases in apartment values is limited to Arlington. Other assessors in Washington and its suburbs said they still rely on the income-producing method of calculating the value of rental apartments. "It's our policy to value on current zoning and use, not what it could be," said Robert L. Rudnik, state supervisor of assessments in Montgomery County.

But several assessors said they might be forced to appraise apartments by comparable sales if their communities experience the same rush of condominium conversions seen in Arlington. "If apartment buildings in my region are being gobbled up for condominiums, then that's going to be my market," said Fred Byrne, senior appraiser in the Alexandria assessor's office, where already some smaller apartment buildings are valued according to recent sales.

"It's a disastrous course to take," said John O'Neill, vice president of the local Apartment and Office Building Association. "What [the Arlington assessor] has done is open the door, and sooner or later all assessors are going to pass through the same door."

Attorneys for the landlords oppose Arlington's approach, arguing that rental properties are not actually comparable to buildings sold for condominium conversion. They point out that not all apartments are legally or economically ready for conversion.

"In treating every apartment house as a condo [the assessor], is forgetting that if everyone of these properties came on the market at the same time then you couldn't get any price for them at all," said Gilbert Hahn, Jr., attorney for Charles E. Smith, the developer of Crystal City and a major Arlington landowner who is appealing the new assessments on seven large buildings.

But the more serious question—apparently out of the hands of assessors and local government—is the question of penalizing landlords who have not converted their buildings to condominiums, particularly those who now provide the remaining moderate-income apartments.

"This has a tendency to encourage just the thing that a government oughtn't to encourage," Hahn said, "If people have to pay real estate taxes as though they were condominiums, then there's a tendency to say, 'Fine, let's make them condominiums.'"

For most of the landlords hit by high assessments, the actual dollar increase in the tax bill this year is low, cushioned in part by a drop this year in the county tax rate from $1.12 to $.96 per $100 valuation.

For tenants, the higher tax bills have meant only small rent increases. For example, the higher taxes were responsible for about $3.10 of an average $50 rent increase at the 1,318-unit Barcroft Apartments, according to the tax assessor's calculations. Although Barcroft president Thomas DeLashmutt said the added tax burden will not be the deciding factor on the future of the complex, it doesn't help.

"I understand the assessor's position. They're just following the law," said DeLashmutt, "but what concerns me is what happens next year—when they look at the prices apartments are going for this year."

The dilemma posed by taxing rental apartments at condominium prices is comparable to the problem of taxing farmland around high development areas. In the early 1970s, Virginia and other states moved to protect farmland from higher assessments by allowing farmers to pay lower taxes, provided they agreed not to develop the land.

Arlington is not looking at similar remedies for apartments that agree to stay in the rental market. "We all recognize that garden apartments are facing a squeeze," said County board member John Milliken. "We would like to find any way we can to encourage their retention as garden apartments."

"We have a community goal of preserving moderate-income housing," said County Board member Ellen Bozman, "That has to be highest on our list."●

## GARY HYMEL

### HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. HORTON. Mr. Speaker, it is a pleasure to join my colleague from Louisiana, Congresswoman BOGGS in paying tribute to one of the House's most dedicated and effective staff members, Gary Hymel.

Keeping the wheels of Government oiled, and maintaining the steady and predictable flow of legislation is a task virtually beyond the ability of any one

single individual. Having said that, I think we can all agree that Gary came very close indeed to accomplishing this in his many years of service. As a key member of the majority whip's office, the majority leader's office and finally the Speaker's office, Gary Hymel demonstrated an uncanny ability to make this institution run "relatively" smoothly. It was with regret that we heard of his decision to leave the Hill. Nevertheless, I join my many colleagues in wishing Gary well.●

## IN MEMORY OF FORMER CONGRESSWOMAN CATHERINE NORRELL

### HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 15, 1981*

● Mr. LONG of Louisiana. Mr. Speaker, I want to join the numbers of my distinguished colleagues in commemorating the truly remarkable life of Catherine Dorris Norrell.

It was in her capacity as Deputy Assistant Secretary of State for Cultural Affairs under President Kennedy that my wife, Cathy, and I first had the pleasure of meeting Catherine Norrell. It was a privilege and a delight to know her. The gift for valuing others runs in the Norrell family, and our friendship with Catherine's daughter, Judy, a lawyer of distinction, has grown stronger over time.

What a bouquet of talents Catherine Norrell was. It is inspiring just to look over the long list of her accomplishments. She was not only a former Member of Congress from Arkansas, she was a musician, a teacher, a college administrator, and a high-ranking official of the State Department. She was a past Worthy Grand Matron of the Order of the Eastern Star in Arkansas, and a member of the Honolulu board of directors of the Salvation Army. She was active in the Baptist Church, the Women's National Democratic Club, the Business and Professional Women's Club, the Foreign Service Officers Association, the Democratic Wives Forum, the Former Members of Congress Club, the Soroptimist Club, and was president, at the time of her husband's death, of the Congressional Club.

William Frank Norrell was a Member of Congress from Arkansas from 1939 to his death in February 1961. During this 22-year period, Catherine served in her husband's office as his staff assistant. When a special election was called after his death, Catherine Norrell's experience, enthusiasm, and capabilities won her the right to sit in her husband's seat in Congress by a hands-down, 2-to-1 margin of votes.

Congresswoman Norrell put herself solidly behind the equal rights amendment by becoming one of its earliest cosponsors. She also served on the House Post Office and Civil Service Committee.

She decided not to seek reelection in 1962. The House's loss was President Kennedy's gain, for in 1963 he appointed her Deputy Assistant Secretary of State for Cultural Affairs. The country she loved would continue to benefit from Catherine Norrell's unique combination of gifts.

In 1969 she retired as director of the State Department Reception in Honolulu, a post she had been appointed to by President Johnson. While there, she gained another distinction by being elected the first woman deacon in the Baptist Church in Hawaii. The last portion of her rich working life was devoted to chairing the music department at Arkansas A. & M. College.

Catherine Norrell's long and illustrious life could serve as a model for all of us, men and women. When someone we love and admire dies, as Thornton Wilder has written, the highest tribute we can by them "is not grief but gratitude."●

## INTEREST RATES

### HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. RAHALL. Mr. Speaker, yesterday, we witnessed another episode in what seems to be the never-ending game of economnic hot potato, as Federal Reserve Board Chairman Paul Volker said, that high interest rates have stayed at near record levels because the financial markets are reacting to the harsh reality of continuing inflation and large Federal budget deficits.

While the wizards of Wall Street and the Reagan administration take turns at blaming each other for this current economic crisis, every segment of American society is facing hardships due to the pressures of high interest rates.

In the first 9 months of this year, over 10,000 businesses have failed and closed their doors, the automobile industry has shown few signs of recovery, and activity in the housing industry is far below normal.

It is no surprise that the business community foresees problems for the Reagan economic program, because their share to the Federal revenue base is declining.

In 1950, 30.5 percent of Federal revenue came from corporate income taxes. It fell to 16 percent in 1970, and 12.4 percent this year. By 1986, it will drop to 8.1 percent, due to the administration's tax cut plan.

The promises of lower inflation, higher defense spending, and reduced taxes do not equal economic prosperity, instead they equal high interest rates and further economic hardship for the American people.

It is time for the administration, the Federal Reserve Board, and the business community to stop this game of economic hot potato. The American people will not be fooled by this ploy, and they are seeing proof that the arithmetic of Reaganomics just does not add up.●

## ROLE OF GOVERNMENT IN SOCIETY

### HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DANIEL B. CRANE. Mr. Speaker, I recently received the following letter from the Reverend Jerry L. Klug, pastor of Grace Lutheran Church, Paris, Ill. At a time of controversy over budget cuts and the role of the Federal Government in society, his comments cut through the rhetoric and express what I have found to be the overwhelming sentiment of the residents of Illinois' 22d Congressional District (and, I suspect, most Americans).

I urge my colleagues to turn a moment from the professional pressure groups and special interest lobbies to listen to a man who speaks for millions:

GRACE LUTHERAN CHURCH,
*Paris, Ill., July 13, 1981.*

DEAR CONGRESSMAN CRANE: For a long time I have felt that the debate over cutting the budget versus a responsible social program is futile. It has become obvious that we can no longer afford free government programs. What I mean is that people quite naturally feel that government grants to help with local projects, and government aid for the needy are funds which reduce the amount we would have to spend on a local level. The truth is that when our tax money goes from the local to the federal through the levels of government and back to the local it costs us more than we can afford for the free program.

May I suggest that some thought be given to establishing local government units (perhaps by counties) to take over whatever federal programs that would be feasible. Instead of a tax cut, allow us to send a portion of our taxes directly to the local unit.

The advantages of such a system would be the continuation of needed social programs with less framework, more flexibility, and less abuse. The result would be less cost. We can no longer afford "free" federal aid, but we can afford to do these jobs ourselves. More responsibility will make better citizens.

Thank you,

JERRY L. KLUG.●

## AMERICAN LIBERALS CAN TAKE CREDIT FOR ELIMINATION OF HUMAN RIGHTS IN NICARAGUA

HON. JOHN M. ASHBROOK
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ASHBROOK. Mr. Speaker, I can well remember the criticism launched at the Somoza government in Nicaragua by some of my liberal friends in this body. Those critical voices are strangely silent now that the Marxist Sandinistas have seized control of the Nicaraguan Government. Have all of those human rights violations ceased since the Marxist takeover? Does freedom now reign in Nicaragua? Hardly.

My good friend, columnist M. Stanton Evans, brings us up to date on the human rights situation in Nicaragua in an excellent article published last week in the national conservative weekly Human Events. He recalls those days during the administration of President Carter when liberal leaders in this Congress were fighting relentlessly to hand over $75 million in American tax dollars to the new Marxist regime. I can remember those days, too. I was one of those Members—a minority at that time—who opposed that emergency aid. I did not believe, nor do I believe today, that the American taxpayers should be forced to subsidize Marxist dictatorships. Mr. Evans writes:

While all this was going on, we now know the Sandinistas were systematically slaughtering prisoners, extinguishing freedom of the press, setting up brainwashing centers manned by Cubans, and locking up thousands of political opponents. That all of this occurred is now denied by virtually no one, including Karen de Young of the Post—by all odds the Sandinistas' chief promoter in the major media.

Mr. Evans points out that systematic violations of human rights continue to occur in Nicaragua and that Cuban Communist influence remains very strong. Since my liberal colleagues were so quick to point out the faults of the pro-American Somoza government which preceded the Sandinista takeover, I think it only appropriate that they take the time to read Mr. Evans' excellent article.

The article follows:

[From Human Events, Sept. 12, 1981]

SANDINISTAS DESTROY "RIGHTS" IN NICARAGUA

(By M. Stanton Evans)

Whatever happened to "human rights" in Nicaragua?

In the days of Anastasio Somoza, there was a continuing uproar in the American government and media about his asserted violations of basic liberties. Because of this alleged repression, the Carter Administration cut off aid to the regime, making no concessions for the fact that it was fighting tooth and nail against a Castro-supported Marxist revolution.

Thanks largely to that cutoff, the Marxists came to power, installing the present Sandinista government. And, immediately, the subject of "human rights" in Nicaragua was no longer fashionable. The Washington Post and others who had backed the Sandinista takeover told us "democracy" was being restored in Nicaragua, while the Carter Administration and its congressional supporters moved to give the Sandinistas $75 million of U.S. money.

While all this was going on, we now know, the Sandinistas were systematically slaughtering prisoners, extinguishing freedom of the press, setting up brainwashing centers manned by Cubans, and locking up thousands of political opponents. That all of this occurred is now denied by virtually no one, including Karen de Young of the Post—by all odds the Sandinistas' chief promoter in the major media.

In a recent write-up of an OAS report on human rights in Nicaragua, Miss de Young was compelled to note the organization's finding of "summary executions" by the Sandinistas, though burying this deep in her story and otherwise trying to downplay its meaning. Her lead managed to attribute "summary executions" not to the incumbent Sandinistas but to the departed Somoza, and she hastened to alibi the Sandinistas' killing with OAS assertion that they occurred in a period of turmoil when the government wasn't to be held accountable.

Miss de Young would have us believe the Sandinista violations weren't too bad and that, if they were, have gotten better. Other authorities, including former officials of the Sandinista government, have a different version. One such is Jose Francisco Cardenal, former vice chairman of the National Legislative Council under the revolutionary government. He escaped from Nicaragua last year because, he says, he could no longer stomach the openly communistic nature of the regime, its suppression of press freedom, or its denial of basic human rights. (See Mr. Cardenal's comments in the August 29 Human Events.)

Contrary to the view that killings and repression were mere aberrations in the Sandinista past and that things nowadays have greatly improved, Cardenal charges that torture, imprisonment and political killing in Nicaragua continue unabated. At a recent seminar sponsored on Capitol Hill by the Council on Inter-American Security, he stated that more than 100 political prisoners were slaughtered in Nicaragua as recently as this June, and that the killers were publicly lauded by the commmander of the army.

Similar testimony has come from Nevardo Arguello, another former Sandinista offical who served in the Nicaraguan Department of Justice and escaped from the country in February. He told the CIS publication West Watch that torture is widely practiced in Nicaraguan prisons, that there are thousands of political prisoners, that the country has become a Communist despotism run by the agents of Fidel Castro.

Asked if there were torture under the Sandinistas, Arguello answered:

"Torture? Yes, there is torture. The Human Rights Commission verified the practice of torture in Nicaragua, and I have personal knowledge of it. Torture takes place in camps and in prisons. I talked to many prisoners, because one of my duties at the ministry was to visit prisons. I have witnessed torture, but I will not mention the names of persons who were tortured, because it might cause the authorities to abuse them even more."

"Repression and torture" have also been charged to the Sandinista account by Jose Esteban Gonzalez, who heads the Nicaraguan Commission on Human Rights referred to by Arguello. Gonzalez says there are 8,000 political prisoners in the country, 800 people who have disappeared, and hundreds of cases of killing and torture. He disputes the Sandinista alibi that the executions occurred because of postrevolutionary turmoil. "These executions were not a product of popular fury," he said, "but rather were carried out in prisons whose chiefs are perfectly identifiable."

For making these statements, Gonzalez was imprisoned by the Sandinista government and released only after he allegedly signed a letter retracting the charges and "recognizing his errors." (Gonzalez, however, denies that he has retracted anything.) From all of which it would appear that human rights in Nicaragua are a little less secure today under the Sandinistas than Miss de Young and others of her ilk would have us think.●

## NEED FOR NURSES

HON. BARBARA A. MIKULSKI
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Ms. MIKULSKI. Mr. Speaker, at a time when national indicators point toward a critical nursing shortage and a growing demand for adequate health care services, nurse educators, and their colleagues are striving to increase the numbers of registered nurses to meet anticipated needs, to maintain quality in a tight economy, and to prepare their graduates for employment in increasingly complex and professionally rigorous practice settings.

Associate degree nursing programs in the Nation's 50 States, trusts, and territories, produce the largest number of new nursing graduates. This year, 1981, marks the 30th academic year of associate degree nursing programs in the United States. To celebrate the event, the Association of Community and Junior Colleges and the National League for Nursing's Council of Associate Degree Programs have undertaken a nationwide project. The project, funded in part by a grant from the W. K. Kellogg Foundation, focuses on recurring issues which will have an impact on the future of the Nation's health care delivery system. I welcome this opportunity to call attention to the project and to extend my best wishes to all associate degree nurses working to improve the delivery of bedside nursing care.●

## SOLIDARITY DAY

### HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DICKINSON. Mr. Speaker, with Saturday marking the advent of AFL-CIO President Lane Kirkland's so-called Solidarity Day, this seems an appropriate occasion to comment on the issue of compulsory union dues used for partisan political purposes.

The news media reports the union has monopolized most of the private chartered buses in the Northeast to bring rally goers into Washington. Once in the city, the marchers will be able to ride free of charge on Washington's Metro System, which was leased for $65,000 by the AFL-CIO. If the AFL-CIO's several months of planning for this 1-day event is any indication of the time and resources union officials use to make their political statements, think of the moneys they pour into election campaigns.

No doubt largely underwritten by forced union dues, the September 19 rally is supposed to demonstrate widespread union member opposition to the administration's budget—despite the fact union rank and file were almost evenly split in their choice for President last November. Lost amidst Mr. Kirkland's antiadministration rhetoric is the reality that millions of the AFL-CIO's members staunchly support this administration and its economic program.

Every year millions of American workers are forced to support political candidates and causes which they might otherwise oppose. They are compulsory union members—workers who would be fired from their jobs if they did not pay forced dues or fees. Nonetheless, according to a March 1980, survey by the highly respected Opinion Research Corp., 71.5 percent of the American public, including 64.7 percent of union members, oppose forced dues politicking.

Legislation recently introduced in the Senate by JESSE HELMS (S. 1550) and which I introduced in the House (H.R. 4351) would respond to this mandate by prohibiting the use of compulsory union dues for political purposes. These bills would close the current loophole in the Federal Election Campaign Act which allows union officials to use compulsory dues for "in-kind" political services such as mass mailings, phone banks, precinct visits, and get-out-the-vote drives. Of all private organizations in our country, only labor unions can take advantage of this special privilege. That is why I urge my colleagues to give their active support to S. 1550 and H.R. 4351 by cosponsoring the bills. Enactment of legislation to prohibit the use of compulsory dues to subsidize union officials' pet candidates and ideological causes is a logical step in responding to the wishes of union members and the American public, and insuring the voluntary nature of each person's participation in the political process.●

## H.R. 3300—LEGISLATION TO REFORM EXISTING FEDERAL FIREARMS LAWS

### HON. HAROLD L. VOLKMER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. VOLKMER. Mr. Speaker, earlier this year I introduced H.R. 3300, a bill intended to reform some of the most abused aspects of the Gun Control Act of 1968. Since that time over 160 Members of the House have chosen to join as cosponsors; the Senate version of this legislation, S. 1030, has been cosponsored by well over half the Members of that body.

Last week, the gentleman from Illinois inserted in the Extensions of Remarks a memorandum critical of this legislation, drafted by two junior associates at the firm of Wilmer, Cutler & Pickering. The analysis showed little comprehension either of the history of the Gun Control Act, the abuses which necessitate this bill, or the practices at which it is aimed.

Before demonstrating that the memorandum's criticisms are simply invalid, I would briefly point out the activities which provide the basis. The Gun Control Act of 1968 was hurriedly drafted and enacted as three pieces of legislation on two different dates. It contains no small number of idiosyncracies which have let it be used to oppress honest and legitimate citizens, and which are of no assistance against the real criminal. For instance, a person can be convicted on the most technical charge, for an honest mistake, and be subject to 5 years' imprisonment, plus convicted felon status. A private citizen can sell a firearm to a criminal, but not to his brother, with a clean record, who lives in a neighboring State. Persons may be prohibited possession of a firearm but not be prohibited to buy it; while a State conviction on a felony removes the right to own a firearm, a full pardon does not restore any such rights.

These legislative slips have harmed our citizens gravely. Three Senate hearings and one House hearing have documented the severity of the abuses. Enforcing agents, empowered to charge honest, nonviolent citizens for technical violations, have done so with abandon, ignoring the harder cases against dangerous felons. Barely 10 percent of Federal gun arrests are on charges of felon in illegal gun possession, or knowing sale to a felon. The average value of confiscated guns is $116—and agents have refused to return seized collectors' items even after the owner was found not guilty of all charges. It is time we stopped these abuses, and that is precisely what my bill is intended to do.

Against these very real abuses, so carefully documented, the memorandum repeatedly poses what law students hear described as "fantasy hypotheticals." These may be suited for demonstrations of wit and sophestry, but hold little weight in the real world.

I. THIS BILL WOULD FOCUS ENFORCEMENT EFFORTS ON ILLEGAL, NOT LEGAL, FIREARM TRANSFERS

The Gun Control Act's sections dealing with interstate sales were intended to prevent persons from purchasing firearms across State lines in a way that circumvented gun laws in their State of residence. All early drafts of this law would have outlawed such transfers where the transfer would have broken the laws of the purchaser's place to residence. All early drafts of this law would have outlawed such transfers where the transfer would have broken the laws of the purchaser's place of residence. This was a rational use of Federal power to assist local law enforcement. Very late in the history of the 1968 law, either in haste or because suitable language could not be agreed upon, this was shifted to a general ban on all purchases from out of State—even where the sale would violate no State law. This made little sense; at most, 10 States had purchase requirements which could be circumvented, yet all 50 States were put under the ban. A hodgepodge of exceptions were provided—some guns could be bought, only if the State of sale was physically contiguous to that of purchase, for instance. My legislation replaces that with a simple and concise rule: No one may purchase a gun from a resident of another State unless the transfer would violate neither the laws of the State where the sale occurs and those of the State in which the purchaser resides. If the transfer would violate the laws of either the place of sale or the place to which the gun is to be taken, it remains a Federal felony.

The memorandum raises two objections. First, it claims permitting such transfers is unworkable since the seller cannot be expected to know the law of the other jurisdiction. The authors are apparently unaware that the Secretary of the Treasury, pursuant to a mandate contained in the Gun Control Act, compiles such laws into a volume entitled "Your Guide to Firearms Laws," a copy of which is provided every licensed dealer and updated annually.

Second, the memorandum argues that enforcement of bans on sales to "prohibited persons" will be more dif-

ficult. Its argument here is not capable of rational analysis. The authors apparently agree that a dealer making such sales could still be prosecuted. Indeed, H.R. 3300 would retain current provisions of law here. But then they seem to argue that it would be hard to prosecute private persons who make such a sale, were my bill passed, since they might not know they were dealing with a prohibited person. Perhaps the authors of the memorandum are not aware that it is no crime right now for a private person to sell to a prohibited buyer, with the exception of a nonresident. My bill will insert such a prohibition into the law, making enforcement of such a ban possible for the first time. It cannot make prosecution of such sales harder than they would be under current law, since they cannot be persecuted under current law, period.

Additionally, the memorandum objects that allowing loan of firearms to nonresidents, "for lawful purposes" would somehow be offensive. Plainly, if the loan is in violation of the law of the place where it is made, it is not for lawful purposes and would not be permitted. The memorandum raises the strange image of "allowing an otherwise unlawful loan of a gun to a person who intends to roam the streets of New York City" for the "lawful purpose of protecting himself and his fellow citizens." I am tempted to respond that under the laws of New York City, protecting oneself from crime seems to be a crime in itself and thus no "lawful purpose," could exist and that perpetuating laws of this type seems quite agreeable to the philosophy of this memorandum. However, on a more serious level, as we all know, traveling the streets of New York with a firearm for self-protection is in most cases, a crime, unless one has political connections enough to obtain the permit. Without a permit, carrying such would not be use "for a lawful purpose." This may, incidentally, be one reason New York has the highest robbery rate and the second highest overall violent crime rate of American cities with a population over 500,000. (The only city exceeding it in overall violence is Boston, home of the Bartley-Fox mandatory sentence for carrying a firearm without a permit.)

II. THIS BILL WOULD NOT INTERFERE WITH ANY LEGITIMATE STATE INTEREST IN CONTROLLING INTRASTATE FIREARMS ACQUISITION AND USE

My bill would amend current law to provide that State laws which prohibit transportation of a firearm or ammunition through that State shall be null and void so long as the transportation is in interstate commerce through such State, when such firearm is unloaded and not readily accessible. This is designed to protect legitimate hunters and sportsmen who occasionally must pass through a restrictive gun law State in order to get to another State. On occasion their vehicles have been subjected to local law, even though they had carefully stored their firearms under lock and key and such were unloaded. Against these very unrealistic abuses the memorandum poses a horrible hypothetical involving terrorists who are traveling about the countryside with unloaded and inaccessible firearms. We might observe at the outset that no cases of terrorists traveling about with unloaded, inaccessible firearms have come to light to date, nor are likely to in the future. In the event that any such case should arise, the incipient terrorists would be prosecuted for violation of the neutrality acts, or of 18 U.S.C. 924(b), which provides 10 years' imprisonment for anyone transporting or receiving a firearm in interstate commerce with intent to commit a felony or knowledge that it may be used for such a commission, or conspiracy to commit any of the acts which the group plans. In brief, should this unlikely hypothetical situation ever come to pass, a State misdemeanor gun charge would be the least worry that the perpetrators would have. The problem can be handled quite expeditiously by concrete legislation aimed at particular abuses or intent to abuse, rather than by a general dragnet law which ropes in enormous quantities of the innocent in the unlikely hope that some day one of the guilty may be caught also.

III. THIS BILL WOULD INCREASE, NOT REDUCE, PENALTIES FOR GENUINE GUN-USING CRIMINALS

This memorandum next claims that this bill would reduce penalties for firearm law violators. This section most clearly demonstrates the memorandum's failure to take into account practice in the real world. When the Gun Control Act of 1968 was being debated, a true mandatory minimum sentence for use of firearms in Federal felonies was at first proposed. This would have prevented the granting of probation or parole to any violator who used a firemarm in commission of a Federal felony. Before passage, however, the provision was so watered down as to become almost totally useless. In theory, it now provides that whoever uses a firearm to commit a Federal felony or carries a firearm unlawfully during this commission shall receive imprisonment from 1 to 10 years on first offense and 2 to 25 on second offense. But since the 1968 act only restricts of the giving of probation on second offense (and even then does not restrict the granting of parole) it has no real effect. A judge who feels that a serious offense should be punished by 6 months imprisonment would simply give 6-months-plus probation on the underlying charge, plus probation on this second, supposedly mandatory, term of imprisonment.

Under my bill, whoever uses any firearm or destructive device against the person of another to commit a felony over which the Federal courts have original and exclusive jurisdiction shall receive 1 to 10 years for a first offense and 2 to 25 for a second, and under neither of these shall be eligible for probation, suspended sentence, parole, or furlough before completing the minimum. As an additional guarantee that the law will be used only against genuine hardcore violators who deserve the prison time despite the sympathy of the judge, the bill provides that the mandatory sentence shall not apply if the use of the firearm was to protect his person or property or that of another from commission of a felony.

The memorandum complains initially that existing law makes this sentence consecutive to the sentence on the underlying charge, whereas this bill would permit it to be given concurrently. Presumably the conclusion is that this bill would lessen the impact on the violator. The argument ignores the practical consequences of legislation in the real world. As discussed earlier, making the sentence theoretically consecutive does absolutely nothing since a judge who decides to give probation can still give it. Accordingly, the provision is meaningless. We provide a genuine mandatory sentence for firearm misuse in crime, and whether it comes consecutively or concurrently makes no real difference in terms of its impact upon criminals.

Next the memorandum complains that this would not apply to firearm felonies that are "not within the exclusive jurisdiction of the Federal courts." This, we assume, would refer to the bill's specification of felonies over which Federal courts "have original and exclusive jurisdiction." The writers of the memorandum apparently have not examined title 18, United States Code, for a definition of what constitutes original and exclusive jurisdiction. 18 U.S.C. § 3231 provides that,

> The district courts of the United States shall have the original jurisdiction, exclusive of the courts of the states, of all offenses against the laws of the United States.

In short, of all Federal offenses. Accordingly, this bill makes no real change in the substance of that portion of the law but only brings it into accord with the language of the jurisdictional statute. A bank robbery within the District of Columbia, for instance, would come within the original and exclusive jurisdiction of the Federal courts both as a robbery within the special maritime and territorial jurisdiction of the United States (18 U.S.C. § 2111) and as a robbery of a bank (18 U.S.C. § 2113).

The memorandum's final criticism of the bill in this area is that the mandatory sentence would not apply to use of a firearm in self-protection. In

particular, the memorandum's drafters seem worried about the provision denying its application to use in defense of property. It would seem that use of a firearm in defense of property would rarely constitute a Federal felony, but the drafters of the memorandum, with their traditional ingenuity, create the image of a hypothetical situation in which a person shoots at someone stealing his mail.

It is apparent upon even a slight examination that this would not come within the mandatory sentence in any event. The person stealing the mail is, it is true, committing a Federal crime; but the individual who fires at him violates no Federal law, as there are no Federal statutes giving special protection to mail thieves. He could accordingly be prosecuted under State and local law, but under no circumstances would ever come within the scope of this mandatory sentence in any event.●

## EXPORTS OF FARM PRODUCTS

### HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. EVANS of Iowa. Mr. Speaker, I am today introducing, along with several cosponsors, legislation requiring the Export-Import Bank to make loans available to purchasers of American agricultural products.

Farmers throughout the country face prospects of a bin-busting harvest leading to a surplus of grain which is severely depressing prices. The best means of reducing that surplus is to export it at a profit to our farmers. But, we face fierce competition in the agricultural export market from foreign nations who provide low-interest loans for buyers of the agricultural products.

The Export-Import Bank has in the past provided attractive financing to purchasers of American farm products. But, during the past administration, the Export-Import Bank was prohibited from making loans for agricultural sales. Loans, however, did and do continue for the sale of manufactured products.

The legislation I am introducing today will require that the Export-Import Bank make loans available for agricultural export in the same ratio that our agricultural exports bear to our total exports. Exceptions to this requirement would be made when the bank determines and reports to Congress that demand for such loans is not high enough to equal or exceed the ratio required or when the Secretary of Agriculture determines that the level of agricultural exports is or will be adequate without such credit.

Increasing our exports of farm products will not only help our farmers, but will also provide a significant improvement in our balance-of-payments situation.

Without an increased effort to export our farm products, the farm economy faces a disastrous financial situation because it has done its job too well.

We must reduce the surplus and the best method is to sell it. But, to do that we must provide attractive financing to potential buyers who will turn to the competition if the funding is not available from us. We provide such financing to help our industrial producers compete and it seems only reasonable that the same treatment be accorded our agricultural producers.●

## WATER: AN INCREASINGLY IMPORTANT CONCERN

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SIMON. Mr. Speaker, one of the issues that is going to be more and more dominant on the national horizon is that of water.

I am taking the liberty of inserting a speech that was made by our colleague, WES WATKINS, about the rural water situation which I recommend to our colleagues.

I am also inserting a column I wrote for the media in my district which touches on the water situation.

We will be hearing a great deal more about water in the future and, obviously, one of those who is going to be leading the way in such endeavors will be our colleague, WES WATKINS, for whom we all have a high regard.

The speech follows:

WES WATKINS' OPENING SPEECH

Thanks very much Marvin, I'm very happy to be here. I hope I am among friends.

As a member of the Appropriations Committee, I serve on the Agricultural and Rural Development Subcommittee and also on the Subcommittee on Energy and Water. One of the members from California turned to me the other day and said, "You know what, I'm just going to give you a new nickname." My new nickname in the United States Congress is "The Rural Radical." I think we've needed a rural radical around here for a long time.

When I talk about Rural America, I'm talking about more than just agriculture. As Marvin knows, my roots are deep in agriculture. I served as Oklahoma state president of the Future Farmers of America. FFA is probably one of the big motivating factors in my life. I lost everything in the drought of '56 in Oklahoma including the peanut crop I left in the field and some old "banger" cows I ended up selling. But I still love the rural elements and agriculture so much that I was stupid enough to go off and major in agriculture in college. But I do love the climate, surroundings and environment and I cherish my upbringing in the rural community.

I grew up in a little town with about 200 people. I live in Ada, Oklahoma, a town with about 15,000 people. My district spreads about 300 miles along the Red River in Southern Oklahoma from the Texarkana area on the east all the way Marvin's house, which is right below Lawton in the Walters-Randlett area. The largest town has about 22,000 people, so we are considerably spread out there. The Federal government considers any city or town below 50,000 rural. That makes my district all rural and I'm proud of it. When the Legislature began redistricting the Congressional districts, I only asked them to do one thing—don't put me in Tulsa or Oklahoma City. They can spread me out anywhere else in the state but don't get me into those large cities.

I cherish, as I mentioned, the rural element, and yes, I'm calling attention to the cause for rural people. We've been second-class citizens too long. When John Steinbeck wrote the book, "The Grapes of Wrath," he portrayed my family in some respects because four different times my family went to California and back in search of jobs during World War II. My mom worked a shipyard there and I cut grapes, picked cotton and everything else going to California and coming back. We finally came home and settled down south of a little community, Bennington, Oklahoma, where I grew up.

That era John Steinbeck reported marked the largest movement of people ever recorded in the history of our country. In the late forties our country, and probably rightly so, saw fit to write the Marshall Plan to rebuild the economic face of Europe. Twenty years later our country saw fit to write the massive urban renewal program to save the inner cities of this country. The sad and tragic thing is that our country has never seen fit to write a program to rebuild rural America.

We have the Rural Electrification Administration today and I'm happy. I still remember setting the lamp aside and when I flicked on the first electric light in our house. I tell my REA friends that I should disown them. The only job I ever lost was because of Rural Electrification. I was an ice doodler on an ice truck that went out through the country. I was too little to carry the ice, but I could tip it off and I could slide it to the back of the truck.

Then Rural Electric came to town, no, not to town, came to the country. I sold ice one whole summer because it made better ice tea. Then the last summer I tried to sell ice, people had that thing called a refrigerator. I kid the Rural Electric people but it was one of the greatest things.

The second greatest thing that has happened to rural America is rural water. How many times have we seen new homes sprout up in the countryside and some family wanting to live there or some elderly couple wanting to retire there because of rural water. That's the element of rural America that you've played.

I was a home builder and land developer before I came to Congress. I built mainly through FmHA. Not by choice, but because we didn't have much money in rural America. I do not have one mortgage banker in my district. Out of the 25 counties I serve, we don't have one Federal Housing Administration house per county because we do not have investment capital in rural America.

I'm chairman of the Congressional Rural Caucus. I hope you are members of the Caucus. If not, I'm going to ask you today to become members of the Rural Caucus.

There's less than 4 percent of the population living on farms today. That's a problem, but that means we are going to have to work harder to organize. That's our business coming down here—trying to organize the rural people.

One city mayor has more power than we do. That's our problem. We need to organize, we need to speak up and we must let the people know that, "Hey, we are human beings, too." Congressional Rural Caucus has about 125 members in it, that's about 20 more than we had last year so we made a thrust forward. But here's the potential.

There's around 300 members of Congress that have about 50 percent of their people or more that would be considered rural with populations below 50,000. What does that mean? It takes 218 votes to pass or defeat a piece of legislation in the House. If we can just make 218 of these Congressmen conscious of rural America, we could have real impact on legislation.

I know some of you are wondering if we have a staff. We have one person who's helping on the staff right now. Many of the Congressmen are chipping in trying to do as much as possible. We are having a Congressional Rural Caucus banquet on March 31st and I understand that several of you are helping buy a table to help participate, but we have got to have more help. We've got to have shoe leather put down in this town if we are going to do the job that's got to be done.

Frank Tsutres is our executive director. He works hard, but when you only have one person, that's nearly an impossible task to try to get the job done that needs to be done. I'm devoting my staff as much as I possibly can to a large rural segment.

In fact, I'm building in my legislative file a legislative bible, or a Marshall plan for rural America. I may mention that a little later.

Let me indicate some of the things that we are trying to piecemeal in this effort as the chairman of the Congressional Rural Caucus and some of the things we are trying to do. Number one thing: All I ask the Members of Congress is to give us fairness and equity. Fairness and equity—that's not asking too much. I'm willing to balance the budget, but we have to have fairness and equity.

For example, take educational funds for handicapped children. I think our rural children are just as important as urban children. But the rural schools get only 7% of the handicap funds for education. We deserve close to one third of it because one third of the people of this country live in communities of 50,000 or below. Is that fairness and equity?

Look at FHA we mentioned a while ago. Section 203 provides for single family housing. We get less than 10% of these funds in rural America, and that's insured mortgage money. It's usually a very limited amount for a home. Unfortunately, with little money in the budget, the funds in my district are used up within the first quarter of the year.

Also HUD is the Community Development Block Grant money, which helps develop our community areas and our towns. But only 17 percent of that goes to cities and communities of 50,000 and below. Again, we should get about one third of it. Is that fairness and equity?

Let's look at UDAG—Urban Development Action Grants. Working through the subcommittee I formerly served on, we are able to get 25 percent set aside for rural communities. I couldn't get the 33 percent we deserve. Only two of us on that subcommittee crusaded or even talked about rural America, and when we asked the other members to be fair and equitable, they were not willing to step across just a little further.

We receive only about 20 percent of the SBA program funds out in rural America. Why? Because many times in our community you have a one-loan-officer bank. He may have someone who helps him a little bit but when he leaves the bank, it may as well be closed for the day as far as loan applications are concerned. These loan officers are not able to go to Oklahoma City six times to get the T's crossed and the I's dotted on SBA loans when they can stay home and make a few cattle loans and a few car loans, and put the rest of it in government bonds. Is that equity? Is that fairness?

The EDA program that I support was originally intended to serve the rural, depressed areas of the country. They've revised the minimum standards until 85 percent of the communities in this country are eligible for EDA assistance. I strongly disapprove of this because I know in Oklahoma City they are using the money to build a Myriad garden when I can't even get money for a water and sewer project in a town that doesn't even have a manufacturing job. Is that fairness and equity? I don't think so.

I'd like to bring us to where we are today. Let's look at the President's budget this way. The President said twice in his speech last week that the budget cuts would be evenhanded and that's all I ask, fairness and equity. But it's like the hen and the pig going down the road and all of a sudden they are confronted with a huge, angry, hungry, lion. The pig turned to the hen and said, "Madam hen, what should we do?" The hen said, "Well, pig, I think we should feed him some sausage and eggs." The pig said, "That's a good idea, but that takes just a little effort from you and that's a major sacrifice from me!" Ladies and gentlemen, let me say this. We are going to make a major sacrifice for rural America. If you don't believe it, look at the front page of The Washington Post this morning. The Administration is looking at taking another $2 billion out of agriculture. Most of it will probably come out of Farmer's Home someplace.

I just told you about programs we are getting in Rural America. As I told them at the Oklahoma Press Association the other day, I'm willing to go along with most of the programs we are cutting, but there is virtually no private industry in my area and in most of the rural areas that can put the investment capital in there that's necessary to take up the slack.

We've got to have Farmer's Home type loan programs to provide us the investment capital. We've got to have water and sewer programs. Sewer projects and facilities were cut from $1.1 billion down to $600 million, and the water program itself was cut over half.

So what do we do? I'm not talking about a hockey stadium or anything like that for some big downtown city, I'm talking about trying to get water to some people in my district who still don't have running water.

I'd like to share with you one of the things we are trying to do. I know you are very interested in supplemental appropriations, and I have agreed to help. This would expand training and technical assistance to the rural water associations. I know you utilize these training funds wisely and provide a tremendous assistance. I've got communities that cannot meet the EPA clean water requirements. More than 50 systems in Oklahoma are in violation of the EPA standards. How are we going to resolve that? How are we going to meet those standards in rural America? It's going to be tough.

I was talking to Interior Secretary Watt concerning water programs. The Administration plans to cut water development projects back in rural America. you know why? Because their priority is on projects which affect the most people—the urban and suburban projects.

Some of you may know I'm sponsoring a bill called the National Water Utilities Bank. I think we've got to have such a program because we are not going to receive the money from the Federal level. We have to go into the secondary money market just as we have done with rural electric. The only problem is that Dave Stockman wants to cut out the Federal Financing Bank at a time when we need it most.

We are going to push for that bill because I think it's an absolute necessity. It will provide loans and loan guarantees. Loan guarantees are off budget. I think we can't afford to stop providing things like electricity, sewer and water to the people of rural America. If we are in much trouble economically, then I think we should cut out every program in the major cities in this country.

Rural America has a big role in America's economic recovery. People talk about the crisis of this country. The crisis of this country they're talking about is energy. There's hardly any energy produced in the cities—it's produced in rural America. They're talking about the crisis of world hunger. There's no food produced in the cities—it's produced in rural America. They're talking about the water crisis that's right around the corner. There's no water impounded in the major cities, either—the dams are in the country.

Now you look at the three major crises of this world. The only way we are going to solve them is in rural America and they are exacting a big price from us to do it. I think we are ready to try to meet those problems. I think the least the Administration could give us is evenhandedness, fairness and equity in this program.

Yes, I may be called a "Rural Radical," but I may be called a whole lot worse before it is all over. These programs are good for your people and our people and they are absolutely essential. Marvin, I would like to stop at this point unless you have some questions or inquiries you would like to make.

---

WATER: THE NEXT CRISIS

We get so absorbed in today's crisis that we sometimes forget that there are some long-range things we should be working on more aggressively.

One of these, which will bring tremendous changes for the better, is the development of an inexpensive process for converting salt water to fresh water.

When that happens the deserts of the United States will blossom, as they will in North Africa and elsewhere. And in trouble spots like the Middle East tempers can be reduced at least a little, for almost lost in all of the other stories from the Middle East is the reality that part of the tensions there are caused by water problems.

We are headed for some major water problems, particularly in the West, unless this sea water source is developed. Today's

headlines are about oil; 10 years from now the headlines are likely to be about water.

Even in relatively water-rich Southern Illinois, we will see more and more farms irrigating. We have a few doing it now. After every dry year we have, there will be more farms joining the ranks.

There are four basic methods of desalting water, and the United States has put a total of $320 million into one of these processes called distillation. There is a general feeling that this process is too expensive to be practical in most situations, and the other three processes are being examined.

This year two demonstration plants for other methods will start in Alamogordo, New Mexico and Virginia Beach, Virginia. Tentatively a third project is scheduled for Louisiana in 1983.

Desalting, however, is not some vague thing that might or might not work in the future. It is working now, but is too expensive to be practical in most situations. There are over 1500 desalting plants in operation around the world. And that number will grow rapidly if we can improve the desalting process.

That takes research. And research costs money, unfortunately.

Within the United States we now produce 100 million costly gallons of fresh water a day out of salt water. But we consume many billions of gallons of water each day.

All nations have a stake in making progress. The United States is working with Mexico and with Israel on specific projects. And many other nations are doing research.

When the day arrives that somewhere a breakthrough is achieved and an inexpensive process is developed for converting salt water to fresh water, it will be one of the most important stories of this century—yet it will probably not be on the front page of most newspapers.

Seventy percent of the earth's surface is covered by water, most of it salt water. It is a tremendous resource which some day will be appreciated much more. We should be hastening that day.●

## HALF A CENTURY

### HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. NAPIER. Mr. Speaker, although we daily stand in awe of the massive fourth estate operation which exists in Washington, I tend to watch more carefully and respond more rapidly to the news I obtain through that great network of grass roots America called the hometown newspaper.

South Carolina's Sixth Congressional District has a journalistic fraternity, while not as massive and slick as the major metropolitan press, compares with the best when carrying the banner of the First Amendment.

One of the priorities in my Washington and district offices is to closely monitor the daily and weekly newspapers, for they guard the front lines of life in rural and suburban America.

I am especially proud of my own hometown newspaper, the Marlboro Herald-Advocate, a true family-owned, operated, written, and distributed journal. Recently celebrating 50 years of reporting the news of Bennettsville, S.C., and the surrounding Marlboro County, the William L. Kinney family was the object of an interesting column written by the State news editor of the Florence Morning News, Thom Anderson, an astute member of the media who has long observed life in journalism circles in the Sixth District.

Mr. Anderson's article details the history of the Kinney family, which passed the torch of journalism from one generation to another, while maintaining the highest standards of the profession.

It is with pride that I offer this article for the information of my colleagues in Congress:

HALF A CENTURY

(By Thom Anderson)

It was just over 50 years ago that Mr. and Mrs. William L. Kinney started a newspaper in Bennettsville, one that became the present Marlboro Herald-Advocate.

They turned the paper over to their son, William L. Kinney Jr., 10 years ago, but they have remained active around the paper, and they put out a special section of the Sept. 3 issue to look back over some good years in Bennettsville.

It was sort of an ill-timed blow that caused Kinney and his bride to launch the Marlboro County Herald, which published for the first time on Sept. 1, 1931.

He had graduated from college in 1925, and in 1926 became bookkeeper of the Pee Dee Advocate, a Bennettsville weekly. A few weeks later, the editor left, and Kinney took over that job, too, serving in both capacities.

In 1932, he was to marry on June 18 in Ninety-Six. The paper was sold, but the new owner told Kinney he would be retained. The day before the wedding, just before Kinney was to leave for the wedding the new owner hit town and greeted him with the news that he would not be needed.

This was quite a blow, but the wedding went on anyway, and they went on a honeymoon to the mountains as scheduled, returning to Bennettsville on July 1.

He picked up a temporary job helping close an estate, and the two decided to start their own paper. With $500 "reluctantly" loaned to Kinney, they started the Marlboro County Herald, a weekly.

The lead story of the first issue of the Marlboro Herald, dated Sept. 1, 1931, carried as lead story an item about Gov. Irba Blackwood holding a meeting in Bennettsville with Marlboro County farmers who favored a possible special session of the Legislature.

There were no pictures on the front, as often was the case then. Other items told of a team called the Tigers edging the Athletics for the local softball title, plans to pave S.C. 9 from Bennettsville to U.S. 1 near Cheraw, election of L. L. Gaddy to the city council. Tom Lewis selling the county's first bale of cotton for the year and F. Gray Craven being the first subscriber to the Herald.

It was printed out of town at first, and they had their troubles, including a wreck in which both were badly injured, but by 1937, they were able to put in their own printing equipment.

Among the people who worked in the back shop, Kinney recalls, was Fletcher Stubbs, who went into the Army when war broke out and became the first Marlboro County serviceman killed in World War II.

In 1948, the Herald went to twice weekly publication.

And in 1951, there must have been delicious irony in it for the Kinneys as they bought the Pee Dee Advocate, the paper that had fired Kinney at such an inopportune time 20 years earlier.

They combined the papers and continued twice-weekly publication as the Marlboro Herald-Advocate. In 1952 they bought the McColl Messenger.

In 1971, they sold their interest to their son who still publishes the Herald-Advocate, and supposedly retired, something Mrs. Kinney calls "the joke of the last 10 years." They are still around the paper regularly doing what ever is needed.

Kinney looks back with a lot of gratitude and justified pride at the development of his paper. He has served as president of the South Carolina Press Association and the paper has won a lot of awards over the years.

"I trust that I have been able to contribute something along the way and over the years that has made life better for someone who has been a reader of our publications." Kinney wrote.●

## AFFIRMATIVE ACTION HARMS THE DISADVANTAGED

### HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WALKER. Mr. Speaker, throughout the course of our discussions in this body of affirmative action programs, a topic which is too seldom addressed is the impact of racial quotas and other instruments of preferential treatment on those they are purported to aid, minorities. I wish to insert the following article by Dr. Thomas Sowell, black economist and senior fellow at the Hoover Institute, in the RECORD. This is one of several recent articles by Dr. Sowell in which he brings to bear his extensive research on minority groups in America in exposing the fallacy that affirmative action programs are capable of bringing minorities into the mainstream of our economy.

The article follows:

AFFIRMATIVE ACTION HARMS THE DISADVANTAGED

(By Thomas Sowell)

The supreme irony of "affirmative action" is that it demands hard statistical results from others but has none to offer itself. This is the tenth year of numerical "goals and timetables" in employment—quotas, for those who prefer plain English. Yet the actual results of a decade of this controversial program are seldom mentioned.

Before "goals and timetables" were mandated by federal guidelines in 1971, Puerto Rican family income was 60% of the national average. Today it is 50%. Black family income, as a percentage of white family income, has never in the past decade ex-

ceeded the level reached in 1969. Usually, it has been lower.

No doubt there are many factors behind these numbers. But imagine an employer with similar statistical trends trying to explain to EEOC or the courts that it was all due to other circumstances beyond his control. Yet that is what affirmative action proponents are reduced to. The results simply are not there to justify this bitterly divisive program.

Progress has not stopped completely for disadvantaged racial and ethnic groups. But the rate of progress is not as rapid as it was in the equal opportunity phase of the 1960s that preceded affirmative action quotas in the 1970s. Indeed, some proponents of affirmative action cite the slowing down of progress as a reason that this program is needed more than ever.

There are economic as well as statistical reasons for considering affirmative action counterproductive. The incentives created by quota pressures seem to increase the demand for "representatives" of the various groups designated by the government for special consideration. But at the very same time, these pressures make it more dangerous to have such people on the payroll.

Their future pay, promotion, and discharge patterns can easily land the employer in costly legal proceedings, even if he ends up completely vindicated. But the plight of employers is not the central issue. The real problem is that disadvantaged groups can be damaged by the way employers seek to protect themselves.

One way out of the employer's dilemma is to hire minority applicants who are sufficiently above average that their future pay, promotions and discharge patterns are unlikely to be worse than those of the other employes. But while the demand for these unusually well-qualified individuals tends to be increased by affirmative action pressures, the demand is decreased for minority or female applicants who are below average, or who do not have enough of a track record for an employer to take a chance.

Some recently published data on black males illustrates the point. Between 1967 and 1978, the income of college-educated black males rose dramatically, both absolutely and relative to the income of college-educated white males. In 1967, college-educated black males who were in the labor force a few years earned 74 percent of the annual income of their white counterparts. By 1978, this was 98 percent.

But over exactly the same span of time, black males with less education were falling further behind white males with less education. For example, black males who were in the labor force a few years, but who had less than 12 years of schooling, earned 79 percent of the annual income of white males of the same description in 1967. By 1978, that was down to 69 percent.

One may try to explain over-all black/white ratio changes by general economic conditions in the 1970s, rather than by affirmative action. But it is hard to explain diametrically opposite trends among blacks this way.

A more narrowly focused study of 50,000 academics showed a very similar pattern. Those black faculty members who had completed their Ph.D.s in highly ranked departments and who had published were earning more than whites of the same high qualifications. But those black faculty members who had not yet completed their doctorates and had not yet published earned less than their white counterparts. Again, the demand seems to have been artificially increased for the highly qualified black and artifically decreased for the more average black or the black who had not yet made a track record.

A number of responsible people have said off the record that they are reluctant to take on risks, with either minority or female applicants, because of the time and money that can be lost in legal proceedings if they later have to be discharged or even promoted more slowly. One black woman in a high position, when informed of this reasoning, replied that that was how she herself operated in considering applicants. "I have no time to spend at EEOC or in the courts," she said.

Affirmative action harms disadvantaged groups in other ways. The number of groups covered by this program has successively expanded to the point where it now includes a majority of the American people. George Gilder in his best seller "Wealth and Poverty" estimates the coverage at 70 percent of the population, controlling 75 percent of the country's wealth.

This means that blacks, for example, are lost in a sea of other people. Moreover by requiring employment decisions to be justifiable to third parties, affirmative action increases the importance of paper credentials—which are disproportionately lacking among disadvantaged minority individuals, even when they are perfectly capable of doing the work.

Like many other public policies, affirmative action needs to be judged by what it actually does, not by what it intends or hopes to accomplish. The crucial question is what incentives and constraints it creates—what it rewards and penalizes. We all know what road is paved with good intentions.

Even the supporters of affirmative action seem to sense its bankruptcy. They generally steer discussions as far away as possible from hard facts about the actual results achieved. They talk instead about history, as if this policy were going to be applied to the past instead of to the future. They impugn the motives of those who criticize their efforts, in a manner reminiscent of Sen. Joe McCarthy. In short, anything to evade the grim facts.

Quotas and preferences have been tried in a number of countries. Nowhere has any racial or ethnic group risen from poverty to prosperity by these methods, though many have done so by all sorts of other methods. The Chinese in Southeast Asia, Italians in Argentina, Germans in Brazil, Japanese in the United States, and Jews in various European countries have begun in poverty and ended in affluence, while avoiding politics. Where preferential treatment has been tried, it has not merely failed to achieve its object but has torn countries apart with internal strife. India, Indonesia, Malaysia and Guyana are just some of the places where such efforts have led to bloodshed in the streets.

After 10 years, it is time to ask what affirmative action has achieved for the disadvantaged, and what it has done to this country.●

## STATE DEPARTMENT DECISION TO REFUSE ENTRANCE VISAS TO CUBAN OFFICIALS

### HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BLILEY. Mr. Speaker, I want to take this opportunity to express my pleasure with the State Department's decision to refuse entrance visas to Cuban officials who were to participate in the Center for Cuban Studies symposium "The U.S. and Cuba: Prospects for Dialogue."

Yesterday's Washington Post quoted Fidel Castro attacking the Reagan administration as "fascist," "genocidal," and "covered in blood." Today Castro's troops are engaging in battles in Angola, Ethiopia, and other countries in Africa and Latin America.

It would be inconsistent and counterproductive to admit these officials to participate in a pro-Cuba propaganda session in the U.S. Capital. This would have been the wrong signal to send to Havana and to those allies we expect to take a tough stand against Cuban adventurism. More importantly, it would have been misinterpreted by many as a back-door normalization of relations with the Western Hemisphere's most repressive government.

The Reagan administration is to be commended for this wise decision.●

## THE TEDDY GLEASON NYSA-ILA SCHOLARSHIP FUND AND AWARDS CEREMONY

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. KEMP. Mr. Speaker, it gives me great pleasure to report that the first annual Teddy Gleason scholarship program has this month named its recipients. A product of the combined efforts of the International Longshoremen's Association and the New York Shipping Association, this program has just granted eight college scholarships to the children of longshoremen from New York and New Jersey: Salvatore Avitabile, John A. Caputo, Christine Kirwan, Lina Liberatore, Thomas A. Moroney, Jr., Hermond E. Palmer, Adrianna M. Rubinic, and Robin Tavares. My congratulations to these outstanding students and their families and it was indeed an honor to participate in the luncheon and meet these outstanding young Americans.

The joint venture that made these scholarships possible represents an important step forward in labor-management cooperation in the maritime industry. Above all, this scholarship pro-

gram is a testimony to the leadership, vision, and imagination of the man after whom it is named: my good friend Teddy Gleason, distinguished president of the International Longshoremen's Association. He worked closely with the New York Shipping Association, led by James Dickman, to create the NYSA-ILA scholarship fund, which provides the wherewithal for the scholarships. When fully implemented in 1984, it will help 32 students, annually, to work toward their college degrees. Mr. Gleason's achievement is typical of his deep and abiding commitment to creating new avenues of opportunity for ILA members and their children. I commend the following account of these scholarship awards to the attention of my colleagues and also want to praise the management association for their progressive attitude toward this program.

PORT LABOR FUND AWARDS FIRST SCHOLARSHIPS TO LONGSHOREMEN DEPENDENTS; ACTION MARKS OPENING OF $128,000 PROGRAM TO AID 32 STUDENTS ANNUALLY

A newly created labor-management fund that finances four-year college scholarships for dependents of union longshoremen in the Port of New York and New Jersey today announced that the first group of eight students has been selected for its $4,000 annual awards. They include residents of Northern New Jersey, New York City and Suffolk County on Long Island.

The action by the Teddy Gleason Scholarship Program of the NYSA-ILA Scholarship Fund marks that initial grant by the waterfront industry plan. It was developed under the present three-year collective bargaining agreement between the International Longshoremen's Association, AFL-CIO and employers represented here by New York Shipping Association, Inc. and is the only one of its kind in the port industry.

When fully implemented in 1984, the fund will annually assist a total of 32 children of ILA members from the bi-state port region in achieving a college level education at a total outlay of $128,000 with eight new high school graduates becoming eligible for each of the $4,000 awards yearly.

Announcement of the winning student candidates was made jointly by the two leading spokesmen for labor and management who helped negotiate the program in contract talks last year. They are ILA President Thomas W. (Teddy) Gleason, for whom the program was named, and James J. Dickman, President of the management association, which represents ship industry employers in the harbor.

The eight students selected for the initial awards by the College Scholarship Service based in Princeton, New Jersey, include the following:

Salvatore Avitabile, son of Mr. and Mrs. Felix Avitabile of 155 Seeley Street, Brooklyn. His father is a member of ILA Local 1 and works as a checker at the Red Hook Terminal in Brooklyn.

John A. Caputo, son of Mr. and Mrs. Frank Caputo, of 162 Hylan Boulevard, Staten Island. Frank Caputo is a member of ILA Local 1 and is employed as a checker at Howland Hook Marine Terminal on Staten Island.

Christine Kirwan, daughter of Mr. and Mrs. Thomas Kirwan of 70 Signs Road, Staten Island, Thomas Kirwan is a member of ILA Local 1804-1 and is employed at the Consolidated Passenger Ship Terminal on the North River in Manhattan.

Lina Liberatore, daughter of Mr. and Mrs. Giacomo Liberatore of 2556 East 23 Street, Brooklyn. Her father is a member of ILA Local 920 and works as a longshoreman at Howland Hook Marine Terminal on Staten Island.

Thomas A. Moroney, Jr., son of Mr. and Mrs. Thomas A. Moroney of Rocky Point, N.Y. The elder Mr. Moroney is a member of ILA Local 1 and is now retired.

Hermond E. Palmer, son of Mrs. Phyllis Palmer and the late Herman Palmer, of 1730 Clinton Place, Teaneck, N.J. His father had been a member of ILA Local 1814 in Brooklyn.

Adrianna M. Rubinic, daughter of Mr. and Mrs. John Rubinic of 41-42 Cpl Kennedy Street, Bayside, Queens, N.Y. Her father is a member of ILA Local 1804-1 and is employed on Pier 36, East River, Manhattan.

Robin Tavares, daughter of Mr. and Mrs. John Tavares of 1508 Vauxhall Road, Union, N.J. John Tavares is a member of ILA Local 1235 and is employed as a longshoreman at the Sea-Land Service terminal in Elizabeth.

The award of scholarships by a fund supported by industry contributions and negotiated through a labor contract is a pioneering event in longshore employer-union relations in the port here. However, it's a program that is a likely forerunner for similar development in other Atlantic and Gulf Coast harbors in later years, according to labor and management sources.

Open to dependents of more than 10,000 ILA members in the New York port area on the basis of academic performance and aptitude tests among other determinations, it is available to qualified applicants who wish to continue education in undergraduate, apprentice or training programs in accredited colleges, universities and other institutions.

The union is the largest waterfront organization in the United States. In addition to members in the Port of New York and New Jersey, ILA represents some 40,000 longshoremen in other ports from Canada to Mexico, and upwards of 50,000 additional waterfront workers in the U.S. Great Lakes, eastern Canada and Puerto Rico.

New York Shipping Association is also the largest waterfront management organization in the United States. It represents approximately 135 companies including many of the largest ocean carriers and stevedoring and marine terminal operating companies in the nation.

The activities of the union and NYSA in the bi-state Port of New York and New Jersey involve handling by workers and employers of more than 24 million tons of high value general cargo yearly through company operated facilities. The port is the nation's largest harbor and the 10,000 active longshoremen in the work force here is the largest such group by far in any American port.

The bi-state port covers pier areas Brooklyn, Manhattan and Staten Island within the five boroughs of New York City, and the New Jersey waterfront communities of Newark, Elizabeth, Jersey City, Hoboken, Bayonne, Weehawken and Perth Amboy.●

## THE HONORABLE MARIO BIAGGI OF NEW YORK REMARKS DURING SPECIAL ORDER FOR GARY HYMEL

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BIAGGI. Mr. Speaker, as one who has benefited from knowing Gary Hymel, I rise to join my colleagues in paying tribute to this great man. True—Gary is leaving the House—but what he leaves behind is one of the most impressive records of service ever accumulated.

For 15 years, Gary Hymel has dedicated himself to the improvement of the House. He has worked for the office of the majority whip, majority leader, and now the Speaker. Gary has made friends on both sides of the aisle by applying the same standards to everyone—be cordial—be cooperative and be fair.

Gary knows this House as well as anyone. His advice was the best around. While we regret it—we do understand his decision to return to private life. However, his departure leaves us with a void that will be hard to fill. Staff people ofttimes do not get the proper recognition for their work, so today I am pleased that we are taking this opportunity to give credit where credit is due. Gary—good luck—good health—and thanks for everything.●

## "NATIONAL AUTO POLICY—UNFINISHED BUSINESS"—PART III

### HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. PEASE. Mr. Speaker, the final portion of UAW President Doug Fraser's address to the Sixth Annual Automotive News World Congress focuses upon one possible remedy for equalizing international auto trade policies. Domestic content laws are already in effect in virtually all other auto-producing countries. The time may have arrived when we ought to at least air the pros and cons of content legislation as a means of signaling our resolve toward both free trade and fair trade policies.

FINAL PORTION OF UAW DOUG FRASER'S ADDRESS

A local content requirement is needed to preserve employment and shore up the nation's sagging industrial base.

Such content legislation should require that, by 1985, auto companies with yearly sales in excess of 200,000 units have at least 75 percent North American content in their fleet; and that companies with 500,000 units

or more have 90 percent North American content in their fleet.

Local content requirements tied to sales volume should be phased in beginning with the 1983 model year. Credit would be given for exports of parts or vehicles, to allow manufacturers flexibility to rationalize production.

A "manufacturer" for this purpose should be defined by the locus of majority control. For example, Chrysler and Mitsubishi would be counted as two separate companies, since Chrysler does not control Mitsubishi Motors.

The UAW believes that each company has an obligation to generate employment in those countries in which it has substantial sales volume. Sales in North America by VW, Toyota, Nissan, and Honda have long since reached a level at which full-scale assembly can be efficiently accomplished here.

Indeed, by 1980 both Toyota and Nissan had U.S. sales that approached Chrysler's.

Substantial local content cannot be implemented overnight. But the timetable carried out by Volkswagen over the last few years can serve as a clear example for others.

VW began U.S. production in 1978. Now, in addition to its assembly plant in Pennsylvania, it has a stamping plant in West Virginia and a new multi-plant complex in Texas. It is about to open a second assembly plant in Sterling Heights, Michigan. Currently, the North American content of VW Rabbits is approaching 70 percent.

Some may object that our content proposal runs counter to the principles of "free trade." We have long recognized the benefits to humanity that flow from expanded world commerce. The vital role of world trade in fueling postwar economic growth is widely known.

Nor have we forgotten the tragic lessons of the thirties, when a round robin of misguided beggar-thy-neighbor protectionist polices worsened the Great Depression.

But the world has changed a great deal since then. When it comes to autos, with the significant exception, until recently, of the U.S., there is no major nation of the world that practices "free trade" and there has not been for some time. Every major nation bent on industrialization and economic growth has singled out auto as a sector to develop.

Every multinational wishing to do business in the major markets of the world has found it to be a political necessity to set up shop in those markets, to contribute investments and employment in return for access to those markets.

The U.S. can no longer afford to be the world's leading exception, accepting whatever others wish to sell here without expecting any contribution to our depleted economy in return.

If other nations' policies prevent auto trade from becoming a two-way street, our country cannot afford a one-way traffic jam of the unemployed. The fact is, our content proposal would not be significantly disruptive of world commerce; rather, it would assure that other nations trade responsibly.

Our minimum vehicle threshold, before application of any content provision, would permit foreign automakers who sell here in moderate volumes, such as BMW or Fiat, to continue to do so without interference.

The phase-in period contained in our proposal would permit companies to increase domestic content in an orderly and achievable way, on a timetable roughly like the one VW has followed voluntarily.

Moreover, with content set at no more than 90 percent even for the highest volume sellers, the automakers would still be permitted a substantial amount of foreign sourcing; consumers could still derive substantial benefits from further internationalization of production.

Domestic content requirements are already part of two laws that affect U.S. auto companies. First, the Corporate Average Fuel Economy (CAFE) requirements of the 1975 Energy Policy and Conservation Act include such a provision.

For CAFE standards, models sold in the U.S. with less than 75 percent North American value-added must be averaged separately from those with more than 75 percent content.

This has served in the past to reduce the incentive for U.S. auto companies to ship more small cars and parts here from their overseas operations, and has brought about faster domestic conversion to production of more fuel-efficient vehicles.

Second, the Automotive Products Trade Act of 1965 also contains a content provision. It permits zero tariffs on vehicles, parts, and materials when at least 50 percent of their value is derived from domestic production.

As a result of this provision, products merely assembled in Canada from non-North American parts would be charged a tariff when they enter the U.S. Japan has imposed local content requirements for its aerospace purchases. As a condition of its purchase of billions of dollars worth of fighters and patrol planes from Lockheed and McDonnell Douglas, Japan will produce at least 40 percent of their value.

The Boeing Company has also reported that foreign production has become widely required to make sales abroad. To help clinch major sales to Japanese airlines, Boeing made guarantees to source in Japan 15 percent of the multi-billion dollar production value of their new 767 series sold worldwide.

The Japanese government, according to its official sources, negotiated arrangements for three Japanese companies to participate with Boeing and provided a subsidy of almost $100 million.

A local content law is clearly superior to long term measures which simply limit imports.

The competition among the world's auto companies to provide the American consumer with a wide variety of innovative products built with the most efficient technologies available would be retained. The U.S. producers would continue to be pressured by the discipline of the design and engineering innovations of foreign-based manufacturers.

Local content requirements would, however, lead to increased investment in our country and prevent further disastrous loss of jobs. Such jobs would be not only in motor vehicle assembly, but in the many firms and industries which supply the auto industry.

Many of you in this audience represent companies that supply the auto industry with parts and components. I'd like to ask you to set aside for a moment the natural tendency to see corporations on one side of the table and the UAW on the other.

No doubt we have strong disagreements on certain issues, but on the question of content legislation I think we have a great deal in common.

The idea of content legislation does have support in both labor and business circles. My union advocates content, yet so does Business Week—hardly a radical publication. Automotive News, which most of you read, endorsed the idea of imposing a content requirement as well.

Today I began sending letters to more than 1,000 parts and supplier companies in the auto industry. In those letters, I'm asking their officers to consider joining with us in the legislative fight on behalf of content legislation.

On this issue, the parts sector and trade unions should have common cause. When General Motors threatens workers with statements it intends to buy or build more components "offshore," your companies may very well be victims as well. When Ford talks about out-sourcing parts overseas, it's your firms as well as our workers who are being blackmailed.

Content legislation not only will address the savaging of the American economy by the Japanese. It will also confront the exporting of American jobs and capital by General Motors and Ford. For years, those companies—whatever their other sins—did do what we're asking of the Japanese.

After World War II, instead of building cars in North America and shipping them to Europe, for example, GM and Ford produced where their market was. They built plants and produced vehicles in Europe for the European market. It would be the height of irresponsibility today for them to reverse that policy and begin producing more vehicle content overseas for the North American market.

The UAW has no intention of allowing them to do so. Nor will the American public tolerate GM or Ford abandoning our shores at the same time those companies seek help from taxpayers and consumers.

Last night you heard Donald Petersen of Ford Motor Company. Like Phil Caldwell, Mr. Petersen has repeatedly threatened to export our jobs unless the UAW reopens the agreement Ford signed committing itself through next September.

You've all probably seen the long row of flags in front of the Glass House at Ford World Headquarters. Now Ford threatens to lower the American flag and raise the colors of countries that distinguish themselves by paying their workers so little they can't afford to buy the products they make. Roger Smith of GM can't seem to get through a speech without making similar threats.

We have no intention of reopening those agreements. Yet, let me make it clear that the UAW fully intends to approach 1982 bargaining in a responsible manner. We are realists. We understand that bargaining doesn't go on in a vacuum—you have to face the economic realities that exist when you go to the table.

I'm hopeful we can work out whatever differences we have with the companies, as we have in past negotiations. The UAW is committed to new approaches at the bargaining table. There is some indication that may well be true of the Big Two as well.

Yet the issue before us today is what can be done now to restore the North American industry to health. There are a number of needed steps, but content legislation is most important. It addresses both the failure of the Japanese to trade responsibly and the threat of GM and Ford to out-source irresponsibly.

The content legislation would be constructed in such a way that companies could rationalize production on an international basis.

We're not urging that every single component that goes into a car sold here be built here. GM, Ford and other multinationals could still have some large volume plants in other countries which would produce parts for cars sold here. In fact, under the legislation we advocate, the U.S. companies currently would meet the content requirements even though they currently import some parts and components for the domestic market.

What the law would do, basically, would prevent domestic manufacturers from launching major efforts to significantly lower domestic content by exporting North American jobs. Who would benefit from content legislation? Just about everyone, in our view.

Consumers would have a wide variety of vehicles to choose from, rather than facing limits with restraints or tariffs or quotas. The consumer also would gain in that American automakers would face the discipline that foreign companies provide in terms of price, design, and product innovation.

Obviously, we believe workers would benefit. Content legislation means jobs—jobs in Detroit and Pittsburgh and Phoenix and Atlanta and all across this country.

Not only would autoworkers benefit, but so would steelworkers, glass workers, electrical workers, rubber workers, etc.

Our towns and cities would benefit from content legislation. Go to Westmoreland, Pennsylvania, and talk to the local merchants about Volkswagen. The union wage VW workers earn gets spent at the local A&P and the hardware store and the coffee shops. The school districts benefit from the tax base as do other units of government there.

Parts suppliers would benefit from content, as I've noted. Their gains, and those of their workers, would not be limited to new vehicle sales, but also would accrue in the replacement market.

Finally, I believe GM and Ford would benefit as well from content legislation, despite the limits it would impose on notions they have about offshore production. They would benefit because the Nissans and Toyotas would have to compete with them on the basis of quality, design, efficiency, price and product innovation, but not on who can pay their workers the least.

Currently, Japan is a country with high productivity in auto, yet it pays its autoworkers as if they worked in an industry with productivity well below Spain, or Italy. High productivity doesn't earn autoworkers decent purchasing power in Japan.

If labor costs are the key factor in international competition, the Japanese will probably experience in auto what occurred in the shipbuilding industry. Other less developed countries exist that are willing to exploit their workers even more.

The Japanese shipbuilding industry has lost market share in a shrinking market because the low-paying shipyards of Korea and Brazil took their markets. Unless a work order can develop that takes wages out of competition by paying workers based on productivity, the unemployment lines of Toledo will have their counterpart in Tokyo, while they work overtime in Taipei.

While the UAW intends to press the fight for content legislation, we are hopeful that representatives of all these groups that would benefit will join us. A coalition of workers, consumers, local governmental officials, parts and supplier firms, and even the auto companies would present a powerful political force on this issue.

In the past few months, my union has received many invitations to "come to the party" from various companies seeking our help. Where it was justified, we did. Now, on an issue which is also justified and which will mean increased investment and job creation here, we're asking them to "come to the party."

Winning content legislation will not be easy. Nor will convincing Washington that we need a coherent auto policy based in part on that legislation.

Other elements of that national economic policy should include the rejection of high interest rates and monetarism; imposition of wage/price restraints to slow inflation; targeted tax and capital formation programs; greater democratization from the shop floor to the corporate boardroom, and expansion rather than cutbacks in job retraining and relocation programs for workers and communities affected by economic dislocations.

There are numerous other initiatives which would help get our depressed industry back on track. I've outlined a program for you tonight that, if implemented, would mean that when you meet next summer at this same World Congress the auto outlook would begin to be brighter.

As a realist, I know some elements of the auto policy I've outlined will not be embraced by the Reagan Administration and the Congress, let alone the automakers themselves.

Winning the content legislation I've proposed tonight will take a very difficult fight. But it's one we can and should make together. If we do, and if we succeed, there probably still will be problems that will keep the champagne corks from popping in the hotel suites at next year's Auto News gathering.

But at least we all won't be crying in our beer over the 39th straight month of depression as all but those of you working for the Japanese automakers probably will do after the session tonight.

Thank you for hearing out my proposals and giving them your consideration.●

## MAKING IT MORE SECURE

### HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. LAGOMARSINO. Mr. Speaker, I would like to bring to the attention of my colleagues the following thoughtfully written editorial from the Ventura County Star Free Press on the difficult minimum social security payment issue.

MAKING IT MORE SECURE

Now that the budget and tax bills are in the corral, President Reagan is attempting to lasso a critter with even more political spunk: Social Security.

The president's original proposal was apparently to wipe out the minimum benefit of $122 a month—which, being paid to everyone who has the required Social Security work record but did not earn enough to be entitled to that amount, is now a sort of "floor" figure. The idea was to save about a billion dollars a year by paying each person with a work record exactly what past earnings entitled—even if it was less than $122 a month.

For people to whom that would be a real hardship, Mr. Reagan proposed that they be picked up by the Supplemental Security Income plan—the "gold check" program, a successor to the former old age security plan, which is based on age and need. SSI funding comes from general revenues, not from Social Security tax receipts, so the strain on Social Security would be eased.

The administration's real target is people who held government jobs not covered by Social Security, and who managed a bit of moonlighting in jobs that were covered by Social Security. Some of them now enjoy relatively good government pensions and also get $122 a month. Others who enjoy the minimum payment are retired, well-to-do people who have a minimal earnings record under Social Security, because their income has been primarily from investments; to them, the $122 is plain, tax-exempt gravy. The current Washington slang for these two classes is "double-dippers and coupon clippers," and neither of them is a hardship case.

But for many Americans, a minimum Social Security payment is a necessity. A congressional study shows that some 300,000 people, many of them widows, need that money for bare subsistence. These include people who can't qualify for SSI, in part because SSI has a rigid means test which would exclude a widow who happened to have more than $1,500 in bank deposits or other liquid assets. For these 300,000, who would "fall between the cracks" if the minimum were removed, Mr. Reagan promises compassionate attention, and he should get solid congressional support.

The double-dippers and coupon clippers may not like it, but the Social Security program was designed from the beginnning to provide a modest, minimum amount for those who need it. Saving a billion dollars a year, by limiting minimum payments to those in need, would be one essential step toward making the whole Social Security system a bit more secure.●

## REMARKS OF REPRESENTATIVE WILLIAM L. DICKINSON

### HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DICKINSON. Mr. Speaker, in developing a China policy, it is essential that the Reagan administration take into account Taiwan's very strategic location. It must be remembered that Taiwan guards two of the most important waterways in Asia—the Taiwan Straits and the Bashi Channel—and that whoever controls Taiwan controls the gateways to Southeast Asia.

In the article, "Taiwan's Strategic Importance" which appeared in Security, Prof. Chin Sheng-pao states that in order to contain Soviet expansion, it is imperative that Taiwan remain in strong friendly hands. Mr. Chin writes that:

Russia, since its estrangement with China, has been trying to break through U.S. encirclement and, in turn, encircle Communist China. The entrenched presence of Afghanistan and Pakistan in the Soviet camp, Laos'

recent severing of treaties with Peking, and the existence of large, vocal pro-Soviet forces in India and Iran are conclusive evidence that Russia is succeeding in its endeavor.

The professor's arguments are supported by such distinguished leaders as Leonard Unger, the last American Ambassador to the Republic of China, who wrote that:

A hostile government on Taiwan could threaten American friends and allies in North, East, and Southeast Asia. Over time, this could encourage policy shifts in those countries contrary to U.S. interests and diminish American influence in the area.

At this time, I insert Professor Chin's article in the RECORD for my colleagues to peruse at their leisure.

TAIWAN'S STRATEGIC IMPORTANCE

(By Chin Sheng-pao)

(Chin Sheng-pao received his LL.B. and LL.M. from National Cheng Chi University. He was also awarded an M.S. in area studies by the University of London. Chin, who specializes in national security issues, is presently an associate professor of international politics at National Cheng Chi University.)

The United States' decision to abrogate its Mutual Defense Treaty with the Republic of China and recognize Peking provokes the asking of two questions. One, why did the U.S. change its China policy after thirty years; has Taiwan's strategic importance to the U.S. changed so drastically? And two, how does this change in policy affect the security arrangements and strategic balance in the Western Pacific?

These two questions can perhaps best be answered by examining U.S. foreign policy vis-a-vis Russia since WWII and Taiwan's strategic importance after the 1949 Communist takeover of Mainland China.

George Kennan in 1947 published an article entitled "The Sources of Soviet Conduct" in the Foreign Affairs Quarterly stating that Russia can maintain internal stability only by external expansion. To bring about the internal collapse or at least changes in the nature of the Soviet regime, the U.S. must prevent Russia from expanding its sphere of influence.

This containment policy was adopted by Washington, and a series of alliance systems and mutual defense treaties was drawn up and signed to encircle Russia. The result was NATO, CENTO, SEATO, and the mutual defense pacts in the Western Pacific region with Japan, South Korea, and the Philippines.

The U.S.-ROC Mutual Defense Treaty was not signed until 1954. The Korean War brought the Americans and the Chinese Communists into direct conflict, and led to Washington's decision to contain what it saw as Peking's aggression. So instead of revising its China policy after the Communist takeover of the Mainland, Washington simply expanded its sphere of encirclement to include Communist China as well as Russia. By joining forces with the Nationalist Chinese on Taiwan, the U.S. closed up its last gap in the island defense chain in the Western Pacific.

The thinking in Washington at the time was that Communist China, like Russia, must expand externally if it were to maintain internal stability. Mainland China, however, was bordered on the east by the Pacific, the west by the Himalayas, the south by Southeast Asia, and the north by Russia.

Geographical elements alone, especially with Taiwan blocking Communist Chinese access to the Pacific, would make it impossible for Peking to expand east or westward. As for the north and south, if the U.S., armed with SEATO, could prevent Peking from expanding into Southeast Asia, the Communist Chinese would necessarily have to turn toward the north where they would come in direct conflict with Russia.

In the 1960s, a number of scholars including Harvard's John Fairbank came up with another theory. They felt the strong nationalistic feelings in Southeast Asia and the presence of so many overseas Chinese there would deter Peking from expandng southward, especially if American military presence were removed from the area. So if the U.S. withdrew its forces from Southeast Asia, Peking might feel free to move the bulk of its southern divisions north against Russia.

Carrying this thinking one step further, the scholars theorized that if Washington joined forces with Peking in its fight against Russia, it would make containment of Russia even more effective.

This theory gained much support in the United States, especially after the Vietnam debacle in the late '60s when the American people began calling for the withdrawal of U.S. forces from Southeast Asia. The theory was later adopted by President Nixon and became the basis of his Nixon Doctrine.

The change in U.S. foreign policy was also influenced by the many new developments in weapons technology. As the U.S. lost its military supremacy over Russia, it chose to substitute quality for quantity in its design and selection of weapons systems. The belief was that in the atomic age, genuine protection could be achieved only by a threat of retaliation on a scale such that it would deter the enemy from initiating an attack.

The introduction of inter-continental ballistic missiles, surface-to-air missiles, and nuclear submarines made obsolete the need to use Taiwan as a refueling station for U.S. long-range bombers or as a base from which U.S. conventional armed forces could launch military support activities.

Thus in view of U.S. rapprochement with Peking, which moved the frontiers of U.S. encirclement of Russia up to Mongolia, Taiwan was no longer needed to contain Communist China. The ROC as a result lost its strategic significance to Washington.

But is this really true? Is Taiwan then strategically unimportant?

Geopolitically speaking, all one has to do is look at a map to know this is not so. Taiwan forms one of the most vital links in the Pacific chain of defense, which stretches from South Korea, through Japan, Okinawa, Taiwan, to the Philippines.

But even more important is the fact that Taiwan guards two of the most important waterways in Asia—the Taiwan Straits and the Bashi Channel. Whoever controls Taiwan thus controls the gateways to Southeast Asia.

This is extremely significant in that U.S. encirclement of Russia is not the only containment system in Asia. Russia, since its estrangement with China after the 1950s, has been trying to break through U.S. encirclement, and in turn encircle Communist China. The entrenched presence of Afghanistan and Pakistan in the Soviet camp, Laos' recent severing of treaties with Peking, and the existence of large, vocal pro-Soviet forces in India and Iran are conclusive evidence that Russia is succeeding in its endeavor.

The friendship treaty of November, 1978, between Russia and Vietnam is also significant in that it is Russia's first major foothold in Southeast Asia. But for Russia to be an effective ally in this region, it must be able to deploy its Pacific fleet to support Vietnam in the event of a crisis, as was the case in February, 1979, when Communist Chinese forces invaded Vietnam.

At present, Russian control of the Kurile Islands off Japan allows it to move its Pacific fleet out of Vladivostok, However, to get to Southeast Asia, Vietnam specifically, it must pass through the Taiwan Straits or the Bashi Channel. Without access to these two waterways, the Russian fleet would have to circle around Australia and New Zealand to reach Southeast Asia. Russia's interest in ensuring that these two waterways remain open and that Taiwan does not fall into hostile, i.e. Communist Chinese, hands is thus quite understandable.

Taiwan's so-called "non-importance" is thus valid only in terms of U.S. assessment. And even this is true only insofar as Taiwan remains in friendly, i.e. not Russian, hands, and the U.S. 7th Fleet is allowed to patrol the area.

In fact, Washington would like to see a solution to the two-China problem, so that the safety of the Straits would be guaranteed. As long as Taiwan is separated from China, there is always a chance that something might happen to alter Taiwan's pro-American policy. Until a unification takes place, Washington will abide by the present status quo.

The U.S. and Russian conflict in this area can perhaps be explained as that of a sea power versus a land power, with the U.S. being the sea power and Russia the land power. For the U.S. to gain the upper hand, it must move ashore on to the Asian continent, thereby tightening the noose around Russia. Likewise, the Soviets must break out of U.S. encirclement and move out to sea. All strategic moves made by these two powers are directed toward attaining these ends. They are like two go players trying to outmaneuver and surround each other.

The U.S. in normalizing its relations with Peking has pushed its sphere of influence inland to the Sino-Russian border. America's coup, however, is countered by the growing presence of the Russian navy not only in the Western Pacific, but also in the South China Sea. Russian reconnaissance planes have also been making regular flights into the region since February this year. This is the first time in history that Russian planes have ventured this far south in the Pacific.

Taiwan's importance to both the U.S. and Russia lies in the fact that it is situated on the rim land, where the Asian continent meets the ocean. The island is thus a stepping stone from which the U.S. can launch its moves inland, and conversely where Russia can expand out into the ocean. The U.S. has succeeded in moving inland. This is why they consider Taiwan strategically unimportant.

As far as Communist China, the third major power in the region, is concerned, Taiwan is simply part of China, and a unification of Taiwan with the Mainland must be effected in the not too distant future. Peking is not likely to contemplate an immediate takeover, however, since it does not at present have the power to do so.

A successful invasion would require a blitzkrieg, which could be concluded before Russia or any other country would have time to react or interfere. This would mean

not only a large enough amphibious force to implement the invasion, but air supremacy over the Straits as well. Communist China has neither capability at the moment.

So unless they are assured of a successful invasion, and if nothing happens to aggravate such an attack, the Chinese Communists are quite prepared to accept the status quo. Taiwan, though not in their hands, is at least free from Russian domination.

A Taiwan swayed by Russia, the Communist Chinese fear, would not only allow the Russian fleet to patrol the Chinese Seas, but might even close off the Straits to Peking. This last move would split the Communist Chinese navy in two—one trapped in the South China Sea, the other in the East China and Yellow Seas.

The Taiwan issue is balanced so delicately now, any slight or unexpected change may make the situation explosive. This is why Japan, South Korea, Singapore, Hong Kong, and the Philippines are so concerned that the U.S. make an alternative defense arrangement with the ROC so as to safeguard the security and stability of the area after the 1954 Mutual Defense Treaty is terminated.

This is perhaps also why Russia till now has made no overtures to Taiwan, for fear that any action it might take would set off a chain reaction. As stated by Ralph Clough in his book Island China, one of the three things which would provoke Peking to move ahead its unification timetable and thus ignite the Taiwan powder keg would be a move by Russia to invade or ally itself with the ROC.

A second possible provocation, according to Clough, would be Taiwan's development of the nuclear bomb. President Chiang, however, has repeatedly stated that the Nationalist government has no intention of doing so.

The third and potentially most volatile circumstance would be a declaration of independence by Taiwan. Peking would never abide any move to separate Taiwan from China. As long as the government in Taiwan insists that Taiwan is part of China, and as long as the Mainland's military capabilities are not fully developed, the Communist Chinese will do nothing to disturb the status quo.

If something does happen to upset the delicate balance of powers, the change will most probably be to Russia's advantage, since the Russians have the least to lose. The U.S. and Communist China are unlikely to make any moves which will result in such an advantage for the Russians.

Thus, at least for the moment, Taiwan need not fear an outright attack. What it must guard against however is internal subversion instigated by foreign agents. Only in this manner will Peking and Washington achieve what they want without risking Russian interference.

As Leonard Unger, the last American ambassador to the ROC, wrote recently in the Foreign Policy Quarterly, Taiwan, far from being strategically insignficant,

". . . occupies a key position in the Western Pacific-East Asian security system. It lies along important shipping and air lanes that link Japan and Korea to their major oil and commercial connections in Southeast Asia, the Middle East, and Europe. Taiwan in unfriendly hands would represent a potential threat to those links. . . .

"So even though U.S. military experts have concluded that access to Taiwan is not essential to immediate U.S. security interests in the Western Pacific, a hostile government on Taiwan could threaten American friends and allies in North, East, and Southeast Asia. Over time, this could encourage policy shifts in those countries contrary to U.S. interests and diminish American influence in the area."●

## HUD-INDEPENDENT AGENCIES

### HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HEFNER. Mr. Speaker, I rise in strong support of the conference agreement on H.R. 4034, the HUD-independent agencies appropriations for fiscal year 1982.

As a member of the Appropriations Committee, I know the difficult circumstances under which these agreements are reached and, given the economic situation we now face, the problems of resolving differences on money bills are more complex than ever. Certainly, all of us are happy that the conference agreement is approximately $2 billion below the amount which recently passed the House. As the very able chairman of the subcommittee has pointed out, the conference agreement is more than $2.5 billion below the budget request. The bill is within the allocation to the Subcommittee on HUD-Independent Agencies based on the targets contained in the first concurrent budget resolution. According to the chairman, it meets the test of the Omnibus Reconciliation Act. In essence, Mr. Speaker, the conferees have done everything they could possibly do in keeping the bill within the spending limits set by the House as contained in the first concurrent budget resolution. I want to commend the distinguished gentleman from Massachusetts, the subcommittee chairman, Mr. BOLAND, and the very able ranking minority member, Mr. GREEN of New York, not only for doing such an excellent job in bringing to us a reasonable compromise with the other body, but for the expeditious way in which they have proceeded to get this appropriation bill to the President. This is the first appropriation bill that has gone all the way through conference. I hope it is adopted so that the Senate can move with it expeditiously.

Mr. Speaker, I am extremely pleased with the level of appropriations provided for in this conference agreement for our Nation's veterans and their dependents. My colleagues will recall that on March 10 of this year the administration submitted a formal request to the Congress that veterans' benefits and services be reduced by more than $800 million in outlays during the next fiscal year. Drastic cuts were proposed for the hospital and health care programs for veterans. The proposed cuts in medical accounts totaled more than $300 million. Most of the cuts would have involved a reduction of some 5,000 personnel in the hospital and health care system. As Chairman BOLAND has said, anyone who takes the time to visit a VA hospital knows full well the agency can ill afford to take such cuts.

At the time the proposed reductions were submitted to Congress, veterans' leaders throughout the country contacted me and, as a member of the Budget Committee, I offered an amendment during the consideration of the first concurrent budget resolution to restore approximately $600 million of the cuts proposed by the President for veterans' programs. I received overwhelming support, Mr. Speaker, in committee and, finally, the administration agreed to the restoration of these funds in the so-called Gramm-Latta substitute on the budget.

Mr. Speaker, I am pleased to state that this conference agreement reflects generally the level of benefits and services for veterans that the Committee on Veterans' Affairs and the Budget Committee proposed to the House. There is no question that the funding levels contained in this agreement will provide adequate monetary benefits to all veterans and, in addition, will assure all veterans, both service-connected and nonservice-connected, that their health care needs will be met in fiscal year 1982. The agreement restores $330 million and 5,181 staff-years proposed to be cut by the President. It will provide more funds for veterans to be treated in community nursing homes, a program, Mr. Speaker, that is very cost effective. Four million dollars has been included to implement the so-called Roberts' scholarship program, a program designed to bring more skilled nurses into our VA hospitals. There is an acute nursing shortage throughout the Nation and this program, when implemented, will allow the VA to begin to recruit more nurses who will be obligated to serve 1 year as a VA nurse for each year he or she receives a scholarship to attend nursing school. We expect to recruit 500 nurses the first year.

On balance, Mr. Speaker, this is an excellent bill, and I am delighted to support it.

It has been suggested that the President may have to veto this bill because some officials in the administration have advised him that the bill is over in outlays from what the President had proposed. I shall not go into the differences between the administration's estimates and those given to the Appropriations Committee by the Congressional Budget Office, but it is obvious to me that most of the outlays we are talking about are those we are enthusiastically supporting for veter-

ans. We thought it had been agreed to downtown. I understand the White House now has indicated that although the President is not opposed to the amount contained in the agreement for veterans' benefits and services, the restoration of these funds for veterans must come at the expense of a reduction in other departments or agencies. This, in my view, places the Appropriations Committee in an impossible situation. I would agree with Mr. BOLAND when he stated that to our knowledge neither Mr. Stockman nor anyone else in the administration has asked us to offset any amount for veterans' benefits and services. We thought this issue was resolved when we passed the so-called Gramm-Latta substitute to the budget resolution, and I hope the administration will live with the agreement that was reached at that time.

It would be a tragic loss for our veterans for the President to veto this bill. If he should do so, I am sure the veterans of our Nation will be asking the administration some critical questions as to where it really stands on veterans' programs for which we are told there is a strong commitment.

Mr. Speaker, I urge the adoption of the conference agreement. I hope the Senate will act on it promptly so it can be submitted to the President in order that he may sign it. If the President does veto the bill, Mr. Speaker, I would urge the chairman to bring it quickly before the House so we can consider a vote to override such veto.●

## BLACK COLLEGES FACE SEVERE PROBLEMS

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SIMON. Mr. Speaker, the Wall Street Journal carried an article on the effect student aid reductions would have on historically black colleges and universities. Despite the President's "safety net" assurances to the presidents of these institutions, the administration's budget and legislative proposals have the potential of significantly undermining the Federal student assistance programs which provide access to college for low- and middle-income students. As the August 4, 1981 Journal indicates, any diminution in Pell grant assistance will have a severe effect on low-income black students attending historically black institutions because the student is unable to make up lost Federal aid from other sources, and the colleges themselves are extremely dependent on the aid their students receive.

Black colleges and universities play a unique and important role within the higher education community. That role can only be maintained if Federal student aid, especially Pell grants and the campus-based programs, are not reduced. I hope my colleagues will read this article and keep it in mind when the fiscal year 1982 appropriations bill for education reaches the House floor. Maintaining at least an $1,800 maximum Pell grant and $2.65 billion in funding are important as higher education opportunities for a great many Americans.

The article follows:

BLACK COLLEGES GIRD FOR CASH CRISIS FROM REAGAN'S CUTS IN STUDENT AID

(By Anthony Ramirez)

HOLLY SPRINGS, MISS.—William A. McMillan is waiting for the shock wave from Washington to hit. As president of Rust College, a small black institution in this quiet town near the Tennessee border. Mr. McMillan is wondering whether federal cuts in student aid will mean fewer young blacks will enroll here this fall.

"We are hoping for the best," he says, "and preparing for the worst."

For Rust College, the question is far from academic: 100% of the student body receives financial aid.

Rust, which had more than 725 students last year, is similar in its federal dependency to many other black schools. Among the 41 member colleges of the United Negro College Fund, the money-raising agency for many black private institutions, 28 have student bodies in which 90% or more of the students receive aid.

NEEDY SCHOOLS

How federal cuts in education programs will affect black private colleges, almost all of which are in the South, has been largely overlooked in the public and congressional debate. These colleges already have been hurt by years of high inflation, scant endowments, low faculty salaries, critical maintenance long deferred and little state and local government aid.

"These places are running on a shoestring," says Humphrey Doermann, president of a private foundation that has helped raise funds for black colleges. "There isn't much slack left in them, if you start taking dollars out."

Black institutions larger than Rust College also will be hurt, says Elias Blake Jr., president of Atlanta's Clark College, which has an enrollment of about 1,800. "We're all crossing our fingers," he says.

Earlier this year, Congress approved reductions in several aid programs, the most important of which for black private schools is the Pell grant program. It provides flat annual awards to needy students. (Federal loans are less important to students at black colleges because many are from rural areas, where banks usually don't participate in federally subsidized low-interest loans.)

SCRAPING ALONG

For the 1981-82 academic year, which starts in the fall, Congress cut the maximum Pell grant to $1,670 from $1,750 a year. Although the $80 seemingly could be made up elsewhere, black educators fear that summer jobs are so scarce that many students coming from low-income families won't be able to scrape up the extra funds. "They're trying to hold together their education with Scotch tape and baling wire now," says Mr. Blake, who says that sums as small as $50 can keep some students out of college.

Moreover, Congress may be readying even deeper cuts in future years, although a rise in total program funds is slated for the 1982-83 academic year. That's because an increasing number of eligible students and more government money to cover high-interest costs for federal loan programs may mean Congress will award students steadily dwindling aid over their college careers.

Meantime, Congress decided late last month to authorize a maximum of $2.65 billion for 1982-83 Pell grants, up about 13% from the year-earlier appropriation of $2.35 billion. Actual appropriations for the 1982-83 year and the maximum Pell grant award haven't been set yet.

Certain technical changes also are likely to hurt. Congress eliminated, for example, the $10-per-student administrative allowance to pay for clerical staff at colleges.

At Rust, founded in 1866 and one of the oldest black schools in the U.S., these cuts could cause enrollment to drop 15% or more, Mr. McMillan says. That would deprive the school of much indirect federal money for its $4.7 million operating budget.

Mr. McMillan says he may have to phase out several small academic departments, cut book-purchase money for the 60,000-volume library to $100,000 from $150,000, close down "some" buildings (out of seven major buildings) to save on winter heating bills, and reduce by as much as a third the college's 35 faculty positions.

Students already enrolled at Rust are likely to feel the effects of federal cuts. Jason Jackson, a 19-year-old freshman from Collierville, Tenn., who is majoring in music, is the son of a Memphis, Tenn., sanitation worker and the first in his family of 10 to go to college. He is on 100% financial aid, except for pocket money of $132 he earned last summer packing eggs at a poultry farm.

"I don't know what I'll do if my aid is cut," he says.

About 80 percent of the student body comes from families with incomes of less than $9,000, according to Fannie Lampley, the financial aid director. Almost all of the students, she says, receive the maximum $3,609 award for tuition, room and board, books, and miscellaneous costs—including the Pell grants. Pocket money and other costs bring a student budget to about $4,000, she estimates. (Some students say they get by with as little as $100 pocket money in a school year.)

Like other black schools, Rust's faculty and staff salaries are low. Pay for a full professor, according to the administration, is about $19,000 annually, but one faculty member, who doesn't want to be identified, says the actual top pay is $14,000.

Faculty and staff are discouraged from attending too many out-of-town conferences—and banned from going by airplane. They are strongly "encouraged" to travel by car or bus. (Staff automobiles are purchased for about $200 each from Army surplus.) They also are encouraged to stay with friends rather than at hotels.

Rust College's 120-acre campus is attractive; the McCoy administrative building overlooks lawns with a gazebo. There is a new $1.3 million cafeteria and media complex, and a $180,000 faculty-staff apartment complex. But several dormitories and other buildings badly need repairs. At Wiff, a women's dormitory, one shower hasn't worked for almost a year. Indeed, bad plumbing has acquainted most students with cold showers. In the school auditorium,

a leaky roof plops water onto the first few rows of seats.

The chemistry laboratories often lack essential—but expensive—equipment and chemicals. In some classes, students have to triple up on books. A freshman English class recently complained that many of their class materials, being photocopies, were hard to read. And many texts are paperbacks, which fall apart faster than hardbound volumes.

Rust's endowment is small, about $3.2 million, and there is little in the way of private contributions that might replace federal money. Mr. Doermann, who is president of the Bush Foundation, in St. Paul, Minn., estimates that for every $2 provided by corporations and foundations for education and other purposes, the federal government spends $100.

"We're outgunned," he says.

HARD-LUCK STORIES

David L. Beckley, Rust's chief fundraiser, says private giving has been flat for the last few years. Giving totaled $1.6 million last year—including the usual $560,000 or so annually from the Methodists, founders of the college—and it isn't expected to rise this year. Taking inflation into account, that means a drop in purchasing power.

"A lot of corporations are telling us that their stock portfolios aren't performing well," Mr. Beckley says. "I expect to be hearing that a lot."

To be sure, the Reagan administration has expressed support for black colleges. It helped increase technical assistance earmarked for black colleges to about $120 million in the 1981-82 academic year from $110 million a year earlier.

But the Department of Education, which implements federal policy, apparently has given little thought to black colleges. "If there is a policy, you let me know," says Anita F. Allen, a top official in the Office of Student Financial Assistance.

If federal education cuts dissuade young blacks from black colleges, they may not be able to get into white schools. Many black freshmen come from inferior high schools and are thus educational "salvage operations" requiring much remedial education, says Christopher F. Edley, executive director of the United Negro College Fund. Yet 30 percent of the graduates of black private colleges go on to graduate school, he says.

White institutions probably wouldn't give so much remedial education to blacks, Mr. Edley says. "After all, if blacks don't have a strong regard for the education of black youth," he asks, "who will?"●

## SOVIET-VIETNAMESE USE OF BIOLOGICAL-CHEMICAL WEAPONS IN ASIA

### HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BROOMFIELD. Mr. Speaker, once again the true nature of the Soviet and Vietnamese regimes has been revealed by this inhumane use of biological-chemical weapons in Southeast Asia. The administration's evidence that lethal toxins have been savagely used against non-Communist resistance forces will no doubt be elaborated upon in the coming days. Those of us who have followed the Soviet biological-chemical buildup over the last few years, accompanied by the enhanced ability of Soviet troops to fight under integrated battlefield conditions, are nevertheless shocked that the Soviets continue to use banned weapons in contempt of the 1972 Biological Weapons Convention and the 1925 Geneva protocol against their use.

This is not a new problem concerning use of biological-chemical weapons. The United Nations has already started an investigation into Soviet abuse in this area. Prior Soviet violations have been reported in Afghanistan and by either Soviet or Vietnamese troops in Cambodia and Laos. Additionally, there is the suspect Sverdlovsk incident in which it is alleged that 1,000 Soviet civilians were accidentally killed by an explosion at a Soviet biological-chemical warfare plant. We have heard many firsthand accounts of Soviet attacks with these weapons, although technical/medical analyses have been difficult to undertake for a variety of reasons. Now, however, we have preliminary evidence which confirms our worst suspicions.

I recommend that this new information be turned over to the United Nations for assistance in their ongoing investigation. Furthermore, I recommend that the House Foreign Affairs Committee hold hearings on the Soviet/Vietnamese use of biological-chemical weapons in Asia. These hearings would emphasize the new information developed since our last hearing on the subject on April 24, 1980.●

## PROPOSED SALE OF FIVE AWACS TO SAUDI ARABIA

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. LONG of Maryland. Mr. Speaker, in the coming weeks, it is likely we shall be voting on the largest single arms sale package in U.S. history—the proposed sale to Saudi Arabia of five AWACS and enhancement equipment for the F-15 fighter costing $8.5 billion.

I recently held a hearing on this ill-conceived proposal in my Subcommittee on Foreign Operations, and would like to take this opportunity to share with my colleagues my opening statement from that hearing.

STATEMENT BY CHAIRMAN CLARENCE D. LONG

Good Morning. We are today holding an educational hearing on the largest single arms sale package in U.S. history—the proposed sale of five AWACS and enhancement equipment for the F-15 fighter costing $8.3 billion—to Saudi Arabia. We have assembled some of the most respected experts on both sides to inform the Subcommittee on all aspects of this proposal.

The Administration, invited to defend the sale before this Subcommittee has declined to state its case publicly until prenotification period is over. Such reticence following its own publicity damages the credibility of the Administration and the Congress.

In an effort to convince the Administration to withdraw the proposed sale, on April 27th, I, along with Representative Norm Lent (R-N.Y.) introduced a bipartisan Resolution of Disapproval of the sale because I felt, as I do today, that this sale is contrary to the national interest of the United States. Two hundred fifty three Members—35 more than a majority, have cosponsored the Long-Lent Resolution of Disapproval (H. Con. Res. 118).

I. COMPROMISE

This proposal can neither ensure stable and secure access to regional oil, prevent the spread of Soviet influence, insure the security of friendly states in the region or in any way enhance our credibility in supporting regional security. The sale would expose our most sophisticated technology to capture by the Soviet Union either through bribery, defection, or accident, as did our sales of F-14s to Iran before its downfall. Indeed, this nation had agreed to sell this very AWACS technology to Iran for largely the same reasons now cited by the Administration for the sale to Saudi Arabia. Fortunately, the delivery date came after the revolution. This time we may not be so lucky. Just two months ago, two 707s—the same aircraft which carries the AWACS equipment—were hijacked from Iran, one carrying former President Bani Sadr to France. Some of the American weapons systems compromised in the Iranian Revolution include the F-14 fighter, the Phoenix missile, the Hawk surface-to-air missile, and the TOW antitank missile.

II. COST TO TAXPAYERS

Second, this sale is against U.S. interests because it represents a giant increase in the arms spiral in the Middle East, a spiral funded largely with American dollars. The American taxpayer would ultimately foot the bill as we would be forced to provide additional aid to the Middle East straining our already overburdened foreign aid budget. Foreign military sales credits to Egypt for example, have already increased from 0 in fiscal year 1980 to a proposed $900 million in fiscal year 1982. Out of the Administration's request of $4.054 billion for foreign military sales credits in fiscal year 1982, 62.7 percent would go to the Near East (Egypt, Israel, Jordan, Lebanon, Oman, Yemen, Morocco and Tunisia).

III. ARMS RACE

This sale will result in a substantial increase in Saudi offensive potential, resulting in a step up in the arms race all over the Middle East. Saudi Arabia, armed with the AWACS and F-15 technology, will be inexorably pulled into a future Middle East war with potentially devastating results.

This huge step up in the arms race has the potential to kindle World War III.

IV. OFFENSIVE POTENTIAL OF AWACS

The Administration has stated that the AWACS, "help Saudi Arabia to defend itself against regional threats but will not measurably increase Saudi offensive potential." According to Senator John Glenn, however, "even the introduction of a crude airborne command center over North Vietnam multiplied our aircraft kill ratio by a factor of six." In a major exercise conducted at Nellis Air Force Base in Nevada, two AWACS were

able to coordinate 134 friendly aircraft and stand off 274 enemy planes. All attempts to attack the AWACS failed.

V. RECORD OF SAUDI COOPERATION

The Saudis have been made out to be a great friend of the United States, yet Saudi Arabia is the major financial supporter of the PLO, has condemned the Camp David agreements, and has opposed the American rescue attempt of the hostages in Iran and even the American response to the Libyan attack recently. The Saudis have refused us basing facilities. The price of their oil has risen from $2.59 per barrel in January 1973 to $34 per barrel in January 1981, hardly a moderate increase.

With this sale we are lighting matches over the most explosive area in the world today. If World War III should break out with all its horror, this is the area which could set it off, and the U.S. taxpayer will be paying to induce his own disaster.●

## BEST WISHES TO GARY HYMEL

### HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, September 16, 1981*

● Mr. QUILLEN. Mr. Speaker, I am pleased to join my colleagues in extending my best wishes to Gary Hymel as he begins his new career.

It's been a real pleasure working with Gary over the years. Gary was a great asset to the Speaker's staff and was also held in high regard by Members on both sides of the aisle.

I always found Gary fair and helpful while at the same time dedicated and loyal to the Speaker. Gary held a difficult and responsible position and he carried out his duties with skill and good judgment.

Again, I congratulate Gary on his fine service to the House and its Members, and extend to him my best wishes for his continued success.●

## ACID RAIN: AN AMERICAN TRAGEDY

### HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. LaFALCE. Mr. Speaker, I commend to the attention of all of our colleagues an article penned by Robert H. Boyle for the September 21, 1981, issue of Sports Illustrated. In "An American Tragedy," Mr. Boyle likens acid rain to a "chemical leprosy • • • eating away at the face of the U.S."

Mr. Speaker, the article is but another source of evidence detailing for all who choose to read it that acid rain is not a problem confined to the Northeast, that acid rain is not the new cause celebre around which the descendants of Sun Day rally to protect the environmental movement for its own sake, and that acid rain is not a problem that can only be resolved by pitting no-growth enthusiasts against economic revitalization and expansion. What acid rain is, Mr. Speaker, is a continually worsening problem that threatens our environment, our health, our economic health, and our good relations with our Canadian neighbors. We must meet this threat today, Mr. Speaker, for our failure to do so will make tomorrow's victory harder to achieve and filled with spoils.

For the benefit of our colleagues, I am inserting in the RECORD one small part of the article detailing on a State-by-State basis the very real costs that we pay today. From the Northeast to the Southwest, and from the Northwest to the Southeast, our rivers, streams, wildlife, plantlife water supplies, buildings, industry, and our health are daily threatened by the poisons that fall from our skies.

The article follows:

A CONTINENT HEADED FOR DISASTER

Maine: Native brook trout have ceased reproducing in all small lakes over 2,000 feet in altitude. The pH in these lakes is 5 (pHs of less than 5.6 are hazardous to aquatic life). The headwater tributaries of at least five Atlantic salmon rivers are sufficiently acid to jeopardize the lives of young fish.

New Hampshire: "The usual picture of acid-pickled lakes is beginning to emerge," says Ronald Towne, chief water pollution biologist of the state's Water Supply and Pollution Control Commission. "We have lakes with low pH, low alkalinities, no fish or missing year-classes, high aluminum." So far, Towne has found that seven high-altitude lakes he has been able to reach by car are "bad," but he hasn't been able to get funds for a helicopter needed to sample remote waters.

Vermont: Several lakes in the Brooks Wilderness Area of the Green Mountain National Forest have a pH of 4, and two tributaries of the West River, Ball Mountain Brook and Wardsboro Brook have been acidified.

Massachusetts: Acid precipitation is pelting the state—this summer, the pH of a rainstorm in Lawrence was 2.9—and Massachusetts' fisheries and drinking-water supplies are both threatened by disaster. The Quabbin Reservoir, which supplies the Boston area, often registers surface water pH values in the 5s and 4s, according to Alan VanArsdale, head of the Massachusetts Department of Environmental Quality Engineering's Acid Deposition Assessment Program. Other bodies of water that have lost their buffering capacity include the headwaters of the Westfield, Deerfield and Swift rivers; the Wachusett Reservoir, Atkins Reservoir, North Watuppa Pond, the reservoir for Fall River; a series of high-elevation (1,200 to 2,000 feet) ponds and reservoirs in the Berkshires; and the drinking-water ponds in Plymouth County. VanArsdale isn't optimistic about getting the EPA funds needed to investigate or improve the situation. "They're not going beyond step one to start funding activities in the Northeast," he says. "They're waiting till we scream bloody murder."

Rhode Island: Officials are keeping a watch on the Scituate Reservoir system, which serves as the drinking-water supply for nearly half of Rhode Island. The total alkalinity of the reservoir is low, ranging from three to seven parts per million. The average pH of rain this summer was 3.5.

Connecticut: A dozen lakes have a total alkalinity of less than five parts per million, but Charles Fredette of the state's Department of Environmental Protection terms acid precipitation a "long-range" concern. "We don't have high-altitude lakes like New York or New Hampshire," says Fredette, "and we have relatively good buffering capacity."

New York: It has been documented that 212 Adirondacks lakes and ponds totaling some 10,460 acres are acidified and incapable of supporting fish life. What is infrequently pointed out is that this figure is derived from tests made on only a third of the lakes and ponds. From the same limited sample, another 256 lakes and ponds totaling 63,000 acres were judged to be in danger of losing their fish. The headwaters of the Hudson have been acidified in part. Other sensitive areas in the state include the Tug Hill Plateau to the west of the Adirondacks, the Catskill Mountains, the Shawangunk Mountains, the Hudson Highlands, the Palisades area and Long Island.

New Jersey: Research is just getting under way, but there are "some waters in the northwestern part of the state that show some signs of acidification," says Dr. Dean Arnold of the U.S. Fish and Wildlife Service. According to A. H. Johnson of the University of Pennsylvania, headwaters of streams in the Pine Barrens show signs of acidification from precipitation.

Pennsylvania: "At present many of our mountain steams can no longer support rainbow trout, and some of our first- and second-order streams can't even support the more tolerant brown trout," says Fred Johnson, Water Resources Coordinator of the Pennsylvania Fish Commission."There are also streams that we can't stock before the trout season begins because of the acidity of the snowmelt. The situation is very serious." A portion of Pennsylvania extending through the central and northern sections of the state routinely has the most acidic rainfall of any large area in the country. The average in the summer is pH 3.8.

West Virginia: A dozen trout streams are too acid to support fish. Moreover, 150 miles of the state's total of 550 miles of native brooktrout streams are considered "threatened," says Don Gasper of the Department of Natural Resources. "The average pH of this 150 miles of streams is 5.5," he says. "In the springtime it dips down to 4.8 or 5 and then climbs up to 6 in September. If the stream pH were to decline a half a pH unit, there would be no more fish. West Virginia is a stream state, and we're talking about losing one-quarter of our heritage," concludes Gasper. "What's coming down is very, very bad. We're really very worried." In addition, stocked streams are also being affected. Gasper says that about 150 miles of these are too acid in the spring to be stocked.

Kentucky: In Cumberland State Park, located in the southern part of the state, acid deposition is leaching heavy metals into watersheds. Lake Nevin in the Bernheim Forest, which is close to the Kentucky-Indiana border, has detectable levels of lead.

North Carolina-Tennessee: The Great Smoky Mountains National Park, which covers 509,000 acres in both states, is taking a battering. The beautiful blue haze that comes from lacquers and oils liberated from the forest canopy is rarely seen. Instead, visibility has been greatly reduced, obscured by an ugly gray haze composed of man-

made particulates, mostly aluminum sulfates. After the Los Angeles basin, the western slope of the southern Appalachians, from Georgia north to Kentucky, has the highest frequency of air stagnation in the U.S.

The average pH of precipitation in the park has gone from 5.3 in 1955 to 4.4 in 1973 and 4.2 in 1980. In the spring, stream pH levels drop to as low as 4.3, and aluminum leaching is ongoing. In Beech Flats Creek zinc and aluminum have reached nearly toxic levels for fish, and rainbow trout in the park contained more than the permissible amount of mercury allowed for human consumption until the Food and Drug Administration raised the level from 0.5 parts per million to 1 in 1979. In lakes lying just outside the park boundary in North Carolina, smallmouth bass have abnormal backbones, generally associated with aluminum toxicity. Amphibians, particularly salamanders, are also threatened. The park contains the greatest diversity of salamanders in the world, including the Plethodontidae, the lungless salamanders that probably evolved in the region.

Georgia: Northeastern Georgia, extending from Raymond County to Pickens County, has low buffering capacity, according to state environmental officials. There have been reports of skeletal deformities in smallmouth bass in Lake Chatuga, a northern reservoir, and officials say there's some indication that these might be the effects of low pH.

Florida: Acid precipitation threatens poorly buffered lakes in the sandy central highlands region that runs the length of the peninsula. According to Dr. P. L. Brezonik, water resources specialist formerly of the University of Florida and now at the University of Minnesota, the acidity of Florida rainfall has increased markedly in the last 25 years. The most acidic rains—with a pH of less than 4.7—fall on the northern two-thirds of the state.

Michigan: Some 16,000 lakes of more than 10 acres each are considered susceptible to acid precipitation. More than half the 8,000 lakes and ponds in the Upper Peninsula have an alkalinity of only about 10 parts per million. The Keeweenaw Peninsula on Lake Superior receives one of the heaviest snowfalls in the U.S., averaging about 12 to 13 feet annually, and the median pH for snowfalls in the winter of 1977-78 was 4.5.

Wisconsin: Twenty-six hundred lakes of more than 20 acres in size are considered very susceptible to acidification because they have a pH of 6 or less and little alkalinity.

Minnesota: The northern part of the state, particularly the Boundary Waters Canoe Area Wilderness, is susceptible to acidification. In fact, the "Transboundary Air Pollution Interim Report," prepared last February by a group of American and Canadian scientists, noted that "Atmosphere load near the BWCAW is at levels associated with the onset of lake acidification in Scandinavian countries."

Colorado: Acid precipitation is falling on the Rockies northwest of Denver. Drs. William M. Lewis Jr. and Michael C. Grant, environmental biologists at the University of Colorado, accidentally discovered this in 1975 while they were working in the university's mountain research station, 9,000 feet up at Como Creek, adjacent to the Indian Peaks Wilderness Area. In the four years from 1974 to '78 the pH of precipitation dropped at a rapid rate, from 5.4 to 5.0, to 4.8, to 4.7. Then, in August, Dr. John Harte of the Rocky Mountain Biological Laboratory reported that small lakes and streams in the Elk Mountains near Crested Butte in western Colorado have very high levels of acid. Harte said that the pH of rain and snow in the area had sunk as low as 3.6 in some storms.

Wyoming: The average pH of precipitation falling at Yellowstone National Park was 5.2 in 1980.

Montana: The pH average for precipitation in Glacier National Park was 4.9.

Idaho: The 1980-81 pH average at Craters of the Moon National Monument was 4.8. All these Rocky Mountain averages are for wet deposition only.

New Mexico: Acid precipitation with a pH often in the 4s and occasionally in the 3s has been reported for the Teseque Watersheds in the Santa Fe National Forest.

Arizona: The 1980 pH average for Tombstone was 5.2.

Washington: Twenty-four of 68 lakes sampled in the Olympic Mountains and the Cascades by Drs. Eugene B. Welch and William H. Chamberlain, of the University of Washington, had a pH of less than 6. Seven lakes had a pH of less than 5.5; they all were located in the Alpine Lakes Wilderness, due east of Seattle. In a report submitted to the National Park Service, Welch and Chamberlain noted that 70% of the rainfall monitored in Seattle ranged in pH from 5.2 to 4.2.

California: Dr. Doug Lawson, a researcher for the state Air Resources Board, says, "The state has levels of acid precipitation as high as or higher than any place in the country, and we do have areas that are very susceptible in the Sierra Nevada and around Los Angeles where there are exposed granitic surfaces." The pH of drizzle measured by Dr. James Morgan of Cal Tech in 1978 was 2.9. Recently, when scientists flew through smog over Los Angeles, they were unable to conduct tests because acids had corroded their instruments.●

## THE IDEA OF A UNIVERSITY

### HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. CRANE of Illinois. Mr. Speaker, our universities are disappearing. The noted scholar and teacher, Prof. Thomas Molnar, added to his formidable reputation as one of the most perceptive thinkers of our time by observing more than 20 years ago that universities were "becoming subcultural and mass-cultural supermarkets where the citizens enroll to receive a document, a kind of identification card, authorizing them to circulate in a bureaucratic society, or, if older, to earn promotion and wage increases."

This prediction has become a reality. For all practical purposes, the university, as it has been understood for over 700 years, no longer exists. This is of profound importance to the Western world, and I highly recommend Professor Molnar's essay to the attention of my colleagues and the American people. It was published in the spring, 1981 edition of the University Bookman.

UNIVERSITIES: AMERICAN, EUROPEAN, THIRD WORLD

(By Thomas Molnar)

The literature and documentation of our educational decline have grown enormously in the last quarter-century, but we have now reached the moment when we may see education in perspective. Perspective in this case means the retrospective and prospective glance—but also a sideways look—to see what happens in other countries and contineents where the initial situation was different from ours.

I have been helped in my assessment of the state of education by two factors. One is the awareness that the Sodom-and-Gomorrah morality and public spirit which permeate our existence are due largely to what has been going on in our schools and universities. We always knew it, but since 1968-70 the realization has kept hitting us with a particular force. The other element of my perspective on education is derived from various sojourns in other lands where, in developed as well as so-called underdeveloped countries, I could observe at first hand—while teaching and lecturing—the mentalities, programs, and educational policies.

Next to economic development and growth, education is the most universal demand today, and we may legitimately argue that the two are connected. The industrial revolution and the rise of democracy made universal compulsory schooling necessary, and vice versa: the schooled man asked for well-remunerated work and for the right to share in the political process. After a country's economic and political regime, education has become the third most important measuring rod of progress. Thus it was inevitable for American education to topple from the pedestal where Cardinal Newman had positioned it. In America, together with industry and democracy, education was regarded as part of the secular trinity. It became also inevitable that the masses of candidates for schooling would debase the high ideals of scholarship and culture, and insist on lowering standards until all could reach them. To the student masses, masses of teachers and professors were added, the majority of them with no ideals higher than those of their pupils and students: a job and a life easier than that of their average fellow citizens.

Since the damage done in schools—to minds, to the moral sense, to the cultural patrimony—is not so easy and rapid to detect as in industry, engineering, or medicine, several decades had to pass before we could be fully aware that education attained its two-centuries-old goal, that of educating everybody in the name of identical presuppositions. The failure to recognize what had happened was hidden by the tumultuous character of our democratic industrial civilization: so many channels exist for the education (actually informing) of the citizen that the school proper no longer seemed to be the most important and privileged one. All sort of silly things could be required of the classroom, from driver education to courses in dating, and for a while the explanation was that culture and knowledge may be also, or better, communicated through television, the press, field trips, discussion groups, or simple living. Those who spoke thus obviously had a view of culture dictated by ideology. Following Dewey, they believed that the classroom is not a place for learning but a laboratory for reshaping society, together with other such "laboratories." In modern times, the argument con-

tinued, there is no need for culture which, being a rehash of old events and values, instills in the recipient's mind antidemocratic prejudices.

Roughly a dozen years ago it became evident that education for "living," for the "whole child," for "democracy," for a "better world," etc., had resulted not only in crass ignorance but also in the annihilation of the very values on which this idea was based. After the teaching of history was replaced by "current events," the students lost all curiosity even in the latter. After elective courses were allowed to obliterate the "core curriculum" students and professors began arguing that the liberal arts core was not advantageous for the handicapped and that it did not leave enough room for electives. When students were authorized to "evaluate" their professor, they gave highest rank not to the best teachers but to the rabble-rousers and third-world revolutionaries. When the university opened its doors to all applicants with high-school diplomas (themselves worthless), the demand arose for a further lowering of standards to accommodate the illiterate and the idiot.

I do not think I astonish anybody by citing a few examples of the present level of students and professors. A friend reports from a respectable Catholic university that his students do not understand why B.C. dates decrease and A.D. dates increase. At a prestigious college I met Ph. D's. who had never attended a course in ancient history (perhaps TV serials were trusted to instill the requisite knowledge of "great civilizations"). At the college where I teach, modern languages are no longer required, although a colleague on the highest curriculum committee said she would vote for requiring them if "computer language" were also required.

These are some of the antecedents and symptoms. Let us enlarge now our scope and examine the relationship of education and scholarship. Here we witness an enormous paradox. In the past, the two hardly ever proceeded hand in hand, but their link was solid and unbreakable. For example, when late scholastic disciplines and methods were still being taught in universities, even in medical schools, between the fifteenth and eighteenth centuries, science, philosophy, medicine, and law were detaching themselves from the official current and experimenting with new concepts and processes. Yet the Aristotelians at universities remained frères ennemis with the moderns—the Gassendis, the Harveys, the Mersennes, the Bacons, and the Cartesians. Their debates were not only meaningful; they were mutually enriching. Earlier, the Hellenistic-Roman vogue of Stoicism (practically an official teaching) could enter into dialogue with the emerging Christian scholarship; the neo-Platonic Plotinus had Christian masters and co-disciples, and he in turn influenced Christian mysticism for centuries. In my own school days, the highest scholarship was distilled into high school textbooks, although with some natural delay, since the tasks of schools is not to stand at the frontline of knowledge but to bring up the rearguard.

This relationship, evident at all periods, did not go without deep conflicts, as is illustrated in the first centuries or in the seventeenth, to choose examples at random. Budding Christianity realized that it could not acquire genuine respectability until it had established contact (even if partly antagonistic) with prevailing versions of Greek philosophy and scholarship. Justin and Tertullian created the links, St. Augustine later the synthesis. In the seventeenth century the overly sensationalized drama of Galileo merely obscures the elaboration of a synthesis in which the academic doctrine and the new science were to be participants for nearly two more centuries.

Today, scholarship, culture, and the schools are so fragmented that the exponents of each meet only by chance and have nothing to say to one another. Education has become a frivolous yet routine exercise, with curricula decided on the grounds of fashion, economics, and political expediency. Courses in female liberation, various racisms, black, hispanic, Judaic, and other "studies" resist successfully timid attempts, here and there, to maintain a liberal arts core curriculum. Culture is mostly counterculture, a series of faddish clouds floating above the populace, serving the snobbism of the jet set, of international juries, and of big executives who need the culture tag as an apology for their capitalistic wealth.

Yet, all this does not affect real scholarship, its sturdiness and originality. In all periods there are men with inquisitive minds loyally committed to the scholar's life. Such men have always been a very small minority, and it has never made any difference whether they were located among the elite or in some other rank of society. They collaborated even if their lives were spent in relative isolation. Only in modern times has their status changed vis-a-vis society: there arose a class of educated people, aristocratic and bourgeois mostly, knowledgeable enough to serve as recipients of high scholarship in the form of the reading public. Between the sixteenth and nineteenth centuries, hundreds of scholars, philosophers, scientists, and artists were engaged in fruitful correspondence with "lay" individuals, from the middle and artisan classes, with whom ideas could be exchanged and taste discussed simply because they were cultured, educated, or self-educated, and insatiably curious. When Diderot launched the *Encyclopedia*, a costly as well as politically risky business, two thousand subscribers registered immediately and paid their subscription fees in advance.

This is how scholarly reputations grew and spread beyond small circles, and, incidentally, this is how the general optimism grew that by schooling everybody would become learned and acquire the moral quasi-asceticism and singleness of purpose needed for scholarly studies and interests. The idea was to embrace the entire nineteenth century, although by then there were a number of lucid minds, from Goethe to Burckhardt and Matthew Arnold, who realized that the more culture and scholarship spread, the more semi-educated people would crowd the corridors of academies, newspaper offices, lecture halls, and publishing houses. Nonetheless, the scholar and the artist had by then become accustomed to a large public, the so-called "educated layman" listening to their lectures, discussing their theses, and admiring as well as buying their "products." When the phenomenon of the mass-university appeared first in the United States, then planetwide, the "educated public" grew to its broadest extension, becoming an "official public." The millions in high schools and universities had to take liberal arts courses and had to read thousands of pages of Homer, Plato, Augustine, Descartes, Shakespeare, and Marx. This was the brief honeymoon time between scholars and masses, the time when the scholars and their middlemen, the professors and the publishers, still had enough authority to impose their cultural and scholarly ideals on the masses of students and on the so-called public.

The drastic change came in the late Sixties and early Seventies. The student masses, by now a distinct sociological and political category, with their enormous weight as a pressure group, rebelled against their leaders in culture and scholarships, the professors and the curriculum planners, whom they perceived now as oppressors in the Marxist sense of the term. Education, in their view, must not be subordinated to something as vague and reactionary as culture and scholarship, which the students interpreted as the manipulative devices used by the bourgeoisie to control the masses of students through cultural selection. In the true spirit of the Enlightenment and nineteenth-century liberalism, they claimed that "education should be for the masses," but this slogan no longer had anything to do with the watchword from d'Alembert to Trotsky. D'Alembert, it will be recalled, had demanded knowledge for all, and Trotsky believed that in the Communist society the average man would have the genius of Aristotle and Goethe.

Since 1968 the student masses have abandoned even the pretense of high culture, and a decade later, now, we are witnessing the consequences: the self-liquidation of the "educated lay-public," mostly former students. One need only visit some prestigious New York bookstores to become aware of the change. Where there used to be long shelves of philosophy, religion, history, etc., in paperback editions, there is now a small corner devoted to books on the occult, on gardening, on party fun, popular science, and sexual perversions. The unsuspecting browser and buyer are no longer exposed to intellectual challenge; they are fed the kind of mush that, in a parallel process, the college students are made to ingurgitate in their classes under the pretext of education. The paperback editions of scholarly works are forced into the background because even fewer professors require, or dare require, them as compulsory reading. The publishers follow the trend and in part anticipate it. Years ago, on the threshold of decline, they at least insisted that the manuscript submitted to them should be written in a clear style, for the "educated public." Later, this label tended to disappear, and the request by publishers was for books that colleges would order in large quantities. Nowadays, college courses require no "large quantities," and the publishers frankly ask for books for mass circulation and "bestsellers."

All this indicates the coming divorce between education and scholarship. More than twenty years ago I observed in The Future of Education that universities were becoming subcultural and mass-cultural supermarkets where the citizens enroll to receive a document, a kind of identification card, authorizing them to circulate in a bureaucratic society, or, if older, to earn promotion and wage increases. I wrote further that serious scholars will find "refuge" in hidden corners of the academy, sought out by members of a future "clandestine elite," where they may work undisturbed. The prediction has become reality, although the scholar, spoiled and often corrupted by five centuries of social and political prominence and influence, lionized by the powerful and the profane, has not yet understood how his status is changing. He will take perhaps decades to realize that the divorce is consum-

mated between him and the public; then he will re-learn to write again for his peers, a kind of secret society, while the public will happily settle for the mediocrities to which it was traditionally attracted. At fairs in the Middle Ages and much later, too, the literature bought by the curious consisted of almanacs, dream interpretations, wondrous travels, famous love stories, great heroes, and how to . . . books about anything from agriculture to love potions. Serious books circulated only among a small elite, the clerks, the erudite, the monks, the humanists. How would today's and tomorrow's Mr. Public know about scholarly books when he visits bookstores or reads popular magazines that do not inform him? Besides, culturally emasculated during his college years, he will not even be interested.

The scholar, on the other hand, never had it so good. To his beneficial isolation from the public and political involvement are added all the modern conveniences; superb libraries, jet flights to international congresses, technical improvements in methods of research and production of material. True, it will be hard for him to give up contact with the public, the residual effect of which will be that his politics and his ideology will be of no interest for the ideamarket. But not hearing Einstein on world peace, Bertrand Russell on communism, or Sartre on everything from homosexuality to Bach's music may be quite a good thing for all concerned.

It has been argued in The University Bookman and more recently on French television that the schools have ceased teaching history at a time when the general public's interest in the subject is on the rise. Two observations. There is no such rise of interest but rather a retro-induced nostalgia for old objects. I note every day my students' absolute lack of sense of time, from language structure to historical dates, not because they are young but because this civilization, hedonistic to the core, is entirely now oriented. One can ascertain it even in the case of institutions like the Catholic Church, which has abandoned Latin, large segments of the liturgy, and traditional ways of dressing and behaving. Noted theologians like Karl Rahner (Catholic) or Rudolf Bultmann (Protestant), and unclassifiable but influential ideologues like Teilhard write of the future as the privileged dimension, and engage in the philosophical groundwork of removing the past from man's scope. The vogue of such charlatanisms as futurology and prospectivism also suggests the direction of semi-educated interest.

The second observation is that whatever interest in history might be sporadically manifested by some sectors of the public is overwhelmed, neutralized, and crushed by the educational establishment, not only in America but also in Europe, which apes us in a grotesquely servile fashion. On the previously mentioned television debate in Paris, politicians, writers, outstanding historians (P. Goubert, Le Roy Ladurie, F. Braudel) argued that a) history is the collective memory of a nation; b) patriotism cannot be preserved without teaching history; and c) the growing person needs a knowledge of history at all levels of this development—yet the ministers of education and their semi-clandestine staff of decisionmakers continue marginalizing history (and geography). Alas, the debaters failed to understand that an agent far more more powerful than any they imagined has been at work against history: the ideology of Western society, the naïve but now dominant belief that a new man is born whose inner life will respond to psychological manipulation and whose outer life will be sociologically manipulated work and leisure. Call it the hedonistic man, the robot man, or any other strange monster—it is the ideal figure of our civilization's coryphees who shape it every day with their myriad decisions and committee meetings, whether in academic, cultural, or business life.

Otherwise, how could one account for the fact that history (I choose this example, but I could have chosen philosophy, religion, literature, etc.) is not marginalized in France alone, with her centralized instructional system, but also in America with its plethora of private, independent, even religiously orientated high schools and colleges? This is what I read in a brochure published by the New York Times as an advertising supplement of "Why Go to College?" There are the following chapter heads in the order listed: a) you'll be prepared for a career; b) you'll have a better chance of getting a job; c) you'll have a better chance of getting a good job; d) you'll have a better chance of earning more; e) you'll be better prepared for a fulfilling life. This last rubric is subdivided into ability to learn on your own, self-discovery, self-confidence, family success, richer leisure, better health, ability to cope, alert citizenship, participation in culture. I leave unmentioned the details of the sugary, publicity-type language of the whole repulsive money-catching device, the therapy-orientation, the cheap style.

Thus at all levels the separation of education from scholarship and culture (other than mass culture and counterculture) has been accomplished by the first superficial hedonistic civilization in history and by the educational bureaucracy with its ideological doctrine that past and permanence must be banned from the new man's purview. The new man is a work-and-leisure directed robot whose existence is divided between the crowded subway, the television set, and the sandy beach two weeks in August.

So far as the scholar and the creator of culture are concerned, we must declare their new fate in many respects superior to the recent one. Nolens volens, they are being detached from servitude to the public at large, and from the engagement in matters not only diversionary but temptingly dishonest. There will be fewer occasions for la trahison des clercs. At the same time, and this should be regretted, the scholar, the artist, the litterateur will be deprived of their hinterland, the intelligent reader, whose contribution was to channel their ideas and forms, responding to them in a mutually advantageous way.

It is outside the scope of this essay to try to comprehend the full consequences and long-range effects of these phenomena, but they doubtless represent a major turning point in the educational panorama of the Western world. For the first time, masses of people will be schooled with hardly any contact between them and the true achievements of the life of the mind. This is worse than the mass illiteracy of the past because that was compatible with the lesson of things and with natural wisdom, la sagesse des nations. Today's and tomorrow's school masses will float in an urbanized utopia, a culturally homogenized nihil. Nobody can tell me the opposite; my students are advanced specimens of the new race of new men.

Can relief from the educational process be expected anywhere? Since the task of answering this question would be too vast if we included lower grades, we shall concentrate on universities. In Europe, while curricula and methods may vary from one country to another, phenomena similar to those in the United States become increasingly apparent, even if they are not yet the rule. European man still finds himself between two civilizations: the traditional and the robotized. He is still not overwhelmed by the media, perhaps because he sees through technology's deadly tricks and has a healthy skepticism about official, or simply public, proclamations and programs.

On the other hand, the unified educational bureaucracy, now increasingly deprived of the erstwhile deeply cultured educational official (for example the French inspecteurs with philosophical dimensions), is more single-minded in its ambition to enforce ideological objectives. It also readily yields to overseas influence: permissive methods, emphasis on applied science, elimination of such "old" disciplines as Latin, history, and philosophy. And far more intensively than in this country, Marxist indoctrination, or at least Marxist coloration of political, sociological, and literary matters is widespread.

Yet the separation of education from scholarship and culture has not been consummated in the European curriculum, primarily because of the prestige surrounding the "great man"—the architect and writer, the philosopher and sage (Wissenschaftler, savant). In countries where the government or the head of state decides on major-scale urban planning or important aspects of cultural policy, the prestige of intellectual achievement remains high, even at school level. However, the traditionally strong relationship, one may even call it a fusion, between school and scholarship is slowly eroding because the high standard of living persuades the powers that be that its preservation depends on the shaping of the consumer, hence on a new culture, on a new curriculum. In Europe, the process that began in the general postwar moral weakening decisively accelerated after 1968 with the creation of universities where ideology and anarchy have reigned ever since.

The situation is somewhat clearer, although not more reassuring, in the universities of the Third World. Clearer because large numbers of grade and high schools are maintained and directed by Christian churches and missionaries, who, in addition to religious education, instill community values in the children, as well as subjects attentive to Western and local realities. Their graduates are generally more respectful of the education they have received than are their Western counterparts. Third World children, in contrast, are aware that education is a great good thing that happens to them, and they put teachers in the same category as ancestral scribes and wisemen, as a source of authority. The situation is clearer also because Third World universities, in theory at least, teach and train such vitally needed personnel as engineers, doctors, agronomists, and public servants. Insofar as they do, they become, quite naturally, technical and vocational schools, nothing more. Insofar as they do not, they are imitation-Western: the courses are heavily politicized, with only a minimum of scholarly content. This condition obtains because the teaching staff consists of locals with diplomas from Western or Communist universities—antagonistic to the West—and of expatriates from the West, mostly young enthusiasts who regard themselves as missionaries

of an ideological cause. The student graduated from such universities acquires only a smattering of serious subjects or of technical preparation. What he mostly acquires is a few crude notions about recent Western cultural fads like existentialism, Third World studies, or "socialism with a human face."

The new elite thus prepared in Asia, Africa, and most of South America, is then hardly competent to carry out tasks in technical and administrative fields and inadequate as well to deal in depth with the tradition of his homeland. Students therefore are neither rooted in the cultural soil of their nation nor capable of helping bring about the necessary modernization. The superficial notions they derive from questionable Western books and other sources only enervate them, supplying them with unrealistic dreams. They have a choice: join the traditional upper class, which is usually corrupt and interested only in preserving its privileges, or become rebels, usually of some Marxist variety. The third choice is to emigrate; hence there are legions of doctors and other professionals from India and South America at Western institutions.

The university staff is no help in this problem. In the course of my last trip through Africa, Asia, and some islands in the Pacific, I was prompted to coin the term "BA in Unemployment" as I was confronted with hordes of students educated for nothing in particular. In a very poor Egypt, the idle young study the Koran at the Al Azhar mosque and law at the national university, both dead-end streets of achievement. In India, the graduates swell the millions of half-employed and the other millions of petty functionaries who shift papers at ministries and banks for eight hours a day. The more ambitious emigrate and never return. In Papua-New Guinea, the teaching staff at the national university at Port Moresby is entirely Australian, ultra-leftist, inciting the native students, who are nominally learning civil administration or medicine, to turn against their government, a "puppet of multi-national companies" and of the "Neocolonialists in Canberra."

Such is, in rough outlines, the state of what used to be called "higher education." Newman's idea of a university is lightyears away in the past. For all intents and purposes the university has ceased to exist; its traditional functions, performed from the twelfth century until about the first third of the twentieth, are no longer recognizable. The conclusion I now reach is not different from what it was in 1961 when The Future of Education appeared. Let me briefly recapitulate it. Institutions come into existence, reach their acme, and decay. After some eight centuries, the Western university, later exported planetwide, has closed its doors. What survives is, amidst the rags of glory, a melange of utilitarian recipes and ideological prescriptions; their ingurgitation is a requisite for anyone wishing to qualify for jobs in the huge work-and-leisure market that our societies have become. Their cultural and scholarly value is nil.

But since scholarship and culture are never extinguished, they are now migrating to other as yet undefined corners of our tolerant and prosperous society. Their adepts, not distinguishable from other graduates by an external sign, are the boat-people of scholarship and culture, refugees held together by the invisible bonds of loyalty to high things. It is among them, and in what I called earlier "lay monasteries," that the great achievements of truth and beauty may again mature.●

## ESTATE TAXES

### HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SMITH of New Jersey. Mr. Speaker, estate taxes, more appropriately known as death taxes that penalize widows and orphans, have been a severe obstacle to economic mobility and family participation in the small business community.

Fortunately, the recent passage of the Conable-Hance tax bill will go a long way toward eliminating this burdensome tax. By 1987, estates valued at up to $600,000 will be exempt from Federal estate tax.

While I am very pleased about the enactment of this legislation, I believe that death taxes should be abolished. For this reason, I have introduced H.R. 4238 which would phase out death taxes by 1984. I invite my colleagues to join in cosponsoring this legislation.

In the following column Wilson S. Johnson, president of the National Federation of Independent Business, discusses the impact of present estate tax law on labor-intensive small businesses. Mr. Wilson's eloquent statement in favor of repealing this tax should be of interest to everyone who is concerned about the well-being of the small business community.

SMALL-BUSINESS ANGLE

(By Wilson S. Johnson)

DEATH KNELL FOR DEATH TAXES

A small-business man I know spends 20 percent of his profits for life insurance to be certain there will be enough cash for his survivors to pay estate taxes and still hold on to the family lumber mill.

Another man who owns a soap manufacturing plant in a small, eastern city says his heirs would have to sell out if he didn't spend thousands for insurance now. The soap plant is the major source of employment for the town, and if another company bought it, the plant would probably be closed and the business consolidated elsewhere.

One of the dreams of any person who has built a successful business during his or her lifetime is to pass that business along to other members of the family—a spouse or surviving children and grandchildren. A business is a legacy.

Today federal government policy is forcing the liquidation of hundreds of successful, privately-owned businesses because of the negative impact of estate or "death" taxes. To many people, estate taxes are perceived as a means of forcing the redistribution of enormous amounts of money when wealthy people die. But the truly wealthy have sophisticated ways of estate planning which help them avoid estate taxes. The law hits squarely the small, family business when government policy ought to be to encourage the continuation of a strong, competitive independent business sector.

A recent survey of urban areas conducted by the National Federation of Independent Business (NFIB) revealed that a substantial number of business people responding—particularly in the northeastern part of the country—either inherited or purchased the company from a member of the family. Urban areas, such as those in the northeast, are already facing severe drains on resources and the negative impact of death taxes on small, independent businesses will add to the problems there and elsewhere in the country.

Analysis of the revenues raised by estate taxes and the economic harm being done to the labor-intensive small-business community suggests that the death tax should be abolished and the relative small number of tax dollars lost be raised by alternate means.●

## BELLMAWR, N.J., VFW POST 7410 CELEBRATES 35TH ANNIVERSARY

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. FLORIO. Mr. Speaker, a very special anniversary will take place in my congressional district. I wish to share with my colleagues this special event.

The Veterans of Foreign Wars, Bellmawr Post 7410 will be celebrating their 35th anniversary. This post is one of which their membership can be very proud. They have actively served their community in these past years and when called upon have willingly supported any civic activity.

I am certain that my colleagues will join in my tribute to this outstanding post and its members, and wish them all a very happy anniversary.●

## * * * AND SOME DON'T

### HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ECKART. Mr. Speaker, I would like to cite an example of the type of unnecessary Pentagon spending which could be cut. It is a disgusting contrast which finds us in the Congress supporting spending like that described in the Cleveland Plain Dealer editorial, while at the same time we reduce our Government-subsidized school lunch program to 1½ ounces of meat per day. While one Government subsidy supports the expensive dining of generals at the Pentagon, another subsidy for our children is too small for more that a paltry snack. The editorial follows:

[From the Cleveland Plain Dealer]

If you belong to the "in" crowd, you can get a good steak dinner at the Pentagon for a bit under $3.

There are five dining rooms at the Pentagon, some more exclusive than others. If you're Secretary of Defense Caspar Weinberger, for instance, you're eligible for the

steak and you can eat it in the Chairman's Dining Room, operated for the Joint Chiefs of Staff. The secretary's salary is $69,630 a year. Does he need to eat subsidized steak?

Prices in the Pentagon's dining rooms reflect only the price of the food; enlisted personnel cook it, serve it and clean up afterward. The taxpayers pay their salaries.

High-level Pentagon officials make a convincing case for having a private dining room or two. They host foreign dignitaries, and private, secure facilities are necessary. But why five dining rooms? And why, exactly, does that mean the food should be cheap?

The very least the Pentagon should do is raise the prices to the level of other restaurants. Better still, the officials could hire civilian personnel, freeing the soldiers for more important (and less admiral-pampering) work. Other civilians are employed at the Pentagon, many in high-security positions. There is no good reason why civilians couldn't also serve food.

The other reason officials cite for using military personnel is that they are available for after-hours duty. Many restaurants are open day and night, too, so that's a weak argument at best.

There's no princely sum by Pentagon standards involved here—it only costs taxpayers $1 million or so a year to feed generals and their friends and associates so cheaply. But a million is a million is a million * * * how many more wasted millions are hidden in the defense budget? It's time to get out the sharpest ax in Washington, and use it judiciously but decisively. And the first chop should come down on the generals' breadline.●

## THE BALANCED BUDGET AMENDMENT: NEEDED NOW MORE THAN EVER

### HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DASCHLE. Mr. Speaker, the September edition of Dollars & Sense, the monthly periodical of the National Taxpayers Union, featured an excellent article entitled, "The Balanced Budget Amendment: Needed Now More Than Ever," authored by the respected chairman of the National Taxpayers Union, James Dale Davidson. I recommend this article to each Member of the House and particularly to those who have not yet given their support to the balanced budget amendment effort.

As Mr. Davidson indicates, the effort to gain congressional approval of a balanced budget constitutional amendment is apparently languishing. There are many factors contributing to this apparent waning of interest in a balanced budget amendment including the administration's public pledge of a balanced budget in fiscal year 1984 and the enactment of the Omnibus Budget Reconciliation Act of 1981 which reduced projected Federal spending by $37.1 billion.

Now, however, is not the time to relax efforts to secure full congressional approval of a balanced budget amendment. The Federal deficit this year will be more than $60 billion and the deficit may be more than $60 billion next year as well. The public debt is increasing constantly and will soon be more than $1 trillion. Additionally, record high real interest rates, the result of massive Federal credit demands produced by continuing deficit spending and restrictive monetary policy, are destroying the basic fabric of the Nation's economy and forcing thousands upon thousands of businessmen and farmers to stare economic failure in the face.

James Dale Davidson is right. The balanced budget amendment is needed now more than ever.

Mr. Speaker, I ask unanimous consent, "The Balanced Budget Amendment: Needed Now More Than Ever," be printed in the RECORD at this point.

THE BALANCED BUDGET AMENDMENT: NEEDED NOW MORE THAN EVER

(By James Dale Davidson)

A few months ago, I had the good fortune to attend an anniversary celebration of William F. Buckley's "Firing Line" program.

It wasn't an exclusive party; every former guest was invited. Among those who turned up was California Governor Jerry Brown, erstwhile supporter of the Balanced Budget Amendment and sometime presidential candidate. Governor Brown was in an expansive mood and wanted to talk about the current status of the amendment drive. Although he didn't say so directly, I got the strong impression that he had lost interest in following the effort himself. After I spent a few minutes detailing our frustrations in trying to get additional states to call for a limited constitutional convention, Brown said, "Well, Davidson, you've got a tough job. Nobody's interested in the Balanced Budget Amendment."

Governor Brown went off to sample the barbequed shrimp, and I was left to think about his comment. I didn't like it. But the more I have thought of it since, the more I can understand why a politician would feel that way. When you get right down to it, a Balanced Budget Amendment is something which is good for the society as whole. And not that many people feel passionately about what is everyone's business. As the old adage puts it, "Everybody's business is nobody's business."

At times it has seemed as though nobody outside a few NTU members really cared whether we achieve a Balanced Budget Amendment or not. It has proven gruesomely difficult to raise the relatively piddling sums required to make our program succeed. Meanwhile, vast amounts are being raised and spent on projects to install second-rate ballet companies in small towns, or to build another tier of seats in a university stadium—efforts which won't make one iota of difference to the long term survival of our economy.

The Balanced Budget Amendment does make a difference. It matters now, more than ever. Without an amendment, it is quite unlikely that President Reagan, with all the political prowess he brings to the job, will be able to balance the budget by the end of his term. And if Reagan can't do it, who could? The answer is that it is not a matter to be left on the shoulders of one man. We need a sound fiscal policy and a sound economy, no matter who is in the White House. A balanced budget amendment would not guarantee it. However, it would make it much more likely.

Very few people today really believe that the budget is likely to be balanced in the future. Just look at the level of current interest rates. If investors at home and abroad were convinced that federal borrowing was going to be dramatically curtailed in the future, they would be rushing to buy federal securities now, and thus lock in a high real rate of return. They are not. In spite of several false rallies in the bond markets, we are some distance away from anything which could be considered "low" interest rates. Rates on 91-day Treasury bills averaged 14.9 percent in July. They averaged 15.46 percent in the first two August sales. The Administration had predicted that rates would average 12.55 percent.

Unnecessarily high interest rates now make future budget balancing more difficult, for two reasons. High rates discourage investment and economic growth. High interest rates keep stock prices low, and shrivel the capital value of almost every productive asset. Other things being equal, a business which is worth $1,000,000 when interest rates are at 10 percent will be worth only $500,000 when interest rates move to 20 percent on a longterm basis. This dramatically changes incentives. Interest rates which cut capital gains in half are as stunting in their effects as tax rates which confiscate half of what investors would otherwise have made. In other words, many of the incentive effects of President Reagan's much-needed tax cuts might evaporate if interest rates remain high.

According to the Administration's projections, the economy will grow by 3.4 percent in real terms next year. Each one-percentage point overstatement in this projection will widen the budget deficit by $8 billion. The current federal borrowing requirement is already in the neighborhood of $100 billion—an amount approximately equal to the total addition to private savings. Rational investors who project even higher borrowing requirements will insist on high rates to purchase long-term government obligations.

This brings us to the second reason why high interest rates now make future budget balancing more difficult. They increase the carrying charge on our massive national debt. The explicit debt is now about one trillion dollars. Luckily for taxpayers, some of this debt bears long maturities, at low interest rates of years ago. But most of the debt turns over every three to four years. Every one-percentage-point of interest rate raises the carrying cost of the national debt by up to $10 billion, depending on the mix between short and long-term obligations. In any event, the difference between financing a trillion dollar debt at 15 percent and financing the same debt at 7.5 percent is enormous and obvious. Great budget savings could be achieved if interest rates fell.

What is the best way to make interest rates fall? Assure the world that the budget will be balanced in the future. The best (and perhaps the only way) to do so is to pass a Balanced Budget Amendment. Such an amendment, if it were approved by the Congress today, could not be ratified for at least two years. Even in the best of circumstances it would take the states that long to act. But markets would not wait two years to respond. Shrewd and even not-so-shrewd investors would react immediately to the prospect of lower federal borrowing in the future by purchasing long-term federal debt

today. Bond prices would rise. Not only the federal government, but other borrowers would benefit from lower interest rates. The incentive to invest would spurt upward as the cost of money fell, and the capital value of any given income went up (the $500,000 business might be worth $1,000,000 again). This would increase the prospect for meeting optimistic growth targets for the economy. It would reduce the federal budget—automatically—and at low political cost.

Such a development would be good for everyone. It's a matter which I still think is worth getting excited about. I hope you feel that way too.●

## REBECCA H. SINGER, A WOMAN OF VISION AND VIRTUE

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SOLARZ. Mr. Speaker, I rise in the House today to pay tribute to the memory of a remarkable woman, Rebbitzin Rebecca H. Singer, who passed away on June 29.

For 30 years, Rebbitzin Rebecca H. Singer had assisted her husband, Rabbi Dr. Joseph I. Singer, in serving the congregation of the Manhattan Beach Jewish Center. Their work together, inspired by their strong faith, devotion, and love, bore rich fruits in the community.

Devoted to her husband and family, Mrs. Singer raised two wonderful children, Alexander T. Singer and Vivian Susan Singer, in our community. But she also found the time to work tirelessly, not only for her family, but for the good causes to which she was devoted throughout her life.

As the daughter of one of the most learned and renowned Rabbis and scholars of our era, Rabbi Dr. Chaim Heller, Mrs. Singer was well versed in the law and tradition of Judaism. She was known for her scholarly knowledge and also for her gentle wisdom, and her interest in helping anyone in need. During her three decades of service in Brooklyn, the energy, kindness, and devotion which marked all her activities gained her the respect and love of the Jewish community.

As the Rebbitzin she served as adviser to the center's sisterhood. Mrs. Singer recognized the importance of this organization in providing the women of the congregation with religious, educational, and social opportunities that would foster their sense of belonging to a community of shared interests and mutual support.

Mrs. Singer was an ardent supporter of Israel who inspired others to join her and her husband in their efforts to insure the existence and survival of the State of Israel, and to promote the growth of Israel's philanthropic and educational institutions.

During my years representing Manhattan Beach in the New York State Assembly and then in the Congress, I had the good fortune to come to know Mrs. Singer well. Being invited to dinner in her home was an opportunity to experience the real warmth and strength of a model Jewish home. For Mrs. Singer epitomized, to me, the ideal of the Jewish wife and mother. She was the "Valiant Woman" described in the Scriptures;

"For her worth is far above rubies.
The heart of her husband trusteth in her . . .
She will render him good, and not evil all the days of her life . . .
She hath opened her hand to the needy, and stretched out her hand to the poor . . .
She hath opened her mouth to wisdom, and the law of clemency is on her tongue. . .
Her children rose up, and called her blessed: her husband, and he praised her. . .
The woman that feareth the Lord, she shall be praised."

Mr. Speaker, with the death of Mrs. Singer, I have lost a valued friend, a woman of vision and virtue.●

## THE POTENTIAL OF WIND ENERGY

### HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HEFTEL. Mr. Speaker, It has been more than a year since the Wind Energy Systems Act was enacted by the 96th Congress. Though budget cuts have forced a reassessment of many of the more ambitious goals in the act, the wind program at the Department of Energy has made significant progress in advancing the state of the art. A number of successful wind turbine demonstration projects are now in operation in Hawaii, Washington State, and California, for example. A national wind resource assessment program is collecting data and analyzing sites for future demonstrations and commercial wind farms. Finally, a growing number of electric utilities throughout the Nation are making plans to integrate wind energy into their systems. I am encouraged by this progress and confident that wind energy will make an important contribution to America's energy future.

This past week, the Washington Post published an article which assesses the problems and potential of wind energy systems from a local and national perspective. I have had the article reprinted for our colleagues and hope that they will find it of interest. I believe strongly in the future of wind power and hope that continued progress will be made in developing its enormous potential in the coming months and years.

The article follows:

[From the Washington Post, Sept. 8, 1981]

WINDMILLS AND UTILITY BILLS

(By Phil McCombs)

Walter F. Szymczewski proudly showed off the windmill he recently built for $7,000 in the back yard of his Maryland home. It was a hot, muggy afternoon and the windmill was not turning because there was no wind. There had not been any for some days.

This did not bother Szymczewski. He built the four-blade, 30-foot-high machine for fun as an experiment—"took the gamble to find out what it would actually do." In fact, it has shaved a little off his electricity bill already, even though summer is the worst possible season in the Washington area for wind and windmills.

"This cloudy, rainy weather is bad. All you get is these up and down drafts, these little spotty currents," Szymczewski said. "That won't drive a windmill. You need a whole [weather] front movement. Usually that begins in late September, and the wind is steadier all through the winter."

Over the course of a year, Szymczewski hopes, the wind will provide one-third to one-half the electric power used in his modest house in Severn, Md.

To the west of Washington in Clarksburg, Md., Montgomery County police officer Karl W. Plitt, 34, installed a sleek, white Enertech windmill on a 50-foot telephone pole in his back yard, Results so far: a $90 saving on his electricity bill in two months.

Small-time windmill experimenters like these are sprinkled throughout the Washington area, and some energy experts believe they are in the vanguard of what will become a significant national effort to reap the wind.

A new study by Worldwatch Institute, a Washington think tank, estimates that wind power could supply 20-to-30 percent of the electricity in many countries by the early part of the next century. The study said that there are 3.8 million homes and 370,000 farms in areas of the United States where the wind is strong and steady enough to make wind-powered electric generation feasible.

In some of those areas, utility companies are taking an early interest in wind power. Southern California Edison, for example, has set a corporate goal of generating 30 percent of its electricity from such sources as sun and wind, according to Douglas C. Bauer, senior vice president of the Edison Electric Institute, which represents utility companies.

Bauer said other companies are examining the potential of wind power, but are concerned about its reliability as a new technology fueled by sometimes fickle winds.

While man has used windmills for grinding corn and drawing water for hundreds of years, electricity-generating windmills that utility companies plan to use in groups on "windfalls" are so huge that they present new technological problems.

Operations at a huge U.S. Department of Energy experimental windmill in North Carolina, for example, had to be curtailed after nearby residents complained that the 200-foot blades on the 2,000-kilowatt machine made an annoying swishing noise.

The winds in Washington generally are not steady and strong enough to justify installing a windmill, according to Energy Department spokesman Jay Vivari.

"The most important thing is to find an area with a high annual mean wind speed," he said. "Chicago, the windy city, is lousy.

The wind blows like mad but it's not good on an annual basis. All through the Appalachians is good . . . all the way up through New England . . . A dynamite area is the Texas panhandle, western Kansas, central Wyoming."

Vivari said that as a rule of thumb you need an annual average wind speed of 10 knots (roughly 11.5 m.p.h.) for a windmill to be a good investment. The highest such wind speed in Maryland listed in "The Wind Power Book," by Jack Park, is 9.6 knots at Baltimore-Washington International Airport. The figure at Fort Meade, which is near Szymczewski's house, is only 4.4 knots. The highest figure listed in Virginia is 8.8 knots at Norfolk, and in the District of Columbia, 7.5 knots at Bolling Air Force Base.

To encourage the development of alternative energy sources, Congress authorized a 40 percent tax credit for the purchase and installation of windmills—in Szymczewski's case, worth $2,800, which he is able to take over two tax years.

It is not clear, however, how much longer that will last. Reagan administration economists are thinking of trying to eliminate the credit in order to increase tax revenues. They are also seeking to slash DOE outlays on wind energy promotion and development, although the Energy Department will continue to do research in the area, according to Vivari.

The Reagan theory is that if wind power is economically feasible, the private sector will develop it with little aid from government.

In another earlier effort to encourage the development of wind power, Congress in 1978 mandated that utility companies must allow individual home owners and other small wind-power originators to hook into their power grids and must pay them a fair rate for any extra electricity generated. Public service commissions in the Washington area and most other parts of the country are still deciding the terms under which these transactions will take place.

So far, four big electric utilities in the Washington-Baltimore area report only six of their millions of customers have installed windmills and wired them into the utility company power grids since the 1978 congressional action.

Potomac Edison Co.'s Donald Whipp said: "It's in the experimental stage. It's too early to make any assumptions on the ultimate impact."

Szymczewski is not one of the six. His house is wired to receive electricity from Baltimore Gas & Electric Co., or he can shut off that power source and use his own windmill-generated power, which he stores in more than 200 batteries. Because his windmill is not wired into the BG&E power grid, Szymczewski cannot use the two sources simultaneously, nor can he sell his excess power to the company.

It was the simultaneous use and buyback that the 1978 congressional legislation made possible. The idea was to eliminate the need for expensive storage batteries, which were needed to make home owner windmill systems run smoothly but the cost of which was prohibitive.

Szymczewski, 66, a retired precision sheetmetal worker, was lucky and bought his batteries cheap when the telephone company got rid of them. New, they would have cost him more than $40,000.

Plitt, the Montgomery County police officer, does have his windmill wired into the Potomac Edison power grid. This means that when his windmill is working and delivering power to the house, Plitt's Potomac Edison electric meter runs slower. If a storm drove the windmill furiously at night when Plitt's house was using little power, the electric meter might actually run backward, although this has not happened yet.

Plitt bought his house in a subdivision in rural Clarksburg with wind power in mind. The modern, comfortable house is situated near the top of a high ridge at the end of a long valley—"an ideal wind site."

The Plitts paid $10,000 for their sleek machine, which is perched atop a 50-foot telephone pole in their back yard, and for a solar hot-water system that complements it. After the tax credit, the total bill came to only $6,000 for the two systems, and a study of their first electricity bill indicates that they saved about $90 already—or half what the two-month bill would have been.

The house has electric heating, which in the past cost $300 every two months during the winter. Now they hope these bills will be under $100 since winter is a time when the wind across their ridge blows strong and steady.

The Plitts' machine was manufactured by Enertech, a Vermont firm that has sold more than 700 windmills to become the country's largest manufacturer of electricity-generating windmills.

Enertech board chairman Ned Coffin said a 1.8 kilowatt machine like the Plitts' should provide 200-to-500 kilowatt hours of electricity a month at a good wind site. The average American home uses about 1,000 kilowatt hours a month.

Coffin said Bendix Corp. recently bought a 30 percent share of the fledgling windmill company.

Plitt discovered one disturbing aspect of his new relationship with the power company: because of safety requirements, he cannot use his windmill when the power company system fails in a storm or for some other reason. This is to prevent the windmill from "backfeeding" power into the company system and electrocuting line repairmen.

It is a problem for Plitt because having a backup system for power outages was one thought behind his getting a windmill in the first place. With some expensive rewiring that will prevent backfeeding, Plitt thinks he can solve the problem to the company's satisfaction.

All the big Washington-area electric utilities—Potomac Electric Power Co., Virginia Electric and Power Co., Potomac Edison and BG&E—have this same safety requirement.

The desire for energy independence goes beyond windmills for both Plitt and Szymczewski. They both have wood stoves and Szymczewski has not paid a cent for heating oil in five years. He gathers his firewood for free.

"This country is in trouble, that's why I had to do this," he said. "I was priced out of the heating market. There's nothing new about wind generators . . . You just have to have an interest in wanting to better your environment, living conditions. A hundred years ago, every man had to feed his family off the land."●

## DEFENSE DOLLARS: STRAIGHT TO YOUR WAIST

### HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. PEASE. Mr. Speaker, I recently wrote to Secretary of Defense Weinberger, urging him to convert the personnel in the Department of Defense executive dining rooms from military to civilian and to more nearly reflect the cost of the meals. By doing this, American tax dollars would be more accurately aimed at their target: the defense of the United States.

I believe that a change in personnel policy at all restaurant facilities in the Department of Defense is not only feasible, but necessary. As the chairman of the Armed Services Committee, Hon. Melvin Price said:

To provide the kind of improvements in defense that we both desire will require a sustained effort over an extended period of years, and we will only be able to retain public support for that sustained effort if we can show that the funds are spent wisely and managed prudently.

The Cleveland Plain Dealer recently editorialized this issue in the following article:

AND SOME DON'T

If you belong to the "in" crowd, you can get a good steak dinner at the Pentagon for a bit under $3.

There are five dining rooms at the Pentagon, some more exclusive than others. If you're Secretary of Defense Casper Weinberger, for instance, you're eligible for the steak and you can eat it in the Chairman's Dining Room, operated for the Joint Chiefs of Staff. The secretary's salary is $69,630 a year. Does he need to eat subsidized steak?

Prices in the Pentagon's dining rooms reflect only the price of the food; enlisted personnel cook it, serve it and clean up afterward. The taxpayers pay their salaries.

High-level Pentagon officials make a convincing case for having a private dining room or two. They host foreign dignitaries, and private, secure facilities are necessary. But why five dining rooms? And why, exactly, does that mean the food should be cheap?

The very least the Pentagon should do is raise prices to the level of other restaurants. Better still, officials could hire civilian personnel, freeing the soldiers for more important (and less admiral-pampering) work. Other civilians are employed at the Pentagon, many in high-security positions. There is no good reason why civilians couldn't also serve food.

The other reason officials cite for using military personnel is that they are available for after-hours duty. Many restaurants are open day and night, too, so that's a weak argument at best.

There's no princely sum by Pentagon standards involved here—it only costs taxpayers $1 million or so a year to feed generals and their friends and associates so cheaply. But a million is a million is a million . . . how many more wasted millions are hidden in the defense budget? It's time to get out the sharpest ax in Washington, and

use it judiciously but decisively. And the first chop should come down on the generals' breadline.●

## A TRIBUTE TO GLORIA AND BOB TAYLOR

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. STARK. Mr. Speaker, I have the distinct privilege of representing a district that is not only beautiful to the eye, but is world renowned for one of its products—California wine. Although I share with some of my colleagues many of the larger vineyards and wineries, there are many smaller ones of which I am equally proud. I would like to take a few moments in the next few days to tell you about what is most certainly one of the oldest art forms in the world. I think the people in my district would agree when I say the making of wine is a work of art.

Probably one of the smallest vineyards in my district belongs to Gloria and Bob Taylor of Livermore, Calif. Although they do not operate a full-fledged winery, last year they sold 33 tons of Grey Riesling to the Wente Winery, also of Livermore.

The Taylors moved to a farm outside of Livermore 4 years ago. Since that time they have become the owners and tenders of 10 acres of grape vines that produce the luscious white grape used in the Wente Bros. superb Grey Riesling wine.

Although Bob Taylor works as a geochemist at the Lawrence Livermore National Laboratory, Gloria is a full-time farmer. Up at 6 a.m., she tends the grapes with the help of their two sons, Noah and Aaron. The Taylors are a recent addition to the longstanding tradition of California wine-growers and winemakers.

An article about the Taylors follows:

(By Joan Kinney)

Gloria and Bob Taylor, with their sons Aaron and Noah, moved from town to an old farmhouse on the outskirts of town in June 1977.

The property, the old Connally farm on South Livermore Avenue, a little south of the Livermore Civic Center, consisted of 13 acres with a house and outbuildings.

The house, which had been built back around 1895, had been a rental for six years prior to the Taylors' coming and was in bad shape. They spent their first years there restoring the house. They stripped it down to the studs, siding and floor; numbered all of the woodwork; then rearranged the plumbing, installed insulation, changed some rooms, and put the place back together.

Then the Taylors turned their attention to the land, to making it a working vineyard. Wente Brothers Winery agreed to buy the grapes. The winery did all of the preliminary work, the preparing of the field, the planting, etc. Ten acres of Grey Riesling were planted.

Bob's work at Lawrence Livermore National Laboratory, where he's a geochemist in solar and oil shale research, limited the time he could spend in the vineyard, so Gloria had to do most of this work.

She would rise at 6 a.m. and would prune for more than an hour, vine by vine. "It's really a nice peaceful thing to do," she says. Bob gave her a Sony, and she would listen to a Bach concerto or her French lessons while she pruned. The pruning took two months. "I got good at doing deep knee bends. I developed good legs."

Their first crop was coming along in 1980 when the starlings hit. The Taylors resorted to various devices to fend off the birds, but nothing worked. The starlings consumed the whole grape crop, so it seemed, and one day Gloria gave up.

The next day Ernest and Philip Wente came by. It's time to start picking, they announced. Pick what? There's nothing left, Gloria replied. Oh, yes, there are grapes left, the Wentes said.

The crop amounted to a ton and a half, with two-thirds having been lost to the birds. A ton and a half was far from great, but it was a beginning.

This year, everything went well. One hundred twenty friends helped the Taylors with the picking on August 23. They harvested thirty-three tons. According to the Taylors, a vineyard that produces four to five tons per acre is considered excellent. In light of the fact that this was only the second year of their crop, they regard the thirty-three tons as an exceptional yield.

They give some of the credit to the Wentes. "The Wentes are marvelous to work with," Gloria says. "Whenever we have any question or concern, they come right over to help us." She speaks of them as being not only fine professionals, but fine people. "The Wentes are well liked by their employees. You get the impression that things are run very nicely."

Gloria says, "We toy with the idea of making wine and having a tasting room. Open only to cyclists. We have no plans for a paved parking lot."

Like Bob, who holds a doctorate, Gloria is college-educated, with a degree. The Taylors were active in city politics during the 1960's and early 1970's. They participated in the growth control SAVE Initiative, Gloria as a board member of the organization. They belong to the Sierra Club. Gloria is a professional artist, and she has served on the Livermore Beautification Committee and Livermore Design Review Committee.

"I consider myself now a farmer," Gloria Taylor says.

"To be a farmer was not one of my dreams. It just happened. Fortunately, I love it. A day isn't complete that I don't go out to check the vines, taste a grape, scratch around in the soil.

"One of the things that happens is you become so aware of the weather—what direction the wind is blowing, how warm it is, how this year compares to last. It sharpens your senses."

Noah Taylor, who now is age 18, has written a little essay describing how he felt about moving from town to a farm:

THE FARM

(By Noah Taylor, June 1980)

I always thought my parents were crazy, or at least a little different. But the day they came home and said, "Now we're farmers," I didn't believe them. Stunned momentarily, I regained my head only to hear it again, "We're farmers!"

The farm was four miles out of town, down an old dusty road, near a vineyard. My parents said it was beautiful, but I needed a crystal ball to see through the haze. "What's beautiful?" I asked. "The farm," they both said simultaneously. Farm, I can't see it through all the garbage!

Well, all is good on the farm. The house is great after four months of hard work and slavery. We have a vineyard, red barn, chickens, rabbits, and everything you could ask for to escape suburbia in a suburban town. It's a real feeling of self-accomplishment, and it brought our family closer together.●

## SECRETARY WATT'S ACTIONS CONTRADICT HIS OATH OF OFFICE

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. VENTO. Mr. Speaker, I want to call attention to the conduct of Secretary James Watt this past week at the Governors' Conference. Apparently Secretary Watt realizes his policies are faltering and his popularity is plummeting. But rather than change his mistaken policies, he is trying to recoup by giving the States everything they ever wanted regardless of the expense to our environment. His actions crassly contradict the oath of office he took when he became Secretary of the Interior.

I am very concerned about the changing complexion of our Nation's environmental policies. The degradation of our natural resources and environment are too great a price to pay for implementation of the Reagan administration's development policies, especially those affecting land use. The Department of the Interior should defend the National Government's water rights and legitimate environmental interests, not place them on the auction block. It does not take much talent or fortitude to cave in to "State's rights" claims, as Mr. Watt has done. It is time the administration stepped back from Secretary Watt's policies and reviewed them dispassionately.

I was disappointed to hear President Reagan remark during a recent press gathering that he thought Secretary Watt was doing a good job in the face of attacks from environmental extremists.

Now what bothers me about the President's statement is not the fact that he supports James Watt. This is to be expected because Secretary Watt is the ball carrier for the administration's environmental policies. What really bothers me is the fact that our President has fallen into the trap of using the loaded phrase "environmental extremists." Those who oppose the policies of Secretary Watt, and I am

one of them, are now labeled environmental extremists not just by Secretary Watt but by the President as well.

Characterizing someone as an extremist is a convenient way to brush off criticism and make it appear that only a few are in opposition, which obviously isn't the case.

Many Members of Congress and vast numbers of Americans oppose Secretary Watt's policies. To dismiss our concerns as "extremism" is both irresponsible and a disservice to many concerned Americans.●

## PHARMACIST OF THE YEAR AWARD

### HON. KENT HANCE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HANCE. Mr. Speaker, it is with great pleasure and pride that I take this opportunity to congratulate Lonnie F. Hollingsworth, Sr., R.Ph., of my district in Lubbock, Tex., for having been selected as the Texas "Pharmacist of the Year" for 1981. Lonnie is well deserving of this prestigious award as evidenced in the following article which appeared in Texas Pharmacy (July 1981), "Meet TPA's 1981 Pharmacist of the Year":

When one considers the attributes that the "Pharmacist of the Year" should have, many ideas flash through the mind. Although devotion to pharmacy is of primary importance, the person's willingness to serve community, state and country must also be considered, along with a deep and abiding devotion to service of fellowman.

The 1981 Texas "Pharmacist of the Year" began his education in Wellington, Texas, graduating with honors there in 1949. He served in the U.S. Navy from 1950-54 in Korea as Storekeeper First Class. After his honorable discharge, he attended The University of Texas College of Pharmacy, graduating first in his class with highest honors in 1957. During his student days his activities included Phi Delta Chi, Phi Eta Sigma (Freshman Honor Society) and Rho Chi. He remains an alumni member of Phi Delta Chi and a lifetime member of the Texas Ex-Students Association.

You do not have to talk at length with the 1981 POY recipient before you learn of his love of his community and all of West Texas. Included in the many ways he has served his city are such diverse areas as Lubbock City Councilman 1968-72 and Lubbock Mayor Pro-Tem 1972-74, City Council representative to the Lubbock Drug Abuse Council 1969-70, Planning and Zoning Commissioner 1967-68, director of the Texas Municipal League 1968-69, and chairman of the Lubbock Power and Light Electric Utility Board. He has also served his community by working with the Multiple Sclerosis Society, Boy Scouts, his church, the Shriners, Lions Club and Elks, just to name a few.

The recipient has served his fellow pharmacists by being a tireless, enthusiastic participant in many phases of the profession. He is currently secretary-treasurer of West Texas Pharmaceutical Association, member of the Executive Committee of the Texas Pharmaceutical Education and Research Foundation and member of the Executive Committee of National Association of Retail Druggists. He has been a member of Texas Pharmaceutical Association for 22 years, has chaired several committees and held many offices in his professional organizations, including the presidency of TPA, WTPA and Lubbock Area Pharmaceutical Association.

The diversity of his business interests and his hobbies shows that he is a well-rounded individual. He is president of L&H Pharmacies, Inc., a member of the Board of the Lubbock Security National Bank, owner of rentals and investment businesses, president of 3 Points Corporation and president of L&H Horseshoe, Inc. His non-business interests include hunting, coin collecting, gun collecting, private aviation and sports.

An extremely important part of the Pharmacist of the Year's life revolves around his lovely wife, Nancy, and their two children, Heather Lea and Lonnie, Jr. Heather is now an actress living in New York City, and Lonnie, Jr., a May graduate of The University of Texas at Austin, will soon be entering law school. May we present to you Texas Pharmaceutical Association's 1981 "Pharmacist of the Year" . . . Lonnie F. Hollingsworth.●

## A CLOUD IN THE ACADEMIC SKY

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SIMON. Mr. Speaker, I want to call the attention of my colleagues to a rather ominous sign on the horizon of higher education. Policy statements developed by the National Governors Association staff and supported by certain State higher education executives would establish a new role in the Federal-postsecondary institution relationship for the States.

State control and review of the Federal student aid allocations, research grants, and discretionary grant funds is unacceptable to the colleges and universities and, I hope, to the Congress. My colleagues should look closely at this issue and its potential harm to higher education. I urge them to read the July 27, 1981, Chicago Tribune editorial, which I am inserting in the RECORD.

A CLOUD IN THE ACADEMIC SKY

One small but ominous cloud in the skies of academia is a policy statement drafted by the staff of the National Governors' Association. This document recommends that state agencies be empowered to review and act on all federal funds coming to public universities and colleges, and to review and comment on federal aid to private schools. The Board of Higher Education and its staff in Springfield would pass on a wide variety of academic funds: student aid, research grants, health education subsidies, etc.

The Reagan administration prides itself on reducing controls in Washington, with its shift of emphasis from categorical to block grants. But universities will find life more rather than less complicated if an array of elected and appointed state officials stand between them and any federal dollars headed their way.

Here in Illinois, neither executive nor legislative officials have wanted control over federal grants to higher education. The General Assembly has repeatedly rejected proposals that it reappropriate all federal moneys coming to state schools. The Board of Higher Education and its staff have not coveted the powers (and problems) that the National Governors' Association draft would push towards them.

The good practice here in Illinois has been that if a university or college succeeds in grantmanship in Washington, it may collect its money without state intervention—with the understanding, of course, that state funds cannot be assumed to be available to carry on after the federal money is spent. That practice avoids the temptation to make federal grants into political footballs at Springfield.

It may not be surprising that some governors and state higher education executives want additional power over federal grants to universities. But it is not in the public interest that they should have it. Higher education does best with a minimum of political interference.●

## EXPORTS OF HAZARDOUS PRODUCTS

### HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ROSENTHAL. Mr. Speaker, once again the delicate moral and political issue of "reverse dumping" has arisen. The Reagan Commerce Department seems to be trying to eliminate the requirements, built up after many years of study and negotiation, that foreign governments be notified before U.S. companies export hazardous products.

In 1978, the Commerce, Consumer, and Monetary Affairs Subcommittee, which I chair, held hearings on the problems resulting from the export, particularly to Third World countries, of products such as pesticides, birth control devices, pharmaceutical drugs and other products determined to be dangerous to the health or safety of Americans. After careful study, President Carter issued Executive Order 12264 shortly before leaving office requiring that foreign governments be informed that such products were being exported to their country so that they could take whatever steps they deemed appropriate. President Reagan reversed the order shortly after taking office and called for further study. It now seems the Commerce Department wants to effectively eliminate the notice requirement still contained in several statutes. As the Washington Post said in an editorial in the September 12, 1981 issue: "An effective international notification system does not now exist. Until it does * * * America's unilateral con-

trols should be kept in place." I submit for the RECORD an article from the September 9, 1981, Washington Post and the editorial referred to.

The material follows:

[From the Washington Post, Sept. 9, 1981]

EASING OF HAZARDOUS EXPORTS STUDIED

MOST NOTIFICATION RULES MAY BE CANCELED

(By Caroline E. Mayer)

The Reagan administration is drafting plans to ease the way for U.S. companies to export hazardous goods that have been banned or restricted in this country.

In a draft policy statement obtained by The Washington Post, high-ranking officials at the State and Commerce departments are proposing the elimination of almost all rules that now require manufacturers to notify foreign governments before they ship goods abroad that have been deemed too dangerous for widespread use in the United States.

The types of products and materials that may be affected by the new policy range from such tightly regulated chemicals as PCBs (polychlorinated biphenyls) and chlorofluorocarbons to banned pesticides such as DDT, lindane and endrin. Consumer products that also have been banned, such as children's sleepwear treated with the flame-retardant chemical Tris, may also be affected.

According to the draft statement, a policy change is needed because the current preexport notification rules "have placed U.S. exports at a competitive disadvantage."

Noting that the United States is "the only country currently requiring notification of the export of hazardous substances," the draft concludes that such rules should be replaced by a broader information and education campaign.

Instead of notifying foreign governments at least once a year when a shipment of banned or restricted goods is to be exported, the Reagan officials propose simply providing "brief summary information" to either foreign governments or international organizations when U.S. government agencies ban or restrict a product's use, even though that notice may be years before that product is exported to another country.

"In the long run, international information sharing will have more beneficial results for the U.S. than procedures requiring specific export notifications. . . . A unified, international approach will provide a more comprehensive basis for importing nations to make decisions without jeopardizing the competitive position of U.S. exporters."

The proposed policy change may require some amendments to existing, laws, according to the draft report.

State and Commerce Department officials, upset that the draft report had become public, cautioned that the policy is only a draft and could be changed before it is sent to President Reagan. Commerce Department officials said they hope to complete the report within a month.

One official involved in writing the report said there was a great deal of internal debate in both agencies over the proposed policy, with several staff members arguing that it does not protect the public's health and safety and the environment.

The two departments themselves are locked in a dispute over just who should be notified about U.S. regulatory actions to ban a product.

State Department officials argue that they should notify individual governments about each action, while Commerce officials contend that such information should go only to international organizations, such as the United Nations.

Commerce argues that it is not the U.S. government's role to keep all other foreign governments informed about hazardous products; instead, it is up to the United States merely to furnish the information to an agency so any interested government would be able to obtain it.

The policy recommendations on hazardous exports was requested by Reagan last February when he struck down an executive order issued by President Carter just five days before he left office. That order sharply restricted the export of products that either have been banned or whose use has been restricted in this country. Among other things, the order would require anyone exporting such products to obtain an export license from the Commerce Department before such goods were shipped abroad.

Despite the revocation, exporters are still required in many cases to notify U.S. government agencies before they export tightly regulated chemicals, banned products, pesticides that are not registered in the United States and medical devices that do not comply with U.S. standards. In turn, these agencies proceed to notify the officials in the foreign country for which these products are destined, either directly or through the State Department.

"In no case can it be documented under the existing shipment specific notification system that a foreign government has taken specific regulatory action in response to notification of a U.S. export," the draft report says in explaining why the current rules should be dropped.

---

[From The Washington Post, Sept, 12, 1981]

EXPORTS ARE ALSO IMPORTS

Yet another leaked draft from inside the administration shows the Commerce and State departments to be at work on a proposal to eliminate the requirement that foreign governments be notified before U.S. companies export hazardous products. Should the plan be forwarded to the president and adopted, it would undo a sensible compromise policy agreed to only a year ago.

There are many who believe that this country should forbid the export of substances—pesticides, drugs, consumer products, chemicals for instance—banned or tightly restricted in this country. This ignores the reality that the risks and benefits involved in a regulatory decision vary greatly among countries. The classic case is DepoProvera, a cheap, long lasting, effective contraceptive banned here because of possible long-term health risks. In many developing countries where skyrocketing population growth has created great hardship, the balancing of risks and benefits yields a different judgment.

A sensible policy not only must accommodate these differences; it also must encompass a number of economic, political and environmental interests that point in conflicting directions. The policy must not interfere too greatly with trade by American companies. But it must recognize that, as the world's dominant economy, this country bears a measure of ethical responsibility. Moreover, unregulated hazardous exports can quickly generate a backlash of hostility and resentment damaging to U.S. foreign policy. This happened a few years ago when American companies tried to export toxic wastes to poor countries in Africa and the Caribbean.

Finally, a good policy must recognize that the earth is much smaller than it seems: banned substances that are exported have an uncanny way of coming home again—via air, water and especially food. For example, residues of banned pesticides—some of them with severe health effects—have found their way back to American kitchens on bananas, sugar, tea, tomatoes, coffee and many other imports.

The compromise eventually agreed to by Jimmy Carter and Congress allows exports of dangerous substances only after the importing country is notified of the risks involved. It is not a perfect solution, but it is the best balancing of these various interests yet put forward. Businesses have complained because of delays and paper work, but these are modest in comparison with the benefits. The draft plan's argument that current controls should be dropped because a "unified, international approach" would be better is a fancy way of saying, let's do nothing. An effective international notification system does not now exist. Until it does—and this country should continue to support its creation—America's unilateral controls should be kept in place.●

---

## TRIBUTE TO LUTHER FLECK OF BLACKWOOD, N.J.

### HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. FLORIO. Mr. Speaker, Mr. Luther Fleck of 225 Marshall Avenue in Blackwood, N.J., was the recent recipient of the Silver Lifesaving Medal for heroism. The medal was officially presented to him by Vice Adm. R. I. Price of the U.S. Coast Guard. I believe that Mr. Fleck's lifesaving actions are of interest to my colleagues.

While strolling on the Steel Pier in Atlantic City, Mr. Fleck spotted a man and small child struggling for survival in the cold surf below. With no concern for himself and without the assistance of lifesaving equipment, Mr. Fleck dove into the water, 50 feet below, and held the two above the waves until help arrived.

The results of such valiant efforts were the survival of the man and his son. Unfortunately, Mr. Fleck sustained internal injuries due to the pounding of the waves and the strain of the rescue.

I would like to take this opportunity to personally and publicly commend Mr. Fleck for his unselfish and heroic act. It is indeed the actions of a man like Mr. Fleck which are exemplary of the brotherhood of man.●

## INTELLIGENCE INFORMATION PROTECTION ACT

### HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SHUMWAY. Mr. Speaker, I am today introducing the Intelligence Information Protection Act. My legislation, which is identical to S. 1235 sponsored in the other body by Senator D'AMATO, would substantially ease the deleterious impact that Freedom of Information Act requirements have had on the CIA.

Although the intelligence community remains our Nation's first line of defense, the effectiveness of the CIA in particular has been severely compromised by materials procured under the Freedom of Information Act. CIA methods have been publicized; CIA operations have been undermined. Perhaps most importantly, the perception now exists among allied intelligence agencies and potential sources alike that identities cannot be protected and information kept secret. This should perhaps come as no surprise, Mr. Speaker, given the fact that, under present law, the CIA recently spent $300,000 to comply with a Freedom of Information Act request from Philip Agee, the notorious former CIA officer whose admitted intent is to destroy the Agency.

Specifically, my bill exempts from the Freedom of Information Act all materials involving personnel selection, training, reorientation, internal operations, office management, and organization of the CIA. Additionally, all materials concerning special activities, clandestine collection, and covert operations are exempted. The right of individuals to obtain personnel files would not be affected, nor would the application of the Privacy Act be altered.

Mr. Speaker, the general issue of Freedom of Information Act reform is currently being debated both in Congress and within the administration. My bill is intended as a contribution to this necessary debate, and as an effort to restore to our intelligence community the ability to effectively carry out its crucial responsibilities. I would therefore welcome the cosponsorship of our colleagues.

At this time, I would like to commend to the attention of the Members of the House, an article by Jack Valenti which underscores the need for the kind of legislation I am proposing:

[From the Washington Star, Mar. 13, 1981]

TOO FREE WITH OUR INFORMATION

(By Jack Valenti)

I spent some time recently in Western Europe chatting with key European officials, including several in the intelligence services of Great Britain and France. They seem persistently nonplussed by peculiarities in the American spirit, centered mostly on our Freedom of Information (FOI) Act and the porous quality it confers on the FBI and the CIA.

As one foreign official put it to me, "I daresay none of my colleagues today would pass on to the Americans sensitive data about the work of our operatives on the Continent—or even hint at anything which would identify agents we have in the field. It would be suicide for our people. It is already deadly to your own."

Another said, "How on earth can you possibly collect and hold intelligence which may slip into foul hands simply because someone you do not know writes in and asks for information? How you can have an intelligence organization that routinely gives away its files passes my understanding."

It isn't enough, they complain, that material extracted from the FBI and CIA with Freedom of Information requests is put through a sifter that supposedly culls out secret material. They point out that people are processing so many requests that human error makes it literally impossible to expunge all that is not designed to be made public. Slippage is inevitable—and when it happens, the irretrievable occurs.

The intent of the FOI Act is laudable. Light thrown on dark crannies of the government usually illuminates a good many practices that should be corrected. But a balance is required, say these Europeans.

CASUAL MADNESS

It is one thing, they point out, to probe the Department of Labor or Transportation for information, but to uncork the files of the FBI and the CIA is a kind of casual, and they hope momentary, madness.

The FBI received some 18,800 requests for information in 1979, and the CIA recorded some 14,000 requests since 1975. No one can be certain how many of the CIA requests come from foreign governments operating through cover names. And there is a difference between sending along a file of newspaper clippings, and parceling out documents with lines blacked out, with no one in the Agency quite certain that all that should be excised has been.

Most people would acknowledge that criminals, both organized and unorganized, are filing requests by the long ton to the FBI to learn what the feds may have on them that might be embarrassing or damaging—and to act on what they learn. Fragments of information are as valuable as the complete dossier.

Unhappily, some past events have convinced a good many people that the FBI and the CIA skulk about doing rude acts not countenanced by our own laws. Public suspicion about two enterprises, without whose vigilance we might be more anxious than we are now about our future security, stirs our unease.

In the war against terrorism in Europe, the intelligence services of the West Europeans find it necessary to foresee violent designs before they are hatched. The only known method to do that is to collect information so that if a design is forming it may be thwarted before it occurs—or at the very least to pick up the spoor of those sponsoring the skulduggery before they kill somebody.

AN INSTITUTIONALIZED LEAK

What the public doesn't know, and probably cannot know until it is too late, is how well our police and intelligence services are prepared to act before some violent deed is done. We have so institutionalized the "leak" in this country that nothing is truly safe from prying eyes. Granted that we may too often stamp Top Secret on a formula for dried milk; granted also that much of what is delivered to someone asking for information is valueless. But it is nonetheless true that in handling literally thousands of requests, brief lapses in scrutiny run throughout the whole costly process.

It is not the cost of handling these requests that should cause us concern. It is the disposition of crucial material, often collected at great risk from sources who believe it is sacrosanct, who suddenly discover to their horror and fear that it is not. All of which causes our colleagues in Europe to shake their heads.

This unease among our friends is not evidence of paranoia. As William Burroughs put it, "A paranoid is a man in possession of all the facts."

The work of the FBI and the CIA is by nature shadowy. But they labor to ensure the security of the nation. Most Americans assume that work is going forward with dispatch, skill and dilgence. But many European friends of this country are queasy not so much about the quality of the labor, but of the impermanence of its safety.

One can only pray that the Congress and its oversight committees can figure out some common-sense balance which places off-limits sensitive information which is now leaked or routinely given away. There is legitimacy in the phrase "national security information."●

## NURSES' DISCONTENT MUST BE ADDRESSED

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BIAGGI. Mr. Speaker, the problem of quality health care in this country continues to plague us in many areas of the country where adequate health care personnel are needed. The problem of nurses is particularly compelling and points directly to the need for greater cooperation between health care advocates in an era of decreasing Federal dollars.

There are currently 1.4 million registered nurses in the United States. Yet, only 400,000 of them choose to work full time in hospitals. In my own city of New York, the problem is even more acute—the current levels of 5,600 RN's must increase by 1,000 in order to continue even a minimal level of patient care.

Dissatisfaction with the low level of pay, grueling hours, and lack of adequate training programs to upgrade job skills have prompted many women to leave the field. At the same time, the number of nursing graduates are decreasing, creating 100,000 nursing vacancies in the United States—or 72 full-time positions in each hospital.

As a member of the House Education and Labor Committee, I have been actively involved in efforts to improve the working conditions of all levels of nursing as well as programs

to upgrade nursing. In New York City, I have spearheaded collective efforts between vocational education, adult education, local school officials, and the Health and Hospitals Corp. which administers municipal hospitals to develop programs to train licensed practical nurses.

Licensed practical nurses, or LPN's as they are known, provide essential support services in hospitals which are vital to any effective health care system. The need for them is well documented. A fall 1980 Bureau of Labor Statistics report notes a current as well as projected scarcity of LPN's to serve the hospitalized. Providing upgraded training within their present employment framework is likely to encourage LPN's to remain in the field and hopefully, encourage training that would upgrade their own professional positions.

The future of our health professions depends upon increased cooperative efforts between the public and private sectors to maximize resources. Adequate funding for nurse training and scholarship programs is essential and I pledge to continue my efforts to combat future attempts to reduce or eliminate these vitally important programs. Nurses deserve our support as much as they do not deserve continued discontent.●

## SOLAR BANK SAVED

### HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. D'AMOURS. Mr. Speaker, few changes this administration has made have been as marked, or potentially as shortsighted as their energy policy. Choosing to rely exclusively on tax credits, they have thus far refused to issue regulations implementing the Solar Energy and Energy Conservation Bank, and have, in fact, proposed its elimination. Despite the overwhelming congressional support for the bank in the 96th Congress and reports from both the GAO and OTA indicating fully supporting its creation, they have steadfastly blocked it.

Therefore, I am exceptionally pleased that the conference report on H.R. 4034, the HUD-independent agencies appropriations bill, contains $25 million for the Solar Energy and Energy Conservation Bank. Although this sum is very modest, it will most certainly provide funding for pilot projects which should certainly demonstrate once again the need for the bank. Perhaps more importantly, the report contains language directing the Secretary of HUD to issue regulations implementing the bank at the earliest possible date.

Colman McCarthy, the noted Washington Post columnist, recently wrote a column very accurately depicting the Reagan administration's shortsighted attitude toward solar energy. I ask that it be printed in the RECORD at this point and commend it to my colleagues. It is especially appropriate today as we consider legislation that initiates this most important of solar energy proposals, the Solar Energy and Energy Conservation Bank:

THE REAGAN SOLAR ECLIPSE

(By Colman McCarthy)

QUONOCHONTAUG, R.I.—Along Ocean View Lane, from which the view of the Atlantic sparkles with the blue waters and bluer sky of Block Island sound, those looking inland can enjoy scenery of a different but still stirring beauty. On the roof of the corner home of Jim Byrne, a retired insurance man, are two solar collector plates.

They are modest in design and purpose. Ten feet by five feet, their heat absorption pipes lead into the house to a water tank that uses the stored energy when needed.

What's beautiful about this solar device is not only that it is one of many in this remote village and, nationally, one of about 350,000 currently on American homes, but that Jim Byrne is in his 80s. He is an oldtimer who has rejected the tired old wasteful ways of the oil conglomerates and their one-note opposition to renewable energy like solar. Instead, in his 80s, Byrne is going with the future.

Much of the rest of the country appears ready to join him. A Gallup Poll last year reported that solar development was the choice of 31 percent of the public to meet the country's energy needs. Oil and natural gas were the preferred options of only 14 percent, and nuclear power sputtered in last with 8 percent.

Warmed by the sunlight in this popular support, Congress last year raised the residential solar tax credit from 15 to 40 percent. In many states, further credits have been enacted. Offering leadership that was unappreciated at the time, Jimmy Carter announced in a 1979 presidential message—the first ever on solar energy—a national goal of using solar and renewable resources for 20 percent of the nation's energy needs by 2000. The new federal Solar Energy Research Institute had a budget of $100 million and a director, Denis Hayes, who was both a sophisticated scientist and a seasoned advocate.

With this kind of support and attention, solarists had reason to bask a bit. But no sooner had this sunny day begun than the Reagan administration charged in with plans for a partial eclipse—and in many places a total one.

It wanted to eliminate the Solar Energy and Energy Conservation Bank, one of the main parts of the Carter solar program. The bank was to have provided $1 billion worth of subsidies through 1984 to builders and owners of both residential and commercial structures. The administration has yet to kill the bank. Its fate is now in the hands of House and Senate appropriations committees that are about to decide whether to give it $150 million for the next three years. The Solar Lobby, a Washington group, says the bank "is the only federal program to help lower-middle income people in making energy conservation improvements to their homes."

Failing to break the bank, in June the administration fired Denis Hayes and cut the institute's staff from 850 to 580. On his last day, Hayes served the nation well with his candor: "The shifts in the energy budget have been described by administration spokesmen as pure exercises to trim the federal budget. That is a manifest lie." If saving money were the goal, Hayes said, "the nuclear budget would not be increased by 36 percent while the solar budget was slashed 67 percent."

From the evidence, it is hard not to agree with Hayes that this administration "has declared open war on solar energy." If there is any comfort to be taken it is that this will be a war that the president's energy generals can win only in their sunless strategy rooms. They argue, with free enterprise slogans, that the future of solar should be decided in the marketplace: as oil prices rise, consumers will go to the solar equipment companies that provide savings in energy. Solar must compete on its own, without subsidies from energy banks.

This is a tidy theory, except that citizens and businesses are so burdened paying this month's gas and electric bills that they have little or nothing left over for the high capital outlay needed for solar. "You could charge $100 a barrel for oil," said Suzette Tapper of the Solar Lobby, "and that only makes people less able to afford solar." The theory also overlooks the immense sums the government provides to subsidize conventional fuels—one study puts the figure minimally at $220 billion from 1923 to 1978. This is free-ride enterprise.

As solar energy becomes politicized, perhaps President Reagan should climb the roof of the White House. A solar hot water system, like the one on Jim Byrne's house in Quonochontaug, was installed there two years ago. Last week, a White House official said it was working just fine.●

## JEWISH NEW YEAR

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. SOLARZ. Mr. Speaker, I would like to take this opportunity to remind my fellow colleagues that beginning with sundown on September 28 through sunset of October 8, the Jews of the world will begin the celebration of the Jewish New Year. These 10 high holy days commencing with Rosh Hashanah mark a period of penitence culminating in Yom Kippur. These holy days, Rosh Hashanah and Yom Kippur, are the most solemn days of the Jewish calendar.

These days involve reflection on the creation of the world, of God's covenant with Israel, and the events of our own lives for the past year.

Rosh Hashanah is the time of remembrance. It challenges one to assess the past and future, and the meaning of all that surrounds us. But it is also a day of hope, for it provides an opportunity to not only repent misdeeds but to renew one's commitment so that by Yom Kippur, the Divine Tribunal will enscribe one's name in the book of life.

As Jews throughout the world gather in their synagogues, we will ex-

perience again the strength of our faith and traditions, and ponder the ancient question: "Who shall live and who shall die?"

We will recall the ancient and modern persecution of our people, particularly the holocaust which claimed 6 million men, women, and children. It will strengthen our determination that never again must such an event be allowed to happen.

We will remember the miraculous birth of the Jewish State in Israel, an oasis of democracy in a sea of dictatorships, a place where the exile has found a home, and where the very desert has been made to bloom.

We will rejoice that thousands of Jews from the Soviet Union and Eastern Europe will worship for the first time in freedom. But we will mourn that tens of thousands of others who remain locked in the gulags of the Soviet Union and Eastern Europe yearning for the freedom of Jerusalem, while the embattled Jewish minority in Syria struggles to survive and wrench from its oppressive Government the right to emigrate.

As we end the holy days with the solemn fasting and prayers of Yom Kippur, let us also renew our commitment to work "to loosen the fetters of wickedness, to undo the bands of the yoke, and to let the oppressed go free."

Mr. Speaker, may I wish to you and to all my colleagues a happy new year of peace, freedom, and justice—and may this be the year of deliverance for the people of Israel throughout the world from all their enemies.●

## THE REAGAN POTENTIAL

**HON. LARRY McDONALD**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. McDONALD. Mr. Speaker, this year in Washington has been different from any time seen in Washington since Mr. Roosevelt's first term. For the first time since 1932, the cutting of taxes and the reduction of the Federal budget are major topics discussed every day in Government rather than just occasionally. Dan Smoot pointed out recently that President Reagan has this marvelous opportunity to bring our Government back to being the constitutional Republic that was intended by our forefathers. Passage of appropriate legislation to pare down the tyranny of the judiciary and the size of our Government can take place under President Reagan, if he will but seize the opportunity. Dan Smoot's article appeared in the Review of the News for July 8, 1981. I commend it to the attention of my colleagues as a very timely discussion:

THE DAN SMOOT REPORT ON THE REAGAN POTENTIAL

I believe a majority of Americans fear and dislike socialism, but our failure to utilize constitutional remedies has rendered us unable even to slow down the socialist revolution that is smothering our Republic, much less stop it and roll it back.

The Constitution is not law of the land for the people to obey. It is law for government to obey. It specifies powers which the federal government may and may not exercise, and a few powers denied the states—summing up in the last article of the Bill of Rights by saying that all powers not mentioned are reserved to the states or to the people.

Even if the President, all Members of Congress, all judges on the Supreme Court, and every other person living in the United States, want the federal government to take certain action, the government cannot legally do so unless the Constitution makes a grant of power authorizing such action. The only legal way out of the impasse is for Congress and the people to amend the Constitution by due process, giving the federal government whatever additional power the people want it to have.

Some raise doubts about the meaning of key passages in the Constitution, but there should be few real doubts for those who have studied its origin. Inherent in our Constitution is the ancient principle that the intent of the original law-giver is the law. If judges or other government agents can change the Constitution instead of obeying it as is, or can with impunity ignore its provisions, a written constitution is a mockery of the noble ideal of limited constitutional government. With regard to our Constitution, the original law-giver was the Constitutional Convention; with regard to an Amendment, the Congress that proposed it was the law-giver. There are records, made by these law-givers, revealing their intent; and their intent is the law.

In any event, it is a mistake to try to find out what the Constitution means by reading federal court decisions. The courts have perverted the Constitution, burying its original meanings in millions of murky paragraphs that confuse rather than clarify.

The Constitution does not give the Supreme Court the power of final arbiter to determine what the Constitution means. That much power given to the Court would have made it constitutionally what it has unconstitutionally become: a judicial oligarchy that can do to the people and their institutions anything a majority of the justices pleases. The original law-givers, the Founding Fathers, were so afraid of judicial tyranny that they made the Supreme Court the weakest of the three federal branches. It was given very limited, and relatively insignificant, original jurisdiction; no appellate jurisdiction except at the pleasure of Congress; and, no means to enforce its decisions.

All this being obvious, is it not strange that Congress permits federal courts to violate not only the Constitution but also specific laws of Congress?

SOME PROBLEMS AND REMEDIES

The First Amendment prohibits the federal government from interfering with the free exercise of religion. In 1962, the Supreme Court subverted this provision and used it to outlaw the free exercise of religion in public schools. Today, 19 years later, the decision still stands, serving as a precedent for other decisions. From time to time, some Members of Congress suggest a Constitutional Amendment to permit prayer in public schools. Yet this wrongly implies that the Supreme Court was right in the first place, and it would give the federal courts constitutional authority to supervise religious activity in public schools.

During the past 17 years, many Members of Congress have been whining about federal courts violating federal laws to order busing for racial balance in public schools. Some Members have proposed a Constitutional Amendment to prohibit such forced busing. Again, the implications are serious!

There are, of course, other remedies. Congressman Lawrence P. McDonald (D.-Georgia) tried to bring impeachment proceedings against a federal judge in Lousiana who, overturning a state judge's decision, ordered three white girls to be bused miles away from their neighborhood school to attend a mostly Negro school. In Tyler, Texas, a federal judge has recently handed down decisions that will require crushing increases in school taxes, and create other monumental problems, while hurting rather than helping children. Again, impeachment has been suggested.

But there is a better constitutional remedy than impeachment to handle such federal judges who are more destructive of our governmental system than the Communists have ever managed to be. There is little likelihood of an impeachment succeeding. If it did succeed, it would at best remove one undesirable federal judge, and, perhaps, scare others; whereas, there are legions of federal judges who need to be reined in sharply and abruptly. With regard to school matters, prayer or busing, all we need is an Act of Congress saying that federal courts have no appellate jurisdiction in cases involving the operation of schools. That would end the matter and leave it to the states and to the people.

Our failure to utilize proper constitutional remedies has rendered us unable even to slow down the socialist revolution, much less stop it and roll it back. We have now reached a turning point; we are at a crossroads of history. During the Reagan Administration, we will either make a turn upward toward restoring America as a prosperous, independent, constitutional republic, or we will accelerate our speed downward through economic collapse and anarchy toward the degenerate position of servitude in an international socialist dictatorship.

At this juncture, Ronald Reagan has a more glorious opportunity to do what is right for America, and is freer to do it, than any other President in the century. For almost 20 years before being elected, he talked publicly about what the federal government should do; and what he said should be done is what the people voted for when they elected him. Hence, he has the clearest public mandate a President has ever had; and he does not have to worry about re-election. Reagan could go down in history as our greatest President: the one who saved our Republic from oblivion. The people are ready; the time is right; and, the President has the special qualification needed: He is superlative in communicating with the public on television. Since he was shot—because of his manly behavior throughout that experience—he has become a towering personal hero of the kind our nation has needed for a long time.

MR. REAGAN AND THE REPUBLIC

Nonetheless, I do not think any of Reagan's legislative proposals to date will do enough good. The President and his men

talk of trimming waste and dishonesty out of such programs as federal Welfare and Food Stamps, but promise that the government will honor its responsibility to help the genuinely needy and deserving. Argument over who is genuinely needy and deserving has been going on since the days of Franklin D. Roosevelt, but no answers have ever been found. Moreover, the federal government has no responsibility in this problem.

Reagan has begun to yield to the vicious lobbying combine which warns him not to try to take food away from the poor in order to give guns to the military. A President who respects his oath of office to uphold the Constitution should spurn such dishonest impertinence, and waste no time on discussions about how much of the federal Budget should be spent on the military and how much on aid to the poor. Raising and supporting armies to defend the nation is a specific power and a duty that the Constitution puts upon the federal government. But all of the federal income redistribution programs are illegal, because there is no grant of power in the Constitution for them.

The awesome governmental power to take property away from some citizens for redistribution to others is among the many powers not specified in the Constitution, and, therefore, reserved to the states or to the people. Reagan, in promising to reform the income redistribution programs, is saying, in effect, that it is all right for the federal government to operate unconstitutional programs if it administers them honestly and efficiently. Such nullifying of constitutional restraints by ignoring them can be more damaging to the cause of liberty than are waste and malfeasance.

Reagan cannot possibly cut enough fat and corruption out of illegal federal programs fast enough to have any perceptible effect on the raging inferno that is consuming our civilization—the inferno of inflation, together with all of its attendant evils: social disintegration, growing anarchy, and a withering national defense that makes us every day less capable of defending our homeland against burgeoning Soviet military power.

We are so near the abyss that prudent pruning, tactful trimming, and rousing rhetoric will do little good. We must have radical measures—radical, in the sense of getting to the root of the matter. Our failure to utilize constitutional remedies has rendered us unable even to slow down the socialist revolution, much less stop it and roll it back. This will be the essence of Reagan's failure, if he fails. If he hopes to succeed, he must mount a massive offensive, geared not to the old pre-Eisenhower Republican Party's idea of frugal spending, but to the radical ideal of restoring constitutional government in the United States.

In the America of today, the most radical of all political proposals is the proposal to restore American constitutional government. That would mean eliminating hundreds, probably thousands, of federal programs and agencies which are illegal because nothing in the Constitution authorizes their activities.

How and where could Reagan begin? If he had begun in his Inaugural Address, it would have been easier for him; but it is still not too late. He should begin now where he should have begun in January—where the problems are greatest and where success would be the most stimulating to public morale. He should ask Congress to abolish all federal Welfare programs (not including, at the outset, the O.A.S.I. and Medicare portions of Social Security, for which special taxes were levied upon participants).

The Welfare programs should be abolished primarily because they are illegal, there being no constitutional authority for such federal programs; but, in explaining the proposal, the President should include pragmatic reasons for getting the federal government out of Welfare activities. It is easy to make a case against federal Welfare programs. Nixon did it in 1968, pointing out that $250 billion spent on federal Welfare since the 1930s had actually harmed the poor. Nixon promised reforms. But, in office, he proposed reforms that would have tripled Welfare rolls. Hubert Humphrey, Nixon's Democrat opponent in 1968, also condemned federal Welfare and promised reforms. His proposed reforms were worse than Nixon's.

It is easy, for instance, to make a case against the Food Stamp program, which began in 1964 as an illegal program to dispose of agricultural surplus, and became, during the first term of Richard Nixon, a monstrously corrupt and corrupting misuse of public money. It seems apparent that millions of dollars' worth of Food Stamps are used as street money to buy booze, illegal drugs, and the services of prostitutes and perverts; that millions of dollars' worth of Food Stamps are counterfeited; that thousands of individuals racketeer in Food Stamps by getting them under a multiplicity of false identities.

CONSTITUTIONAL SOLUTION FOR REAGAN

In asking Congress to abolish the federal Welfare programs, the President should ask for a simultaneous across-the-board income-tax reduction totaling, per annum, the cost of all the federal programs being eliminated. That would leave in the states more money than the federals have been spending in the states on the programs, because it would save what is now being wasted through inefficiency and corruption, and what is now being spent in Washington on federal administration.

The President should explain to the people that if they want their money spent on Food Stamps, or any other kinds of Welfare, they should make arrangements to do it the way they want it done: privately, or through state or local governments—the federal government having no valid authority to make such decisions.

The President should also ask Congress to abolish a host of other types of unconstitutional operations, such as foreign aid, the Peace Corps, E.P.A., O.S.H.A., C.E.T.A., the Legal Services Corporation, the Department of Energy, the Department of Education, and farm price supports. As each one of these is abolished, the savings should be passed immediately to taxpayers in an across-the-board income-tax reduction; or should be added to appropriations for national defense; or should be used for reducing the National Debt.

After all of that had been accomplished, the country would be in such fine shape and the people in such confident spirits that it would be possible for the President to take the final step toward restoration of constitutional government, by doing something about the illegal Social Security and Medicare programs. The acceptable way out of the Social Security-Medicare morass is to stop its expansion at once with no one else taken into the system. Then retrench, by removing from the system all participants not close to getting retirement benefits: remove them by paying them back, with interest, everything that has ever been paid into their Social Security accounts. Persons already retired or about eligible to retire on Social Security should be left as is until they die.

This would virtually end the Social Security operation in about 25 years—and during those 25 years it could be fully funded to keep its promises to participants because of the hundreds of billions of dollars saved by elimination of all other income redistribution activities.

Though it would not be as quick and easy as I have made it sound, Ronald Reagan could save our Republic by reestablishing constitutional government, if he put all of his prestige, influence, power, and talent to work on the job.●

## IN DEFENSE OF THE DEATH PENALTY

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BIAGGI. Mr. Speaker, recently Beth Fallon, a very fine reporter for the New York Daily News, wrote a column on the need to restore the death penalty. I wish to place this column in the RECORD for the close consideration of my colleagues.

It is important to note that the writer herself was not an advocate of the death penalty—until she realized that our present criminal justice system was not meting out sufficient penalities for those committing heinous crimes, criminals as she points out, like Mark David Chapman and Sirhan Sirhan.

As a sponsor of legislation to restore the death penalty I find myself in full agreement with Ms. Fallon's comment and believe that we must work for speedy enactment of legislation to restore capital punishment for heinous crimes. The urgency is even greater when one considers the sharp 9.4-percent increase in crime during 1980 as accumulated by the FBI.

At this point in the RECORD, I wish to insert the column entitled, "Murder Is Forever—So Should Be Its Punishment":

MURDER IS FOREVER, SO SHOULD BE ITS PUNISHMENT

(By Beth Fallon)

Mark David Chapman read his passage from "The Catcher in the Rye," but I didn't have to listen to it, so I didn't. I watched while the Son of Sam blew the lid off a courtroom for his own amusement, and I am watching with astonishment as Sirhan Sirhan announces his flight plans to Libya, which he says will follow his proposed release by the California parole board in 1984. Some instinct of revulsion kept me from giving Chapman one more body at his moment in the sun, the moment his sick soul killed John Lennon to achieve. So, just this once, I passed.

It probably should get me thrown out of the reporters' union, but I couldn't stomach another courtroom display, another "20 to

life" sentence, another realization that another killer, crazed or sane, may very well walk these streets again in our lifetime. The victim will of course remain in the ground. His is a real death sentence.

This brings us to the death penalty. I have always been against the death penalty for one quite simple reason, and one only: What if you're wrong, and it's the wrong person? That sort of injustice, even in relatively rare cases, is too appalling. Think if it were your life, if you were the one they made the mistake about. And so life imprisonment, real, Birdman-of-Alcatraz life, seems to me a good solution. If you take a life, you give your life on a rock somewhere, not tortured, but caged. Punished. A life for a life.

But today, it appears, there is no real life imprisonment. California speaks of treating Sirhan Sirhan "like any other murderer." If they get out after 17 years with good behavior, he should get out in the same way. New York may do the same with Chapman. I see their logic but would like to attack their premise. Why is any first-degree murderer getting out after 17 years. Is that the permanent trade arrangement? I kill somebody, and give you eight years, or 12 or 17 in exchange?

That is not a good arrangement. John Lennon will still be dead 20 years from now, and may be quite forgotten by everyone but the wife, the grown son, and the little boy now five years old. Some parole board may feel that their loss, and society's loss and outrage, has been sufficiently made recompense by Mark David Chapman. He may have become sane in the meantime, not just legally sane but really sane. He may read even better books than "The Catcher in the Rye." But John Lennon will still be dead.

Bobby Kennedy will still be dead in 1984, and the fate of this nation was changed, perhaps materially, by one bullet to one passionate, contentious brain. And Sirhan Sirhan has flight plans?

The underlying impulse in recent sentencing laws seems to be that the death penalty is too cruel. The Supreme Court attacked it not as too cruel, but as too infrequently and arbitrarily applied in many states, thus a species of the "cruel and unusual punishment" forbidden by the Constitution. Because some states have wished to show mercy to some killers, but not all—and some states have executed a much larger proportion of black killers, for instance, than white killers convicted—the death penalty now is applied quite rarely, never in some states.

But if death is judged too cruel, so is real life imprisonment. Too cruel, people say, to lock up a 21-year-old for 40 or 50 or 60 years. Too cruel. Well, it is cruel, and there is little enough mercy in the world for me to be suggesting that nobody ever get any, but I would like to suggest this.

It is also cruel to pump the body of a man you don't know full of bullets, whether you leave just a family mourning, or a whole nation mourning, or the entire world mourning. It is the ultimate unsocial, impious act—to enlarge yourself by the death of another, whether for money or fame or for safety or for "love." It is a cruelty that lasts forever.

So should be the punishment. If society has not got the means and the guts to imprison people for life in appropriate cases, the death penalty should be restored. There is no possible doubt in Chapman's case, or Sirhan's. A life for a life is not "cruel." It is justice.●

## SOLIDARITY DAY: A RECOMMITMENT TO HUMAN VALUES

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HAWKINS. Mr. Speaker, the meaning of Solidarity Day can best be symbolized by saying it is now time to defend the great strides in social progress which Americans have helped to build, and to move forward toward a society which embraces the ideals of fairness and compassion. I wish to submit to my colleagues an excerpt from a statement by AFL-CIO President Lane Kirkland for Labor Day 1981, which epitomizes the aspirations of America's workers and why Solidarity Day is so important.

LABOR'S "CENTURY OF STRUGGLE" YIELDED GAINS FOR ALL SOCIETY

"We want more of the opportunities to cultivate our better natures."

This was part of Samuel Gompers answer to the question, "what does labor want?"

That was in 1893, twelve years after the founding of the national labor center that became the AFL-CIO, whose 100th anniversary we celebrate this year.

"More of the opportunities to cultivate our better natures." This is still what labor wants on Labor Day 1981.

Looking back on our century of struggle and sacrifice, we take pride in the gains American workers have made through their unions. Those gains have not been restricted to a narrow interest group in our society. In fact, all Americans have benefitted from the higher wages, expanded consumer purchasing power, and improved working conditions that unions have fought for.

Our entire society is better off because of labor's victories in the struggle for free public education, social security, unemployment insurance, civil rights laws, voting rights, and many other milestones in our progress toward a more humane and just society.

Some people don't agree and never have. They think our better natures are best cultivated in the economic jungle. They believe in the survival of the fittest. Unfortunately, people who share that view have captured the White House and have cowed a compliant Congress.

They are suspicious of government programs to feed the hungry, educate the young, secure dignity for the elderly, care for the sick, safeguard the rights of minorities, protect consumers, and defend the environment from plunder.

Their philosophy has been summed up by their budget director, David Stockman: "No one is entitled to anything from the government."

This breathtaking statement is remarkable for its candor. It joins the issue—the fundamental issue confronting the American people. What is the purpose of government? What is the relationship between the government and the people?

The Administration projects a picture of government as an alien force sitting on the backs of the people, holding them down, repressing their productive energies.

At the AFL-CIO, we believe government is, in Abe Lincoln's words, "by, for, and of the people." In a democracy the people have the right to shape their government into an instrument that meets their needs.

Now we are told by the Administration that the people's government is the people's enemy.

We are also told the way to get the government off the backs of the people is to slash the people's programs and give a high tax cut to big corporations and wealthy individuals.

We are told that our government will become more responsive to the people's needs by transferring the people's resources to the rich and powerful. They, in turn, will invest these resources wisely, without government interference, and thereby create new jobs, improve productivity, and ultimately return more tax dollars to the federal treasury.

Presumably, these wealthy and wise men bear no responsibility for our nation's economic problems, and therefore can be trusted to make the right economic decisions for the rest of us—if only we leave them alone and allow the free market to work its magic.

This doctrine has a new name—"supply-side economics." We have always known it by another name—the "trickle-down theory." But while the theory is not really new, this is the first time we have been asked to gamble so much on it. We are asked to risk our jobs, our mortgages, our children's education, our social security, and even our national defense.

This is not a gamble the AFL-CIO is prepared to take. We have too great a stake in the American way of life—which we have helped to build—to put it in jeopardy.

We intend to make ourselves heard. On Sept. 19—which we call Soiidarity Day—tens of thousands of trade unionists and our allies will go to Washington to express our deep concern over the direction in which our nation is headed.

We will protest the Administration's efforts to dismantle the social programs that reflect humane and compassionate government. We will exercise our constitutional right of petition to assert our demands for jobs and justice. We will march in the spirit of the great abolitionist Frederick Douglass, who said:

"If there is no struggle, there is no progress. Those who profess to favor freedom, and yet deprecate agitation, are men who want crops without plowing up the ground. They want the ocean without the awful roar of its many waves."

This Labor Day 1981 is a time for all Americans to reflect on the contributions of working people to the nation's progress. It is also a time to reflect on the stake all of us have in preserving that progress.

Despite the grave challenges we face, we are not discouraged. Looking back on our first one hundred years of achievement, we realize that we have faced harder problems than we face today. We have faced worse odds. But we have survived, and we have overcome.

Today, we have a challenge not only to the nation's achievement since the New Deal, but to the trade union movement itself. We intend to meet that challenge, confident that, in their fundamental decency, the American people will not consent to the destruction of one of their fundamental institutions.●

## CONGRESSIONAL VIGIL FOR SOVIET JEWRY—FINKELSTEIN FAMILY

### HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. DONNELLY. Mr. Speaker, I am honored to take part in the congressional vigil for Soviet Jewry. I commend Congressman BARNES for his leadership role in this vigil, and I welcome the involvement of many of our colleagues in this worthy effort.

I am deeply troubled, in fact angered, by increasing reports that the Jewish cultural movement, and those who seek freer emigration from the Soviet Union are being harassed, arbitrarily imprisoned, and their community forcefully disbanded. I take this opportunity to inform the House of the unjust treatment of the Finkelstein family of Vilnius by Soviet authorities and their agents. Eitan Finkelstein first applied for emigration status for his family in 1971. Since then, Eitan, his wife Alexandra, and their young daughter Miriam, have suffered greatly due to that simple, legal request for exit visas.

Following Eitan's application in 1971, he has encountered tremendous difficulty in gaining employment. Due to the need to provide for his family, he has no alternative but to accept menial, low-paying jobs. Accounts reaching the United States relate that the Finkelstein family faces daily financial hardship. To add to such woes, KGB agents have searched the family's apartment on numerous occasions hoping to suppress the activities of the Jewish Cultural Symposium to which Eitan contributes. For the record, I would like to quote a recent letter from Eitan Finkelstein to a relative in New York.

As a first hand observer of the life of Soviet Jewry for the last 15 years and as a direct participant of many important events in this life, I declare that a cultural genocide of the Jews is being conducted in the Soviet Union.

The severe crackdown on dissident and refusnik activities in recent years lends credence to Eitan Finkelstein's tragic assessment.

Now, more than ever, we in Congress must commit ourselves to defending the right of these brave people to emigrate from tyranny. We must commit ourselves and our Government to protesting, whenever necessary, the Soviets' violation of the most basic human rights. Truly, such action is fully consistent with the best traditions of our Nation.●

## IT IS TIME TO PUT THE PAY CAP ISSUE ON THE FRONT BURNER

### HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WOLF. Mr. Speaker, the pay cap issue has now reached crisis proportions. The ability of government to function smoothly and effectively is being seriously threatened.

The retirement rate for Federal executives in the 55- to 59-year-old age group was 15.5 percent in March 1978, 28.9 percent in March 1979, 74.6 percent in March 1980, and 94.7 percent in August 1980. I can imagine what the percentage will be next month when we have top managers making no more than the GS-14 subordinate.

According to statistical information documented by the General Accounting Office, the cost of paying a salary pension to a senior executive who retires early, plus the salary of a replacement for the executive amounts to $67,573 per retiree in actual dollar losses for the Government within a 3-year period. Raising executive salaries would actually be cost effective.

Several enlightened editorials have addressed this subject in recent date, and I ask unanimous consent that they be printed at this point in the RECORD.

[From the New York Times, Sept. 4, 1981]

FAIRNESS AND FEDERAL PAY

Congress, in its July budget reconciliation battle, slapped a 4.8 percent ceiling on pay raises for 1.4 million Federal white-collar workers. President Reagan, who issued his recommendation at that level this week, could have suggested a lower figure, or no raises at all. In that sense the recommendation illuminated a larger point: Federal pay schedules have become awesomely confused, complicated and unfair, to the detriment of the nation as well as Government employees.

For example, in 1969 Congress approved the idea of "comparability"—wages and benefits for Federal jobs should match those for similar private jobs. One aim was to establish a survey of wages and benefits in 91 private jobs as a basis for setting pay, thus diminishing the influence of politics.

But Federal pay has not come up to the survey levels for a few years. This year's survey indicated that white-collar employees need an average 15.1 percent raise—far in excess of the President's 4.8 percent recommendation, even taking into consideration that Federal workers get about 4 percent more in fringe benefits and somewhat more job security than private workers.

A ceiling on top salaries in the highest executive category, GS-18, creates another kind of unfairness. In addition to squeezing those executives financially, it compresses the whole pay scale. As a result, with the proposed schedule, there will be about 45,000 Federal employees in grade levels 14, 15, 16 and 17 whose pay will be at the maximum amount allowed, around $51,000. Thus a manager may be making no more than subordinates two or three ranks below him. Consider the effect that would have in a police department, or an electronics company.

Congress could act to raise pay levels and make the system fairer, but doing so would require a Congressional pay raise. Senior executive pay is linked to that of Congress. And for the moment a Congressional pay raise is a back-burner item, since members of Congress fear any such move would generate a storm of public protest.

Yet the twin problems of too little pay and too much compression deserve attention. Government workers face the same food prices, interest rates and college costs as everyone else, and they are losing ground. The best of them, when treated unfairly, do what anyone else would do: they quit.

[From The Washington Post, Sept. 16, 1981]

THAW-TIME FOR TOP FEDERAL PAY

Most Federal white-collar workers were less than giddy a few weeks ago when President Reagan proposed an annual pay raise for them of 4.8 percent. But the news this week that he would like the same raise for senior government executives must be music to the frozen little ears of these employees, who have not seen an extra penny—not one—in four years. After all this time, they deserve a break today.

True, their current salaries may not be the stuff of which poverty is made. But when you freeze everyone's pay at the top for four years, the crowd bumping against the ceiling gets thicker, incentives get thinner and valuable experience and talents vanish into retirement, which at prevailing pension rates can prove more lucrative than staying on the job.

That's hardly the formula for top-flight management in government, which is why Congress should support the administration's recommendation to end the freeze and to offer the same modest rate of increase proposed for all other federal white-collar workers. It is not a matter of "comparability" with whatever a worker's supposed counterpart in private business may be earning, but with whatever others down through the federal ranks may be getting.

Still better, of course, would be a federal pay structure that took into consideration 1) regional differences in costs of living and pay scales and 2)—would you believe?—the value of the work performed by each employee. That may be too much to ask, but then, who is footing the bill, and how much is too much to pay?

PAY CEILING CREATES BRAIN DRAIN AT THE TOP

SENIOR EXECUTIVE SERVICE

(By Douglas B. Feaver)

Top federal personnel officials are becoming increasingly concerned that the ceiling on federal pay is causing too many top career employees to retire and creating serious morale problems for those who stay.

"I'm not sure that the attrition rate is higher than it should be," said George Nesterczuk. "I'm more concerned with the loss of quality. We're losing a lot of corporate memory." Nesterczuk, a Reagan appointee, is the new chief of the Office of Personnel Management's Executive Personnel and Management Group.

At the end of August, 1980, the most recent 12-month period for which OPM has developed statistics, 95 percent of eligible federal employes receiving the maximum

federal salary had retired whether they were GS15s or in the Senior Executive Service. In January, 1979, only 28 percent of people in the same category had retired.

The Senior Executive Service, created by the Carter administration to give status and bonuses to the top federal jobholders, has 6,500 positions. There were 930 retirements from SES from July, 1979, to March, 1981.

Nesterczuk said that the National Aeronautics and Space Administration and the Department of Defense, have been particularly hard hit by the recent retirements of specialists who have found better paying jobs in the private sector.

Pay for federal employes has been frozen at $50,112.50 since Oct. 1, 1979 and before that was capped at $47,500 on Feb. 20, 1977. President Reagan promised a salary increase during the campaign, but the answer to the question of when now seems tied to undefined improvement in the economy.

Another factor in the retirements, according to several federal officials, is that pensions for federal employees are being regularly boosted with cost-of-living increases. Pensions are based on the top salary earned, and if that salary is static there is no reason to delay retirement.

When the Civil Service Reform Act of 1978 set up the SES, up to half its members were supposed to be eligible for annual bonuses for good work. Congress intervened after one year and cut the limit to 25 percent. Then OPM got into the act and cut it to 20 percent and added the requirement that bonuses be distributed throughout all parts of the agencies. The amount of the bonus was supposed to be limited to 20 percent of salary, but has averaged out to about 11 percent.

Senior civil servants throughout the government complain about "the cap" during interviews on any subject. "The feeling of unfairness grows and it's very corrosive," a top aide in the Office of Management and Budget said.

"What makes me angry," said a top official at Treasury, "is that the guy I'm working for and six people working for me are all getting the same salary. Private industry would never tolerate a salary schedule like that."

The pay ceiling for federal employees is tied to the pay ceiling for congressmen and, as Nesterczuk pointed out, it doesn't sell too well in Broken Bow, Okla., when some one making $50,000 a year is voted a taxpayer-financed raise.

FEDERAL EMPLOYES AGED 55–59 RETIRING

| 12-month average ending | January 1979 (percent) | January 1980 (percent) | August 1980 (percent) |
|---|---|---|---|
| Employes at pay ceiling | 28 | 52 | 95 |
| Employes not at pay ceiling | 28 | 35 | 49 |

Source: Office of Personnel Management.

"There are some GS15s or SESers in the field who may be the highest paid people in the community," said Nesterczuk. "They become an issue just because of that, and members of Congress have to be sensitive to that."

At the same time, SES members are learning that the outside world sometimes values them more highly than the taxpayers.

C. William Fischer served at OMB, the Congressional Budget Office, the Office of Economic Opportunity and the Energy Department before concluding his federal career as an assistant secretary in the Education Department.

He had the right to remain in the SES, although he conceded in a telephone interview that "because of my close identification with the Carter administration it was unrealistic to expect I would get an assignment of equal responsibility." But, he said, "if greater rewards financially were there I probably would have stayed."

Instead, he took one of many offers he was made: a job as vice president for budget and finance at the University of Colorado that pays "about $60,000." He gets to teach, which he said he enjoys, and has good fringe benefits and he's only 49.

Nesterczuk said that OPM has done some polling of senior employes and has learned that almost 80 percent of them regard their jobs as "satisfying," but that about the same percentage are contemplating retirement.

That, he said, "is an indication of a severe morale problem."●

## INSTITUTIONAL INVESTORS SUBJECT OF CONCERN

### HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BEDELL. Mr. Speaker, many of us watched with interest and concern this past summer as various corporate giants battled for control of Conoco, the Nation's ninth largest oil company. On July 21, I wrote a letter to the Acting Chairman of the Federal Trade Commission, David Clanton, expressing my concern over the degree to which certain institutional investors now dominate the ownership of many of our leading energy companies.

Citing the bidding war between Mobil and Du Pont for control of Conoco as a case in point, I noted that 36 institutional investors showed up in the lists of top shareholders at two or more of the three companies involved. In fact, I noted that 20 investors, mostly financial institutions, were listed among the top shareholders of all three companies.

The complete text of my letter to Mr. Clanton appears in the CONGRESSIONAL RECORD of July 23, 1981.

Now it appears I was not the only one concerned about the central role played by institutional investors in the Conoco takeover. According to an article in the September 1981 issue of Dun's Business Month magazine, the chairman of the board of Conoco, Ralph E. Bailey, also is troubled by the impact of large institutional investors.

At this point in the RECORD, Mr. Speaker, I wish to insert the complete text of the article from Dun's.

CONOCO: THE BITTER AND THE SWEET

Chairman Ralph E. Bailey of hotly pursued Conoco, Inc. feels "privileged and excited about participating in the creation of a unique and extraordinary company"—the merging of his firm into du Pont, victor over Seagram Co. and Mobil Corp. in a titanic tender war.

Nevertheless, Bailey blasted current takeover laws, which permit institutional shares to be tendered "whenever the opportunity for a few dollars profit arises." He warned that Washington's "relaxed attitude" toward mergers can only lead to more Conocolike tender offers, with "speculative interests playing on margin."

Noting that 70 percent of Conoco's stock was held by institutions, half of it in the hands of the top twenty institutional buyers, Bailey asserted: "We have more than 70,000 shareholders, but not more than thirty people determined our fate." Under the present system, "the first 51 percent of the stockholders get favorably treated, and the rest get left holding the bag," he complained. Moreover, "majority control can be acquired at a price that doesn't recognize the intrinsic value of the company."

Indeed, paying $7.5 billion for 55% of the nation's ninth-largest oil company and second-largest producer of coal, du Pont had itself quite a buy. For $98 a share, about twice what Conoco stock was selling at when Seagram started the frenetic bidding last June, du Pont corralled Conoco's considerable petroleum, natural gas and coal assets, which analysts valued at $120-to-$150 a share. Now those coveted assets will be melded into du Pont to create a $31-billion oil, coal and chemical colossus and become the country's seventh-largest company, just behind Ford Motor Co.

For du Pont, which has had to pay high prices for the petroleum that goes into 80% of its products, Conoco brings an in-house supply around 420 million barrels of domestic oil reserves. Conoco also has a stake in the North Sea, proven reserves of 5.7 trillion cubic feet of natural gas worldwide and 14.3 billion tons of coal.

Wall Street speculated that du Pont might deal Conoco's coal operations to Seagram in return for the distiller's 20% of du Pont stock, which nearly rivals that of the du Pont family. But Conoco's Bailey called the notion "utter nonsense." At a postmortem press conference, there was one question for which Bailey had no appropriate answer: "How does it feel to be an $18-billion [revenues] subsidiary of a $13-billion company?"●

## LET THEM EAT EGGS, BUTTER, AND CHEESE

### HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ECKART. Mr. Speaker, yesterday I commented in the CONGRESSIONAL RECORD about this administration's attempt to rewrite the lunch program. Today I cite another problem. In June, 20 of our colleagues signed a letter to Secretary of Agriculture John Block urging him to expedite the implementation of the food bank demonstration projects. These projects, which were signed into law last December, are an integral part of the Agriculture Act of 1980.

I was very disappointed to learn that Secretary Block did not choose to maximize the potential of these projects. The law allows for up to seven

food banks to be selected for the demonstration projects. Yet, in spite of mounting surpluses and costly storage, Secretary Block has elected to choose only two or three food banks to participate.

In other countries of the world, people starve to death while animals roam the streets: But this is due in part to religious beliefs. In this country it seems that the Federal Government is willing to buy butter, cheese, and milk at artificially high prices, pay millions upon millions to store it, and then sell it at a discount to foreign countries or allow it to diminish in quality until it is no longer fit for human consumption. Meanwhile, the poor and elderly people of this country are malnourished and, in some cases, literally starving to death.

This situation cannot be blamed on religious beliefs: The only obvious reason here is stupidity. There is no excuse for one senior citizen in this country to go to bed hungry at night. There is no excuse for one child to go to school hungry, unable to learn. We must do everything possible to distribute these surplus commodities to the poor and the needy. Food banks can help. These organizations distribute food to a wide variety of people from runaways and orphans to halfway houses and shelters for the indigent.

The "let them eat cake" attitude that seems to be prevailing in this administration cannot continue. In the case of food bank demonstration projects, let them eat eggs, butter, and cheese.

The Cleveland Plain Dealer recently published the following editorial and I commend it to my colleagues.

SOME GO HUNGRY

Surplus dairy products are piling up in government warehouses. Some spoils. The Department of Agriculture commonly sells some to foreign countries for whatever it can get—half what it paid farmers for the surplus, or less. But can the hungry in American cities and towns stand in the government-subsidized food line? Not yet.

Budget cutbacks or no, the government has obligated itself to purchase many different types of farm surpluses, keeping market prices high so farmers aren't forced to sell their produce at a loss. Price supports are of arguable benefit to the country as a whole, but one easily observable result is that the government winds up owning millions of tons of butter, cheese and other farm products.

Butter, for instance, is selling for a little more than $1 a pound wholesale in the world market. The government paid American farmers $1.50 a pound for 220 million pounds; it froze and stored the butter for two years, then it sold the butter to New Zealand last month for 70 cents a pound. Uncle Sam was out of pocket $160 million for the butter and $8 million in storage costs.

The Agriculture Department has no figures on the amount of food spoilage in its warehouses; "spoiled" is not in its vocabulary. When a stored commodity gets old—it may or may not be chemically "spoiled"—the department "downgrades" it and sells it for animal fodder or, in some instances, just throws it out.

There must be a way to get this food to the needy before it is wasted. Various charities would undoubtedly be happy to distribute it, assuming it weren't festooned with layers of government red tape, and that it came in manageable sizes. One local food distribution charity noted it came by a 60-pound block of surplus butter not too many years ago in a roundabout way, and had innumerable problems just cutting it down to usable size. The Agriculture Department does handle small sizes; it's more a matter of matching the need to the commodity.

Representative Donald J. Pease, D-13, of Oberlin, has pursued the problem of gross waste of both food and money for months now. He reports that, after substantial prodding, the department has begun stirring itself to life on the federal food bank program, which in theory could begin to move some of the surplus commodities into the stomachs of America's poor. Pease should continue the pressure—his cause is a good one.

As the federal budget is cut, as welfare benefits shrink and living costs expand, as women, children and senior citizens fall off the aid wagon and through the holes in President Reagan's safety net, it becomes increasingly important for the government to use those resources it has to help those who need it most. The impractical, wasteful ways of the past must be stopped. The Reagan administration must burn away the red tape and get this food to where it will do the most good—to those who need it to survive.●

## HUMAN RIGHTS

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BONKER. Mr. Speaker, this is day 240 of the Reagan administration and the Office of the Assistant Secretary for Human Rights and Humanitarian Affairs remains vacant. Two months ago, Mr. Stoessel, the Under Secretary for Political Affairs, appeared before the Foreign Affairs Subcommittee on Human Rights and International Organizations.

At that time, I listed the numerous instances where the Reagan administration had circumvented the intent and the spirit of congressionally mandated human rights laws. Since then, the masquerade has continued. For example:

The Reagan administration with great fanfare declared that quiet diplomacy will be the hallmark of its human rights policies. Yet we have had the spectacle of the Vice President of the United States telling Marcos of the Philippines that: "We love your adherence to democratic principles and to the democratic process." This is a statement that appalls anyone with any knowledge of the Philippines. We have the further spectacle of the Ambassador to the United Nations traveling to Latin America, visiting countries that are among the worst violators of human rights in the world and leaving the clear impression that the Reagan administration is more interested in winning the favors of these repressive regimes than in condemning their brutal violations of human rights.

On the question of southern Africa, by voice and vote, the Reagan administration has made it abundantly clear on whose side it is when it comes to the odious policies of the South African Government.

Claiming there have been "improvements" in human rights conditions, the Reagan administration is seeking to sell weapons to Uruguay—a country that has been universally condemned as one of the worst violators of human rights in Latin America.

Again, I urge the administration to follow the letter, intent, and spirit of the human rights laws and not take every opportunity to circumvent those laws.●

## LABOR'S AGENDA UNDER ATTACK

### HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. RATCHFORD. Mr. Speaker, workingmen and workingwomen from throughout Connecticut will join their brothers and sisters in the American labor movement in an historic march on Washington this Saturday. I welcome them to the Nation's Capital, and I stand with them in their efforts to redress the costly, hurtful, and inequitable antiworker attitudes and policies of the Reagan administration.

I am encouraged, Mr. Speaker, by labor's renewed determination to engage our Nation's workers in the tough fights sure to come over this Government's social and economic policies. I know what is at stake; I read the signals from the Labor Department and the other policy centers of this administration, and I know that only a united, informed, and assertive labor movement will be able to achieve success in its inevitable confrontations with a White House unabashedly committed to breaking the hard-won coequal status of unions, to withdrawing Government's assistance for the members of society squeezed by high inflation and spreading joblessness, to weakening protections against unsafe working conditions.

There is much justification for the "solidarity" that will be on display here Saturday, and much promise. In three areas, in particular, Mr. Speaker, I pledge to our visitors and to all workingmen and workingwomen a continued battle against the antilabor policies of this insensitive administration:

(a) Tax and budget proposals pressed by the President have been largely unsympathetic to middle-income workers, burdensome to the working poor, and slanted to give unfair benefit to the wealthy. Budget cuts in student loan and grant programs, the Economic Development Administration, energy assistance, health, housing, and mass transportation support will weaken the working family's ability to cope with continued high inflation. Tax cuts that target their greatest benefits to those in the $50,000-plus income brackets and virtually ignore the average wage earner will only deepen the economic divisions in our country. And a locked-in tax-cutting program that, combined with a massive military spending buildup over the next 4 years, will guarantee substantial budget deficits for the foreseeable future means continued uncertainty on Wall Street, continued upward pressure on interest rates, and a continued squeeze on workers.

(b) Social security was a victory for labor in the years after the Great Depression, and that victory is now under challenge by administration proposals that would strip away roughly one-fourth of the system's earned benefits—far in excess of adjustments needed to insure its long-term solvency. Administration efforts to eliminate the system's $122 "minimum benefit" will, if not stopped by Congress, cut deeply into the monthly payments to at least 2 million retired workers; Reagan plans to abruptly lop 40 percent off the early retirement pension would affect millions more men and women now in their early sixties and late fifties. For the majority of workers who rely on social security for the greatest share of their retirement income, the administration's proposals were unnecessarily severe—and plainly insensitive.

(c) Warning signs of the widening rift between Government and workers have appeared in Reagan administration plans to rewrite—or simply decline to enforce—regulations affecting the health and safety of workers in a variety of occupations. And these signals of unconcern could not come at a worse time; just as efforts have intensified to weaken the Occupational Safety and Health Act, new information has recently been published about the millions of workers exposed to hazardous industrial chemicals over the years, and more and more medical evidence has been gathered linking a variety of illnesses to poor working conditions. One study alone by the National Institute of Occupational Safety and Health and a research unit of the AFL-CIO has just told of the exposure of 1,100 workers in Augusta, Ga., 9 years ago to known cancer-causing agents—an exposure the workers themselves are only now being told about.

There is good sense in some efforts to modify workplace regulations—particularly in areas where commonsense could more efficiently replace burdensome paperwork and retain strong guarantees of public safety and health. But occupational safety rules have saved countless lives of coal miners and assembly line workers over the years; any attempt to streamline those rules must be carried out with care and deliberation, and with certainty that public and worker health will not be compromised.

I will be watching the unfolding of this administration's labor record, Mr. Speaker. I hope that this Saturday's march and the growing awareness of the attitudes this President and his advisers have displayed in recent months will elicit a new understanding in Washington of the problems—and dreams—of our Nation's workers. I share those dreams, Mr. Speaker, and I will continue to fight for their realization in the resolutions of this House and the laws of this great Nation.●

## THE ROLE OF THE SOCIALIST INTERNATIONAL—PART I

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. McDONALD. Mr. Speaker, on September 14, here in Washington, Count Hans Huyn of the West German Bundestag delivered an address which sheds valuable light upon the function of the Socialist International in European and world affairs. Count Huyn has a clear understanding based upon his extensive knowledge of key individuals and key events. What he has to say is of particular importance in the wake of recent demonstrations of the strength of the leftist threat in West Germany.

THE ROLE OF THE SOCIALIST INTERNATIONAL—PART I

A few words first on the origins and organization of the Socialist International—the third Socialist International was formed in Frankfurt on July 3, 1951, following on from its two predecessors, as a loose association of socialist and social democratic parties.

According to the statute of 1976, the Socialist International is supposed to strengthen the ties between the member parties and coordinate political ideas and actions. The International includes parties from 47 countries with about 50 million members. The Congress, which is the highest organ of the SI, meets every two years. The SI Bureau meets every two months and calls a party leader conference at least once a year. The current president is Willy Brandt.

To many people, particularly in America, Willy Brandt is mainly known as a symbol of free Berlin. Others remember him as the German Chancellor who initiated the agreements with East Germany and he is currently heard of mainly as the chairman of the German Social Democratic Party, the SPD.

However, the SPD is not Willy Brandt's political home ground. Anyone who knows his history and has followed his political development can say with some certainty that if Willy Brandt were faced with the question of choosing between democratic solidarity and socialist solidarity, he would in all probability decide in favour of the socialists. Willy Brandt led the SPD to the left. His election as president of the Socialist International gave him a new, easily controllable instrument, which can be applied in a variety of ways to efface the boundaries between the social democrats and the communists.

The Karlsbad conference of the European communist parties in April 1967 gave precise instructions to its members on how to infiltrate the socialist and social democratic parties and use cooperation to gain their compliance. The priority objective is to split the Atlantic alliance and to separate Europe from the United States.

The final communiqué from the Karlsbad communist conference, however, is of particular importance for other reasons. The communist parties were enlisted for a new type of popular front politics. This concerns popular front cooperation between communists and socialists of all shades of opinion in Europe but not only in the classical form of a popular front—a communist/socialist government alliance in one country. It really involves cooperation extending beyond frontiers between socialist and communist parties for the attainment of precisely defined objectives. The final communiqué states: "The Karlsbad conference, in full awareness of its great responsibility, appeals to the working class, to the socialist and social democratic parties, to the trade unions, to the believers of all persuasions, to the intellectuals, to the younger generation and all peace loving forces. It appeals to them to unite and develop widespread campaigns and mass activities in every country and at the continental level for collective security in Europe. . . . New and positive tendencies are appearing in the socialist and social democratic movements, which in some countries of Western Europe are openly in favour of international détente and cooperation with the communists. . . . We turn to the socialist and social democratic parties, which have a great influence in the European labour movement and have government responsibilities in a large number of European states. The experience of decades has shown that joint action between communists and socialists gives the working class a decisive influence on political life and gathers around it those of the community who are interested in maintaining peace and in political and social change."

As far as the communists are concerned, the main object of popular front politics is to use alliances with other and related political groups to overcome their own isolation. Their object is to come to power with the help of other socialists. As far back as the 16th February 1957, one of the leading SED officials, Hermann Matern, member of the East Berlin Politburo declared: "The efforts to obtain unity of action serve the main problem, the struggle for power. Unity of action only for unity's sake has no particular importance."

The communist popular front strategy is derived from the Bolshevik demand for a united front, the unity of action of the working class, which was first comprehensively defined in the so-called United Front

Thesis of the Executive Committee of the Communist International on the 18th December 1921. Only a few months later, a conference took place in Berlin in which socialists from Western countries and communists took part. The Belgian socialist Vandervelde declared: "They appeal for the unity of all, they propose effecting a united front but they do not disguise their background intention of embracing us first in order to suffocate or poison us later."

The socialists and communists in France made an alliance in July 1934. A few months later, the French communist party chairman, Maurice Thorez demanded the extension of unity of action from the working class into the bourgeois camp under the concept "popular front". Thorez made no secret of the fact that he understood this as meaning complete subjection to the political objectives of the Soviet Union. In the summer of 1935, at the seventh Congress of the Communist International in Moscow, he declared: "Our views are only shared by a minority of the working class at the moment. However, this minority can and must control the majority of the antifascist people and bring them step by step through their own experience to the point where they recognize that it is necessary to found a Soviet Republic."

At this seventh World Congress of the Communist International, the newly elected General Secretary of the Comintern, Georgi Dimitrov, expressly recognized popular front politics and referred to it as the tactic of the "Trojan horse".

The popular front in Spain was formed on the French model and to meet the requirements of the Communist International. One year later, in 1936, the call for a German popular front was signed in Paris by Wilhelm Pieck, Walter Ulbricht, Herbert Wehner and Willy Brandt.

[It should be noted that, in the period following World War II, Pieck and Ulbricht became Soviet puppet rulers of East Germany, while their companions rose to positions of leadership in West Germany.]

Moscow continued its communist popular front strategy even after 1945. The objective is always the same and can be read even today in the official lectures on the Communist Party of the Soviet Union, published by a group of authors under Professor Afanasyev, member of the Central Committee of the Communist Party of the Soviet: "Part of the tactics of the communist party is to deceive the social democratic forces in the labour movement and other bourgeois elements, to tack with the wind and operate tactics which by these means lead to the victory of communism."

In this way, Moscow ensures its dominance in Eastern Europe. The socialists and social democrats always hold the ladder for the communists. In the Soviet occupied zone of Germany, the Social Democratic and Communist Parties united on the 22nd April 1946 to form the Socialist Unity Party of Germany (SED). In Hungary, the socialists fused with the communists in August 1948 to form the United Hungarian Workers Party. In Czechoslovakia, the social democrats joined with the Communist Party on the 17th April 1949. In Poland, the United Polish Workers Party was formed at the beginning of 1947 from the two socialist parties. All other parties were forbidden, absorbed or remained only as a facade. The communist strategy for taking power was also fixed for the free states of Europe. The Karlsbad Conference of the European Communist Parties in April 1967 showed the way to a new form of popular front cooperation extending beyond frontiers.

On the 24th April 1978 in Helsinki, the chief coordinator of the Western policies of the Communist Party of the Soviet Union, Boris Ponomarev, addressed the Socialist International and in his speech told the "comrades" quite bluntly what he wanted from them: "Our party has supported and continues to support cooperation with social democrats, particularly in questions of peace and détente . . . The struggle against militarism is one of the most characteristic traditions of the International Labour Movement. Communists and social democrats now have sufficient influence to permit them to do a great deal towards preserving peace".

During the visit by a delegation of the Socialist International to Moscow in the Autumn of 1979, the Finnish ex-Prime Minister Kalevi Sorsa clarified the position of the Western socialists relative to "comrade" Brezhnev with these words: "We know your devotion to the politics of peace." They agreed with Moscow's proposal to undertake all the steps necessary to support the "détente process" and to increase their activities in the struggle for disarmament. One of the Soviet demands was that vital NATO reequipment with American Long Range Tactical Nuclear Force missiles should be rejected.●

## REPROGRAMING OF FUNDS EARMARKED FOR CYPRUS

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues correspondence I have had with the Department of State regarding the proposed reprograming of economic support fund (ESF) moneys earmarked for Cyprus to help fund the creation of the Sinai Multinational Force and Observers (MFO).

This would have been the second reprograming of funds from the Cyprus account and would have delayed the development of a scholarship program for Cypriot students. In recent years, Cypriot students have had numerous scholarship opportunities in Eastern bloc countries but fewer, and far more expensive, opportunities in Western countries. The scholarship program is to supplement important ongoing humanitarian programs we support on Cyprus. It now appears, however, that the administration will be able to fund the MFO without reprograming funds from Cyprus.

The correspondence follows:

CONGRESS OF THE UNITED STATES,
COMMITTEE ON FOREIGN AFFAIRS,
*Washington, D.C., August 12, 1981.*

Hon. ALEXANDER M. HAIG, Jr.,
*Secretary, Department of State,*
*Washington, D.C.*

DEAR MR. SECRETARY: I am concerned about the recent notification to the Congress of your intention to reprogram $1.5 million from the funds earmarked for Cyprus to help fund the creation of a multinational peacekeeping force for the Sinai. This would be the second reprogramming from the funds earmarked for Cyprus in fiscal year 1981. Earlier, you advised the Congress of a reprogramming of $1 million from Cyprus for use in Liberia

Because of these reprogrammings, an important scholarship program for Cypriots, which both the Executive branch and the Congress supported for funding this year, apparently could not be undertaken. The scholarship program in this case could not begin until sometime in fiscal year 1982, provided funds are available then.

The proposed reprogramming of funds raises some questions which I would like answered:

(1) Given the fact that the Economic Support Fund money for Cyprus over the last several years has been earmarked in legislation, why were these earmarked funds used for reprogramming when other, unearmarked fiscal year 1981 funds were available which could not be used for their originally intended uses in fiscal year 1981?

(2) Why was it not possible to reprogram to the Sinai account some of the Fiscal Year 1981 money that was part of the $28 million which you announced earlier this month would be returned to the Treasury?

(3) what positive impact do you see this action having at a time when Special Ambassador Bartholomew and other officials are seeking to promote serious Cyprus negotiations?

(4) Why is it in the national interest to delay the funding of a scholarship program for Cypriot students at a time when the Soviet Union and its allies are determined to have as many Cypriots as possible receive free education in East Bloc countries?

I fully realize the need for some flexibility in meeting unforeseen circumstances which arise after programs are authorized for a given fiscal year and the need for authority to reprogram from all programs, including earmarked programs. But I believe all available unmarked funds should be considered for reprogramming before tapping, for the second time, a program in the sensitive Eastern Mediterranean region.

I appreciate your consideration of this matter and look forward to hearing from you.

With best regards,

Sincerely,

LEE H. HAMILTON,
*Chairman, Subcommittee on Europe and the Middle East.*

DEPARTMENT OF STATE,
*Washington, D.C., September 2, 1981.*

DEAR MR. CHAIRMAN: The Secretary has asked that I respond to your letter of August 12 expressing concern over our intention to reprogram $1.5 million from funds earmarked for Cyprus to help fund the creation of the Sinai Multinational Force and Observers (MFO).

When we proposed the second reprogramming from Cyprus in July we did so only because there appeared to be no alternative. We were confronted with the need to provide funding during fiscal year 1981 to assure the timely establishment of the MFO, and Economic Support Funds (ESF) were the only feasible source under the Foreign Assistance Act. The amount of unobligated funds available this late in the fiscal year is extremely limited.

In reviewing the potentially available funds it appeared there was some question whether arrangements with the Government of Cyprus for the planned scholarship program could be completed in time to obli-

gate the remaining $1.5 million by the end of the fiscal year. The bulk of the funds for Cyprus, which were designated for the housing program, had already been obligated. It was decided that this $1.5 million, along with other unobligated funds designated for other programs, should be transferred to the Peacekeeping Operations account and made available for the MFO.

Since that decision the Foreign Operations Subcommittee of the House Appropriations Committee has requested that no funds be made available for the MFO until hearings are held in September. Taking into account your strong interest in this matter, we have taken advantage of the time now available to review once again the status of ESF programs worldwide to see if there are changed circumstances in other countries which could obviate the need to transfer Cyprus funds. It now appears that we will be able to fund the MFO without reprogramming from Cyprus. The relevant committees will be advised of the final reprogramming actions through normal channels.

As you note, there is a need for some flexibility in meeting unforeseen circumstances. Moreover, I fully concur that all unmarked funds need to be considered before tapping Cyprus a second time. This was, and is, being done. More generally this issue well illustrates the problems created by reprogramming. There is seldom a way that emergency needs such as the MFO can be met without incurring problems in other country programs. This is one reason we have requested a special requirements fund under the Economic Support Funds account to provide for such situations. We hope we can count on your support for this proposal.

Yours sincerely,

RICHARD FAIRBANKS,
*Assistant Secretary for Congressional Relations.*●

## LUCILLE BANKS ROBINSON MILLER

## HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. FAUNTROY. Mr. Speaker, I rise in this Chamber today to call to the attention of my colleagues the outstanding achievements and contribution to the Nation's Capital rendered by my constituent, Lucille Banks Robinson Miller.

The achievemets of Madam Miller, as she is affectionately known, are worthy of recognition by this body and, indeed, the people of this Nation, as they have been premised on the commandment of our Lord to love thy neighbor as thyself—this Madam Miller has done all her life.

She began her career in the field of gospel music 29 years ago, and became the second female disc jockey in the District of Columbia. Her love of life and neighbor is exhibited through her song—exhibited to such a degree that she has moved hundreds of people to join with her in an effort to assist those in need in our city. The result has been the formation of the Love Club which is administered through WYCB radio where Madam Miller is director of public relations. The only requirement for membership in the club is that you wish to devote time in helping your neighbor. The Love Club under the direction of Lucille Banks Robinson Miller has provided food for the hungry, encouragement for our youth, and an uplifting of spirit for those in the throes of depression and hopelessness.

On Saturday, September 19, Madam Miller will be officially honored by the District's Shaw Community Food Project Committee at a prayer breakfast to be held at the District of Columbia Stadium-Armory Complex. As she has so many times in the past—the count is now over 200 such occasions, including receiving the key to our city—she will receive recognition for her efforts on behalf of our community.

Let me conclude by saying how proud I am to be able to share Madam Miller's work of love with this body; and let me also express my own deep gratitude, and that of all residents of the District of Columbia, for her selfless devotion of time and talent on behalf of the betterment of the lives of those in need in our community.

So that you and the people of this great country may know fully of Mrs. Miller's untiring ministry of love, I am furnishing for inclusion in the RECORD a newspaper article from the "District Weekly" section of today's Washington Post for review.

The article follows:

POPULAR GOSPEL BROADCASTER IS STILL SPREADING HER LOVE

(By Leah Y. Latimer)

For Madame Lucille Banks Robinson Miller, inspiration comes in the middle of the night. "God gives me all of my thoughts at night," declared Miller, the popular hostess on Washington's "inspirational" AM music station WYCB.

And so it happened that the 70-year-old Miller decided to battle drugs and crime around 7th and T Streets NW, having driven past the drug-riddled corner earlier in the day. Miller and 175 listeners marched through the Northwest drug corridor in July, singing and praying for the sinners' salvation. That was several weeks before District police began their latest crackdown on drug trafficking.

Another night, after she heard that a local girls' home needed graduation outfits for five of its students, Miller recalled, "something told me to bring those girls down to the station."

The next day she told listeners: "I'm not begging cause I've got God to help me. But I know there are enough Love Club members to get five dresses, five pairs of stockings and five pairs of shoes." Enough donations were made to buy each girl three outfits.

And it was Saturday night 18 months ago, Miller said, when she awakened with her most fruitful idea.

"I'm organizing the Love Club" she announced that Sunday on her morning program. "There are no dues and no rules. The only requirement is that you love God and your brother."

"The lines lit up," said Miller. She estimates that 10,000 radio listeners have sent in application forms to join the radio club whose goal is helping the needy.

"You can't imagine the hundreds of calls I get from persons who are depressed, or lonely or hungry," said Miller. "They have confidence in me because they know I'm for real."

Miller was born and raised in Washington and, in her life time, she has touched the lives of politicians, ministers, musicians, school administrators, community leaders and youth.

Many know her from her 28 years on Washington airwaves. She was the second female religious broadcaster in Washington when she began her career on WUST. She later became a hostess on WOL before going to WYCB in 1978. She is now on the air Saturday and Sunday inspiring her listeners with traditional gospel music. Her trademark is a soft, slow drawl and perfect pronunciation.

A tall, stately woman who often drapes herself in chiffon and oversized hats, Miller is one of the most visible people among the Washington church-going and religious music-loving community. She taught music and performed with local gospel groups in Washington churches for 40 years. She gained a reputation as Washington's mistress of ceremony, a weekend hostess for church programs, community fundraisers, religious concerts and political prayer breakfasts.

She gave the invocation at Effi Barry's spring luncheon for Nancy Reagan and Barbara Rush. She broadcast the dedication services for Bible Way's $3 million complex earlier this month. On Oct. 3 she'll host a day-long concert fundraiser for the United Planning Organization at Howard University's Cramton Auditorium.

This Saturday, an expected 200 people will pay $15 a ticket to honor the woman affectionately called Madame Miller at the Shaw Community Center's fundraising prayer breakfast at the RFK Stadium clubhouse.

Because of her many fundraising efforts and appearances, Miller has worked closely, at one time or another, with almost every black minister in the city.

"Mrs. Miller has the ability to pull people together and inspire a sense of unity in them," said City Councilman Jerry Moore, pastor of the 19th Street Baptist Church (NW).

Two years ago, Miller was named WYCB's community relations director and in February, the station sponsored a birthday gala for her at the 19th Street Baptist Church. Guests included Moore and Del. Walter Fauntroy. According to Andrew Rowe, who directs the D.C. Choral Ensemble, "It was an extravaganza. Everybody who was anybody was there."

Miller's small Northwest apartment bears the proof of appreciation. Plaques, awards, certificates and photos of Miller with everyone from Mayor Marion Barry to Nancy Reagan adorn the walls' book cases, and furniture. Barry gave her the key to the city in August.

Miller grew up in Northwest Washington and says she married young against her mother's wishes. Her first marriage ended shortly after it began and she worked as a domestic to support herself before the birth of a son. She remarried four times over the years and has two other sons.

During the Depression, she put herself through Howard University's school of music.

"I went to school morning and night, walked in the rain and cold . . . until I finished school. That's why I don't have any sympathy for the young people today."

However, the piano and voice lessons she gave Washington youth taught more than the scales. "Ask any of my students what they learned," she said without modesty.

Rowe, a recording artist and a popular gospel performer, was 5 years old when Miller gave him his first piano lesson. "She also taught morals, discipline, charm and etiquette," Rowe said.

"If someone would come into her class and just sit down, she would make them go back out. They would have to come back in and say, 'Good afternoon, Mrs. Miller and class,'" recalled Shirley Ables of the Joy Gospel Singers, whose three children were taught by Miller. "They couldn't just slump down either. They had to sit with shoulders back."

Miller retired from teaching last year as her public appearances and WYCB responsibilities made life too hectic, she said. But former students and their parents lament the decision.

"If Mrs. Miller would go back to teaching today and she charged $100," said Ables, who works at a Southeast preschool, "I would borrow that and put my daughter back in."●

## TMI: A PLAN THAT DOESN'T WORK

### HON. ALLEN E. ERTEL

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. ERTEL. Mr. Speaker, last week, in Kansas City, the Edison Electric Institute (EEI) announced that it is recommending to its members, investor-owned electric utility companies, that they collectively contribute $192 million, over the next 6 years, to the cleanup at Three Mile Island unit 2. I am pleased that EEI has finally recognized that a resolution of the TMI-2 cleanup funding problem is in the best interests of its members.

As I have pointed out on numerous occasions, the costs to the entire utility industry from failing to make a commitment to assist in the TMI-2 cleanup are far greater than the actual cost of the cleanup. Utilities will save more money by helping to pay for the cleanup than by continuing to ignore it and take the battering of the financial and investment community.

These costs from inaction come in the form of increased "risk premiums" investors attach to the interest rates on the utilities' necessary borrowings. Much of this risk premium has been attributed to TMI; to the prospect that Metropolitan Edison may go bankrupt, to the continuing lack of a TMI-2 cleanup funding solution, and to the seriously underinsured nature of the nuclear utility industry as pointed out by the accident.

These costs are no secret to utility executives. Economic analyses showing the costs of TMI have been prepared. Representatives of Wall Street investment houses have testified before the Congress. The economic self-interest of the utility industry has led chief executive officers to offer financial assistance to the TMI-2 cleanup. However, this fact does not in any way diminish the importance of the utility industry's acknowledgement of this economic self-interest. After 2½ years of waiting, I will be the first to welcome their participation. I will also be among the first to state that their interests demand that they contribute more.

The effectiveness of the utility industry contributions is intimately linked to the TMI-2 cleanup cost-sharing formula espoused by EEI in Kansas City. If this overall cost-sharing formula fails to work; that is, other parts of it are not implemented, the industry will continue to experience negative economic effects from TMI. As such, EEI's recommendation to its members, and it is only a recommendation, must be viewed within the broader context of the plan EEI endorsed.

This plan also calls for participation in the cleanup by the Federal Government, the States of Pennsylvania and New Jersey, and the ratepayers of the General Public Utility Corp. system (GPU), the owners of Three Mile Island. Just like the tires on your car, if you're missing one of them, the whole thing does not go forward. What are the prospects that the parts of the package will come through?

FEDERAL GOVERNMENT CONTRIBUTION

The plan calls for $190 million from the Federal Government over the next 6 years to help pay for the cleanup at TMI-2. This money has been called various things, but it is most often referred to as research and development money from the Department of Energy. I agree that there are R. & D. opportunities present at TMI-2. So does DOE and OMB. They have put a price tag on it: $75 million over 3 years. The administration's fiscal year 1982 request for $37.5 million is part of that 3-year plan.

While it is obvious that there might be requests in the future for greater amounts for TMI R. & D., it is not clear to me that the administration, at a time when it is trying to make additional budget cuts of billions of dollars, will be anxious to increase its R. & D. effort at TMI over 150 percent.

The likelihood of a Federal contribution of $190 million is made even more dubious when it is realized that every dollar spent on TMI research and development only reduces the cost of the cleanup by about 33 cents. Much of what has been identified as R. & D. has nothing to do with the cleanup. This R. & D. program includes conducting waste vitrification experiments, examining the damaged reactor core at laboratories across the country, and generally collecting data. The R. & D. program, by and large, is not directly involved in the TMI-2 cleanup.

If this 3-to-1 ratio were to hold up for any expanded R. & D. program the Federal Government would have to spend $570 million over 6 years to make its $190 million cleanup contribution under the EEI-backed clean-cost-sharing plan. I find it very difficult to believe that this administration and this Congress would feel that this level of expenditure could be justified. Using the analogy of a car's tires as the four parts of this TMI-2 cleanup funding proposal, I would have to say that this tire has a bad leak.

GPU RATEPAYERS

Another tire on the program calls for the ratepayers of the General Public Utility system to pay $245 million toward the cleanup over 6 years. It is obvious to me that for any cost-sharing plan to work, it must include the GPU ratepayers. Even though they are the only innocent victims of the accident at TMI, the hard reality is that if they don't pay part of the cleanup bill, they will be forced to pay it all one way or another. I am afraid, however, that in its present form, the $245 million ratepayer tire of the plan has some broken glass in its path.

Since the accident at TMI in March 1979, the undamaged unit 1 has not been allowed to restart pending a new licensing hearing process. That process is now nearly complete and unit 1 is expected to be back in operation early next year. The cost of purchasing power to replace that which would otherwise have been produced at unit 1 has been much more expensive than unit 1 generated electricity. Consequently, the restart of unit 1 will bring with it less costly power. The cost-sharing plan supported by EEI would take the energy savings from a unit 1 restart and divert it to the unit 2 cleanup. Unfortunately, it's not quite that simple.

First, the Pennsylvania Public Utility Commission (PaPUC) has made clear its intent to reduce rates to GPU customers when unit 1 comes back on line to reflect the lower cost of power to the ratepayer. Obviously the PaPUC could reassess its past position that the ratepayers will not pay for the cost of the cleanup, as I believe it inevitably will, but it would be a mistake to ignore the potential barrier to this part of the cost-sharing formula.

Second, and more damaging, the General Accounting Office has concluded,

The restart of TMI-1 in early 1982 will produce some relief to GPU but is likely to

have little effect on the availability of cleanup funds.

GAO points out a number of competing requirements for the funds generated by a TMI-1 restart—assuming the rates are not reduced—which are necessary for GPU to avoid bankruptcy. This GAO conclusion flies right in the face of the EEI-backed plan. While I believe the ratepayers must ultimately be part of the TMI-2 cleanup funding plan, backers of this particular proposal's method of obtaining ratepayer participation will soon be desperately looking for a tire patching kit.

PENNSYLVANIA AND NEW JERSEY CONTRIBUTION

As the Pennsylvania delegation ad hoc TMI task force earlier pointed out, the States of Pennsylvania and New Jersey have been profiting from the accident at Three Mile Island. This profit has come from a windfall in the gross receipts taxes the States collect in each ratepayer's monthly electric bill. Essentially, the States collect the gross receipts tax as a percentage of the monthly electric bill. Since replacement power is more expensive than that previously generated at TMI, ratepayers' monthly bills have gone up appreciably. Consequently, the fixed percentage of the electric bill levied through the gross receipts tax nets the States more money than they would have received had the accident not occurred.

Legislation has been introduced in Pennsylvania in past sessions to remit these windfall profits to the company or its ratepayers, but has never passed the State Legislature. The EEI plan calls on the State of Pennsylvania to make a $5 million annual contribution, for 6 years, for the cleanup of TMI-2. In addition, New Jersey is to provide a $2.5 million contribution to the cleanup.

It is appropriate that these States at least divert to the cleanup the windfall they have received through the gross receipts tax. The Governor of Pennsylvania has committed to provide help in this. While this commitment still requires positive legislative action by both States' legislatures, this tire of the EEI-backed program may survive.

UTILITY INDUSTRY CONTRIBUTION

Having looked at the other three tires of this cost-sharing package, we need to bring our attention back to the first: EEI's recommendation that its members contribute $192 million over 6 years to the cleanup. As I earlier pointed out, the electric utility industry has every reason to want to assist in the TMI-2 cleanup. But, can the industry provide this money in the manner recommended by its trade association? On closer examination, in its present form, even this tire of the plan is missing some of its tread.

Apparently, the EEI-recommended contribution is totally voluntary. While a formula for allocating the industry's contribution was part of EEI's suggestion, it is up to each individual utility to decide if it wants to send a check to GPU or to some intermediary. Utilities get their money from their ratepayers with the approval of their State regulators. As such, if a utility wants its contribution to come from its customers, it will have to file a rate increase request with its State regulatory body. It is not inconceivable to me that the regulators in some States will not allow the utility's TMI-2 contribution in its rates to its customers. Consequently, the utility will have to decide whether it wants to make its contribution from its earnings before dividends. This would have the effect of diverting money from the stockholders of these utilities to GPU.

At a time when utilities are attempting to raise additional revenue for their own needs by selling millions of new shares of common stock, they may perceive that making a contribution to GPU with dividend money might be counterproductive to their effort to gain more stockholders. On the other hand, if they do divert dividend money in this manner, they will do so with the full understanding that they may be inviting legislation from their stockholders for giving away assets of the utility. Given the totally voluntary nature of the TMI-2 cleanup contributions from utilities, it is possible that some utilities will decide not to follow EEI's suggestion. If this happens, the stockholders of contributing utilities will have even stronger legal and equity arguments as to the disposition of their utilities' assets.

A number of utilities will no doubt do as EEI has recommended. But, under these circumstances, we should also not be surprised if some utilities do not. The greater the number of utilities which opt out of a contribution to TMI-2, the less the industry as a whole will provide for the cleanup. This tire of the overall cost-sharing formula is, therefore, missing some tread at the outset. How long it will run without a problem cannot now be predicted.

If we try to use a spare tire on this wheel by requiring, by legislation, utility contributions without a visible benefit, like insurance for cleanup costs in case of a future accident, we might encounter constitutional problems of a taking of property without due process. CRS has prepared an analysis which questions the constitutionality of this approach. If any such questions arise, this may slow the vehicle down without necessarily puncturing the tire. Meanwhile, the problem at TMI goes unresolved.

SUMMARY

In the final analysis, the condition of any one of the "tires" of the plan is contingent upon each of the others. If one goes flat, the vehicle will not go forward. In looking at the TMI-2 cost-sharing plan endorsed by EEI last week, I am afraid I see one tire already leaking air, one about to go over some glass, and one with very little tread. Consequently, I must conclude that, important as the EEI recommendation is, I would not bet on its getting to its destination as long as it is mounted to the overall plan endorsed by EEI in Kansas City. With this plan, you can not get there from here.●

## U.S. CANE SUGAR REFINERS ASSOCIATION

### HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. PEYSER. Mr. Speaker, before the recess, my colleagues Congresswomen LINDY BOGGS and VIRGINIA SMITH circulated to the Members an analysis by Dr. J. B. Penn of Economic Perspectives, Inc., of the proposed sugar program which was apparently done for the sugar producer industry. I note with great interest a review of the Penn analysis by Schnittker Associates, Washington-based economic consultants, which finds five major defects in this analysis. These defects are:

First, it understates the importance and viability of the world market.

Second, it demonstrates a lack of understanding of how a U.S. program would affect the world market.

Third, it seriously underestimates the exposure of the U.S. Government to budget outlays under S. 884.

Fourth, the assessment of the impact on consumers is simply wrong.

Fifth, the analysis in this report is inconsistent with EPI's August 1981 analysis of the European Community's sugar program.

I would like to call the Schnittker review to the attention of my colleagues. The review follows:

MEMORANDUM FOR U.S. CANE SUGAR REFINERS ASSOCIATION

REVIEW OF EPI SUGAR PROGRAM ANALYSIS

You asked that we review a report published in June by Economic Perspectives, Inc. The report was titled "An Analysis of the Sugar Program Proposal in Senate Bill S. 884." Much of the report is descriptive or historical material on the U.S. sweetener market, the International Sugar Agreement, the USDA Draft Impact Analysis, and S. 884. When the authors proceed beyond description, however, they stumble and fall. We think their analysis has 5 major defects:

1. It understates the importance and viability of the world market.

2. It demonstrates a lack of understanding of how a U.S. program would affect the world market.

3. It seriously underestimates the exposure of the U.S. government to budget outlays under S. 884.

4. The assessment of the impact on consumers is simply wrong.

5. The analysis in this report is inconsistent with EPI's August 1981 analysis of the European Community's Sugar program.

THE WORLD MARKET

EPI's analysis relies in part on resurrection of that tired old hobgoblin—the volatile, unfree, thinly-traded, unstable, world sugar market. In fact, the similarities among the world markets for sugar and other agricultural commodities are more striking than the differences. For example, 1980–81 crop year statistics from F. O. Licht and USDA indicate that total world exports of sugar as a percent of world production are greater than those of wheat or coarse grains (corn, barley, etc.):

*World trade as a percent of world production*

| | |
|---|---|
| Wheat | 22 |
| Coarse grain | 16 |
| Soybeans | 31 |
| Cotton | 35 |
| Sugar | 32 |

World sugar exports in 1980–81 were 28 mmt (million metric tons). Of that amount, trade within the European Community represented 1 mmt, Cuban exports to Comecon countries were 4.5 mmt, and trade under various other special arrangements may have been as much as 4.5 mmt. That left a free market of 18 mmt, more than 20 percent of world production and 65 percent of world trade.

One should not forget that much of world trade in wheat and coarse grains also occurs under special arrangements. World exports of those commodities in 1980–81 were about 215 mmt. The USSR, China, and Mexico alone have trade agreements with exporting countries covering 40 mmt per year or nearly 20 percent of world trade.

Finally, the true definition of "world market" should include any sugar, wheat, etc., that is priced in relation to the world price. This leads to our second point.

EFFECT ON U.S. PROGRAM ON WORLD MARKET

After incorrectly arguing that the world market is chronically unstable because of its small size and residual nature, the EPI analysts proceed to argue that a U.S. program that would further reduce the size of world market would actually "be consistent with efforts to stabilize world prices" (p. 12). Not only is this incorrect, it also flies in the face of established U.S. trade policy for sugar and other commodities.

U.S. posture in most commodity trade negotiations has been to favor widening of international markets. In fact, the principal (i.e., first) objective of the International Sugar Agreement is "to raise the level of international trade in sugar", a point conveniently ignored in EPI's discussion of the ISA.

U.S. policy makers, from the State Department and USDA to the CFTC, have consistently recognized that a large freely traded market with many participants is more likely to be "stable" than a market distorted by preferential trading arrangements, domestic subsidies to consumption and production, and export subsidies. When a sugar producing country holds down domestic prices during a period of high world prices, that subsidy to consumption is destabilizing; supplies have been diverted from the world market and world sugar prices have been increased. Similarly, when a sugar importing country such as the U.S. maintains domestic prices above the world market in order to stimulate home production, imports fall and the size of the world market is reduced. These are destabilizing actions that depress world prices.

EPI's curious conclusion that the domestic program proposed in S. 884 will help stabilize world prices seems to arise from their creative definition of "stability." Early on they make the point that the effects of "price swings in the world market . . . (are) a relatively new development" for U.S. producers. This is true as far as it goes. Since the 1930's U.S. sugar producers have rarely been forced to adjust to declining world prices, but they have always benefited from prices above domestic support levels. The Senate Committee's bill is little different from its predecessors in this regard: producers will be protected from low prices and will reap substantial gains if world prices rise above the domestic support price. In short, "stability" means a floor but no ceiling.

FORFEITURES AND THE BUDGET

Misconceptions about how the world market operates are of little moment, however, when stacked up against EPI's optimistic discussion of the likely budgetary impact of the Senate Committee's bill. The view that the Administration could "use import fees to avoid any incentive to forfeit sugar under loan" (p. 12) leads to the cheery conclusion that "no significant amount of forfeitures would be expected during any year of the FY 1982–FY 1986 period" (p. 12).

EPI analysts arrived at this conclusion by relying on USDA supply, demand and price forecasts that were farfetched when they were published. USDA assumed that world production and consumption in 1981–82 would be in rough balance, and that the season average price in the world market would be over 26 cents per pound. EPI should have sensed that something was amiss since the ISO price had already fallen below 16 cents before their report was published.

This altogether too rosy view of world prices led EPI to the conclusion that loan forfeitures could be limited and budget exposure minimized. There is, however, no guarantee that the Administration will be able to keep the market price high enough to prevent both large forfeitures and large budget outlays. As shown below, the U.S. market price for raw sugar would have to be at least 23.56 cents per pound to prevent loan forfeiture under a program that mandates a 19.6 cent loan rate. Even loan rates of 18.0 cents or 16.5 cents could result in government ownership of sugar, unless crop failures reduce world production. Requiring that processors pay interest on forfeiture would, however, significantly improve the government's chances of avoiding budget outlays at loan levels of 16.5 or 18 cents.

MARKET PRICE FOR RAW SUGAR REQUIRED AT ALTERNATIVE LOAN RATES

[Cents per pound]

| | | | |
|---|---|---|---|
| National average loan rate | 16.50 | 18.00 | 19.60 |
| National average freight cost | 1.00 | 1.00 | 1.00 |
| Interest at 16.5 percent for 11 months | 2.50 | 2.72 | 2.96 |
| Required domestic spot price | 20.00 | 21.72 | 23.56 |

Any of these price objectives could be difficult to achieve continuously. The world spot price for raw sugar is now near 12 cents per pound. If values get as low as 10 cents per pound in the next year or two, the Administration would be unable to attain even a 20 cent price objective because Section 22 import fees cannot exceed 50 percent ad valorem. The calculation is as follows:

[Cents per pound]

| | |
|---|---|
| World price | 10.00 |
| Section 22 import fee | 5.00 |
| Maximum duty | 2.81 |
| Transportation, insurance, and handling (USDA estimate) | 1.77 |
| Total | 19.58 |

This would provide no margin of safety to ensure redemption of the loan.

Even with a higher world price, there could easily be periods when domestic prices were below the objective if the future import fee adjustment mechanism is modeled on that in the proclamation currently in effect. That mechanism allows U.S. prices to get as much as one cent above or below the objective before making a "within quarter adjustment." This approach was chosen because for practical purposes any attempt at greater fine-tuning of the domestic price would disrupt the market.

In light of these facts, it is quite possible that if world market prices were to decline another two cents from current levels in the next two years, and if interest rates remain high, a 16.5 cent loan program of the type we had in the past would probably result in forfeitures of sugar to the government. Quantities are difficult to predict, but it would be reasonable to expect them to be on the same order of magnitude as in the past—200,000–500,000 tons. The first year budget outlay, should 500,000 tons be forfeited, would be $165 million—hardly the insignificant amount forecast by EPI.

CONSUMER COSTS

What does the Senate Committee's bill mean for consumers? EPI points once again to price stability, arguing in essence that prices above world market levels will keep the CPI steady but ignoring completely the salutary impact on the CPI of lower sugar prices (p. 8). This leads them to one last bizarre conclusion: higher domestic sugar prices will "have a beneficial impact on consumer food and sweetener expenditures" (p. 12). Do those words mean beneficial for consumers, as implied, or for products?

HAVING IT BOTH WAYS

Finally, in a subsequent report on European Community sugar policy,[1] EPI takes a different analytical tack. More precisely, EPI tacks in both directions at the same time:

High internal sugar prices are bad in the EC but good in the U.S.;

High internal sugar prices are bad for EC consumers, but good for U.S. consumers;

EC support policies destabilize the world market while a U.S. program would stabilize it; and

EC export subsidies are bad but U.S. export subsidies are good.

One cannot have it both ways. The sugar price support program in S. 884 is qualitatively the same as the EC sugar price support program, except that the latter actually holds down internal sugar prices when the world market rises above the EC support level and the U.S. program would not.●

[1] Impact of European Economic Community Sugar Subsidies on U.S. and World Sugar Markets, August 19, 1981.

## THE MALIGNED MORAL MAJORITY

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. McDONALD. Mr. Speaker, Newsweek magazine recently permitted Reverend Falwell to respond to the allegations of the critics of both himself and the Moral Majority, Inc., in its "My Turn," page 17 of the September 21, 1981, issue. In this column, Reverend Falwell strips away all the verbiage and smokescreen that have surrounded the statements of the church and political liberals who are outraged that church fundamentalists and conservatives are now organized and speaking out on the issues. In other words, there is a lot of sour grapes going around. I commend this item to the attention of my colleagues who are really interested in learning the truth about Reverend Falwell and the Moral Majority.

"MY TURN"—JERRY FALWELL

"An unconditional right to say what one pleases about public affairs is what I consider to be the minimum guarantee of the First Amendment." The author of that remark was not a "right-wing, fundamentalist" preacher, but the late Supreme Court Justice Hugo Black.

When liberals first began attacking the Moral Majority, they said we had no right to speak out. When it was pointed out that the liberal agenda was well represented in the 1960s and '70s in the government, in the streets and in liberal churches, the liberals conceded that while we had the right to speak, it was wrong for us to try to "impose" our moral viewpoint on everyone else.

Of course, there was nothing wrong, so far as liberals were concerned, with "imposing" their own views, whether those views had to do with civil rights, the Vietnam War, busing, the eradication of voluntary school prayer or the extermination of unborn babies through abortion. Liberals could impose their views because liberals were right! And they call us arrogant!

Freedom: The Moral Majority was founded in June 1979 to address four basic issues. First, we are pro-life. We believe all human life is valuable and deserving of legal protection, whether it be born or unborn, black or white, rich or poor, handicapped or normal, old or young. Second, we are pro-traditional-family. While homosexuals should be free to live together if they wish, we oppose any law that would grant to homosexual couples the status of "family" or qualify them as a legitimate minority. They are not a legitimate minority because theirs is a chosen life-style. Third, we are pro-morality, meaning that we oppose the illegal-drug traffic and the spread of pornography. Fourth, we are pro-American, and that means we stand for a strong national defense, believing that freedom is the ultimate moral issue. We also support the nation of Israel and Jewish people everywhere. Those who spread the myth that we are anti-Semitic don't know what they are talking about.

To suggest that I am a modern-day Pavlov who, upon ringing my bell, causes millions of Americans to salivate to whatever political tune I am playing is as illogical as it is ludicrous.

The Moral Majority has touched a sensitive nerve in the American people. Many Americans are sick and tired of the way their government has been run. They are tired of being told that their values and beliefs don't matter and that only those values held by government bureaucrats and liberal preachers are worthy of adoption in the area of public policy. Our people are the previously inactive, turned-off voters who believed that who wins an election doesn't matter. The 1980 election showed that people can make a difference.

It is not the religious conservatives in this country who have politicized the Gospel. It is the liberal in the church and in the government who has turned the basic moral values that were the foundation of this country into political issues. Until recently, most people agreed that abortion is murder, that homosexual practice is perversion and that pornography is the exploitation of women and men. Now the liberals tell us these are political issues, not moral ones, and when we oppose their attempts to legislate and adjudicate what they believe, we are called "ayatollahs" who want to line people up against the wall and shoot them. Our goal is to line people up, all right, but at the polls! This is still a nation of majority rule. Although we do and should protect minority rights, we should not do so in a way that renders the majority impotent.

The Moral Majority is not a Christian or a religious organization (however, as a fundamentalist, I personally object to categorizing fundamentalists as bellicose and anti-intellectual). We are made up of fundamentalists, evangelicals, Roman Catholics, conservative Jews, Mormons and even persons of no religious belief who share our concerns about the issues we address.

We believe that people can disagree with us and not be relegated to an "immoral minority." We believe a person can be just as good a Catholic, a fundamentalist, a Jew, a Mormon or whatever, and disagree with us on any or all our issues.

We do not endorse political candidates, nor do we have a "hit list." We do not judge the quality of a person's relationship to God based on his or her voting record.

The Founding Fathers, contrary to what our liberal friends believe, wanted to preserve and encourage the church, not to restrict it or its influence. For them, the separation of church and state was a check on the *government*, not the church. The First Amendment prohibits the government from establishing a church (as had been done in England). It does not prohibit the churches from doing anything, except collecting taxes. Any person who suggests that separation of church and state requires more than this—that it requires churches to remain silent on "political issues" or preachers to be neutral on candidates or religious organizations to pursue only "spiritual goals"—is simply grinding his own ax rather than reading the law.

Rights. Let's remember that all law is the imposition of someone's morality to the exclusion of someone else's morality. We have laws against murder, rape, incest, cannibalism and stealing. No doubt, there are murderers, rapists, practitioners of incest, cannibals and thieves who are upset that their "rights" have been denied. But in order to provide for the common defense and promote the general welfare, it was deemed necessary to pass such laws.

New York Democratic Sen. Daniel Patrick Moynihan has said, "We are a blessed people, but we are not invincibly elect and we must shape our future as we have our past." I can think of no better way to state the outlook and purpose of the Moral Majority.

There is something worse than war, and worse even than speaking out. It is silence! The grossest immorality has been perpetuated not by those who carried it out, but by those who remained silent and did nothing. We may not always be right, but we will never stand accused of doing nothing.●

## CHANGE IN COMMAND BY THE BRITISH IN NORTHERN IRELAND

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. BIAGGI. Mr. Speaker, as chairman of the 122-member bipartisan Ad Hoc Congressional Committee on Irish Affairs, I wish to advise my colleagues of a most significant development which occurred yesterday.

Prime Minister Margaret Thatcher, in the course of a major reshuffling of her Cabinet, announced that James Prior, formerly a key official in the Employment Ministry, would assume the all-important position of Secretary of State for Northern Ireland. Mr. Prior replaces Humphrey Atkins who held the position for more than 2 years.

While some press accounts indicate that Mr. Prior took the assignment with some reluctance—other analysts believe that a main reason why he chose to take it was based on assurances that he would be able to exert some degree of independence in his work as the highest British official in the north.

I hope the British Government will use this occasion to begin some long-needed modifications and reforms to their archaic policies in Northern Ireland. Central to these modifications should be a full reevaluation of their policy of direct rule in Northern Ireland. I have advocated as part of an overall political solution in Northern Ireland that the British Government declare its intention to withdraw their entire presence from Northern Ireland, including their 12,000 troops—in a phased and orderly manner. In addition, I still hope that the British Government may bring more flexibility to their policy in dealing with the hunger strike crisis.

I extend my very best wishes to Mr. Prior as he assumes this difficult and challenging position. I stand prepared to work with the new Secretary of State in pursuit of the goals of peace, justice, and freedom for Northern Ireland.●

## EXTENSION OF THE VOTING RIGHTS ACT

### HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. HAWKINS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

This weekend I will attend a seminar in Los Angeles, sponsored by Black Women's Forum, Inc., whereby the discussion will focus on the importance of the extension of the 1965 Voting Rights Act. If we are to unite in one enduring cause this year, certainly the extension of the Voting Rights Act must be one of them.

This act does something special; it affirms the right of minorities to register and vote at the election polls and prevents the evidence of racial discrimination in the process.

Many blacks in this country died to uphold this special right to vote, and thus we must continue to safeguard this constitutional privilege for minorities—which is the cornerstone of all free democracies.

A great man passed away this month by the name of Roy Wilkins. Through his tireless efforts he helped pave the way for greater opportunities for blacks. He pushed for legislative remedies offering blacks an opportunity to break out of the pervasive circle of discrimination so evidenced in this time. I can think of no better tribute to this man, and other great leaders in the civil rights forum, than by supporting congressional approval of the Voting Rights Act.●

## "CELEBRITY ROAST" TO HONOR REV. JOSEPH MALIK

### HON. LYLE WILLIAMS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, September 17, 1981*

● Mr. WILLIAMS of Ohio. Mr. Speaker, on Sunday, September 20, 1981, a group of my constituents are saluting a man who has served his community and his church well for a number of years. It will be my pleasure to attend a "celebrity roast" for the Reverend Joseph Malik of Warren, Ohio, and to celebrate with his friends his full and useful life.

REV. JOSEPH MALIK, OF WARREN, OHIO, HONORED

Rev. Joseph A. Malik was born November 17, 1926, in Youngstown, Ohio. He attended St. Casimir Grade School, Ursuline High School, Youngstown; John Carroll University, Cleveland, Ohio; St. Mary's College, St. Mary, Kentucky; and St. Mary's Seminary, Cleveland, Ohio. He was ordained by the late Bishop Emmett Walsh on May 30, 1952. Father Malik had four brothers, two of whom are living, and two sisters, one of whom is living.

Father Malik came to St. Mary's Parish in Warren as pastor in 1970 and in 1974 was named dean of Trumbull County Catholic Clergy. Prior to coming to Warren, Father Malik served as assistant at St. Joseph, Ashtabula, Ohio from 1952-1967, as Pastor of St. Andrew, Kingsville, Ohio, from 1967-1970.

Father Malik has served in numerous capacities throughout the Youngstown Diocese: Chaplain of the Trumbull N.C.C.W., L.C.B.A., Catholic Daughters; Honorary Chairman Catholic Social Services of Trumbull County; Catholic Clergy Chairman of the United Fund; Board of Managers, Y.M.C.A.; Children Services Board; Children Rehabilitation Board; Trumbull Hospital Corporation Board, Rotary International, and moderator for the Trumbull County Naim Club. Father Malik has also served on the Diocesan Priest Senate, Liturgy Commission, Diocesan School Board, and the Trumbull County Task Force on Crime.

Sir Knight, Father Malik joined the Knights of Columbus in January 1953, and is a member of Warren Council No. 620. He was exemplified into the Fourth Degree on April 28, 1957, in Youngstown, Ohio, under the direction of the Late Former Master John E. Johnston. He is a member of Bishop McFadden Assembly. Sir Knight, Father Malik, has served as Faithful Friar of the Eastern District of Ohio, Fourth Degree, since September, 1975, and as Chaplain of Warren Council No. 620 since January 1972.●

# HOUSE OF REPRESENTATIVES—*Friday, September 18, 1981*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. WRIGHT).

## DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
*September 16, 1981.*

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Friday, September 18, 1981.

THOMAS P. O'NEILL, Jr.,
*Speaker of the House of Respresentatives.*

## PRAYER

The SPEAKER pro tempore. Our guest chaplain today is our former colleague, the very distingusished gentleman from Alabama, the Honorable John Buchanan, who will lead in prayer.

The Reverend John H. Buchanan, Jr., Christian Life Commission, Southern Baptist Convention, and former Representative, offered the following prayer:

We thank Thee, O Lord, for this House, and for the men and women who serve our country here. Grant to the Members of the Congress, we pray Thee, the wisdom to know the truth, and the courage to live by it. For it is in Thy holy name we ask it. Amen.

## THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 103. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

## THE SENATE PASSES ANTICONSUMER, AND ANTITAXPAYER SUGAR BILL

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, yesterday the Senate did less than cover itself with glory when it passed the anticonsumer and antitaxpayer sugar bill.

It is hard to believe that this is the same Senate that is now working on President Reagan's program to cut social security benefits for the elderly, because on the one hand they are handing out one of the biggest giveaways to a dozen or more major corporations who grow sugar, and on the other hand they are about to take away from the elderly a substantial amount of social security earnings. It just does not make good sense to me.

I hope the public will equally recognize that it does not make good sense and that this entire program of paying homage to special interests, such as sugar and oil, while going after children and the elderly is not in the best interests of this country.

## HIGH INTEREST RATES CRIPPLING MIDWEST

(Mr. FITHIAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FITHIAN. Mr. Speaker, just a brief report from Indiana.

High interest rates are crippling the housing industry, the auto industry, and the steel industry. They are pushing many farmers, small businessmen and their savings and loan institutions into the red.

A quotation from the mail from a small businessman from Chesterton:

Do something about the interest rates now. Six months from now is too late—another half of the real estate and housing industry will be gone by that time.

Now, Mr. Speaker, it is apparent that the tax bill that we passed in this House at President Reagan's urging put us in that position to where the business interests of this country and the financial interests in this country look at that deficit and realize that we are going to have the deficit and realize that the Government borrowing is going to continue to push interest rates up. It is that that we cannot afford; but neither can we afford to do what the President's people are now arguing that we should do and that is to go into the social programs for an additional round of cuts, rather than to go back and look at the tax program for what it was, a giveaway to special interest in the United States.

I said on the day that that tax cut was on the floor that we would live to regret that program.

## ROLLCALLS LESS EVIDENT IN 1981

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous material.)

Mr. DANIELSON. Mr. Speaker, as you know, I have been making an analysis of rollcall votes taken in the House of Representatives over the past several years so that we can keep in touch with trends and recognize ways in which we can prevent the inordinate waste of time on unnecessary votes that has been our lot in the past.

At this time I am not going to make a full report, but I want to inform our colleagues that we have spent much less time on rollcall votes in 1981 than in any year in recent history.

When we adjourned for the August district work period, on August 4, 1981, our 106th legislative day, there had been only 190 rollcalls. A comparison for similar periods, 106 legislative days, in previous years is as follows: 1978, through July 27, 612 rollcalls; 1979, through September 6, 447 rollcalls; 1980, through August 19, 459 rollcalls; and 1981, through August 4, 190 rollcalls.

It is interesting to note, as well, a substantial reduction in quorum calls, 10 of the 190 rollcalls were quorums, to 5.3 percent so far in 1981 as compared with 11.3 percent being quorums in 1980.

There has been an increase, however, in the number of votes on approving the Journal and on resolving into Committee. Figures on those two types of votes combined are as follows:

Rollcalls on approving the Journal and on resolving into Committee: 1978, 74 of 942—7.9 percent; 1979, 60 of 758—7.9 percent; 1980, 64 of 681—9.4 percent; and 1981, 27 of 190—14.2 percent

I recognize, of course, that votes on approving the Journal are often used in lieu of a quorum call at the opening of the day.

## CONGRESSMAN GONZALEZ INTRODUCES BILL PROVIDING FOR ABOLITION OF SO-CALLED OPEN MARKET COMMITTEE OF FEDERAL RESERVE BOARD

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, I have introduced today a resolution and a bill. The bill would provide for the abolition of the so-called Open Market Committee of the Federal Reserve Board, which is really not open, but I would call for its abolition. It is long overdue.

The resolution implements a resolution that I introduced in July, before the recess in August, which would provide for the proper committee to look into the impeachment of the Chairman of the Federal Reserve Board, Mr. Volcker.

This resolution implements that one by extending the impeachment process to the Open Market Committee of the Federal Reserve Board, as well as a companion bill that seeks to abolish that Board in the interim.

We have heard a litany of complaints both from Congress as well as from all over the States about high interest rates, their usurious and ruinous impact on business.

Businesses are, as one of my predecessor speakers stated going out like popcorn popping in a machine. This has been true all along, and this is why the Congress needs to focus attention on the conduct of the Federal Reserve and its so-called Open Market Committee

The usurpation by the Open Market Committee's five private member bankers of the power to determine the monetary policy of our country demands its abolition.

## THE PRESIDENT AND SOCIAL SECURITY

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, today I want to call special attention to the "Washington Week That Was" in terms of statements by the White House regarding the social security system.

On Tuesday the administration gave the impression and the appearance and certainly the words that they did not intend to offer any cuts in social security. The media reported the President's stated intention in the Wednesday morning headlines.

But on Thursday morning, the media reported that the President, indeed intended to stand by the recommendations he made in May to cut social security benefits by delaying the cost-of-living adjustment from June until September.

This proposal will decrease the benefits of all those people currently receiving social security who would receive it in the future.

I think that the President is speaking out of both sides of his mouth. He is misleading the American people by telling them he will not cut social security while at the same time proposing fundamental reductions. I am very concerned about this. I think that the President should have the courage of his convictions and be responsible for his proposals. I think this goes to the heart of our democratic form of government.

President Reagan is refusing to accept public responsibility for his actions and for his intentions. The President should not be able to have his cake and eat it, too, Mr. Speaker.

## THE LATE E. MICHAEL ROLL, MAYOR OF DISTRICT HEIGHTS, MD.

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, this has been a sad week for me. My dear friend E. Michael Roll succumbed after a long and trying illness on Friday, September 11. It is not often that we can stop and take the time to eulogize a private citizen on the floor of the House of Representatives, but on this occasion the magnitude of the man—his enormous contributions to the people around him; his caring nature; his thoroughness in all things—demands it.

E. Michael Roll was the longtime mayor of a small city in America. For almost a quarter of a century, Mike Roll led the city of District Heights, Md., and in that endeavor he became the guide and friend to thousands of men and women in his community.

In our great county of Prince Georges, municipalities provide a focal point for the life of the community, giving each citizen who lives there a sense of identity and place. The grassroots support so necessary in maintaining effective government at all levels begins in places with strong community identity. And the person most responsible for developing this sense in District Heights was Mayor Mike Roll.

He represented the epitome of what a local official can do for his people and, in turn, for all public officials through developing this strong citizen interest and support. Through his leadership and tireless efforts, he planned, developed, and saw to completion the city's municipal center, which truly became the heart of the community in District Heights.

His keen knowledge of the needs of his constitutents came at a time when our country was expanding, and its people becoming more transient. He knew how important it was to maintain an identity of place in this ever-changing society.

Mr. Speaker, Mayor Roll had a long list of accomplishments in both his business and private life. As a mayor he was active in municipal associations at all levels, and his leadership in the business community and in numerous religious and charitable organizations brought him much acclaim.

But his most outstanding characteristic was his enormous heart. Mike Roll was never too busy for people, never in too much of a hurry to stop and talk to you, to listen to your problems or to a new idea. And although Mike Roll was not a great name in the annals of American politics, he represented the best of what true democratic politics was all about.

As a young man, I would go to his town meetings and see his brand of politics in action—frank, open discussions, hours of work, and in the end always concern for the well-being of his fellow men. He was always ready to discuss the problems of the world and how we, as young people, could go about solving them.

Mike Roll came to the United States from Nusco, Avelino, Italy, with the wave of immigrants that sought out America in the early years of this century. He and his family went to Lamberton, Pa., in 1912 where he spent his formative years. A job as sales representative for Exxon brought Mayor Roll to the Washington area in 1934, and he finally settled in District Heights with his beloved wife Melinda in 1948.

There Mike Roll became active in municipal government and was elected mayor in District Heights in 1957. His interest and talent did not stop there, however. As an active member of the Maryland Municipal League he carried municipal issues to the State and county and was elected president of both the State league and the Prince Georges County Municipal League as a result. He further expanded his role as a 12-time delegate to the National League of Cities.

Mike Roll also played an active part in the development of the governmental processes at the county level. In 1963 and 1964 he served on the County Charter Writing Commission, which was responsible for drawing up a new charter for Prince Georges County. He chaired both the Prince Georges Beautification Commission and the Animal Control Commission, and for the past 12 years served on the advisory board of the Prince Georges Community College.

Not only the public arena felt his concern and impact. Active in the Holy Name Society of Mount Calvary and Holy Rosary Catholic Churches,

and the Saint Pius X Council of the Knights of Columbus, Mayor Roll's involvement and his dedication to his faith was always apparent.

Mr. Speaker, I know of no person more loved or respected in his community than was Mike Roll. He was a source of inspiration to me and to all those with whom he came in contact.

He was much beloved by us all, and we shall miss him.

## A VOTE OF NO CONFIDENCE

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ZABLOCKI. Mr. Speaker, yesterday the House defeated H.R. 3518, a bill to authorize the appropriation of funds for the Department of State, the International Communication Agency, the Board for International Broadcasting, and the Inter-American Foundation. Along with the Defense Department, there is no agency more vital to the security of America than the Department of State.

Mr. Speaker, on that vote on final passage, 131 Republicans voted against this bill. Only 40 voted for it. That legislation was requested by the President.

Mr. Speaker, if the Republican Party cannot, and will not support its own President and Secretary of State, how can we ask others to do so?

Under a parliamentary system of government, defeat of such a bill would be tantamount to a vote of no confidence.

Maybe that is the problem. Maybe the minority party in the House has no confidence in the ability of the President or the Secretary of State to carry out the foreign policy of this country. That is the only conclusion I can draw after the vote of no confidence yesterday.

## MASSIVE PROTEST GATHERINGS OF AMERICANS AGAINST BUDGET AND TAX CUTS

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, tomorrow under the auspices of the American Federation of Labor and Congress of Industrial Organizations, there will be a massive gathering in Washington, D.C., of Americans coming to protest the budget cuts and the tax cuts which have created, and will be creating even more, chaos among our people. That demonstration could not be more timely. It comes on the heels of the President of the United States demanding and getting, a tax cut of some $746 billion over the next 5 years, thereby creating a situation where the budget cannot possibly be balanced. And now, because of the massive deficit which has been projected because of his action, he is coming back and demanding, on top of the $35 billion in cuts in our domestic programs already adopted, an additional $15 to $17 billion this year and $75 billion more in the next 2 years.

□ 1015

Mr. Speaker, the American people will not stand for that, and tomorrow will be the first graphic demonstration of America's opposition to the President's ill-conceived program.

## CORPORATE TAKEOVERS PUSH UP INTEREST RATES

(Mr. JEFFORDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFORDS. Mr. Speaker, today I am introducing a resolution which urges the Federal Reserve Board of Governors to discourage the establishing of large lines of credit by corporations for merger purposes while interest rates remain high. I am pleased to say that I have 13 original cosponsors, and invite all other Members of the House who want to do something constructive about high interest rates to join us.

The list of recent corporate marriages seems made in Hollywood: Du Pont and Conoco, of course, the most highly publicized, American Express and Shearson Loeb Rhoades, Prudential and Bache, Nabisco and Standard Brands, and Sohio and Kennecott, among others. If the present rate of takeovers persist, U.S. companies could spend $70 billion or more to swallow up more than 2,000 other firms this year alone.

These mergers would not be as disconcerting if this country's economy were vibrant and fully restored to health, but it is not yet. We are in a transition period. The President is in the process of implementing his program for economic recovery, and until it is fully put in place, I think we have to be wary of the effect mergers have on interest rates.

In the bidding war for Conoco, for example, prospective buyers lined up more than $25 billion in standby bank credit. Although some of this financing came from European banks, the heavy demand for credit here contributed to a tight money supply, making it harder for small businesses and farmers to finance new equipment, and for families to borrow for new homes and cars.

Takeovers can also divert money from productive capital investments. Rather than build new plants and create jobs by turning out new and better products, companies are increasingly interested in acquiring existing factories. Says Walter Adams, professor of economics at Michigan State University, "Mergers do not create new factories or add new employment. Oil companies say they need profits to expand in gas and oil. What they really want is to diversify through acquisitions and get into other industries."

So if you are concerned about these show biz mergers and their effect on the economy, give my office a call and we will sign you on to the bill.

Thank you, Mr. Speaker.

## NATIONAL PARK MAINTENANCE LEGISLATION

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, there is a growing awareness among all Americans of the seriousness of the maintenance problems now confronting the National Park Service. Recent summer visitors to our parks have experienced firsthand the deterioration of park facilities which was underscored in a 1980 General Accounting Office study.

In response to that GAO study, President Reagan announced in February his intention of making increased funding for national park maintenance a major objective of his administration. Unfortunately, the administration's proposed solution involved using the land and water conservation fund for park maintenance, a plan which ultimately proved unacceptable to Members of Congress who feel that use of the fund should be restricted to acquisition of new parklands.

Today, when the need for improved park maintenance is widely recognized, the question of how to finance new park maintenance efforts needs to be addressed. In this context, I am introducing legislation today which would establish such a funding mechanism.

Before I briefly describe what the bill would do, I want to express my gratitude to Senator BUMPERS of Arkansas, who introduced companion legislation in the Senate on June 10. I am indebted to Senator BUMPERS for the ideas contained in the bill I am introducing today, and hope that simultaneous consideration of this legislation in both the Senate and the House will hasten its passage.

The bill I am introducing is remarkably simple in concept. It would simply establish a fund for park maintenance, by earmarking for that purpose all franchise fees paid by concessioners for the privilege of operating in park units.

I want to emphasize that franchise fees paid by concessioners are distinct from entrance and user fees paid by

visitors to national parks. Only franchise fees would be included in the maintenance fund—not fees paid directly by park visitors.

Currently, franchise fees totaling $4.7 million per year are deposited as miscellaneous receipts in the Federal Treasury. The legislation I am introducing today would funnel franchise fees into a newly created fund for park maintenance. Disbursements from the fund would be subject to the appropriations process.

While the money made available to the maintenance fund from franchise fees would not be enough to solve all the problems in our national parks, it could have a significant effect. Moreover, I believe the bill I am proposing will have another advantage, in that it will provide an incentive to the National Park Service to revise its methods for calculating franchise fees.

Senate hearings in 1979 clearly showed that the franchise fee formulas which have been used by the Park Service since the early 1960's need to be changed. William J. Whalen, the Director of the National Park Service at that time, testified that the methods used to calculate the value of franchises in parks was no longer valid. Mr. Whalen's view was supported by a recent GAO study which concluded that—

> The Park Service should develop a new franchise fee rate system that best reflects the value of the privileges granted under concession contracts and that can be easily understood and properly applied by the concessions management staff.

When concessions were first permitted in our national parks, the majority were operated as small businesses, with few financial resources, and limited prospects for return on investment. The changes which have occurred in the parks within the past two decades have had an inevitable effect on the operation of concessions. Increased park usage by Americans intent on exploring new recreation opportunities has made park concessions more profitable. Increased profitability has encouraged larger corporations to compete for, and secure, concession franchises. Competition for franchises has therefore declined, as profitability has increased.

Unfortunately for the American taxpayer, increased profitability of concessions has not been reflected in increased revenues to the Treasury in the form of higher franchise fees. For 10 years the Park Service has been investigating ways to increase franchise fee rates. Despite several studies and reports, the fee structures of the 1960's remain unchanged.

By specifically earmarking franchise fee revenues for a new maintenance fund, it is my hope that the legislation I am introducing today will provide the necessary incentives to the Park Service for implementing franchise fee schedule changes.

As I have stated, the bill I am introducing today will not solve all of the maintenance problems in our national parks. It can, however, be a responsible first step toward a solution. I urge my colleagues to join me in taking that first step by agreeing to cosponsor this legislation.

## CHEMICAL WARFARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LEACH) is recognized for 40 minutes.

Mr. LEACH of Iowa. Mr. Speaker, Laotian tribespeople call it medicine from the sky. Falling as yellow or red or white rain, it causes convulsions, nausea, bleeding from the nose and mouth, and death.

Lethal chemical agents, sprayed from planes and helicopters or delivered in rockets which explode above ground releasing clouds of deadly gas or dust, have been used since 1975 by Vietnamese forces against dissident groups in Laos and Kampuchea.

These weapons of modern science make no distinction between civilians and combatants, between men and women, or between children and adults. They have been used indiscriminately against villages and farms, killing civilians and resistance fighters alike, as well as animals such as dogs, chickens, pigs, cattle, and buffalo.

Secretary of State Haig's announcement in Berlin this week that the U.S. Government has conclusively identified the agents used by Communist forces in Indochina demands immediate international attention.

The perversion of science involved in the development and exploitation of chemical weapons is one of the tragedies of the 20th century. First used by the Germans at Ypres, Belgium, in 1914, poison gas caused an estimated 1.3 million casualties during World War I. Until recently, few instances of the further use in combat of lethal chemical agents have been documented. Chemical weapons were employed sporadically by Mussolini's troops against Ethiopia in 1935, by the Japanese in China and Taiwan in the late thirties, and by the Egyptians in Yemen during the midsixties.

Unconfirmed reports also exist that chemical weapons may briefly have been employed by the Ethiopians against Eritrean rebels and that the Vietnamese may have warned the Chinese of their chemical weapon capacities by controlled usage of poison gases during China's border incursion in January 1979. In addition, Afghan freedom fighters—Mujahadin—have reported to me the use of poisonous—zaerdar—bullets and "sleeping sticks" by Soviet troops in their efforts to subjugate an unwilling population. The former cause severe fever and death from even the most minor wound, and the latter, dropped from planes and helicopters, cause everyone in the vicinity to fall into a deep sleep, rendering them vulnerable to capture and likely death in this conflict where few prisoners are taken. The use of poison bullets and sleep-inducing gas represents yet another dramatic escalation in the chemical weapons race.

The effects of chemical warfare have a tendency to be exaggerated by those who have witnessed its use and, paradoxically, to be ignored by civilized people who have difficulty facing up to uncivilized behavior. But it is clear that there is an ominous trend toward legitimization as well as proliferation of chemical weapons usage. Reports, in fact, are beginning to surface of chemical weapons preparation being made by both sides in the Iranian-Iraqi conflict and of recent purchases of chemical weapons by countries as disparate as Syria, Libya, and India. And of direct strategic importance to the United States, the Soviet Union, and its Warsaw Pact allies have substantial stockpiles, as do North Korea and to a lesser extent Cuba.

The Soviet Union possesses the world's largest stockpile of chemical weapons, and Russian military doctrine emphasized chemical warfare as part of a triad of weapons of mass destruction. However, unlike the other two arms of the triad—biological and nuclear—chemical weapons are considered conventional in the sense that their usage implies a lower threshold strategic option.

It is estimated that Soviet forces include 90,000 officers and men trained extensively in chemical weaponry while, by contrast, the United States has perhaps 2,000—and a military doctrine reflecting a substantially lower tolerance for chemical weapons usage.

Human evidence of the use of chemical weapons in Southeast Asia and Afghanistan has been readily available but definitive analysis of the precise substances involved has been lacking. In this international detective story, bodies have been uncovered, but until now the exact weapon has remained a mystery.

Until now, also, most governments of the world, including our own, have given surprisingly little attention to this extraordinary aspect of man's inhumanity to man.

Having heard rumors in the refugee community of the possible employment of chemical weapons in Laos, I visited Nong Khai, a refugee camp in northern Thailand, in January 1979. After personally interviewing H'mong tribespeople who witnessed chemical weapons attacks, I became convinced of the validity of refugee claims and requested that the State Department launch a thorough investigation of the

problem and raise the chemical weapons issue as a high priority item in appropriate international bodies.

Unfortunately, the Carter administration displayed surprising reluctance to investigate systematically the refugee reports and to apply appropriate historical perspective to the issue itself. It refused publicly to confirm that chemical weapons were indeed being used by the Vietnamese and Laotian Communist forces, despite the overwhelming refugee evidence and the corroboratory intelligence information available at the time.

While collection of evidence proceeded, though frequently on a happenstantial basis, the State Department took the position that the U.S. Government had no responsibility under international law to determine the validity of the allegations concerning chemical weapons usage. While legalistically correct, this position could not have been more morally derelict. If civilized countries refuse to acknowledge the evidence and marshal world public opinion against the usage of such weapons, the legal, moral and political sanctions against their use in the future could not help but be weakened.

The reluctance of our Government to confirm the irrefutable was reminiscent of the refusal of Western democratic governments in the late thirties and early forties to accept the startling body of evidence that pointed to Nazi concentration camp gassing of Europe's Jewish population.

In an effort to increase governmental concern for the issue, I introduced and Congress eventually passed legislation to compel the administration to launch broad governmental and diplomatic initiatives aimed at bringing world attention to the issue of poison gas usage in Southeast Asia and to intensify efforts to conclude an international convention prohibiting the development, production, and stockpiling of chemical weapons.

Unfortunately, despite the establishment of a U.N. investigatory group, little international headway has to date been made. Sample after sample of chemical evidence was provided the International Red Cross and our intelligence agencies and one even in an exchange to the Defense Department through my office, but sparse resources and slipshod attention was given by our Government to the analysis process.

This June I wrote Secretary of Defense Caspar Weinberger a letter outlining the shortcomings of our collection and laboratory analysis efforts with recommendations for change. Perhaps because of this prodding, perhaps because of the urging of an energetic scholar, Sterling Seagrave, who has committed substantial personal resources to investigating the issue, the Defense Department finally decided to dedicate greater resources to the scientific dimension of the probe and turned over to a sophisticated private laboratory samples of chemical residues from Kampuchea. The laboratory results proved definitive. Three blood, blister, and vomiting trichothecene toxin were identified, the effects of which on human beings are so revolting that they defy reasonable description.

The surprise aspect of the laboratory discovery and the clear reason Government scientists have been stumped so long in their efforts to identify the agents involved is that the chemical residues remaining on the leaf and stem samples examined did not have the composition of traditional chemical weapons. Instead, the agents have been identified as biologically derived mycotoxins.

With Secretary Haig's speech in Berlin, the U.S. Government for the first time affirmed that chemical weapons have been employed in Indochina. The "smoking gun," the Secretary indicated has been found—with fingerprints.

Despite the reluctance of the State Department to point a direct finger at the Soviet Union, there is no room for question as to whose fingerprints they are. While it is nearly impossible to track the actual transfer of chemical weapons from Soviet stockpiles to Vietnamese combatants, the toxins identified to have been used in Southeast Asia do not occur there naturally. Neither the Vietnamese nor other forces under their influence have the capacity to produce them on the scale that has been witnessed. In addition, massive evidence exists of Soviet support to and monitoring of chemical attacks in Indochina but this evidence is unfortunately still classified.

Without doubt the Soviet Union stands in direct violation of both the Geneva Protocol of 1925 and the 1972 Biological Weapons Convention, which as a junior Foreign Service officer I helped draft and negotiate in Geneva. The Geneva Protocol prohibits the use in war of chemical and biological weapons. The Biological Weapons Convention prohibits the manufacture or retention for nonpeaceful purposes of biological and toxin weapons, as well as their transfer to any other party. Unfortunately, neither the Geneva Protocol nor the Biological Weapons Convention contain provisions for onsite verification or appropriate international sanction in the event violations are discovered. They are treaties which have been helpful in reducing the usage of these terrible instruments of war, but their weaknesses are grave.

The use by Communist forces of exotic mycotoxins which dissipate into the air within hours of dissemination marks the commission of a near-perfect crime. It has taken years of effort to collect the evidence concerning the laboratory-like experiments the Soviets have cynically conducted on some of the poorest and most defenseless people in the world. The use of chemical weapons by Soviet-supported forces has profound racial as well as strategic implications. New modes of weaponry are being battle tested in remote and poverty-stricken areas of the globe with tribal and ethnic minorities serving as guinea pigs. The Communist call for national liberation has come to mean national genocide for Afghan freedom fighters and tribal groups like the H'mong of Laos.

Unfortunately, even though Third World peoples are the current victims of chemical weapons, there does not appear to be great alarm in the Third World concerning their use, partly because Soviet brutality has come to be perceived as a norm, partly because American credibility has been undercut by a foreign policy that appears insensitive to the concerns of developing countries. This problem has been exacerbated in recent months by the administration's stand on a number of issues. Our opposition to the infant formula marketing code and the Law of the Sea Treaty, our failure to join in the condemnation of South Africa in the U.N. and our military involvement in El Salvador are seen by many developing countries as examples of poor judgment and callous insensitivity. In addition, our involvement in Vietnam and introduction of virulent herbicides like agent orange to that conflict has undercut significantly our international stature on the chemical weapons issue.

In the post-World War II era the United States played the dominant role in the U.N. and most other international bodies. Not only did we never veto a Security Council measure, but for 20 years we never voted on the losing side of a U.N. resolution. In recent years, however, we are becoming increasingly isolated as we support the interests of pariah states like South Africa and narrow corporate interests as in the infant formula and Law of the Sea negotiations. Developing nations perceive the United States, rightly or wrongly, as projecting a policy of almost exclusive paranoia against the Soviet Union with no complementary concern for the compassionate needs of the less-advantaged people of the world. Thus when Secretary Haig points with care at a towering international grievance, his comments do not carry the moral force they deserve.

In strategic terms the renewed use of biochemical weapons underlines the possibility that without new international sanctions another enormously expensive and awesomely dangerous arms race may be in the making. Faced with evidence that the Soviets

have not only a capability but also a willingness to use mycotoxin weapons, the United States has only two realistic options. National security requires that we either upgrade significantly our own chemical arsenal or launch negotiations aimed at definitively eliminating biochemical instruments of warfare. Given the training and technological advantage currently enjoyed by the Soviets, strategic as well as humanitarian considerations make arms control from the U.S. perspective vastly preferable to a costly new arms race that in the long run no one can win.

If legitimized through production, stockpiling, and use, chemical and mycotoxin weapons could all too easily become the poor man's weapon of mass destruction. Nuclear arms are beyond the financial and technical capacities of most nations, and bacteriological warfare is generally regarded as too dangerous and uncontrollable. However, countries which are unable or unwilling to produce nuclear and bacteriological weapons can easily produce or obtain some types of deadly chemicals. If the Soviet Union and its surrogates get away with using chemical weapons with impunity, the list of other countries willing and able to do likewise will almost certainly grow.

In this hemisphere, for example, the training of Castro's army in chemical weapons techniques and the glib comment attributed to Castro that he has the capacity to spread hoof and mouth disease in the United States does not bode well for future hemispheric relations. There is no indication Cuba has anything but a very modest stockpile of chemical weapons, but the fact that Castro himself has referenced Cuba's biochemical capacities and alleged U.S. use against Cuba of such weapons is worthy of careful attention. It can sometimes be a mistake not to take a Communist leader at his word.

In the final analysis, from the Soviet Union's perspective, there is real question whether the proliferation of chemical agents may not carry more long-term liabilities than advantages. As long as the Soviet Union is on the side of the forces which exclusively have chemical weapons at their command, the advantages are obvious. But if smaller countries and insurgency groups unsympathetic to Soviet interests obtain these weapons, overwhelming Soviet military power may be offset. In the event of a nationalist rebellion, in Eastern Europe for instance, anti-Soviet forces possessing chemical weapons could provide a devastating disincentive to Soviet intervention.

Now that the flagrant violation of international law by the Soviet Union has been incontrovertibly exposed, the opportunity exists to test the much-discussed concept of linkage. A symbolic and meaningful way of reorienting the direction of arms control talks might well be to bring the issue of chemical weapons to the SALT negotiating table. Such linkage would bring Soviet Third World adventurism to the forefront and serve as well to broaden arms control concerns away from the United States and Soviet preoccupation with bilateral nuclear discussions.

A chemical weapons initiative of this nature might help break the deadlock in current arms control discussions. The Soviets face a choice that might be summed up as "pox" or "pax." If they are not prepared to be forthcoming in negotiating a verifiable ban on chemical weapons, they can have little expectation of meaningful progress in other arms control areas.

President Reagan, for his part, may not be as quick to endorse certain arms control positions as his predecessor, but he probably has the leadership to get any treaty that he might sanction ratified. A reluctant Reagan has the potential to be a more effective arms controller than a too-willing Carter.

## MIKE MICHAELSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise to extend my best wishes for continued success to Mike Michaelson, the superintendent of the House Radio and TV Gallery, who will resign his post on October 1 to become the executive vice president of the Cable Satellite Public Affairs Network.

As a member of the House Administration Committee, I had the opportunity to get personally acquainted with the fine ability of Mike during the 16 years I have been privileged to serve in the House of Representatives.

It is difficult to find individuals nowadays who will go that extra mile, and, time and time again, Mike was willing to extend that special effort it takes for perfection. I express my appreciation to him for the efficient and dedicated service he has extended to me and my office, and wish him the best as he continues his career in devotion to the highest standards.

Mr. Speaker, an article on Mike Michaelson from the September 17, 1981, edition of the publication Roll Call follows:

[From the Roll Call, Sept. 17, 1981]

MICHAELSON LEAVING HOUSE RADIO-TV GALLERY

(By Rich Burkhardt)

After a career with the House Radio and TV Gallery which has spanned nearly 30 years, Superintendent Mike Michaelson has decided to call it quits Oct. 1. Michaelson, who has been superintendent since the retirement of Robert Menaugh in 1974, will become the Executive Vice-President of the Cable Satellite Public Affairs Network (C-SPAN), the local cable firm which sends televised coverage of daily House sessions across the nation.

Michaelson, 57, said that he originally hadn't planned to leave the Radio and TV Gallery this soon, but that the chance to work with C-SPAN proved to be too good to pass up.

"I was thinking about retirement in another couple of years, but not thinking in terms of going out to pasture," Michaelson said. "I thought for a while that I was going to try going into consulting.

"But then (C-SPAN President) Brian Lamb, approached me and said that he is expanding his operation and wanted someone to take over the managerial duties so he could spend more time marketing C-SPAN and helping it grow." Mike became that someone.

Michaelson's belief that cable TV will be the major force in broadcasting in the future and that C-SPAN is helping to "fill a vacuum that is present in what people can know and learn about government" were his main reasons for deciding to take on the new position.

"Nobody at present but C-SPAN is presenting an unfettered view of government," he said. "They have gavel-to-gavel coverage of the House, and don't editorialize—they just show what is happening as it happens."

"When you watch a network news show, or even something on PBS, you only get part of the picture," he continued. "Network news has to make value judgments on what's news, there is just so much happening around here that you can't get it all into a short time."

Michaelson is also excited by the direction that the expansion of C-SPAN, which has recently moved its offices from Arlington to the Amtrak building at 400 North Capitol St., is taking. He believes that committee coverage will increase, and forsees the possibility that if the Senate eventually decides to televise its sessions, C-SPAN might be able to present coverage of both houses of Congress to the public.

Such coverage, Michaelson believes, is the next step in the media explosion that has taken place on The Hill in recent years.

"When I first came up here in late 1951, you had three networks, UPI film and Hearst Telenews—the big five, and occasionally you'd get a local station," he said. "Little by little it began to grow. Time-Life opened a bureau, and some of the smaller stations began to realize that it was important to have their own people here, that the networks couldn't always give them all that they needed."

The growth of the independent stations and less reliance on networks to cover events for its affiliates has skyrocketed the membership of the Radio and TV Gallery during Michaelson's tenure there.

"When I first came on board, we had about 300 to 400 members," he said, "Now we must have about 1,300 members, and if we're not the largest gallery, we are sure close, because the number of newspapers has decreased since television began to get bigger."

During much of the time Michaelson was here, however, television coverage of Congress was unheard of. Former Speaker Sam Rayburn, who was dissatisfied with television coverage of hearings of the House Un-American Activities Committee in 1954, put a ban on Congressional television coverage that lasted until 1970.

In addition to the TV ban, 1954 was a memorable year for Michaelson for another reason. It was the year that a group of Puerto Ricans fired shots into the House chamber, and Michaelson said that the only reason he is here to tell about it now is because he switched seats just before the shooting started.

"I was in the line of sight, and for some reason, I decided to move down closer," Michaelson said. "It wasn't two minutes after I moved that they started shooting. If I had stayed where I was, I would have been dead—there were bullet holes in the seat where I was sitting."

Throughout his years on The Hill, Michaelson said that he has developed a great respect for both the media and the institution of Congress.

"I love the press—these people have been absolutely super to me and I respect the institution of the media. I've seen it go through tremendous changes through the years," he said.

"By the same token, I love the House of Representatives, and I think I'm the luckiest guy in the world to have worked here for so long," Michaelson continued.

Michaelson, who has served under five different Speakers, said that his major accomplishment has been to keep the gallery in step with the changes that have occurred over the past 30 years.

"When I first took over this job, I was scared," Michaelson said. "I was only the second Superintendent of the Gallery in history. Former Superintendent Robert Menaugh started out with the gallery (in 1939); he knew the Speaker and everybody and I didn't. But I think I've kept the gallery moving forward throughout the years."

Soon Michaelson will be turning the reins over to a new Superintendent, Ruth M. "Tina" Tate, who is currently first assistant superintendent and who will soon be starting her 10th year with the radio and TV gallery.

What will he miss most about leaving The Hill? Like other senior staffers who have recently departed, Michaelson says that he'll miss the people he has known for so many years. In addition he says, he'll miss "the everyday excitement of watching everything that's important in the world go through here."

Michaelson, however, doesn't really see his move as one where he is leaving The Hill.

"By bringing the House floor debates (to the public) and hopefully the Senate in time, I don't feel as though I left The Hill, but simply moved across the street," he said.●

## SUPPORT FOR SOLIDARITY DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. FERRARO) is recognized for 5 minutes.

● Ms. FERRARO. Mr. Speaker, through the first 6 months of this Congress, as the President's economic program was moved through the House and Senate, we have been repeatedly told by the supporters of that program that the President had a mandate from the American people for his program and that the program would bring renewed prosperity for all Americans.

On Saturday, September 19, hundreds of thousands of Americans, including upward of 30,000 from New York City alone, will be coming to Washington, D.C., to express their feelings about the President's economic program. The message they are bringing is not a mandate or an expression of support for Reaganomics, nor are they coming to celebrate a new wave of prosperity that is is sweeping the land.

The people who are coming to Washington September 19, for the Solidarity Day march are coming to protest the President's budget cuts. They are representatives of labor unions, women's groups consumer groups, church groups, and civil rights groups. They are middle class, working class, working poor, and the elderly—the people who will bear the brunt of Reagan's budget cuts.

They are working people concerned about the administration's callousness toward occupational safety and health laws.

They are students and parents concerned about the administration's slashing of the student loan program.

They are young people, potential homeowners, concerned about interest rates that make homeownership a virtually impossible dream.

They are senior citizens concerned about the administration's cuts in social security and in housing programs that threaten their retirement years.

They are Federal employees concerned that the new round of budget cuts will leave them and their families without a source of income and will undermine the effectiveness of their agencies.

That is who these people are.

But let us also consider who they are not.

They are not wealthy land speculators who will benefit from the adminstration's tax proposals which lower the top rate on capital gains.

They are not oil company executives who will reap a bountiful windfall harvest from the administration's tax cuts for that industry.

They are not earners of $200,000 a year for whom the administration's across-the-board tax cut will mean some $14,000 in tax reductions.

By coming to Washington for this march, these Americans hope to bring to President Reagan, and to those of us in Congress, the message that for millions of Americans, opportunity, and compassion, and equality are still important goals. The economic renewal promised by President Reagan's supply-side approach is really nothing more than traditional Republican trickle-down economics. Reagan's version of trickle down is to give a flood of tax relief for the upper income brackets, and a trickle for lower and middle income Americans.

The kind of prosperity sought by the participants in Solidarity Day is the prosperity brought by the New Deal, and the Fair Deal, and the New Frontier, and the Great Society.

The kind of prosperity they seek is based on the idea that growth and wealth come from providing opportunity to the greatest number of Americans—the kind of prosperity that has made this country great over the past half century.

President Reagan's budget cutters, led by Budget Director David Stockman, have acted as though they believe the programs they are cutting were created simply to spend money.

But while no one can deny that there have been inefficiencies and excesses in Government, no one should lose sight of the reasons the programs came into being.

People needed assurances of income in their retirement—and social security was born.

We saw that in this great country, there were some Americans living in substandard housing—and the federally subsidized housing programs were established.

We saw that Americans—and especially children—were malnourished, and the food stamp and school lunch programs were passed.

We realized that education was the key to getting jobs, and the Elementary and Secondary Education Act and the student loan programs were enacted.

The message of Solidarity Day is that America should not abandon its commitment to equality of opportunity and to a prosperity that includes all our people. It is a message we all need to remember.●

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. LEACH of Iowa) and to revise and extend remarks and include extraneous material:)

Mr. LEACH of Iowa, for 40 minutes, today.

(The following Members (at the request of Mr. DANIELSON) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Ms. FERRARO, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. FRANK, for 60 minutes, on September 21, 1981.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LEACH of Iowa) and to include extraneous matter:)

Mr. JEFFORDS in two instances.

Mr. CORCORAN.

Mrs. SCHNEIDER.

Mr. DORNAN of California in three instances.

(The following Members (at the request of Mr. DANIELSON) and to include extraneous matter:)

Mr. BARNES in two instances.

Mr. RODINO in two instances.

Mr. ECKART.

Mr. EDWARDS of California.

Mr. STUDDS.

Mr. WEISS.

## SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 103. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

## ADJOURNMENT

Mr. DANIELSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 30 minutes a.m.) under its previous order, the House adjourned until Monday, September 21, 1981, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2207. A letter from the Principal Deputy Assistant Secretary of Defense, transmitting a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement for the quarter ended June 30, 1981, pursuant to section 720 of Public Law 96-527; to the Committee on Appropriations.

2208. A letter from the Secretary of the Treasury, transmitting a report on a violation of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

2209. A letter from the Secretary of Energy, transmitting a report of public comments on the national electric reliability study, pursuant to section 209 of Public Law 95-617; to the Committee on Energy and Commerce.

2210. A letter from the Director, Defense Security Assistance Agency, transmitting addenda to the quarterly report on foreign military sales as of June 30, 1980, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2211. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $25,409.23 in excess royalties to the Shell Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

2212. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $20,897.67 in excess royalties to the Shell Oil Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

2213. A letter from the Acting Secretary of the Interior, transmitting notice of the proposed refund of $35,444.89 in excess royalties to the Texaco Co., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953; to the Committee on Interior and Insular Affairs.

2214. A letter from the Under Secretary of the Interior, transmitting notice of the leasing systems to be used in oil and gas lease sale No. 66, Gulf of Mexico, to be held on October 20, 1981, pursuant to section 8(a)(8) of the Outer Continental Shelf Lands Act, as amended; to the Committee on Interior and Insular Affairs.

2215. A letter from the Associate Commissioner of Examinations, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in the cases of certain aliens found admissible to the United States, pursuant to section 212(a)(28)(I)(ii) of the Immigration and Nationality Act; to the Committee on the Judiciary.

2216. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report on the employment of speciality qualified scientific and professional personnel for calendar year 1980, pursuant to 5 U.S.C. 3104(b); to the Committee on Post Office and Civil Service.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 4523. A bill to amend the Internal Revenue Code of 1954 to defer certain individual and windfall profit tax reductions until the Federal budget is balanced; to the Committee on Ways and Means.

By Mr. BAFALIS:

H.R. 4524. A bill to amend the Internal Revenue Code of 1954 to limit the maximum rate of interest charged on certain deferred payments of estate taxes and certain recapture taxes; to the Committee on Ways and Means.

By Mr. GONZALEZ:

H.R. 4525. A bill to abolish the Federal Open Market Committee; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MATSUI (for himself, Mr. DASCHLE, Mr. STANGELAND, Mr. GLICKMAN, Mr. DORGAN of North Dakota, and Mr. FAZIO):

H.R. 4526. A bill to designate the sunflower as the national flower of the United States; to the Committee on Post Office and Civil Service.

By Mr. NELLIGAN:

H.R. 4527. A bill to amend the act of October 9, 1965; to the Committee on Interior and Insular Affairs.

By Mrs. SMITH of Nebraska:

H.R. 4528. A bill to delay the application of Revenue Ruling 81-216 until January 1, 1983; to the Committee on Ways and Means.

By Mr. GONZALEZ:

H. Res. 226. Resolution providing for the impeachment of Paul A. Volcker, Anthony M. Solomon, Edward G. Boehne, Robert H. Boykin, E. Gerald Corrigan, Lyle E. Gramley, Silas Keehn, J. Charles Partee, Emmett J. Rice, Frederick H. Schultz, Nancy H. Teeters, and Henry C. Wallich, as members of the Federal Open Market Committee; to the Committee on the Judiciary.

By Mr. JEFFORDS (for himself, Mr. LEACH of Iowa, Mrs. HECKLER, Mr. DENARDIS, Mr. PURSELL, Mrs. SNOWE, Mrs. SCHNEIDER, Mr. HOLLENBECK, Mr. BEDELL, Mr. GLICKMAN, Mr. SIMON, Mr. D'AMOURS, Mr. JONES of Tennessee, and Mr. MINETA):

H. Res. 227. Resolution expressing the sense of the House of Representatives that the Board of Governors of the Federal Reserve System should take prompt action to discourage the establishment of large lines of credit which may be used by large corporations for purposes of acquiring other corporations; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PICKLE:

H. Res. 228. Resolution calling on the Governors of the Federal Reserve System to encourage banks to make loans available for productive uses while eliminating loans for speculative and unproductive uses; to the Committee on Banking, Finance and Urban Affairs.

## ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 248: Mr. MARLENEE.

H.R. 660: Mr. GILMAN, Mr. PEPPER, Mr. PEYSER, and Mr. STUDDS.

H.R. 872: Mr. JEFFORDS.

H.R. 1465: Mrs. CHISHOLM, Mr. DERRICK, and Mr. MCEWEN.

H.R. 1663: Mr. DONNELLY, Mr. FRANK, Mr. FAUNTROY, Mr. NAPIER, Mr. DELLUMS, Mr. CLAY, Mr. BINGHAM, Mr. FOGLIETTA, Mr. OBERSTAR, Mr. MOTTL, Mr. HARKIN, Mr. STANGELAND, and Mr. ANDERSON.

H. Res. 196: Mr. MATTOX.

# SENATE—*Friday, September 18, 1981*

*(Legislative day of Wednesday, September 9, 1981)*

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Father in heaven, I pray this morning for all who work in the Senate and their families. Our culture teaches us never to wear our feelings on our sleeves. We accept this as good and proper, but carried to the extreme it causes us to wear masks, to pretend everything is OK when the truth is we feel lousy and things are falling apart. In so doing we deprive ourselves of the caring love that friends and colleagues are most willing to give in an hour of need. Forgive us for thinking we have to be strong all the time, for fearing vulnerability.

Thou knowest those among us who are hurting: Personal health, trouble with children, financial burden, unkind and unfounded publicity, alienation from spouse, rejection by friends, thoughtless criticism from constituents, discouragement, disappointment, a nagging sense of failure. Gracious God, we pray for Thy loving, healing touch on each life, each family, each office.

And Lord, help us to defer to each other, to respect and love each other, so that by attitude and action we minister to each others need even when not aware of it. Help us we pray in the name of Him whose love and care for His people has never ceased from Abraham to this present moment. Amen.

## RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

## THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## THE EXODUS OF SENIOR FEDERAL EXECUTIVES

Mr. STEVENS. Mr. President, previously I have spoken of the senior Federal executives our executive branch has been losing either to retirement or to the private sector. The cases I mentioned are but a few of an incredible number of losses of Federal executives. I would like to demonstrate the magnitude of these losses on the individual agencies and departments.

The Department of Defense has lost approximately 20 percent of its senior executives during 1980 and again in 1981.

The State Department found that, in any given month, 40–60 percent of their retirees are senior foreign officers. Approximately one-third of these officers are or will be at the pay cap after this year's 4.8-percent pay increase.

The Securities and Exchange Commission has lost 48 percent at the GS–15 and Senior Executive Service levels since October 1978. This represents about 25 percent of the positions at those levels.

The Department of the Treasury has lost 130 SES members since July 1979—95 through retirement and 35 through voluntary resignations. This represents 23 percent of their total SES position allotment. Their concerns result from the fact that between September 30, 1981 and September 30, 1983, 100 more of their SES members will become eligible for voluntary retirement.

The Department of Labor quotes a retirement rate of approximately 14 percent with the pay cap being a definite factor.

The Federal Reserve Board has an attrition rate of more than 20 percent this year with 76 percent of its staff at the cap. I will ask unanimous consent to have printed in the RECORD a letter I received from the Reserve Board in which they illustrate that of 10 officers who have left in 1981, 8 listed pay as the primary reasons for leaving.

The Department of Transportation states that since they started recording reasons for executives leaving earlier this year, every one has indicated that the executive pay cap was a factor influencing their decision.

The Department of Housing and Urban Development has lost 20 career executives this fiscal year with over half of them accepting positions in the private sector. The Department had 107 losses from their Senior Executive Service in 1980.

The National Aeronautics and Space Administration lost 20 percent of their senior executives in 1980.

The Tennessee Valley Authority has lost more than a dozen executive level managers in the last 18 months.

The National Labor Relations Board has lost one-third of its regional directors in the past 2 years. I quote from their letters to me:

> There has never been a mass exodus like this in the history of the agency.

Similar horror stories are heard from other smaller agencies where the loss of even a few executives can be critical. We cannot afford to continue to allow this mass exodus of talent which the Government has spent years and much money to develop.

Lifting the pay cap will not increase total compensation expenditures but will likely help to retain the people we need to run this country.

Mr. President, I ask unanimous consent that the letter from the Federal Reserve System be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BOARD OF GOVERNORS OF THE
FEDERAL RESERVE SYSTEM,
*Washington, D.C., August 20, 1981.*

Hon. TED STEVENS,
*Chairman, Subcommittee on Civil Service, Post Office and General Services, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.*

DEAR CHAIRMAN STEVENS: Thank you for your letter on the problem of senior executives leaving the Federal Government due to inadequate pay. This is a serious concern for the Federal Reserve, as I am sure it is for other government agencies, and I appreciate the opportunity to comment.

As you know, the Federal Reserve Board is not part of the Federal Government's Senior Executive Service (SES); however, compensation of the Board's official staff parallels very closely the SES pay structure, including the limitation on pay. Our inability to grant salary increases to our top-level people has had a harmful effect on morale and has severely distorted pay relationships. As a result of this problem, salary distinctions are insufficient to reflect accurately differences in levels of responsibility. Due to the pay cap on executives salaries, the Board's officer salary structure is so severely compacted that the salaries of 76 percent of the Board's official staff are currently frozen; after October 1 of this year, assuming retention of the pay cap, that figure will increase to 91 percent. Because of the pay compaction problem, the Board is faced with the problem of promoting employees to higher levels of responsibility with little or no increase in salary.

Within the past year, a number of key officials have resigned from the Board, partly or largely for reasons dealing with inadequate compensation. Most of these employees have accepted employment offers which exceeded their Board salaries by 70 percent and more. (You may be interested in the enclosed listing of officers who left the Board in 1981.) Although Federal salaries cannot match those in the private sector, an increase in salary levels of modest proportions may have averted the exodus of some of these people. Thus far this year, the annualized attrition rate for the Board's official staff is exceeding 20 percent, almost double the rate experienced in 1980 and nearly triple the rate experienced in 1979.

In the past, when pay was more competitive and the attrition rate for our key senior officials was fairly low and stable, most of our vacancies were quickly filled. But with the recent sharp increase in resignations among our key officials, it has become extremely difficult to find replacements with the quality of experience necessary to cover critical areas. Unfortunately, we can no longer rely as heavily on recruiting competent replacements from outside of the Federal Reserve due to the increased gap between our salary levels and those offered in the private sector.

The Federal Reserve has traditionally been staffed at senior levels by people intent on

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

making the Federal Reserve their career. However, to an increasing degree, we now find ourselves training people who after a number of years leave for greater financial rewards. While many dedicated individuals have made sacrifices in the past, today's salary gap is too great for us to expect to be able to retain many of these individuals. I am greatly concerned that further erosion of talent could result in a decline of overall Board effectiveness. I realize that in a period of severe budgeting restraint it is difficult to argue for pay increases for the highest paid government workers. However, I do believe the situation has become sufficiently serious that the only responsible course is to take prompt action to lift the pay cap. Again, thank you for the opportunity to comment.

Sincerely,

PAUL A. VOLCKER.

OFFICERS LEAVING THE BOARD IN 1981 (AS OF JULY 28, 1981)

| | New salary | Reason |
|---|---|---|
| 1. Officer | | Retirement. |
| 2. Officer | $90,000 | Pay. |
| 3. Officer | 61,000 | Pay. |
| 4. Officer | 110,000 | Pay. |
| 5. Officer | 62,000 | Greater opportunity. |
| 6. Officer | 125,000 | Pay. |
| 7. Officer | 90,000 | Pay. |
| 8. Officer | 90,000 | Pay. |
| 9. Officer | 75,000 | Pay. |
| 10. Officer | 70,000 | Pay and greater responsibility. |

Mr. STEVENS. Mr. President, I reserve the remainder of our time for the distinguished President pro tempore when he is out of the chair.

(Mr. COCHRAN assumed the chair.)

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

## S. 1639—EXTRADITION ACT OF 1981

Mr. THURMOND. Mr. President, today I am introducing, along with Senators HATCH, KENNEDY, DENTON, LAXALT, and SPECTER, a bill developed over the past 2 years in close cooperation with the Department of Justice and the Department of State to modernize the extradition laws of the United States.

Mr. President, current extradition provisions have been on the books for over a century without significant change. According to those responsible for administering extradition activities within the United States, these provisions have proven increasingly inadequate in dealing with modern difficulties in the international control of crime.

Moreover, there has been such a marked increase in the number of extradition requests received and made by the United States in recent years that deficiencies that were minor inconveniences in the past have become major problems.

In addition, the United States has negotiated new extradition treaties with many foreign countries in the past few years that cannot be fully implemented under the language of present law, thereby preventing fulfillment by the United States of its international obligations.

I submit it is time to review and modernize U.S. extradition laws to comport with the realities of modern crime control between nations. Some of the principal changes proposed by the bill I am introducing would:

Require the Attorney General to serve as complainant in extradition matters, thereby eliminating the possibility of a foreign government—or someone acting for a foreign government—instituting unjustified extradition proceedings.

Permit an arrest warrant to be issued when the location of the fugitive is not known, thereby facilitating law enforcement authorities' efforts in locating international fugitives, including territories, et cetera.

Permit extradition proceedings to be commenced by means of a summons rather than an arrest warrant where the fugitive's location is known and flight is unlikely.

Set standards and conditions for the release of the alleged fugitive in any stage of the proceeding, not just prior to the extradition hearing.

Place responsibility for deciding whether extradition is sought for a "political offense" in the hands of the Secretary of State, thereby permitting this determination to be made in the same manner as asylum applications.

Permit fugitives to be temporarily extradited to the United States for trial or sentencing.

Authorize the Attorney General to make all arrangements to take custody of fugitives found extraditable to the United States by foreign countries.

Mr. President, to further assist my colleagues in evaluating the merits of this legislation, I ask unanimous consent that the following material be printed in the RECORD following these remarks:

Tables delineating the number and nature of extradition cases;

Letter from the Department of Justice in support of the legislation;

Letter from the Department of State in support of the legislation;

A 35-item list of changes proposed by the bill;

Detailed memorandum explaining provisions; and

The bill as introduced.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXTRADITION: NUMBER OF FUGITIVES REQUESTED

| | 1975 | 1976 | 1977 | 1978 | 1979 | 1980 [1] | 1981 |
|---|---|---|---|---|---|---|---|
| Foreign | 26 | 41 | 44 | 57 | 75 | 86 | 26 |
| United States: | | | | | | | |
| Federal | 73 | 74 | 72 | 43 | 51 | 76 | 29 |
| State | [2] | [2] | [2] | [2] | [2] | 56 | 13 |
| Total fugitives requested | 99 | 115 | 117 | 100 | 126 | 218 | 68 |

NUMBER OF FUGITIVES SURRENDERED [3] EACH YEAR

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Foreign | 16 | 7 | 27 | 20 | 38 | 34 | 16 |
| United States: | | | | | | | |
| Federal | 16 | 23 | 30 | 19 | 24 | 34 | 18 |
| State | [2] | [2] | [2] | [2] | [2] | 14 | 6 |
| Total fugitives surrendered | 32 | 30 | 57 | 39 | 63 | 82 | 40 |

[1] As of Mar. 31, 1981.

[2] Handled by legal adviser, Department of State. No statistics kept. Best estimate is that State requests never exceeded 20 in any year, and were probably less.

[3] Surrender—extradited, waived extradition, deported, returned voluntarily.

EXTRADITION: FUGITIVES REQUESTED BY CATEGORIES OF CRIMES

| Source of request and category of crimes | 1979 Number | 1979 Percent | 1980 Number | 1980 Percent | 1981 Number | 1981 Percent | 1979 1st through quarter 1981 Number | 1979 1st through quarter 1981 Percent |

U.S. DEPARTMENT OF JUSTICE,
*Washington, D.C., August 4, 1981.*

HON. STROM THURMOND,
*Chairman, Committee on the Judiciary, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: This is in reference to your letter of July 7, 1981, requesting the views of the Department of Justice on your proposed bill to modernize and improve the United States' laws governing the implementation of our extradition treaties with other countries. As you note, this bill was originally introduced by you, Senator Kennedy and Senator Hatch in the past session of Congress as an amendment to the proposed federal criminal code. It was developed jointly by the staffs of the Committee, the Department of Justice and the Department of State. The Department of Justice strongly supports this bill.

The present provisions of Title 18 of the United States Code governing the implementation of our extradition treaties were originally enacted in the 1840's and 1880's, and have not been materially changed since their enactment. They were designed to deal with transnational criminal activity in an era when the United States was largely geographically insulated from such activity. During that era few requests were ever made by the United States or our treaty partners for the extradition of fugitives. The present provisions are not capable of adequately dealing with extradition problems in the world of intercontinental jet air transport and high-speed telecommunications—a world

in which we are no longer geographically protected from transnational criminal activity. Over the past decade we have witnessed a more than ten-fold increase in the volume of extradition requests made by and to the United States.

The proposed bill also should be helpful in the United States' efforts to curb violent crime, narcotics trafficking and terrorism. In the past two and one-half years almost one-third of the extradition requests made by or to the United States have sought the extradition of persons accused or convicted of crimes of violence. Another third have sought the extradition of persons accused or convicted of narcotics trafficking. A significant number of such requests have related to persons accused of terrorist-related activity.

The substantial improvements made by the proposed bill will greatly enhance the United States' ability to deal with the significant increase in transnational criminal activity. At the same time, it will set forth clearly the procedural safeguards to be afforded fugitives from foreign charges arrested in the United States. The proposed bill will convert our present horse-and-buggy era extradition laws into ones capable of dealing with international fugitives in today's world.

For the above reasons, we believe that it is very important that the proposed bill be enacted.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

ROBERT A. MCCONNELL,
*Assistant Attorney General.*

---

THE SECRETARY OF STATE,
*Washington, D.C. August 25, 1981.*

Hon. STROM THURMOND,
*Chairman, Committee on the Judiciary, U.S. Senate.*

DEAR MR. CHAIRMAN: Thank you for your letter of July 7 asking for my views on the proposed "Extradition Act of 1981."

Your letter notes that the proposed legislation was worked out over the last several years by the staffs of your Committee, the Department of Justice, and the Department of State. I understand that these efforts to modernize and improve United States extradition law drew heavily on court decisions, recent treaty developments, and practical experience with the ever-increasing number of extradition cases.

The Department of State is particularly pleased with the provisions of the bill which provide more effective federal control over filing of extradition requests in this country (section 3192); which for the first time permit appeal from a district court's decision on an extradition request (section 3195); and which place in the Secretary of State the determination whether extradition should be refused on political offense grounds (section 3196(a)(3)). Taken together, these provisions should reduce the risk of adverse foreign policy consequences which flow from extradition either improperly initiated or improperly refused. At the same time, every effort has been made to preserve the protection of individual rights.

New legislation of this kind will be tremendously important in enabling the Departments of Justice and State to carry out their increasing treaty responsibilities in this area more effectively, and I therefore endorse it.

Sincerely,

ALEXANDER M. HAIG, JR.

---

CHANGES EFFECTED BY PROPOSED EXTRADITION LEGISLATION

1. Limits place for filing complaint for extradition to federal courts.

Under present law complaint can be filed in state court of general jurisdiction. In practice all complaints are presently filed in federal courts.

2. Permits only Attorney General to file extradition complaint.

Under present law complaints can be filed by anyone authorized by foreign government. Proposed change is in accord with the laws of most countries and can prevent significant foreign policy problems. Department of Justice in recent years has taken over handling of virtually all of foreign extradition requests pursuant to either treaty provisions or reciprocal agreements.

3. Empowers Attorney General to file complaint with U.S. District Court for District of Columbia if fugitive's whereabouts in United States not known.

Under present law complaint can be filed only where fugitive may be found. Thus, present law precludes use of NCIC for apprehension of international fugitives in United States where whereabouts not known.

4. Specifically prescribes contents of complaint.

Prescribes contents in line with current practice. Present law silent as to contents of complaint.

5. Specifies documentation necessary to support provisional arrest.

Specified documentation is generally in accord with present practice and case law. Present statute does not deal with provisional arrest.

6. Permits Attorney General to request summons rather than warrant for arrest.

Present law does not provide for flexibility of summons procedure. It is anticipated that summons procedure will be used where there is no apparent flight risk thereby ameliorating codified special circumstances rule applicable to prehearing release of subjects of extradition.

7. Requires arrested person to be taken without unnecessary delay before nearest available federal court for extradition hearing.

Follows policy of Rule 5 F.R. Cr. P. in assuring prompt judicial notification of reasons for arrest and advice of rights. Present law silent.

8. Codifies "special circumstances" rule for release on bail pending extradition hearing.

Codifies rule for release set forth in Supreme Court rulings. Use of summons procedure (#6 above) will provide new flexibility with respect to prehearing release. Present statute silent.

9. Codifies conditions of release pending extradition hearing.

Present statute silent.

10. Resolves ambiguity under present case law for determining commencement and termination of provisional arrest period.

Present statute silent.

11. Establishes procedure for waiver of extradition hearing and consent to removal.

Almost all modern treaties provide for waiver, but do not specify procedure. Proposed law draws upon present practice and analogous prisoner transfer verification procedures. Present law silent.

12. Prohibits courts from asserting jurisdiction to determine merits of charges by foreign state.

In accord with case law. Present statute silent.

13. Prohibits courts from determining whether foreign state is seeking extradition for a political offense or an offense of a political character or for the purpose of punishing person for his political opinions.

For reasons set forth in the detailed memorandum below, this decision should be solely an executive decision akin to the similar decision on political asylum. Presently, case law has divided decision between executive and courts with executive determining motivation of foreign country and court determining the character of offense.

14. Requires extradition hearing to be held as soon as practicable after arrest or issuance of summons.

Present law silent.

15. Establishes right of person sought to representation by counsel.

Codifies present practice. Present law silent.

16. Specifies right of person sought to cross examine witnesses against him and to introduce evidence on own behalf.

Codifies present practice. Present statute silent.

17. Simplifies procedures for authentication of documents for admission at extradition hearings.

Simplification patterned after authentication procedures in treaties and other statutes. Revises present archaic, questionable authentication rule in 18 U.S.C. 3190.

18. Establishes admissibility of State Department affidavit on ex'stence of treaty and its interpretation.

Codifies present practice. Present law silent.

19. Adopts federal probable cause standard where treaty refers to such evidence as would justify ordering a trial if the offense had been committed in the United States.

Old case law applied state committal for trial standards. Newer case law and all modern treaties adopt federal standard. Present law silent.

20. Establishes that extraditability may be determined solely on hearsay and/or documentary evidence.

Codifies case law. Present statute silent.

21. Specifies findings which court must make in finding person extraditable.

Codifies present practice primarily based on treaty language. Present law refers only to sufficiency of evidence to sustain charge under applicable treaty.

22. Incorporates double criminality as necessary finding to extraditability.

Almost all treaties impose this requirement. Present statute silent.

23. Requires court to state specific reasons for its findings and to certify them to Secretary of State.

Present statute does not require specification of reasons.

24. Permits commencement of new extradition action only with concurrence of Secretary of State.

Present law permits indefinite number of new actions to be brought by anyone authorized by foreign state to bring such actions.

25. Permits direct appeal by either party.

Under present law there can be no direct appeal from a court's finding of extraditability or non-extraditability. The person sought may challenge a finding of extraditability only through habeas corpus. The foreign state cannot appeal a finding of non-extraditability, but can institute a new action before a different judge. Proposed bill permits direct appeal while greatly restricting habeas corpus attacks.

26. Establishes criteria for release of person sought while appeal pending.

Present law requires commitment of person found extraditable until surrendered to requesting country. Proposed statute would permit release in such cases upon showing of special circumstances. Such release, of course, is subject to specific conditions.

27. Sets time limits for appeal and stays surrender pending appeal.

Present statute silent.

28. Provides for expedited appeal.

Present statute silent.

29. Permits Secretary of State to set conditions of surrender "to effectuate the purposes of the treaty or the interest of justice."

Codifies present practice to protect person sought beyond letter of treaty. Present statute silent.

30. Expressly authorizes Secretary of State to extradite United States nationals unless surrender is expressly prohibited by applicable treaty.

United States policy is to extradite United States nationals to countries with which we have active treaties. Newer treaties all empower Secretary of State to extradite United States nationals. Older treaties make extradition of United States nationals merely discretionary. Supreme Court held in 1936 that discretionary language insufficient to permit extradition of United States nationals. This provision would reverse effect of that case on most pre-1936 treaties.

31. Imposes notification requirements on Secretary of State of decision to order surrender or deny request for extradition.

Codifies present practice. Present statute silent.

32. Sets time limits for Secretary of State to make decision and on foreign country to remove person found extraditable.

Substitutes specific 45-day period for Secretary to act and 30-day period for foreign country to remove fugitive for ambiguous two calendar month period under present statute.

33. Empowers Attorney General to designate agents to pick up persons sought by United States from foreign country.

Present statute gives this power to President who has delegated it to Secretary of State.

34. Permits temporary extradition to the United States of accused person who is otherwise in custody in foreign country.

Permits disposition of all charges against person in United States and foreign country without requiring person to first complete foreign sentence before being extradited to United States. This provision would only be operative when not barred by treaty or laws of foreign country.

35. Codifies payment of extradition expenses in accordance with present practice.

Changes archaic present statute to conform to present practice developed through specific treaty provisions and informal reciprocal agreements.

---

MEMORANDUM ON EXTRADITION LEGISLATION

Chapter 209 of current title 18 of the United States Code (18 U.S.C. 3181–3195) entitled "Extradition" covers both interstate rendition and international extradition. This bill would retain chapter 209 for interstate rendition provisions and create a new chapter 210 for international extradition laws.

International extradition is the process by which a person located in one nation is arrested and turned over to another nation for criminal trial or punishment. The new chapter 210 consists of eight sections. Sections 3191 through 3196 deal primarily with requests made to the United States by foreign governments and set forth the procedure for determining whether a person located in this country should be delivered up to a foreign power. Section 3197 deals with the return of a fugitive extradited to the United States from a foreign nation. Section 3198 contains definitions and a provision on payment of the expenses incident to extradition. The proposed chapter replaces 18 U.S.C. 3181 and 3184–3195.[1]

The provisions of the proposed chapter substantially alter the present statutory law for several reasons.

First, many of the statutes on extradition have been in force without major alteration since 1882. Several have not been significantly changed since 1848. These antiquated provisions have proven increasingly inadequate in dealing with the modern problems in the international control of crime.

Second, there has been a marked increase in the number of extradition requests received and made by the United States in recent years. Those requests have revealed problems in the extradition process. Moreover, these requests have generated a number of published court decisions on constitutional and legal issues involved in international extradition. The judicial interpretation of the law contained in these court decisions fills important gaps in the present statutory law, and should be reflected in any new extradition legislation.

Third, the United States has concluded new extradition treaties with many foreign countries in the past few years. The language of the present law is not adequate to fully implement some of the provisions of the new treaties, and therefore impedes fulfillment by the United States of its international obligations.

PROVISIONS OF THE PROPOSED BILL

Section 3191—Extradition Authority in General:

1. Present Federal law:

18 U.S.C. 3181 states that the present Federal laws authorizing the extradition of persons from the United States shall continue in force only if there is a treaty in force with the foreign nation requesting extradition. 18 U.S.C. 3184 requires that an extradition treaty be in force before any court can conclude that a person may lawfully be extradited to the foreign country involved.[2] These provisions, read together, permit the United States to surrender a person to a foreign country only in accordance with an applicable treaty in force between the United States and the foreign country involved.[3] This principle has become a settled aspect of United States practice in international extradition.

2. Provisions of Section 3191:

Section 3191 of the proposed chapter on extradition carries forward the basic principle of the present law. The provision specifies that the United States may extradite a person in this country pursuant to the chapter only if there is a treaty concerning extradition in force with the country requesting extradition, and only if the request falls within the terms of that treaty. This section refers to a treaty "concerning extradition" rather than an "extradition treaty" because an obligation to extradite a particular class of offenders is sometimes included in international agreements other than extradition treaties.[4] However, the limitation established by this section applies only to the surrender of fugitives pursuant to the chapter, and does not apply to any other legal process which may result in a person facing trial or punishment in another country. Thus, the surrender of a United States serviceman to foreign authorities for trial in accordance with the reciprocal criminal jurisdiction provisions of a Status of Forces Agreement,[5] or the deportation of an alien who happens to face criminal charges abroad,[6] remain governed by the treaty provisions and statutes relating to those processes, and not by this chapter.

Section 3192—Initial Procedure:

This section sets forth the steps to be followed in instituting court proceedings necessary for extradition.

1. Present Federal Law:

Extradition proceedings under 18 U.S.C. 3184 commence when a complaint is filed, under oath, charging that a person has committed, within the jurisdiction of a foreign government, any of the crimes for which extradition is provided under the treaty on extradition in force between the United States and that foreign government. There is no requirement under present law that a formal diplomatic request for extradition be made before the complaint is filed.

18 U.S.C. 3184 permits any federal judge or justice, or duly authorized federal magistrate, or any judge of a state court of record of general jurisdiction to receive complaints and issue warrants of arrest in international extradition matters. In practice, however, such cases are almost invariably filed in the federal courts.

The present statutory scheme does not specify who may file complaints in extradition matters. The rule developed by the courts appears to be that any person acting under the authority of the demanding government may file a complaint for extradition.[7] Thus, international extradition cases have been instituted by foreign diplomatic or consular representatives,[8] foreign police officers,[9] and even private citizens who claim to be acting on behalf of a foreign government.[10] This situation has required the courts to determine, in each case, whether the person filing the complaint is "authorized" to act on behalf of the foreign government.[11] However, in recent years, the United States Department of Justice has become the complainant in the overwhelming majority of extradition cases. The Department of Justice takes this action either pursuant to provisions in the applicable extradition treaty requiring the government of the requested state to provide assistance to the government seeking extradition,[12] or pursuant to an informal international agreement for reciprocal legal representation.

The complaint must be filed in a Federal or State court in whose jurisdiction the fugitive may be found. Unfortunately, in many cases the international fugitive's location in the United States is unknown. Therefore, no complaint can be filed and no arrest warrant can be isued. The ability of United States law enforcement agencies to locate and apprehend international fugitives is greatly hampered by the lack of an outstanding arrest warrant or other judicial process in such cases.[13]

The present statutory scheme contains no provision for the release of an alleged fugitive on bail pending the extradition hearing.[14] However, the courts have claimed the inherent right to release an alleged fugitive on bail pending the extradition hearing in cases where "special circumstances" require such release.[15] The standard for release on bail in extradition cases is more demanding than in ordinary cases, and a clear presumption against bail is recognized.[16]

2. Provisions of Section 3192:

Subsection (a) permits the Attorney General to file a complaint charging that a fugitive is extraditable in the United States district court for the district in which the fugitive may be found. The subsection also permits a complaint to be filed in the United States District Court for the District of Columbia if the fugitive's location is not known. Under this provision, a complaint could be filed, and an arrest warrant issued, when the whereabouts of the fugitive in the United States are still being ascertained, or when it is believed that the fugitive has not yet entered the United States but may be about to do so. The word "found" is intended to have its usual, non-technical meaning, and permits extradition proceedings to be initiated in any district in which the fugitive can be physically apprehended, without regard to the manner in which the fugitive entered the district.[17]

Subsection (b) prescribes the contents of a complaint for extradition. Since all United States extradition treaties specify the documents and quantum of evidence necessary for surrender, paragraph (1) states that an extradition complaint is sufficient if it is accompanied by the evidence specified in the treaty and a copy of the formal request for extradition. Paragraph (2) deals with the documentation necessary to support a "provisional arrest," the process by which a fugitive from justice is arrested to prevent further flight while the foreign government seeking extradition assembles the necessary documents and evidence.[18] Subparagraph (A)

Footnotes at end of article.

of paragraph (2) provides that a complaint will support an arrest under subsection (c) if it contains information sufficient to identify the fugitive, explains the circumstances necessitating provisional arrest,[19] and either indicates that a warrant for the fugitive's arrest is outstanding in the foreign state,[20] or outlines the essential facts indicating that an extraditable crime has been committed and that the fugitive committed it. Since many of the extradition treaties contain articles which expressly set out requirements for obtaining the arrest of fugitives,[21] subparagraph (B) of paragraph (2) also permits the complaint to be filed if it contains the information required by the provisions of the applicable treaty.

Subsection (c) obliges the court to issue a warrant for the arrest of the fugitive upon receipt of the complaint unless the Attorney General requests that a summons to appear at the extradition hearing be issued instead. The subsection requires that the warrant of arrest be executed in accordance with Rule 4(d) of the Federal Rules of Criminal Procedure. This means that the warrant may be executed anywhere in the United States in the same manner as an ordinary Federal warrant of arrest. The subsection also requires that the person arrested be taken without unnecessary delay before the nearest available Federal court [22] for an extradition hearing. The language is similar to that of Rule 5 of the Federal Rules of Criminal Procedure, and is intended to insure that the person arrested under this section is speedily informed by a judicial officer of the reason for the arrest and of his rights to counsel, to cross-examine witnesses, and to introduce evidence on his behalf. It is not intended to require the dismissal of extradition proceedings solely on the ground that the fugitive arrested for extradition was taken without unnecessary delay before a judge or magistrate later determined not to be the "nearest" one. There is no requirement that the extradition hearing take place in the State in which the fugitive is found,[23] so long as there has been compliance with the provisions of this chapter.

Subsection (d)(1) provides that a fugitive arrested for extradition may be released on bail pending the extradition hearing only if he can demonstrate that "special circumstances" warrant his release. The provision continues the approach which has been followed by United States courts [24] in setting the standards for release on bail pending an extradition hearing considerably higher than the standards for release on bail pending trial on Federal charges in the United States. This approach is necessary to assure that the United States continues to carry out its treaty obligation to surrender extraditable fugitives. It is anticipated that the courts will find the "special circumstances" test satisfied "only in the most pressing circumstances and only when the requirements of justice are absolutely peremptory." [25] Such special circumstances might be found, for instance, where the incarceration of the fugitive would seriously damage his health,[26] or would endanger the welfare of a third party who is wholly dependent upon the fugitive for care.[27] It is anticipated that these circumstances would rarely be encountered.

Subsection (d)(3) provides that even if special circumstances are found, the release of the fugitive shall be permitted only upon such conditions as will reasonably assure his appearance at future proceedings, and assure the safety of other persons and the community. Such conditions might include surrender by the fugitive of any passport or travel documents, posting of a substantial bond, and the requirement that the fugitive maintain contact with appropriate Federal agencies, such as the United States Marshals Service.

Subsection (d)(2) gives the court the discretion to release the fugitive provisionally arrested pursuant to this section if the evidence or documents required by the applicable treaty are not received within sixty days of the arrest (unless a longer period of detention is specified in the applicable treaty). The subsection resolves an ambiguity perceived by the courts with respect to the commencement and conclusion of the time period for provisional arrest by providing that this period should be calculated from the date on which the fugitive is taken into custody for extradition [28] to the date on which the documents are received by either the court or the Department of State.[29] If the court is notified that the documents have been received by the Department of State before the expiration of the 60-day period, the court is directed to defer release of the fugitive for a reasonable time pending the prompt transmission of the documents to the court by the Department of State. If a court does release the fugitive from custody due to the non-receipt of the documents within the applicable time period, subsection (d)(3) requires that the court frame conditions of release reasonably calculated to assure that person's appearance for future proceedings and the safety of other persons and the community. Release of the fugitive under subsection (d) does not terminate the proceedings, which can resume once appropriate documentation arrives.[30]

This section does not carry forward 18 U.S.C. 3184's little used authorization for extradition proceedings to be commenced before State judges. The section also specifies that extradition proceedings must be initiated by the Attorney General, rather than by a foreign government or one acting on behalf of a foreign government.[31] These changes reflect the fact that international extradition is strictly a function of the Federal Government,[32] and determining when and how to perform that function is properly the business of Federal officials and Federal courts. The United States Government has a sufficient interest in the vigorous enforcement of the laws (including the extradition law and treaties) to justify the participation of its legal counsel, the Department of Justice, in all court proceedings aimed at determining whether extradition can take place. Indeed, this is the approach which has been adopted in most foreign countries, many of which do not permit the United States to argue in court during proceedings in connection with a United States extradition request. In addition, United States courts are freed from any need to determine whether a private person is "authorized" by an "appropriate" foreign authority to initiate extradition proceedings. It should also significantly reduce the likelihood of extradition proceedings being used by private individuals as a tool for harassment, debt collection, or other improper purposes.

Section 3193—Waiver of Extradition Hearing and Consent to Removal:

1. Present Federal Law:

Present Federal law provides no specific procedure by which a person arrested for extradition may waive the formalities and voluntarily return to the foreign country requesting surrender. This is especially unfortunate since a significant number of the fugitives arrested under 18 U.S.C. 3184 choose not to challenge the request for extradition and wish to expedite removal to the foreign country. Moreover, many of the newer extradition treaties to which the United States is a party contain provisions obliging the request state to expedite the return of a fugitive who has waived a hearing or other procedures.[33]

2. Provisions of Section 3193:

Section 3193 of the proposed extradition chapter clarifies the method by which the fugitive who does not contest extradition can expedite his surrender. The provisions of this section are based on Federal statutory provisions governing a closely analogous situation: the verification of a prisoner's voluntary consent to transfer to his country of nationality under treaties on the execution of penal sanctions.[34] The section states that the court which would have handled the extradition proceeding shall verify that the fugitive's consent to be removed to a foreign country has been given voluntarily and with full knowledge of his right to consult with counsel before making a decision in the matter.

Under some circumstances, the foreign government may not be willing to accept custody of a fugitive who has offered to waive extradition.[35] There also may be situations in which the United States government would consider waiver inappropriate.[36] Therefore, the provision does not permit removal of the fugitive if the Attorney General notifies the court that the United States or the foreign state objects to the proposed waiver.

Section 3194—Extradition Hearing:

1. Present Federal Law:

Under 18 U.S.C. 3194, an alleged fugitive is entitled to a hearing at which a judicial officer determines whether extradition is lawful. 18 U.S.C. 3189 specifies that the hearing must be held "on land, publicly, and in a room or office easily accessible to the public".

At the extradition hearing, the judicial officer must determine whether the offense for which extradition is sought falls within the terms of the treaty. He must also determine whether the acts for which the fugitive is sought by the foreign country would constitute a crime had they been committed in this country. This rule, known as "dual criminality" or "double criminality", is generally considered a basic principle of international extradition law,[37] and is expressly required by many of the extradition treaties to which the United States is a party.[38] The courts have held that the double criminality requirement is satisfied whenever the acts which the fugitive is charged with having committed in the foreign country would be punishable under Federal law, the law of the State where the fugitive is found, or the laws of a majority of the States, had those acts been committed in this country.[39]

A judicial officer must also determine whether there is sufficient proof that an extraditable offense in fact has been committed. Most of the treaties to which the United States is a party require that an extradition request be supported by "such evidence of criminality as, according to the laws of the place where the fugitive shall be found, would justify his commitment for trial had the crime or offense been there committed." Many years ago, the courts viewed the words "place where the fugitive shall be found" as requiring the Federal court to determine if the foreign government's evidence is sufficient to justify a trial under the State laws of the State in which the fugitive is apprehended.[40] This approach was a reasonable one eight decades ago, because at that time Federal courts had no uniform rules of criminal procedure and routinely followed the procedural rules of the courts of the State in which they were located. However, the adoption of the Federal Rules of Criminal Procedure has made it generally unnecessary for Federal courts to refer to State law in these matters.[41] Moreover, extradition is a national act,[42] and the quantum of evidence necessary for extradition is precisely the kind of issue which should be determined by uniform national law, rather than by various State laws. For these reasons, all of the more recent extra-

Footnotes at end of article.

dition treaties contain language essentially requiring that the Federal law standard of commitment for trial—probable cause—be applied in weighing the sufficiency of the evidence for international extradition.[43]

The Federal Rules of Evidence do not apply in extradition proceedings,[44] where unique rules of wide latitude govern the reception of evidence on behalf of the foreign government.[45] It is settled law that hearsay is admissible, and the foreign government usually presents its case by submitting affidavits, depositions, and other written statements in order to satisfy the requirements of the applicable treaty.[46] 18 U.S.C. 3190 provides that originals or copies of depositions, warrants, or other papers are admissible in evidence at the extradition hearing if authenticated so as to be admissible for similar purposes according to the laws of the requesting country. The statute also provides that the certificate of the principal diplomatic or consular officer of the United States resident in the requesting country shall be proof that the documents are authenticated in the manner required. In essence, the documents need only be genuine and authentic—requirements that are deemed fulfilled once it is shown that under similar circumstances the requesting country's own courts would accept them as authentic. The courts have held that extradition documents bearing a certificate which is couched in the language of 18 U.S.C. 3190, and signed by one of the specified officials, are conclusively admissible.[47] As a result of these decisions, foreign governments routinely submit the documentation in support of extradition requests to the appropriate United States Embassy abroad for certification and transmission to the United States. This practice imposes undesirable burdens on the United States Foreign Service officers who must fill out the certification.[48]

The present statutory scheme offers little guidance with respect to the evidence which can be introduced on behalf of the alleged fugitive in an extradition hearing. Many cases emphasize that whether such evidence should be admitted is a decision for the court, in its discretion, to make.[49] The alleged fugitive is ordinarily permitted to testify on his own behalf [50] or to have witnesses testify for him.[51] However, it is clear from the case law that the alleged fugitive may offer to explain ambiguities in the evidence submitted against him, but may not offer evidence which merely contradicts that submitted by the requesting country, or which poses a question of credibility, or which raises an affirmative defense to conviction on the charges, or which is incompetent by the terms of the extradition treaty under which surrender is sought.[52] This restrictive approach is appropriate because the issue before the court at an extradition hearing is probable cause, not the ultimate guilt or innocence of the accused.

Finally, the judicial officer must determine whether the treaty contains a defense to extradition which would preclude surrender in the case before him. Extradition treaties frequently bar surrender if a statute of limitations has foreclosed prosecution or punishment for the offense in question,[53] or if the fugitive has been tried or punished in the requested state for the same offense,[54] or if any of several other legal considerations are present.

Virtually every extradition treaty contains a provision barring extradition for a political offense, and many treaties also preclude extradition if the requesting country has political motives for seeking the return of the fugitive. Under the present case law, the courts decide whether the crime for which extradition has been requested is a political offense [55] but traditionally have declined to consider whether the requesting country's motives in seeking extradition are political.[56] Since these issues are usually intertwined, the result under current case law has been that the court decides the applicability of the "political offense" exception in some cases, and the Executive branch decides the applicability in other cases.[57] The possibility for inconsistent results is obvious.

If the judicial officer is persuaded that the crime charged falls within the treaty, that the acts involved would constitute an offense in this country, that the evidence submitted is sufficient to sustain the charge under the treaty, and that no legal defense to extradition is applicable, it is his duty to certify these conclusions to the Secretary of State. The judicial officer also must send the Secretary of State a copy of all the oral testimony taken at the hearing. 18 U.S.C. 3184 requires the judicial officer to order the commitment of the accused to jail pending surrender, and there is no provision for release on bail at this stage of the proceedings. If the judicial officer finds that the fugitive is not extraditable, the proceedings are terminated, and the fugitive is released from custody.

2. Provisions of Section 3194:

Section 3194(a) requires that a judicial hearing be held to determine whether the person sought is extraditable (unless such a hearing has been waived under section 3193) and sets out the procedure for the hearing.

Section 3194(a) provides that the court does not have jurisdiction to determine whether extradition is sought for a political offense or because of the person's political beliefs, while section 3196(a)(3) specifies that the Secretary of State has the authority to order surrender of a person if he is persuaded that his extradition is sought for one of these reasons. The provisions together provide that the Secretary of State alone shall have jurisdiction to decide the applicability of the "political offense" exception to extradition contained in most extradition treaties. This approach is a desirable one for several reasons.

First, the most modern United States extradition treaties specify that the executive branch of the requested country shall decide the applicability of the political offense exception.[58] Moreover, under present case law the courts generally shun deciding whether the foreign government's extradition request is politically motivated, preferring to leave that decision to the Executive branch.[59] Thus, the approach adopted in this proposal is not a radical departure from present law. It should be noted that the political offense decisions are made exclusively by the executive branch of government in several foreign countries, including Canada.

Second, the decision to shield a criminal from extradition on the ground that his offense was "political" is not the kind of issue which lends itself to resolution through judicial process. There are few truly objective criteria by which a comprehensive definition of the term "political offense" can be based,[60] and a public court proceeding is not an appropriate or desirable forum for careful analysis of a friendly foreign state's intentions or political system. Rather, a decision on the "political offense" exception is (as the name suggests) inescapably political in nature, and inextricably intertwined with the conduct of foreign relations. It is an issue best left to the Executive branch to decide—much as the decision to offer political asylum is an executive decision.

Third, a decision on the political offense exception can have a devastating impact on United States relations with the requesting country. The potentially crippling effect of such decisions on foreign affairs is particularly great where it could compromise United States efforts to combat international terrorism.[61] The present law exacerbates this situation, because frequently the United States government, through the Departments of State and Justice, must take a position on the applicability of the political offense exception while the case is before the court. Moreover, the government must take this position publicly, before all the evidence and arguments are in, and despite the fact that the court or the Secretary of State may subsequently decide against extradition on other grounds. By contrast, the approach taken by the proposed chapter permits a more informed decision on extradition to be made in a manner less likely to be offensive to the friendly foreign government in the case.

Subsection (b) supplements present law by expressly providing that the fugitive be informed of his right to be represented by counsel at the extradition hearing. Indigent fugitives will be provided with counsel pursuant to the provisions of section 3401 relating to court-appointed counsel. The provision also requires that the fugitive be informed of his right to introduce evidence in his own behalf on matters within the jurisdiction of the court. The subsection thereby leaves intact the extensive case law on this point.[62]

Subsection (c) deals with evidence in an extradition hearing. Paragraph (1) is designed to clarify the circumstances under which documentary evidence will be admissible on behalf of either party in an extradition hearing.

Many treaties specifically set out the manner in which extradition documents must be authenticated,[63] and subparagraph (A) of paragraph (1) provides that documents so authenticated shall be admissible. It also provides that documents authenticated in accordance with the provisions of United States law shall be deemed appropriate. Thus, documents which comply with the requirements of Article IX of the Federal Rules of Evidence would be admissible in extradition proceedings. However, the provision does not require the exclusion from the hearing of evidence which fails to satisfy the Federal Rules of Evidence. Rather, the subsection merely underscores the common sense proposition that evidence which satisfies the high standards set out in the Rules, and which would be admissible in civil or criminal proceedings in this country, should likewise be acceptable in extradition proceedings.

Subparagraph (B) of paragraph (1) is based on 18 U.S.C. 3190 and provides that a document authenticated in accordance with the applicable laws of the foreign country requesting extradition shall be admissible if it is accompanied by an attestation to this effect from a judge, magistrate, or other appropriate officer of the foreign state. The phrase "other appropriate officer" would include an official of the foreign counterpart of the Department of Justice, or any other government official likely to be familiar with legal matters in the foreign country. It further requires that the signature and position of the person so attesting be certified by a diplomatic or consular officer of the United States posted in the foreign country, or by a diplomatic or consular officer of the foreign state assigned to this country.[64] The provision thus brings the essential requirements of 18 U.S.C. 3190 more into line with Rule 902(3) of the Federal Rules of Evidence.

Subparagraph (C) of paragraph (1) permits the court handling an extradition matter to accept as evidence any documents which it is persuaded are in fact authentic, regardless of compliance with either of the previous two provisions. This rule is similar to Rule 901(a) of the Federal Rules of Evidence, and is in accord with established case law permitting the authenticity of documents presented in extradition proceedings to be established by the testimony from expert witnesses or by other evidence.[65]

Paragraph (2) of subsection (c) provides that a certificate or affidavit by an appropri-

Footnotes at end of article.

ate State Department official as to the existence or interpretation of a treaty is admissible as evidence of that treaty or its interpretation.

The overwhelming majority of extradition treaties require that the requesting country present such evidence of criminality as would justify commitment for trial had the crime or offense been committed in the place where the fugitive has been found. Under paragraph (2) such a treaty provision may be satisfied by evidence establishing probable cause to believe that a crime was committed and that the person sought committed it. This is the usual standard for commitment for trial in Federal criminal cases.[66] This approach permits the Federal courts to apply the standard for commitment with which they are most familiar, and establishes a single, uniform standard by which the sufficiency of evidence in extradition proceedings may be measured. It is also consistent with the views expressed in several recent court decisions pointing out the advantages of dealing with the quantum of evidence for extradition in a manner consistent with Federal law.[67]

Paragraphs (1), (2), and (3) of subsection (d) carry forward the requirements of 18 U.S.C. 3184 that instruct the court to find the fugitive extraditable if the evidence presented is sufficient to sustain the complaint under the provisions of the applicable treaty and also requires that the court find probable cause that the person before it is the person sought in the foreign state, and that none of the defenses to extradition which the court is empowered to consider are applicable. Paragraph (4) bars extradition unless the acts for which the fugitive's surrender is requested would constitute a crime punishable under State or Federal law in the United States. Finally, the subsection states that the findings required for extradition may be established by hearsay evidence or certified documents alone. This rule is similar to Rule 5.1 of the Federal Rules of Criminal Procedure, which permits a finding of probable cause to commit for trial to be based on hearsay evidence. It is also in accord with recent court decisions which point out that the kind of evidence necessary for extradition is an issue which should be determined by uniform national law.[68]

Subsection (e) details the procedures that the court must follow at the conclusion of the hearing. If the court finds that the fugitive is extraditable, it must state, in writing, its findings and rationale with respect to each of the offenses for which extradition is sought.[69] These findings must be sent to the Secretary of State, together with a transcript of the hearing.[70] If the court finds that the fugitive is not extraditable, the findings required by the subsection may be accompanied by a report rather than a transcript of the hearing.

Section 3195—Appeal:

1. Present Federal Law:

Under present Federal law, there is no direct appeal from a judicial officer's finding in an extradition hearing.[71] A person found extraditable may only seek collateral review of the finding, usually through an application for a writ of habeas corpus.[72] The foreign government that is dissatisfied with the results of the hearing must institute a new request for extradition.[73] The lack of direct appeal in extradition matters adds undesirable delay, expense, and complication to a process which should be simple and expeditious.

2. Provisions of Section 3195:

Section 3195 of the proposed chapter permits either party in an extradition case to appeal directly to the appropriate United States court of appeals from a judge or magistrate's decision. It is anticipated that review on appeal will be very narrow, and that any findings of fact by the lower court will be affirmed unless they are clearly erroneous.

Subsection (a) specifies that the appeal shall be filed within the time limits set out in Rules 3 and 4(b) of the Federal Rules of Appellate Procedure, i.e., 10 days for the person sought and 30 days for the government. These are the same deadlines for filing a notice of appeal in criminal cases, and while an extradition hearing is not a trial,[74] or even strictly a criminal proceeding,[75] these deadlines adequately balance the competing interests of fairness and expedition. It is anticipated that other aspects of the appeal process (such as the preparation and submission of the record, briefing, argument, and decision) will be governed by the applicable provisions of the Federal Rules of Appellate Procedure.

If the fugitive has been found extraditable, subsection (a) requires that surrender to the foreign government be stayed pending determination of the appeal by the court of appeals.[76] This provision prevents the government from mooting the appeal by spiriting the petitioner out of the country while the matter is sub judice. The provision is designed to maintain the status quo with respect to the fugitive's custody pending appeal. It is anticipated that the district court will not ordinarily stay or delay any other element of the extradition process, such as the certification of its findings to the Secretary of State under section 3194(e).

Subsection (b) provides that a person found extraditable must remain in official detention pending the appeal unless the court of appeals finds that special circumstances require release. This is a slight amelioration of present law, which does not permit the lease of a fugitive on bail after he has been found extraditable.[77] The change is desirable because the same kind of pressing, unusual situation which might require that the person sought be released from custody on bail pending the extradition hearing[78] could conceivably arise after the extradition hearing. However, it is anticipated that this authority to release a fugitive on bail will be utilized even more sparingly than the power to grant bail before the exradition hearing, and only after the most thorough and searching examination of the claimed need for release. It is expected that the courts of appeal will keep in mind that "no amount of money could answer the damage that would be sustained by the United States if [the fugitive] were to be released on bond, flee the jurisdiction, and be unavailable to surrender . . .".[79]

If the person was found not extraditable, subsection (b)(2) permits the district court to order that the person be released pending an appeal by the government. Release may not be ordered if the government satisfies the district court that the appellee is likely to flee before the appeal is decided, or endanger the safety of any other person or the community.

A major purpose of section 3195 is to simplify, and thereby expedite, the extradition process by providing for a direct appeal from a contested decision on extradition. The direct appeal provided by this section largely eliminates the present need for habeas corpus proceedings in order to obtain judicial review of the initial finding that a person is extraditable. This purpose would be frustrated if a fugitive bent on dilatory tactics were permitted to pursue an appeal under this section, a petition for certiorari to the Supreme Court, and then begin one or more rounds of habeas corpus proceedings. Such a course of action would lengthen the extradition process rather than shorten it. Therefore, subsection (c) deprives any court of jurisdiction to review a finding that a fugitive is extraditable under this chapter unless the fugitive has exhausted the appellate remedies available to him by right in this section. It also forecloses an appeal, a petition for habeas corpus, or declaratory judgment action if the validity of the fugitive's commitment for extradition has been ruled upon in prior proceedings, unless grounds are offered which could not have been presented previously.

The resolution of challenges to judicial action in international extradition cases must be especially prompt for several reasons. Extradition cases are quasicriminal in nature. Moreover, in such cases our government's timely and ungrudging execution of its solemn treaty obligations to a friendly nation is in question.[80] Therefore, this section requires that courts of appeal decide cases arising under this chapter expeditiously.

Section 3196—Surrender of a Person to a Foreign State:

1. Present Federal Law:

Under 18 U.S.C. 3186, the Secretary of State may order that any person found extraditable by a court under 18 U.S.C. 3184 be delivered to an authorized agent of the government seeking extradition. Although it is generally agreed that the Secretary's decision in this matter is discretionary,[81] present law provides no indication of the parameters of the Secretary's discretion.

18 U.S.C. 3188 states that if a fugitive found extraditable under 18 U.S.C. 3184 is not removed from the United States within "two calendar months" of the court's commitment order, he may be released from custody unless there is "sufficient cause" why release should not be ordered.[82] The courts have held that if the fugitive institutes litigation challenging his extradition, the two-month period commences when the claims are finally adjudicated rather than when the commitment order was issued.[83]

2. Provisions of Section 3196:

Subsection (a) carries forward the essence of 18 U.S.C. 3186 by providing that the Secretary of State shall make the final decision as to extradition. The subsection requires that the Secretary's decision be made in accordance with the chapter and the applicable treaty, and lists the actions that the Secretary may take.

Subsection (a)(1) simply permits the Secretary to order the surrender of a person the court has found to be extraditable to a duly appointed agent of the foreign state.

Subsection (a)(2) permits the Secretary to condition the surrender of a fugitive upon the acceptance by the foreign state of restrictions or conditions he considers necessary in the interest of justice or to effectuate the purposes of the treaty. This provision underscores the Department of State's authority to impose such restrictions where humanitarian concerns[84] or questions concerning trial procedures in the requesting state exist.[85] It would also permit the imposition of restrictions expressly contemplated in the provisions of some newer treaties.[86]

As noted, most extradition treaties preclude extradition for an offense of a political character, and many treaties also bar extradition where the request is motivated by political considerations. Subsection (a)(3) specifies that the Secretary of State may deny extradition where he concludes that a treaty clause of this kind is applicable. The subsection is designed to give the Secretary of State the same broad discretion in addressing this issue which he possesses in determining whether to extend political asylum to refugees. The Secretary's decision in this matter, which frequently involves a question of foreign policy, is discretionary and will not be reviewable by the courts.

The subsection also provides that any evidence or arguments the fugitive wishes to

Footnotes at end of article.

present shall be in writting. The Secretary is not obliged to provide a formal hearing for a fugitive who claims the benefit of the "political offense" exception,[87] but it is expected that the Secretary will utilize the resources of the State Department for gathering evidence and assessing the fugitive's claim.

Subsection (a) expressly authorizes surrender of United States nationals unless surrender is expressly prohibited by the applicable treaty.[88] This subsection is necessary in light of Valentine[89] in which the Supreme Court held that language contained in many of the older extradition treaties to which the United States is a party does not permit the surrender of United States citizens absent explicit statutory authority for such surrender. The result of the Neidecker decision has been to effectively immunize United States citizens from extradition in many cases—a result never intended by the negotiators of the treaties involved. It is the policy of the United States to treat its citizens and aliens within its borders equally in extradition matters,[90] and this subsection permits that policy to operate effectively.

Subsection (b) requires that the Secretary of State notify all interested parties of his decision on extradition.

Subsection (c)(1) provides that the fugitive shall be released from custody if the Secretary of State does not order, or declines to order, the person's surrender within forty-five days after receiving the record of proceedings from the court. Of course, if the Secretary of State decides within forty-five days to refuse to order extradition, the authority for holding the person sought in custody under section 3214(e)(1) immediately expires, and the person should be released from detention at once.

Subsection (c)(2) is based on the provisions of 18 U.S.C. 3188, and provides that when the Secretary of State has ordered a person extradited, the foreign country involved must take custody of the person and remove him from the United States within 30 days. This 30-day time period does not begin until all litigation challenging extradition has been completed. The subsection expressly excludes from consideration the time during which surrender has been stayed pending litigation.

Subsection (c) requires a person found extraditable to give the Secretary of State reasonable notice that he will seek release because of expiration of a time limitation set forth in subsection (c)(1) or (c)(2), and forbids release if good cause is shown for the delay in effecting surrender.

Section 3197—Receipt of a Person From a Foreign State:

1. Present Federal Law:

18 U.S.C. 3192 authorizes the President to "take all necessary measures for the transportation and safekeeping" of a person extradited to the United States from a foreign country. At one time the President relied upon this statute to issue a warrant designating an agent to receive custody of a fugitive from a foreign government. 18 U.S.C. 3193 authorizes such an agent to convey the fugitive directly to the place of trial, and grants to the agent "all the powers of a Marshal of the United States, in the several Federal districts through which it may be necessary for him to pass with [the] prisoner . . .". The authority to issue warrants and appoint agents under these sections has now been delegated to the Secretary of State.[91] However, the Department of State wishes to transfer to the Department of Justice the authority to appoint agents and issue warrants in these matters.

2. Provisions of Section 3197:

Section 3217 of the proposed subchapter carries forward the provisions of 18 U.S.C. 3192 and 3193, with minor modifications reflecting present United States practice.

Subsection (a) authorizes the Attorney General to designate an agent to receive custody of a fugitive surrendered by a foreign government, and permits the agent to convey the fugitive to the place of trial in the United States. The final sentence of the subsection permits the extradited fugitive to be taken directly to the Federal district or State jurisdiction in which charges are outstanding, without removal proceedings under Rule 40 of the Federal Rules of Criminal Procedure or interstate rendition proceedings.

Section 3217(b) is new, and is designed to implement provisions found in some of the most recent United States extradition treaties. The laws in many foreign countries require that extradition be postponed until the person has satisfied any outstanding criminal charges in that country.[92] Frequently, a person sought by the United States has already been tried and convicted of other charges in the requested country and has a sentence to serve there. If the sentence abroad is a long one, the postponement of surrender could compromise the possibility of a speedy and fair trial in this country.[93] Some extradition treaties contain provisions which deal with this problem by permitting "temporary extradition". Under these treaty provisions, a fugitive convicted abroad would be surrendered to the United States solely for the purpose of trial and sentencing here, then returned to the foreign country involved to finish the sentence previously imposed there.[94] This process balances our government's interest in adjudicating the charges while the evidence is fresh with the foreign country's desire to fully enforce its laws. It also works to a fugitive's benefit by enabling him to answer the charges in this country while evidence for his defense is still available, and by creating the possibility that the sentence imposed upon conviction in this country could run concurrently with that the fugitive must serve abroad.

Section 3197(b) provides implementing legislation for treaty provisions of this type. It provides that when a foreign state has delivered a person to the United States on the condition that the person be returned at the conclusion of the criminal trial or sentencing, the Bureau of Prisons shall keep the person in custody until the judicial proceedings are concluded, and thereafter surrender the person to a duly appointed agent of the foreign country. It also provides that the return to the foreign state of the person is not subject to the requirements of the subchapter, such as an extradition hearing or an order of surrender by the Secretary of State.

Section 3198—General Provisions for Chapter 210:

1. In General:

This section contains the definitions and general provisions applicable to the extradition chapter.

2. Present Federal Law:

18 U.S.C. 3198 requires that the foreign government which sought extradition pay all costs and fees resulting from the request. The costs resulting from extradition requests here frequently are so small that it is uneconomical—and diplomatically embarrassing—to attempt to enforce this statute. Moreover, many of the extradition treaties to which the United States is a party contain provisions which modify this statutory rule.[95] Also, the United States has entered into informal arrangements with some countries whereby each counry bears most of the cost of the other's extradition request. In short, the present statute does not adequately reflect government policy in extradition matters.

Present statutory law offers no guidance as to who must pay the costs associated with United States requests to foreign countries for the extradition of fugitives. The Department of State requests extradition on behalf of either the State within the United States in which the fugitive is charged, or, if Federal charges are involved, on behalf of the United States. Therefore, the longstanding policy of the Department of State has been that the State jurisdiction which sought the fugitive's return must pay any expenses incurred in connection with the extradition request, and the Department of Justice must pay the expenses incurred in obtaining the extradition of a fugitive Federal offender.

2. Provisions of Section 3198:

Subsection (a) of section 3198 sets forth definitions for the terms "court", "foreign state", "treaty", and "warrant".

Subsection (b) states that in general a foreign state which has requested the extradition of a fugitive located in the United States must bear all costs and expenses incurred in connection with that request. Since many of the extradition treaties contain provisions specifically dealing with costs in extradition matters, the subsection authorizes the Secretary of State to direct that this matter be handled in accordance with terms of the applicable treaty or agreement. Subsection (b) also requires that all costs and expenses incurred in connection with the execution of a request by a State of the United States for the return of a fugitive located in another country must be paid by that State. When the request for extradition is made to secure the return of a fugitive wanted for a Federal offense, the expenses must be borne by the United States. It is anticipated that when the fugitive involved is sought for both Federal and State offenses, the costs incurred abroad will be allocated accordingly.

FOOTNOTES

[1] Other Federal statutes on extradition, which include 18 U.S.C. 751, 752, and 1502, are not affected by this legislation.

[2] Moreover, 18 U.S.C. 3188 requires that a court find that the person sought is extraditable before the Secretary of State may order surrender to the foreign state.

[12] *In re David*, 395 F. Supp. 803, 807 (E.D. Ill. 1975); *United States ex rel. Petrushansky* v. *Marasco*, 215 F. Supp. 953, 957 (E.D. N.Y. 1963) *aff'd* 325 F. 2d 562 (2nd Cir. 1963), *cert. denied*, 376 U.S. 952 (1964).

[13] For example, many Federal, State, and local law enforcement agencies rely on the FBI's National Crime Information Center—"NCIC"—in determining whether an individual is wanted for arrest in another jurisdiction. Since no complaint for extradition can be filed against a fugitive whose location is unknown, there can be no Federal arrest warrant issued, and no information on the person will appear in NCIC. Thus, law enforcement officers may have no way to learn that a particular person is an international fugitive sought for extradition.

[14] In *Wright* v. *Henkel*, 190 U.S. 40 (1903), the Supreme Court reviewed former section 596 of title 18 (now 18 U.S.C. 3141) in conjunction with former section 591 (now 18 U.S.C. 3041), and concluded that there was no statute providing for admission to bail in cases of foreign extradition. The Bail Reform Act (which amended Sections 3041, 3141–3143, and 3568, and enacted 18 U.S.C. 3147–3152) did not alter this result. The Act liberalized access to bail in those cases to which the bail statutes apply, but did not broaden the availability of bail generally. Both the previous sections of the law and the provisions of the Bail Reform Act apply only to "person(s) charged with an offense," and the term "offense" is expressly defined in 18 U.S.C. 3156 as "any federal criminal offense which is in violation of any act of Congress and is triable by a court established by act of Congress . . .". Since fugitives facing extradition to a foreign country are not accused of any federal criminal offense, and will not be tried in any Federal court, the bail statute's provisions do not apply to them. *Cf. Kelley* v. *Springette*, 527 F.2d 1090, 1093 (9th Cir. 1975); *Beaulieu* v. *Comm'r of Massachusetts*, 382 F.2d 290 (1st Cir. 1967).

[15] *United States* v. *Williams*, 611 F.2d 914 (1st Cir. 1979); *Beaulieu* v. *Hartigan*, 554 F.2d 1 (1st Cir. 1977); *Wright* v. *Henkel*, supra note 14.

[16] *Hu Yan-Leung* v. *Soscia*, — F.2d —, No. 80–2356 (2d Cir. May 26, 1981).

[17] See, *In re Chan Kam-Shu*, 477 F.2d 333 (5th Cir. 1973), *cert. denied*, 414 U.S. 847 (1973); *Vardy* v. *United States*, 529 F.2d 404 (5th Cir. 1976), *rehearing denied*, 533 F.2d 310 (5th Cir. 1976); *In re David*, 390 F. Supp. 521 and 395 F. Supp. 903 (E.D. Ill. 1975).

[18] Provisional arrest is a well-recognized aspect of international extradition procedure, and is specifically provided for in most of the extradition treaties to which the United States is a party. See, e.g. Art. 11, Extradition Treaty, United States-Canada, signed Dec. 31, 1971, 27 U.S.T. 983, T.I.A.S. 8237 (entered into force March 27, 1976). See generally, Reuschlein, *Provisional Arrest and Detention in International Extradition*, 23 Georgetown Law Journal 37 (1934); Note, 16 New York Law Forum 420, 429–430 (1970).

[19] E.g., contains an indication that the fugitive is likely to flee the jurisdiction and be unavailable by the time the extradition documents arrive.

[20] See, 6 Whiteman, *supra* note 3, at 931; *Whitely* v. *Warden, Wyoming State Penitentiary*, 401 U.S. 560, 568 (1970); *United States* v. *McCray*, 468 F. 2d 848 (5th Cir. 1967).

[21] See, e.g. *Caligerone* v. *Grant*, 629 F. 2d 730 (2d Cir. 1980).

[22] "Court" is defined in section 3198(a)(1) to mean a United States district court established pursuant to 28 U.S.C. 132, or the District Court of Guam, the Virgin Islands, or the Northern Mariana Islands, or a United States magistrate authorized to conduct an extradition proceeding.

[23] Thus, the section eliminates the arbitrary rule created by the Supreme Court in *Pettit* v. *Walshe*, 194 U.S. 205 (1904). See note 40, *infra*, and accompanying text. This rule is unnecessary in light of proposed section 3194(c)(3).

[24] See notes 15 and 16, *supra*.

[25] *In re Mitchell*, 171 Fed. 289, 290 (S.D. N.Y. 1909).

[26] See, e.g., *In re Kaplan*, Civ. No. 79–2219 RF (C.D. Cal. July 29, 1979).

[27] See, e.g., *In re Itoka*, Misc. No. 79–1536–M (D. N.M. Dec. 17, 1979).

[28] Sec. *In re Chan Kam-Shu*, 477 F. 2d 333, 339–340 (5th Cir. 1973) *cert. denied*, 414 U.S. 847 (1973).

[29] *United States* v. *Clarke*, 470 F. Supp. 979 (D. Vermont 1979).

[30] E.g., Art. 13(2), Extradition Treaty, United States-Norway, signed June 9, 1977, — U.S.T. —, T.I.A.S. 9679 (entered into force March 6, 1980).

[31] It is anticipated that in most cases the Attorney General will act through the United States attorney for the district in which the fugitive is located. If the foreign government involved feels the need to participate in the judicial proceedings, it can retain counsel and seek to enter the case as *amicus curiae*.

[32] *Valentine* v. *United States ex rel. Neidecker*, *supra* note 3, at 5, 8; *United States* v. *Rauscher*, 119 U.S. 407, 414 (1886).

[33] See e.g., Art. 10, Extradition Treaty, United States-Japan, signed March 3, 1978, — U.S.T. —, T.I.A.S. 9625 (entered into force March 25, 1980); Art. 18, Extradition Treaty, United States-Mexico, signed May 4, 1978, — U.S.T. —, T.I.A.S. 9656 (entered into force January 24, 1980).

[34] See 18 U.S.C. 4107–4108.

[35] For example, a fugitive might wish to waive extradition on only one of many outstanding charges against him in the requesting state. Under these circumstances, that foreign state might conceivably prefer to have extraditability determined as to all of the charges.

[36] For example, many extradition treaties permit the requested state to postpone extradition until the person sought has been tried and punished for criminal charges outstanding in that state. A person facing criminal charges or imprisonment in this country might well attempt to expedite his extradition to a foreign country where less serious charges are pending, in order to avoid prosecution or punishment here. In such circumstances, it would not be appropriate for the United States to permit expedited surrender, at least not until the charges in this country have been resolved or the sentence served.

Supp. 568, 575 (S.D.N.Y. 1979); *Sindona* v. *Grant*, *supra* note 43.

[57] *Zyad Abu Eair* v. *Wilkes*, 641 F.2d 504 (7th Cir. 1981).

[58] See, e.g., Art. 5(1), Extradition Treaty, United States-Mexico, signed May 4, 1978, — U.S.T. —, T.I.A.S. 9656 (entered into force January 25, 1980).

[59] See note 56, *supra*.

[60] Levy, Contemporary International Law: A Concise Introduction, 190 (1979). The courts in various countries differ widely on what kinds of offenses are covered by the term, and legal scholars here and abroad have proposed a host of different—and frequently contradictory—proposals on the topic. See, generally, Carbonneau, *The Political Offense Exception to Extradition and Transnational Terrorists: Old Doctrine Reformulated and New Norms Created*, 1 ASILS International Law Journal 1 (1977).

[61] For instance, in *In re McMullen*, No. 3–78–1099MG (N.D. Cal. May 11, 1979), a federal magistrate in San Francisco barred the extradition to England of an admitted IRA bomber, holding that the fugitive's action (blowing up an army barracks in England) was an offense of a political character. This decision was a considerable setback for United States efforts to control international terrorism, and could make the United States a more attractive refuge for members of the IRA, the PLO, the Baader-Meinhof gang, the Italian Red Brigade, and other terrorists.

[62] See *supra* note, 52, and accompanying text.

[63] See, e.g., Art. 10(6), Extradition Treaty, United States-Mexico, signed May 4, 1978,— U.S.T.—, T.I.A.S. 9656 (entered into force January 25, 1980). The United States will also be a party to the Convention Abolishing the Requirement of Legalization for Foreign Public Documents, done at The Hague, October 26, 1960, 527 U.N.T.S. 189 (ratified by the Senate Nov. 28, 1979). This Convention will eliminate a substantial portion of the authentication requirement with respect to extradition documents submitted by one signatory country to another.

[64] It is anticipated that in most cases the foreign state's diplomatic or consular personnel assigned to the United States will make the certification required by the section, thereby relieving U.S. diplomatic and consular officers abroad of this chore.

[65] See, generally, *United States* v. *Galanis*, *supra* note 54.

[66] See Rule 5.1, Federal Rules of Criminal Procedure.

[67] *Greci* v. *Birkness*, *supra* note 43; *Brauch* v. *Raiche*, *supra* note 39.

[68] *U.S. ex rel. Sakaguchi* v. *Kaulukukui*, 520 F.2d 726, 728 (9th Cir. 1975); *Shapiro* v. *Ferrandina*, *supra* note 47.

[69] This requirement is consistent with the practice followed by the courts today. See *Kaplan* v. *Vokes*, — F.2d —, No. 79–2662 (9th Cir. July 6, 1981); *Shapiro* v. *Ferrandina*, *supra* note 47.

[70] Present law (18 U.S.C. 3184) only requires that the court send the Secretary a transcript of the *testimony* taken at the hearing. By providing the executive branch with a fuller record of the proceedings, the Secretary of State will be more fully informed in making his decision on extradition.

[71] *Collins* v. *Loisel*, *supra* note 46.

[72] See, e.g., *Sindona* v. *Grant*, *supra* note 43.

[73] *Hooker* v. *Klein*, 573 F.2d 1360 (9th Cir. 1978).

[74] *Glucksman* v. *Henkel*, 221 U.S. 508, 512 (1911).

[75] *United States ex rel. Oppenheim* v. *Hecht*, 16 F.2d 955, 956 (2nd Cir. 1927); *United States ex rel. Klein* v. *Mulligan*, 1 F. Supp. 635, 636 (S.D. N.Y. 1922).

[76] The automatic stay of extradition expires when the court of appeals issues its mandate in the matter. Thus, the automatic stay would not ordinarily protect a fugitive seeking further, discretionary review, such as an applicant for a writ of *certiorari* from the Supreme Court. Of course, the fugitive whose case merits further review is free to request that either the court of appeals or the Supreme Court exercise its discretion by staying surrender while *certiorari* or other relief is considered.

[77] In fact, 18 U.S.C. 3184 specifically provides that a person found extraditable must be committed "to the proper jail, there to remain until . . . surrender shall be made".

[78] See *supra* notes 23 and 24, and accompanying text.

[79] *Jimenez* v. *Aristequieta*, 314 F.2d 649 (5th Cir. 1963).

[80] *Magisano* v. *Locke*, 545 F.2d 1228, 1230 (9th Cir. 1976).

[81] See, generally, Note, *Executive Discretion in Extradition*, 62 Columbia Law Review 1313 (1962).

[82] *In re Factor's Extradition*, 75 F.2d 10 (7th Cir. 1934); *In re Normano*, 7 F. Supp. 329 (D. Mass. 1934); 6 Whiteman, *supra* note 3, at 1064–69.

[83] *Jimenez* v. *United States District Court for the Southern District of Florida*, 84 S. Ct. 14, 11 L. Ed. 2nd (1963); *Barrett* v. *United States*, 590 F.2d 624 (6th Cir. 1978).

[84] See, e.g., *Peroff* v. *Hylton*, 542 F.2d 1247, 1249 (4th Cir. 1976), *cert. denied*, 429 U.S. 1062 (1977); *Sindona* v. *Grant*, *supra* note 43, at 199, 207; see Note, Columbia Law Review, *supra* note 81.

[85] For example, the Department of State has frequently conditioned surrender of a fugitive convicted in absentia upon a promise by the foreign country involved to permit a retrial. See 6 Whiteman, *supra*, note 3, at 1051, 1117–1122.

[86] For example, some treaties permit the requested state to condition extradition upon satisfactory assurances that the death penalty will not be imposed. See e.g., Art. 6, Extradition Treaty, Canada-United States, signed December 31, 1971, 27 U.S.T. 983, T.I.A.S. 8237 (entered into force March 27, 1976).

[87] *Peroff* v. *Hylton*, 563 F. 2d 1099, 1102–1103 (4th Cir. 1977).

[88] At present, no extradition treaty to which the United States is a party expressly prohibits surrender of citizens of the requested state.

[89] 299 U.S. 5 (1936), *supra* note 32.

[90] Many foreign countries do not extradite their citizens because those countries can instead prosecute and punish their citizens for crimes committed in another country. As a general rule, the United States has no such ability. *Escobedo and Castillo* v. *Forsch*, 623 F. 2d 1098 (5th Cir. 1980); 6 Whiteman, *supra* note 3, at 876–878.

[91] Executive Order 11517, 35 Fed. Reg. 4937 (1970), reprinted in 1970 U.S. Code Cong. & Ad. News, at 6232.

[92] See, e.g., Extradition Act, R.S.C. 1952, c. 322 (Canada); s. 24, Ley de Extradicion (Dec. 29, 1975), Art. 11 (Mexico).

[93] *United States* v. *Rowbotham*, 430 F. Supp. 1254 (D. Mass. 1977); *United States* v. *Dolack*, 484 F. 2d (7th Cir. 1973).

It is well to remember that both the prosecution and the defense suffer when a criminal trial is delayed too long. Indeed, as the Court of Appeals trenchantly remarked in *United States* v. *Judice*, 457 F.2d 418, 418 (5th Cir. 1972):

". . . all practiced trial lawyers are well aware that attrition from . . . delay is more damaging to the prosecutor's case than to that of the defense. This will be so as long as the prosecution has the burden of proof."

[94] Cf. 6 Whiteman, *supra* note 3, at 1052–1053.

[95] For example, Art. 21, Extradition Treaty, United States-Mexico, signed May 4, 1978, —U.S.T.—, T.I.A.S. 9656 (entered into force January 25, 1980) requires that the requested state bear all of the expenses of extradition except those incurred for the translation of the documents or the transportation of the fugitive.

Extradition treaties are considered self-executing, Bassiouni, International Extradition and World Public Order 30–31 (1976), and supersede the provisions of prior inconsistent federal legislation, Restatement (Second) of Foreign Relations Law of the United States, § 141, Comment (b) at 433 (1965). Therefore, whether 18 U.S.C. 3195 or a differing treaty provision is applicable in a particular extradition case depends on when the treaty entered into force.

---

S. 1639

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That this act may be cited as the "Extradition Act of 1981".

SEC. 2. Chapter 209 of title 18, United States Code, is amended as follows:

(a) Section 3181 is deleted.

(b) Section 3182 is redesignated as section "3181".

(c) Section 3183 is redesignated as section "3182" and is amended by striking out "or the Panama Canal Zone" in the first sentence.

(d) A new section 3183 is added as follows:

"§ 3183. Payment of fees and costs.

"All costs or expenses incurred in any interstate rendition proceeding in apprehending, securing, and transmitting a fugitive shall be paid by the demand authority.".

(e) Sections 3184 through 3195 are deleted.

(f) The chapter heading and section analysis are amended to read as follows:

"Chapter 209—INTERSTATE RENDITION

"Sec.
"3181. Fugitives From State or Territory to State, District, or Territory.
"3182. Fugitives from State, Territory or Possession into extraterritorial jurisdiction of the United States.
"3183. Payment of fees and costs.".

SEC. 2. A new chapter 210 of title 18 of the United States Code is added as follows:

"Chapter 210—INTERNATIONAL EXTRADITION

"Sec.
"3191. Extradition authority in general.
"3192. Initial procedure.
"3193. Waiver of extradition hearing and consent to removal.
"3194. Extradition hearing.
"3195. Appeal.
"3196. Surrender of a person to a foreign state.
"3197. Receipt of a person from a foreign state.
"3198. General provisions for chapter.

"§ 3191. Extradition Authority in General

"The United States may extradite a person to a foreign state pursuant to this chapter only if—

"(a) there is a treaty concerning extradition between the United States and the foreign state; and

"(b) the foreign state requests extradition within the terms of the applicable treaty.

"§ 3192. Initial Procedure

"(a) IN GENERAL.—The Attorney General may file a complaint charging that a person is extraditable. The Attorney General shall file the complaint in the United States district court—

"(1) for the district in which the person may be found; or

"(2) for the District of Columbia, if the Attorney General does not know where the person may be found.

"(b) COMPLAINT.—The complaint shall be made under oath or affirmation, and shall specify the offense for which extradition is sought. The complaint—

"(1) shall be accompanied by a copy of the request for extradition and by the evidence and documents required by the applicable treaty; or

"(2) if not accompanied by the materials specified in paragraph (1)—

"(A) shall contain—

"(i) information sufficient to identify the person sought;

"(ii) a statement of the essential facts constituting the offense that the person is believed to have committed, or a statement that an arrest warrant for the person is outstanding in the foreign state; and

"(iii) a description of the circumstances that justify the person's arrest; or

"(B) shall contain such other information as is required by the applicable treaty;

and shall be supplemented before the extradition hearing by the materials specified in paragraph (1).

"(c) ARREST OR SUMMONS.—Upon receipt of a complaint, the court shall issue a warrant for the arrest of the person sought, or, if the Attorney General so requests, a summons to the person to appear at an extradition hearing. The warrant or summons shall be executed in the manner prescribed by rule 4(d) of the Federal Rules of Criminal Procedure. A person arrested pursuant to this section shall be taken without unnecessary delay before the nearest available court for an extradition hearing.

"(d) DETENTION OR RELEASE OF ARRESTED PERSON.—

"(1) The court shall order that a person arrested under this section be held in official detention pending the extradition hearing unless the person establishes to the satisfaction of the court that special circumstances require his release.

"(2) Unless otherwise provided by the applicable treaty, if a person is detained pursuant to paragraph (1) in a proceeding in which the complaint is filed under subsection (b)(2), and if, within sixty days of the person's arrest, the court has not received—

"(A) the evidence or documents required by the applicable treaty; or

"(B) notice that the evidence or documents have been received by the Department of State and will promptly be transmitted to the court;

the court may order that the person be released from official detention pending the extradition hearing.

"(3) If the court orders the release of the person pending the extradition hearing, it shall impose conditions of release that will reasonably assure the appearance of the person as required and the safety of any other person and the community.

"§ 3193. Waiver of Extradition Hearing and Consent to Removal

"(a) INFORMING THE COURT OF WAIVER AND CONSENT.—A person against whom a complaint is filed may waive the requirements of formal extradition proceedings, including an order of surrender, by informing the court that he consents to removal to the foreign state.

"(b) INQUIRY BY THE COURT.—The court, upon being informed of the person's consent to removal, shall—

"(1) inform the person that he has a right to consult with counsel and that, if he is financially unable to obtain counsel, counsel may be appointed to represent him pursuant to section 3006A; and

"(2) address the person to determine whether his consent is—

"(A) voluntary, and not the result of a threat or other improper inducement; and

"(B) given with full knowledge of its consequences, including the fact that it may not be revoked after the court has accepted it.

"(c) FINDING OF CONSENT AND ORDER OF REMOVAL.—If the court finds that the person's consent to removal is voluntary and given with full knowledge of its consequences, it shall, unless the Attorney General notifies the court that the foreign state or the United States objects to such removal, order the surrender of the person to the custody of a duly appointed agent of the foreign state requesting extradition. The court shall order that the person be held in official detention until surrendered.

"(d) LIMITATION ON DETENTION PENDING REMOVAL.—A person whom the court orders surrendered pursuant to subsection (c) may, upon reasonable notice to the Secretary of State, petition the court for release from official detention if, excluding any time during which removal is delayed by judicial proceedings, the person is not removed from the United States within thirty days after the court ordered the person's surrender. The court may grant the petition unless the Secretary of State, through the Attorney General, shows good cause why the petition should not be granted.

"§ 3194. Extradition hearing

"(a) IN GENERAL.—The court shall hold a hearing to determine whether the person against whom a complaint is filed is extraditable, unless the hearing is waived pursuant to section 3193. The purpose of the hearing is limited. The court does not have jurisdiction to determine the merits of the charge against the person by the foreign state or to determine whether the foreign state is seeking the extradition of the person for a political offense, for an offense of a political character, or for the purpose of prosecuting or punishing the person for his political opinions. The hearing shall be held as soon as practicable after the arrest of the person or issuance of the summons.

"(b) RIGHTS OF THE PERSON SOUGHT.—The court shall inform the person of the limited purpose of the hearing, and shall inform him that—

"(1) he has the right to be represented by counsel and that, if he is financially unable to obtain counsel, counsel may be appointed to represent him pursuant to section 3006A; and

"(2) he may cross-examine witnesses who appear against him and may introduce evidence in his own behalf with respect to the matters set forth in subsection (d).

"(c) EVIDENCE.—

"(1) a deposition, warrant, or other document, or a copy thereof, is admissible as evidence in the hearing if—

"(A) it is authenticated in accordance with the provisions of an applicable treaty or law of the United States;

"(B) it is authenticated in accordance with the applicable law of the foreign state, and such authentication may be established conclusively by a showing that—

"(i) a judge, magistrate, or other appropriate officer of the foreign state has signed a certification to that effect; and

"(ii) a diplomatic or consular officer of the United States who is assigned or accredited to the foreign state, or a diplomatic or consular officer of the foreign state who is assigned or accredited to the United States, has certified the signature and position of the judge, magistrate, or other officer; or

"(C) other evidence is sufficient to enable the court to conclude that the document is authentic.

"(2) A certificate or affidavit by an appropriate official of the Department of State is admissible as evidence of the existence of a treaty or its interpretation.

"(3) If the applicable treaty requires that such evidence be presented on behalf of the foreign state as would justify ordering a trial of the person if the offense had been committed in the United States, the requirement is satisfied if the evidence establishes probable cause to believe that an offense was committed and that the person sought committed it.

"(d) FINDINGS.—The court shall find that the person is extraditable if it finds that—

"(1) there is probable cause to believe that the person arrested or summoned to appear is the person sought in the foreign state;

"(2) the evidence presented is sufficient to support the complaint under the provisions of the applicable treaty;

"(3) no defense to extradition specified in the applicable treaty, and within the jurisdiction of the court, exists; and

"(4) the act upon which the request for extradition is based would constitute an offense punishable under the laws of—

"(A) the United States;

"(B) the State where the fugitive is found; or

"(C) a majority of the States.

The court may base a finding that a person is extraditable upon evidence consisting, in whole or in part, of hearsay or of properly certified documents.

"(e) CERTIFICATION OF FINDINGS TO THE SECRETARY OF STATE.—

"(1) If the court finds that the person is extraditable, it shall state the reasons for its findings as to each charge or conviction, and certify its findings, together with a transcript of the proceedings to the Secretary of State. The court shall order that the person be held in official detention until surrendered to a duly appointed agent of the foreign state, or until the Secretary of State declines to order the person's surrender.

"(2) If the court finds that the person is not extraditable, it shall state the reasons for its findings as to each charge or conviction, and certify the findings, together with such report as the court considers appropriate, to the Secretary of State. The Attorney General may commence a new action for extradition of the person only with the agreement of the Secretary of State.

"§ 3195. Appeal

"(a) IN GENERAL.—Either party may appeal to the appropriate United States court of appeals, the findings by the district court on a complaint for extradition. The appeal shall be taken in the manner prescribed by Rules 3 and 4(b) of the Federal Rules of Appellate Procedure, and shall be heard as soon as practicable after the filing of the notice of appeal. Pending determination of the appeal, the district court shall stay the extradition of a person found extraditable.

"(b) DETENTION OR RELEASE PENDING APPEAL.—If the district court found that the person sought is—

"(1) extraditable, it shall order that the person be held in official detention pending determination of the appeal, or pending a finding by the court of appeals that the person has established that special cirumstances require his release;

"(2) not extraditable, it may order that the person be released pending determination of an appeal unless the Attorney General establishes to his satisfaction that the person is likely to flee or to endanger the safety of any other person or the community.

If the court orders the release of a person pending determination of an appeal, it shall impose conditions of release that will reasonably assure the appearance of the person as required and the safety of any other person and the community.

"(c) SUBSEQUENT REVIEW.—No court has jurisdiction to review a finding that a person is extraditable unless the person has exhausted his remedies under subsection (a). If the person files a petition for habeas corpus or for other review, he shall specify whether the finding that he is extraditable has been upheld by a court, and, if so, shall specify the court, the date, and the nature of each such proceeding. A court does not have jurisdiction to entertain a person's petition for habeas corpus or for other review if his commitment has previously been up-

held, unless the court finds that the grounds for the petition or appeal could not previously have been presented.

"§ 3196. Surrender of a Person to a Foreign State

"(a) RESPONSIBILITY OF THE SECRETARY.—If a person is found extraditable pursuant to section 3194, the Secretary of State, upon consideration of the provisions of the applicable treaty and this chapter, may—

"(1) order the surrender of the person to the custody of a duly appointed agent of the foreign state requesting extradition;

"(2) order such surrender of the person contingent on the acceptance by the foreign state of such conditions as the Secretary considers necessary to effectuate the purposes of the treaty or the interest of justice; or

"(3) decline to order the surrender of the person if the Secretary is persuaded, by written evidence and argument submitted to him by the person sought, that the foreign state is seeking the person's extradition for a political offense or an offense of a political character, or for the purpose of prosecuting or punishing the person for his political opinions.

The Secretary may order the surrender of a person who is a national of the United States unless such surrender is expressly forbidden by the applicable treaty or by the laws of the United States.

"(b) NOTICE OF DECISION.—The Secretary of State, upon ordering a person's surrender or denying a request for extradition in whole, or in part, shall notify the person sought, the diplomatic representative of the foreign state, the Attorney General, and the court that found the person extraditable. If the Secretary orders the person's surrender, he also shall notify the diplomatic representative of the foreign state of the time limitation on the person's detention that is provided by subsection (c)(2).

"(c) LIMITATION ON DETENTION PENDING DECISION OR REMOVAL.—A person who is found extraditable pursuant to section 3194 may, upon reasonable notice to the Secretary of State, petition the court for release from official detention if, excluding any time during which removal is delayed by judicial proceedings—

"(1) the Secretary does not order the person's surrender, or decline to order the person's surrender, within forty-five days after his receipt of the court's findings and the transcript of the proceedings; or

"(2) the person is not removed from the United States within thirty days after the Secretary ordered the person's surrender.

The court may grant the petition unless the Secretary of State, through the Attorney General, shows good cause why the petition should not be granted.

"§ 3197. Receipt of a Person From a Foreign State

"(a) APPOINTMENT AND AUTHORITY OF RECEIVING AGENT.—The Attorney General shall appoint an agent to receive, from a foreign state, custody of a person accused of a Federal, State, or local offense. The agent shall have the authority of a United States Marshal. The agent shall convey the person directly to the Federal or State jurisdiction that sought his return.

"(b) TEMPORARY EXTRADITION TO THE UNITED STATES.—If a foreign state delivers custody of a person accused of a Federal, State, or local offense to an agent of the United States on the condition that the person be returned to the foreign state at the conclusion of criminal proceedings in the United States, the Bureau of Prisons shall hold the person in custody pending the conclusion of the proceedings, and shall then surrender the person to a duly appointed agent of the foreign state. The return of the person to the foreign state is not subject to the requirements of this chapter.

"§ 3198. General Provisions for Chapter

"(a) DEFINITIONS.—As used in this chapter—

"(1) 'court' means

"(A) a United States district court established pursuant to 28 U.S.C. 132, the District Court of Guam, the District Court of the Virgin Islands, or the District Court of the Northern Mariana Islands; or

"(B) a United States magistrate authorized to conduct an extradition proceeding;

"(2) 'foreign state', when used in other than a geographic sense, means the government of a foreign state;

"(3) 'foreign state', when used in a geographic sense, includes all territory under the jurisdiction of a foreign state, including a colony, dependency, and constituent part of the state; its air space and territorial waters; and vessels or aircraft registered in the state;

"(4) 'treaty' includes a treaty, convention, or international agreement, bilateral or multilateral, that is in force after advice and consent by the Senate; and

"(5) 'warrant', as used with reference to a foreign state, means any judicial document authorizing the arrest or detention of a person accused or convicted of a crime.

"(b) PAYMENT OF FEES AND COSTS.—Unless otherwise specified by treaty, all transportation costs, subsistence expenses, and translation costs incurred in connection with the extradition or return of a person at the request of—

"(1) a foreign state, shall be borne by the foreign state unless the Secretary of State directs otherwise;

"(2) a State, shall be borne by the State; and

"(3) the United States, shall be borne by the United States.".

SEC. 3. This Act shall take effect on the first day of the first month after enactment, and shall be applicable to extradition and rendition proceedings commenced thereafter.

---

## S. 1640—A BILL RELATING TO PROCEDURES FOR INTERCEPTION OF WIRE OR ORAL COMMUNICATIONS

Mr. THURMOND. Mr. President, today I am introducing a bill to establish uniform statutory procedures for the use of surreptitious entries to install court-authorized electronic eavesdropping devices and to provide for emergency interceptions of wire and oral communications in life-endangering situations. These proposals are not new. Similar provisions were considered and reported by the Senate Committee on the Judiciary last Congress as S. 1717 (S. Rept. No. 96-788) and passed by the Senate on June 9, 1981, by voice vote. However, the House failed to act by the end of the last Congress.

This is a bill to continue our efforts to improve and fine tune important legislation as experience is acquired in its operation. The two areas covered by the bill remove language ambiguities in title III of the Omnibus Crime Control and Safe Streets Act of 1968 (18 U.S.C. 2510-2520), the first comprehensive effort to regulate wiretapping and electronic surveillance. First, the measure would require that when a surreptitious entry is necessary for the installation of a court-authorized electronic intercept device, the applicant for the order must so indicate in his application and specify why other means are not feasible to accomplish the objective. The court must then determine whether such an entry is reasonably required to effect the surveillance and, if so, specifically authorize the entry.

Mr. President, I should point out that the Supreme Court in *Dalia* v. *United States*, 441 U.S. (1979), upheld "reasonable" surreptitious entries under the current provisions of title III. There is no doubt about the constitutionality of this type of law enforcement activity. The amendments to current law provisions in this bill, however, improve the eavesdropping situation by enhancing the interest of every citizen in preventing unreasonable and unnecessary violations of individual privacy while promoting law enforcement interests in safeguarding expensive and important investigations from subequent challenge and officials from harassing civil suit.

Finally, the bill would amend 18 U.S.C. 2518 to clearly and unequivocally permit emergency electronic surveillance in life-endangering situations. Inexplicably, the current law does not focus on immediate danger to a person as a basis for an emergency surveillance. As a result, responsible officials have stretched to the limit the scope of the language "conspiratorial activities characteristic of organized crime"—an appropriate basis for an emergency surveillance today—to include life threatening activity. This distortion is unnecessary and an appropriate change should be made. This bill would accomplish that change.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1640

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 2510 of title 18, United States Code, is amended—

(1) in paragraph (10), by striking out "and" at the end thereof;

(2) in paragraph (11), by striking out the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following:

"(12) 'surreptitious entry' means a physical entry upon a private place or premises to install, repair, reposition, replace, or remove any electronic, mechanical, or other device, and includes both covert entry and entry effected by means of a ruse or subterfuge.".

SEC. 2. Section 2518(1) of that title is amended—

(1) in paragraph (e), by striking out "and" at the end thereof;

(2) in paragraph (f), by striking out the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following:

"(g) a statement whether surreptitious entry is required to effect the interception, and if such surreptitious entry is required, a statement as to why means of effecting the interception other than surreptitious entry reasonably appear, if tried, to be unlikely to succeed, to be too dangerous, or to be impracticable.".

SEC. 3. Section 2518(3) of that title is amended—

(1) in paragraph (d), by striking out the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(2) by adding at the end thereof the following:

"(e) where the order is to authorize or approve a surreptitious entry, such surreptitious entry reasonably appears to be required to effect the interception because means of

effecting the interception other than surreptitious entry reasonably appear, if tried, to be unlikely to succeed, to be too dangerous, or to be impracticable.".

SEC. 4. Section 2518(4) of that title is amended—

(1) in paragraph (d), by striking out the "and" at the end thereof;

(2) in paragraph (e), by striking out the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following:

"(f) whether surreptitious entry is authorized or approved to effect the interception; and

"(g) in any order which includes authorization of surreptitious entry—

"(i) the identity of the agency authorized to make the surreptitious entry;

"(ii) in any case in which more than one entry is necessary to install the device, or in which reentry is necessary to repair, reposition, replace, or remove the device, the attorney for the government in charge of the investigation shall, when practicable, notify in writing the authorizing judge prior to such reentry of the reasons which necessitate the reentry, and when prior notice is not practicable, such notification is to be made within forty-eight hours after the reentry and is to describe the reasons which necessitated the reentry and why prior notification was not practicable.".

SEC. 5. Section 2518(7) of that title is amended—

(1) by amending paragraph (a) to read as follows:

"(a) an emergency situation exists that involves—

"(i) immediate danger of death or serious physical injury to any person;

"(ii) conspiratorial activities threatening the national security interests; or

"(iii) conspiratorial actvities characteristic of organized crime;

that requires a wire or oral communication to be intercepted before an order authorizing such interception can, with due diligence, be obtained, and"; and

(2) by inserting a comma and "and may make any surreptitious entry required to effect such interception," immediately before "if an application for an order".

SEC. 6. Section 2519(1) of that title is amended—

(1) by inserting immediately after paragraph (e) the following:

"(f) the fact that a surreptitious entry to effect the interception was authorized or approved, the number of such entries made, and the purpose, either to install, repair, reposition, replace, or remove the interception device for each such entry;"; and

(2) by redesignating paragraphs (f) and (g) as paragraphs (g) and (h), respectively.

SEC. 7. Section 2519(2) of that title is amended in paragraph (a) by striking out "(g)" and by inserting in lieu thereof "(h)".

## RECOGNITION OF SENATOR ROBERT C. BYRD

The PRESIDING OFFICER. Under the previous order, the Senator from West Virginia (Mr. ROBERT C. BYRD) is recognized for not to exceed 10 minutes.

## AN ECONOMIC PLAN BASED ON SHIFTING SANDS

Mr. ROBERT C. BYRD. Mr. President, a week ago last Thursday the Congressional Budget Office released its revised economic forecast in its report to Congress entitled "The Economic and Budget Outlook: An Update." We learned some very interesting and very upsetting things from that CBO report.

Although their new economic assumptions are very close to the revised administration figures, the CBO is still a great distance away from the administration's claim of a balanced budget in fiscal year 1984. The CBO estimates that even under this more optimistic economic scenario the budget will be $50 billion in deficit in fiscal year 1984—$50 billion is a far cry from the balanced budget the administration projects.

Mr. President, it would be good for the sake of this country if the President's economic advisers be right. But they do not give us much, if any reason, to believe that their plan will work. How can we have confidence in a plan—so vital to the well-being of this country—that is based on shifting sands?

CBO essentially includes all of the spending assumptions of the administration and arrives at a fiscal year 1982 deficit of $65 billion, not $42.5 billion as the administration forecasts, an increase of almost $22 billion.

The CBO report cautions that the deficits they are projecting could be even greater unless defense spending is scaled back, more cuts are made in nondefense programs, and/or additional revenues are generated. This is not a very secure base on which our economic recovery should depend.

In testimony before the Senate Budget Committee on September 15, CBO's Director, Dr. Alice Rivlin, included the following table. I ask unanimous consent that the table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 4.—FEDERAL BUDGET OUTLAY ESTIMATES FOR MAJOR PROGRAM CATEGORIES—THE ADMINISTRATION'S JULY ESTIMATES ADJUSTED FOR CBO ECONOMIC ASSUMPTIONS AND ESTIMATING METHODS

[By fiscal year]

| | 1981 | 1982 | 1983 | 1984 |
|---|---|---|---|---|
| | In billions of dollars | | | |
| National defense | 161 | 193 | 226 | 261 |
| Benefit payments for individuals | 316 | 341 | 367 | 393 |
| Net interest | 68 | 81 | 87 | 86 |
| Other Federal operations and grants to State and local governments | 120 | 105 | 103 | 102 |
| Unspecified savings to be proposed by the administration | | | −30 | −44 |
| Additional spending cuts (or revenue increases) to reach administration deficit targets for 1982 to 1984 | | −22 | −32 | −50 |
| Total | 665 | 698 | 721 | 748 |
| | As a percent of GNP | | | |
| National defense | 5.6 | 6.1 | 6.4 | 6.7 |
| Benefit payments for individuals | 11.1 | 10.7 | 10.4 | 10.0 |
| Net interest | 2.4 | 2.6 | 2.5 | 2.2 |
| Other Federal operations and grants to State and local governments | 4.2 | 3.3 | 2.9 | 2.6 |
| Unspecified savings to be proposed by the administration | | | −.8 | −1.1 |
| Additional spending cuts (or revenue increases) to reach administration deficit targets for 1982 to 1984 | | −.7 | −.9 | −1.3 |
| Total | 23.3 | 22.0 | 20.4 | 19.1 |

Mr. ROBERT C. BYRD. I believe the most interesting yet alarming point of this table is that, using CBO's projected fiscal year 1984 deficit, $94 billion would have to be cut in fiscal year 1984 to balance the budget.

If, as the President has previously promised, there would be no more cuts in defense and entitlement programs, there is only $102 billion from which to cut $94 billion in fiscal year 1984. That means no more highways, no more water projects, no more agricultural programs; it means virtually no more of the so-called discretionary programs.

Congress and the American people were told that if the President's economic plan was given a chance, the economy could be turned upright. But the President had to receive his entire package.

Well, the Congress enacted the entire package.

The President asked for drastic cuts in domestic spending. In July Congress passed an Omnibus Reconciliation Act that gave the President the amounts he asked for. While all the cuts were not in the exact programs targeted by Mr. Stockman, the total dollar savings requested from the Congress was achieved.

These cuts were necessary to get control over the budget deficits—to bring the budget into balance. However, while reconciliation was being considered, the need for additional savings began to surface from the administration. I doubt that many of my colleagues were aware that the cuts would not stop with reconciliation.

Additional savings of $15 billion in fiscal year 1982 and $50 billion in fiscal year 1984 were included in the fiscal year 1982 first budget resolution. At that time, $28 billion of the additional cuts in fiscal year 1984 was "unidentified." Now the administration has increased "unidentified cuts" to $44 billion. When does this stop?

The CBO projections include the assumed $44 billion in unidentified cuts in fiscal year 1984 and their projections still forecast a $50 billion deficit in fiscal year 1984. Also, CBO has included the administration's assumed cuts in social security. Although the President may be willing to cut social security, I do not believe the Congress will be willing to break faith with the retirees of this country.

We were told that we had to give the President his tax cut if his economic plan was going to work.

Well, Congress did that. He was given his tax cuts. He was given his budget cuts.

Democrats cautioned that the tax cut was too large. We warned against mortgaging 3 years of the Nation's future without knowing how the economy would respond. But we were outvoted. The Congress gave the President his tax cut.

Now, less than a month since the Pesident signed the bill into law, there is talk of tax increases because the cut is too deep to be sustained and achieve a balanced budget. These concerns are

further complicated by CBO's revenue projections, which are lower than the administration's by about $7 billion in fiscal year 1982 and $11 billion in fiscal year 1984.

A third part of the plan was increased defense spending. We were told that we could have huge increases in our defense spending when we satisfied the spending cuts and tax cut pieces of the plan.

The fiscal year 1982 first budget resolution, which sets congressional spending priorities, provides for the increase in defense spending that we all want. But now the administration has told us we will have to cut the defense budget.

In February and March we were told one thing; in June and July we were told something else; and now in September we are being told something else again. The September changes are taking place on an almost daily basis. Yesterday, we learned that it is very likely that administration promises will be broken again.

On Tuesday, the White House announced there would be no additional cuts to social security. But on Thursday—only 2 days later—we received reports that the White House would recommend that the cost-of-living adjustment for social security and other entitlement programs be deferred. This is a cut in social security. And, it is a cut in entitlement programs.

Not only is it a social security cut, it is a change in the COLA. I have a letter, dated May 6, 1981, from Mr. Stockman and Secretary Regan that explicity states the President was opposed to changing the social security COLA as a budget savings measure. I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,

*Washington, D.C., May 6, 1981.*

Hon. ROBERT C. BYRD,
*Democratic Leader,*
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR BYRD: Thank you for the opportunity to provide the Administration's position concerning changes in cost-of-living adjustments (COLA's) for income security programs adopted by the Senate Budget Committee (the Hollings Amendment). These changes would:

Make COLA adjustments on the basis of the lower of the CPI or average wage increases, and

Shift COLA adjustment dates beginning in calendar year 1982 from July to October for OASDI, Railroad Retirement, SSI and Veterans; from April to October for civilian retirement; and March to October for military retirement.

In response to your specific questions we would offer the following guidance:

(1) The President has opposed changing the current CPI-based cost-of-living adjustment formula in Social Security as a budget savings measure. That position has not changed.

(2) The Administration does recognize the impending solvency problems of the Social Security Trust Fund. Significant savings are needed and Secretary Schweiker has promised the relevant Congressional Committees a package of reforms designed to maintain solvency of the Fund. As a practical matter, these changes would reduce current law outlays in the income security function by a magnitude sufficient to achieve the First Concurrent Resolution ceilings.

(3) For these reasons, we believe the outlay totals in the resolution reported by the Senate Budget Committee can be achieved. We would therefore not support amendments causing a net increase in the outlay levels provided in the resolution.

Sincerely,

DAVID A. STOCKMAN,
*Director.*

DONALD T. REGAN,
*Secretary of the Treasury.*

Mr. ROBERT C. BYRD. Why is this necessary?

We have given the President all that he wanted for his economic recovery plan.

We gave him the domestic spending cuts;

We gave him the tax cut;

We gave him the defense spending increase;

We gave him a budget resolution that was essentially based on his economic assumptions; and

We gave him a chance to identify the cuts assumed in his fiscal year 1984 budget.

On several recent occasions—August 13 and September 9—the President has said that the increased Federal deficits were due in large part to his administration not getting totally what he asked for.

It is time the administration stopped trying to find someone or something else to blame. It is now in its eighth month in power and it is time for the administration to take a realistic look at its economic forecast—and that it reexamine its interest rate assumptions. For example, CBO's projected interest rate is 2 percentage points higher than the administration's in fiscal year 1982, and more than 3 percentage points higher in fiscal year 1984. Interest assumptions alone could add about $40 billion to spending estimates over the fiscal year 1982–84 period. These sorts of discrepancies go beyond a tolerable forecasting range.

Mr. President, it does not appear that the budget can be balanced because of the Kemp-Roth tax cut. The administration should concede that it made a mistake with Kemp-Roth.

Mr. President, I yield such time as I have remaining to the distinguished Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, how much time do I have?

The PRESIDING OFFICER. There are 10 minutes remaining.

Mr. PROXMIRE. I thank the Chair.

---

## FCC PROPOSED REPEAL BY CONGRESS OF EQUAL TIME RULE AND FAIRNESS DOCTRINE MAKES EMINENT SENSE

Mr. PROXMIRE. Mr. President, this morning's Washington Post carries the welcome news that the FCC has asked Congress to repeal the so-called fairness doctrine and equal time rule.

I think that is good news. People say, what is wrong with fairness, what is wrong with the equal time rule?

I applaud that decision. I do so for a host of reasons. Earlier this year, I introduced S. 22, the First Amendment Clarification Act, which would do exactly what the FCC now recommends; namely, abolish the fairness doctrine and the equal time rule.

My bill is similar to a measure I first introduced in 1975 and again in 1977 and 1979.

Mr. President, the preferred source of news for 87 percent of the American people is radio and television. Yet, because of the fairness doctrine, the equal time rule, and other governmental controls, broadcasters are second-class citizens when it comes to first amendment rights.

Anybody who proposed that we require the newspapers to be subject to the fairness doctrine and the equal time rule would get short shrift in this body or anywhere else in the country because it would be such a clear abridgment of first amendment rights.

As I pointed out, radio and television are overwhelmingly the source of news for Americans. This means our first amendment is only about 13-percent effective when it comes to freedom of the press. Obviously, we can and must do better.

What my bill would do and what the FCC now proposes is to end both the equal time rule and the fairness doctrine.

The equal time rule requires that when a candidate for public office is given or sold time, any other candidate for that same office must be given an equal opportunity.

That sounds great. But the equal time rule is an abridgment of the first amendment. It is governmental control over a part of the free press.

The fairness doctrine of the Federal Communications Commission requires that broadcasters afford reasonable opportunities for the presentation of contrasting viewpoints on controversial issues of public importance.

Unlike the equal time requirement, the fairness doctrine does not call for each viewpoint to receive an equal amount of air time, nor does it require that the other viewpoint be given in the same program.

Again, that sounds fine. But the fairness doctrine, like the equal time rule, violates the first amendment. Once more, a segment of the free press is being regulated by the Government.

Why is my legislation necessary and, indeed, crucial? Why should Congress move ahead promptly to repeal the fairness doctrine and equal time rule, as the FCC yesterday recommended?

Mr. President, there are many reasons. Let me cite some of them.

First, these governmental controls on the free press are unconstitutional. They violate the first amendment's guarantee of freedom of the press.

Second, this kind of governmental regulation is unnecessary. Newspapers,

operating without governmental control, have improved vastly in fairness, objectivity, accuracy, and relevance over the years. Broadcasters deserve that same opportunity to be free.

Mr. President, I have made a study of newspapers for the last 30 years as part of a dissertation I never finished for my doctorate at Harvard. There is one thing I am absolutely sure of and that is our newspapers are the best in the world and have enormously improved, largely, I think, because they have been free to do so.

Third, denying broadcasters their first amendment rights is self-defeating. The fairness doctrine, for example, does not stimulate the free expression of diverse ideas. Rather, it promotes the "sameness" of ideas. Stations avoid the airing of controversial issues because they fear a challenge to their license renewal or expensive litigation resulting from a fairness complaint.

Fourth, governmental controls like the fairness doctrine and the equal time rule are dangerous. Letting government be the final arbiter of "fairness," for example, confers immense power. This is especially true when that same government decides on the granting of broadcast licenses.

Finally, those who favor continuing governmental regulation of the broadcasting media rely on an argument that is fast becoming obsolete—the so-called scarcity rationale. In almost every city in America—regardless of size—there are more television signals available than daily newspapers. If radio stations are counted, as they must be, general audience broadcasting stations far outnumber general circulation newspapers. Moreover, economic pressures make it nearly impossible to establish a daily newspaper in a community where one already exists.

To quote this morning's Washington Post article to which I referred at the outset of my remarks, FCC Chairman Mark Fowler "argued that with the growth of radio, the development of cable television, satellites, tapes, and other new media forms, there are far more broadcast outlets in communities around the country than newspapers."

Mr. President, Chairman Fowler is right on target in making that observation.

The Washington Post further reports that, "The opposition of Fowler and the rest of the Commission majority to the laws is based on the fact that the members believe the medium is no longer one bounded by scarce resources."

Mr. President, that statement from the Washington Post article says it all. The fairness doctrine and the equal time rule are outdated relics from an earlier day.

The time is long past due when the Congress should recognize, as the FCC has done, that the fairness doctrine and equal time rule should go.

I salute the FCC for its action yesterday in asking the Congress to repeal both the fairness doctrine and the equal time rule.

I urge my colleagues to move ahead quickly in acting on this FCC recommendation, which will benefit not just broadcasters, but all Americans.

Mr. President, I repeat, freedom of the press is for the benefit of all Americans, not just broadcasters. If television and radio, the most popular disseminators of news and opinion, continue to be tied down by governmental controls like the fairness doctrine and the equal time rule, the people of this Nation will continue to be the losers.

Mr. President, I ask unanimous consent that the article from this morning's Washington Post, discussing the FCC's recommendation that we abolish the fairness doctrine and equal time rule, be placed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FCC PROPOSES REPEAL BY CONGRESS OF EQUAL-TIME, FAIRNESS PROVISIONS

(By Merrill Brown)

The Federal Communications Commission, reflecting the impact of its new Reagan appointees, asked Congress yesterday to repeal the Fairness Doctrine and equal-time rules that govern the nation's broadcasting industry.

The recommendations represent the first time in the 47-year history of the Federal Communications Act that the FCC has sought to end the rules that are the basis for the agency's handling of political fairness and campaign issues. The vote was 4 to 2.

It is uncertain whether Congress will act on the commission recommendations. There was no immediate comment from the Senate's Republican leadership. However, Rep. Timothy Wirth (D-Colo.), chairman of a House telecommunications subcommittee, said the FCC is "wrong" to consider these issues as "simple deregulation measures," adding that the equal-time law and Fairness Doctrine are unlikely to be quickly abolished by Congress.

FCC Chairman Mark Fowler, a lawyer for Ronald Reagan's 1976 and 1980 campaign organizations, said the two provisions were based on "bankrupt concepts." Fowler said the "time has come to eliminate a large burden on freedom of speech."

The broadcasting industry has for many years argued that the laws deny the free-speech rights granted newspapers under the First Amendment. A spokesman for the National Association of Broadcasters hailed yesterday's commission action.

But the action drew sharp criticism from citizen groups and others. The two laws "enhance the First Amendment by giving people holding dissenting or not widely held viewpoints an opportunity to express them," said Andrew Jay Schwartzman, director of the Media Access Project, and a spokesman for a coalition fighting the proposal. The group includes the United Auto Workers, the National Citizens Committee for Broadcasting and the Office of Communications of the United Church of Christ.

Arthur Ginsburg, who left his post as chief of the FCC's Complaints and Compliance Division last year after 20 years with the agency, called the action a "sham and a fraud that plays upon the public's ignorance."

"If you wipe out the Fairness Doctrine, the richest and most powerful organizations will have their say and you'll never hear the other side of a particular issue," said Ginsburg, now a visiting professor of journalism at the University of Texas.

In essence, the issue in the debate is the government's role in regulating the over-the-air content in radio and television. The historic premise of the two laws is the notion of "scarcity," the view that since the broadcast spectrum is limited, the government has a major role to play in insuring that the electronic media carry multiple points of view.

The Fairness Doctrine requires broadcasters to air controversial topics and to present differing viewpoints, and the equal-time law forces licensees who put candidates on the air to grant equal opportunities to other candidates for the office.

In addition, the FCC voted to ask Congress to repeal a provision of the Communications Act that specifically guarantees broadcast time to candidates for federal office, a provision certain to rankle congressional leaders. Further, the commission agreed to recommend that the Justice Department, rather than FCC regulators, investigate obscenity, lottery and fraud charges against broadcasters.

The actions are the clearest statement yet by the leadership of a newly revamped FCC of the intention to combine free-market economics with broadcast deregulation.

"It's right for the country," Fowler said. "I'm proud of this commission . . . ."

The opposition of Fowler and the rest of the commission majority to the law is based on the fact that the members believe the medium is no longer one bounded by scarce resources.

Fowler argued that with the growth of radio, the development of cable television, satellites, tapes, and other new media forms, there are far more broadcast outlets in communities around the country than newspapers.

But Commissioners Joseph Fogarty and Abbott Washburn disagreed. Fogarty noted that his home does not have access to cable or any of the new distribution technologies.

## CAMBODIAN BALLET TROUPE SURVIVES HORROR

Mr. PROXMIRE. Mr. President, I call the Senate's attention to the cultural enrichment added to our Nation's performing arts this year by the Royal Cambodian Ballet. This troupe, which is composed of Cambodian refugees, has brought a unique and beautiful art to our country's stages—that of Cambodian classical ballet. They have given public performances at Wolf Trap Farm Park and at the Library of Congress to share their gifts with their new countrymen.

We are indeed fortunate to be able to enjoy the thousand-year-old ethnic tradition which these refugees offer us. Our Nation's cultural heritage has been created over the centuries through the contributions of many nationalities and ethnic groups. The diversity of our backgrounds is the source of our cultural richness, and we are happy to welcome the art of our newest Americans to our wealth of ethnic tradition.

Yet these refugees were fortunate to escape not only with their art, but also with their lives. As Cambodians educated in their country's classical tradition, their continued survival there was in peril. Disguising their identities, they fled from one of the most horrible bloodbaths mankind has witnessed. Many of the group were executed or starved along the way. Only a few months ago did the survivors reach the safety of the United States.

The story of this Cambodian ballet troupe underscores the need for ratification of the Genocide Convention. Just as our Nation is enriched by each of the peoples it includes, so the world com-

munity is enhanced by the contribution of every group of people, regardless of their ethnic background or religion. The loss of any such group deprives every nation of part of its heritage as a human community.

That is why the Genocide Convention is so very vital. It addresses at an international level a human right which has international ramifications—the right of all peoples to live. Our ratification of that treaty would demonstrate that the United States not only values all human life, but that it will act to defend that right.

We recognize that our interests do not end at our national borders. We must acknowledge that our responsibilities are international as well. I urge my distinguished colleagues to accept those responsibilities and to ratify the Genocide Convention.

## RECOGNITION OF SENATOR BENTSEN

The PRESIDING OFFICER. The Senator from Texas is recognized.

## HIGH INTEREST MORTGAGE RATES

Mr. BENTSEN. Mr. President, a few days ago, I made a trip to Boston to appear before the National Association of Homebuilders. I did it because I am concerned with what is happening to homeowners in this country. It was just a few years ago when we had—it is hard to remember that—a 4-percent rate on home mortgages. Now we have seen the rate go up 4 percent in a year. What has happened is that the dream of homeownership is just eluding the grasp of the average couple starting out today. Today, there are only one out of five young couples who can afford the mortgage on a home.

We have a situation where, I can recall, when I got out of World War II, my wife and I wanted to build a home, and we had something called the GI bill that would help you qualify for a loan. That does not work today. Except the GI does if you are fortunate enough—that means, generous in-laws. If you do not have generous in-laws, you just cannot cut it with this kind of situation.

Mr. President, there is an incredible difference in that monthly payment depending on what that interest rate is. For example, the average-priced home today and take a 30-year mortgage and suppose you had an 8-percent rate or you had a 16-percent rate. It means about $350 a month difference in that payment.

How do these young people decide to buy a home? They do not look so much at the price tag overall on that home, but they decide, "Can I take that monthly payment they are talking about with that mortgage and can I fit it into this paycheck and can I have enough left over to live on?" That is how they decide to buy a home. Today, they just cannot cut it. They cannot make that.

What do we do about it? We have a conflicting problem here. When we talk about trying to get these rates down, we want to be sure that at the same time, we are not causing a substantial increase in inflation. It is awfully easy to criticize the Fed, but in this situation, I think I can do it and offer a reasonable alternative.

Mr. President, we see a situation now where one big company is buying another large company. We see a situation where du Pont is buying Conoco.

See them tie up $7 billion worth of credit in an afternoon. See the syndication put together to do that. See Seagram turn around and decide they are going to buy Conoco, and they get into a bidding contest, and finally they end up in the catbird seat because they own more of du Pont than the du Ponts own now. I am not sure how well alcohol and oil mix. I am not sure how much synergism there is in that. I really doubt that even one barrel of oil will be added to production by that kind of purchase.

I am not faulting them over it. If they want to have a bigger company and get some gratification from that, that is up to them. But it is the wrong time for that. I believe the timing is bad.

Take a situation in which small business cannot borrow money at 22 percent or 23 percent interest, with a compensating deposit and whatever else is tied to it.

The true interest rate will get up to 24 percent or 25 percent. Which small business has that kind of margin or can say to the consumer, "You have to eat that?" They cannot do it. So we are seeing an increase in bankruptcies among small businesses.

We have the problem of a farmer who goes out to buy a tractor which has escalated in cost by an incredible amount. He decides that he has to get along with the old one or get out of the business.

In Dalhart, Tex., which is not a large town, not really a large farming community, more than a hundred farms are now listed for auction this fall. People are selling out. They are getting out of the farming business. One of the biggest problems they have is what is happening to the interest rates.

When large corporations can put together $7 billion in an afternoon or already have commitments of $50 billion to $70 billion for acquisitions or to fend off acquisitions—that is what the reports are now—we are really looking at the tip of the iceberg.

I have sat on the boards of some major corporations in this country. You get into a situation in which the financial officers in all these big companies are looking at all the balance sheets and trying to decide, "We can buy this one. This one is selling below book value, so we can buy this company cheaper than we can buy the new equipment."

Does anyone think that really adds to productivity? No. They are not going to buy the new equipment on that basis. They say, "We can borrow that money, and we can get the New York banks to put together a syndication for us to do it."

I believe it is time the Federal Reserve Board called in the New York banks and said, "Gentlemen, let's cool it. This is not the time to be competing with the small businessman for those funds. This is not the time to be competing with the homebuyer for those funds. This is not the time to be competing with the farmer and the rancher who are hanging on by their fingernails."

Am I proposing something radical, something never tried before? No. That was done back in 1974, when the Federal Reserve Board called in the big banks and said:

> Gentlemen, here are some guidelines, and you had better comply with them. We're not going to have you funding major speculative loans. We're not going to have you funding a situation where a company is trying to buy its own stock. We're not going to have you funding something where, for your own gratification, you want to acquire another company that has no synergism, no increase in productivity. This is not the time for it.

That is just what they did. They held off. So, what did the banks do? It really is not a problem imposed on those banks. They just call in their top customers and say, "Gentlemen, we would like to make this kind of loan, but this is not the time for it. You'll have to put that off. If you want to buy some new equipment, if you want to increase productivity, if you want to do something to stimulate this economy, which will increase productivity—and that is one of the ways you stop inflation—then we will make you those loans. Otherwise, we're going to have more money available for small business and for the farmer and the homeowner, and we're going to try to make the dream come true for these young people who want to buy a home."

The people in the Treasury are not just those from this administration. Some of these people go on from one administration to the other. The Senator from Louisiana (Mr. LONG) calls them "the Lilliputians over there." No matter how big a man you put in as head of the Treasury or some of the other officers, they sort of get their hands tied by this set way of thinking. There are fellows over there who think it is not productive to buy a home, that it is not a productive use of capital.

Well, I believe it is a great social objective for our country. In the last 40 years, we have increased homeownership in this country from 40 percent to 65 percent.

People who own homes do not burn them down. People who own homes are interested in how the schools are working in that area. People who own homes have the kind of stability which results in a concern about the tax structure in that area, and they will try to see that there is fair administration of it and that there is equity.

So I believe that is a great social objective for our country, and we should try to promote it and continue it. That is one of the differences we have with respect to many other countries around the world.

So, Mr. President, here is a positive, affirmative proposal to try to cut back on some of the competition for capital in this country, particularly the competition that is not adding to productivity.

Maybe it allows more accumulation of jets for an executive group. Also, they

now have something called the golden parachute. That is when the executives of a major company who think they are about to be taken over by some other major company get the board together and say, "Fellows, you know, I may lose my job in this field. So what I would like you to do is this. If somebody else gets as much as 25 percent of this company, then I want you to vote me a 5-year contract or a 10-year contract at my present wage. Also, I'd better take care of the fellows around me, so I want you to do that for six vice presidents."

That is a great defense of the stockholders. Those executives do not have themselves in mind. They are really trying to do something that will help their stockholders. That is part of the parcel we are seeing today in some of these acquisitions and mergers.

So, Mr. President, now is the time to cool it. Let us back off from that. We have a situation in which farmers do not have that golden parachute. Farmers are having trouble marketing their crops, getting a reasonable return, and interest rates are adding to that cost.

If you cool that kind of competition for funds, there is nothing inflationary about that. All that means is that capital is going to a more productive use. That is what I urge.

I have submitted a Senate resolution with a number of cosponsors. I wish the Presiding Officer, the Senator from Mississippi (Mr. COCHRAN), would take a look at it, and I wish other Members of this Senate would take a look at it, because it deals with something affirmative and does not simply try to cast aspersions on the operation of everything, without any solution. It is a positive, affirmative action the Federal Reserve Board can take.

I think it will help. I think it is also important that we use it for the purpose of affecting the situation and effecting the situation where the people of this country will understand that we are trying to do something in a very positive manner to help with these burdensome interest rates.

Mr. President, I yield back the remainder of my time.

## ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business.

Mr. BENTSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

## EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations on the calendar commencing with Calendar No. 460, Department of Energy.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object——

Mr. STEVENS. Mr. President, I withdraw that. I ask unanimous consent that we go into executive session for the purpose of considering the nominations on the calendar beginning with Calendar No. 458, Inter-American Development Bank.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that all nominations on the calendar beginning with Calendar No. 458 on pages 2, 3, 4, 5, and 6, down to and including all the nominations on the Secretary's desk be considered and confirmed en bloc and a motion to reconsider those nominations en bloc be in order.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, those nominations have been cleared on this side of the aisle. There is no objection to the consideration and confirmation of the nominees involved.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

INTER-AMERICAN DEVELOPMENT BANK

Jose Manuel Casanova, of Florida, to be Executive Director.

DEPARTMENT OF ENERGY

Guy W. Fiske, of Missouri, to be Under Secretary of Energy.

William Addison Vaughan, of Michigan, to be an assistant Secretary of Energy (Environmental Protection, Safety and Emergency Preparedness).

Rayburn D. Hanzlik, of California, to be Administrator of the Economic Regulatory Administration.

DEPARTMENT OF THE INTERIOR

Dallas Lynn Peck, of Virginia, to be Director of the Geological Survey.

Robert Carlton Horton, of Colorado, to be Director of the Bureau of Mines.

U.S. AIR FORCE

Lt. Gen. John G. Albert, U.S. Air Force, (age 58), for appointment to the grade indicated pursuant to the provisions of title 10, United States Code, section 8962; to be lieutenant general on the retired list.

The following permanent professor for reappointment to the Active Duty List of the Regular Air Force, in accordance with section 531, title 10, United States Code, in the grade indicated, under the provisions of section 601, title VI, Transition Provisions, Defense Officer Personnel Management Act of 1980.

LINE OF THE AIR FORCE

Badgett, Lee D., [redacted] to be colonel, Regular Air Force.

U.S. ARMY

The following-named officers under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

Maj. Gen. Jack Vincent Mackmull, [redacted] U.S. Army, to be lieutenant general.

Maj. Gen. Donald Edward Rosenblum, [redacted] U.S. Army, to be lieutenant general.

Maj. Gen. Howard Francis Stone, [redacted] Army of the United States (brigadier general, U.S. Army), to be lieutenant general.

Maj. Gen. James Benjamin Vaught, [redacted] U.S. Army, to be lieutenant general.

Lt. Gen. William Rowland Richardson, [redacted] Army of the United States (major general, U.S. Army), to be Senior Army Member of the Military Staff Committee of the United Nations under the provisions of title 10, United States Code, section 711.

The following-named officer under the provisions of title 10, United States Code, sections 3036, 3066, 3284, and 3307 to be assigned as the Surgeon General, U.S. Army, a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

Maj. Gen. Bernhard Theodore Mittemeyer, [redacted] Army of the United States (colonel, U.S. Army, Medical Corps), to be lieutenant general, Army of the United States and major general, U.S. Army.

Maj. Gen. John Nelson Brandenburg, [redacted] U.S. Army, under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade indicated, to be lieutenant general.

Lt. Gen. Charles Calvin Pixley [redacted], (age 57), Medical Corps, Army of the United States (major general, U.S. Army), to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 3962, to be lieutenant general.

U.S. NAVY

The following named reserve captains of the line and staff corps of the Navy for temporary promotion to the grade indicated, subject to qualification therefor as provided by law:

LINE

LeRoy Vincent Isaacson, Vincent Joseph Anzilotti, Jr., Francis Neale Smith, and George Clark Sayer, to be rear admiral.

MEDICAL CORPS

John Peter Connelly, to be rear admiral.

SUPPLY CORPS

Delbert Harry Beumer, to be rear admiral.

INTERNATIONAL ATOMIC ENERGY AGENCY

W. Kenneth Davis, of California, to be the Representative of the United States of America to the 25th Session of the General Conference of the International Atomic Energy Agency.

Richard T. Kennedy, of the District of Columbia, Roger Kirk, of the District of Columbia, and Thomas M. Roberts, of Tennessee, to be an Alternate Representative of the United States of America to the 25th Session of the General Conference of the International Atomic Energy Agency.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, NAVY AND MARINE CORPS

Air Force nominations beginning Jose E. Calzada, to be major, and ending Bobby C. Springer, to be first lieutenant, which nominations were received by the Senate and appeared in the Congressional Record of July 31, 1981.

Air Force nominations beginning George W. Beddingfield, to be colonel, and ending Melvin B. Emmons, to be colonel, which nominations were received by the Senate on August 11, 1981, and appeared in the Congressional Record of September 9, 1981.

Army nominations beginning Ray A. Strawser, to be colonel, and ending Henry S. Maerki, Jr., to be major, which nominations were received by the Senate and appeared in the Congressional Record of July 31, 1981.

Army nominations beginning Marvin G. Back, to be colonel, and ending Joe T. Skidmore, to be lieutenant colonel, which nominations were received by the Senate on August 11, 1981 and appeared in the Congressional Record of September 9, 1981.

Navy nominations beginning Iffat A. Abbasi, to be lieutenant commander, and ending Jeri M. Rigoulot, to be lieutenant commander, which nominations were received by the Senate on August 11, 1981, and appeared in the Congressional Record of September 9, 1981.

Navy nominations beginning John R. Aguilar, to be commander, and ending Craig L. Majkowski, to be lieutenant (j.g.), which nominations were received by the Senate on August 11, 1981, and appeared in the Congressional Record of September 9, 1981.

Navy nominations beginning Robert Waugh Aldinger, to be captain, and ending James Wallace Moor, to be captain, which nominations were received by the Senate on August 11, 1981, and appeared in the Congressional Record of September 9, 1981.

Navy nominations beginning Steven C. Streck, to be lieutenant commander, and ending Jon G. Motter, to be ensign, which nominations were received by the Senate on August 28, 1981, and appeared in the Congressional Record of September 9, 1981.

Navy nominations beginning Billy J. Archer, to be ensign, and ending Zein E. Obagi, to be commander, which nominations were received by the Senate on August 28, 1981, and appeared in the Congressional Record of September 9, 1981.

Marine Corps nominations begining George L. Alvarez, to be lieutenant colonel, and ending Robert A. Zink, to be chief warrant officer, which nominations were received by the Senate and appeared in the Congressional Record on July 31, 1981.

Marine Corps nominations beginning Anthony E. Agrue, to be first lieutenant, and ending John R. Zimmerman, to be first lieutenant, which nominations were received by the Senate on September 4, 1981, and appeared in the Congressional Record of September 9, 1981.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominees.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATIONS OF GUY W. FISKE, WILLIAM A. VAUGHAN, RAYBURN HANZLIK, ROBERT C. HORTON, AND DALLAS L. PECK

● Mr. McCLURE. Mr. President, on September 16, the Committee on Energy and Natural Resources favorably reported the following nominations for positions in the Department of Energy and the Department of the Interior:

Guy W. Fiske, to be Under Secretary, DOE.

William A. Vaughan, to be Assistant Secretary for Environmental Protection, Safety and Emergency Preparedness, DOE.

Rayburn Hanzlik, to be Administrator of the Economic Regulatory Administration, DOE.

Robert C. Horton, to be Director, U.S. Bureau of Mines, DOI.

Dallas L. Peck, to be Director, U.S. Geological Survey, DOI.

The vote on each nominee was 17 to 0. The committee's vote followed a nomination hearing held on September 14.

Mr. President, I am pleased to note that each of the nominees is very well qualified for the position to which he has been nominated. During the hearing on their nominations, the professional qualifications of the nominees were briefly described, as follows:

Guy W. Fiske:

Mr. Fiske has been a business executive for over 30 years. He has served as Executive Vice President and Director of General Dynamics Corporation since 1977. For nine years he was employed by International Telephone and Telegraph Corporation. Mr. Fiske was a Vice President of ITT, and he also served in a number of executive positions in ITT's international operations. From 1949 to 1968, Mr. Fiske was employed by the General Electric Company.

William A. Vaughan:

Since 1970, Mr. Vaughan has been employed by General Motors Corporation. For six years, he served on GM's legal staff, and since 1976 he has held the position of Director, Energy Management, Manufacturing Staff. Prior to joining GM, Mr. Vaughan served for ten years on the faculty of the Virginia Military Institute.

Rayburn Hanzlik:

Mr. Hanzlik is an attorney whose career has been a combination of private law practice and Government service. As an attorney in private practice, he has had extensive experience in a variety of energy-related areas. For example, he has served as legal advisor for an Alaska oil refinery project, and as counsel to the Japanese Government on U.S. nuclear energy policy. Mr. Hanzlik has also had several positions on the White House staff, including Associate Director for Intergovernmental Relations, White House Domestic Council (1976–1977), and Director 1971 White House Conference on Youth.

Robert C. Horton:

Since 1976, Mr. Horton has been employed by Bendix Field Engineering Corporation as the Director of the Geologic Division. For ten years, Mr. Horton has employed by the Nevada Bureau of Mines either as Associate Director or as a mining engineer. He has also served as an officer of two petroleum exploration and drilling companies, and he has been self-employed as both a geologist and a mining consultant.

Dallas L. Peck:

For virtually his entire career, beginning in 1951, Dr. Peck has been a geologist with the U.S. Geological Survey. He has served as Chief Geologist since 1977. Dr. Peck's career with the Geological Survey has consisted of an impressive variety of duties and special asignments. He engaged in geologic exploration in Oregon in the 1950's, in Hawaii in the 1960's, and in California in the 1970's. He has served as a technical advisor to a number of science organizations, including the National Science Foundation and the National Research Council. Dr. Peck has also participated in at least eight international conferences on such subjects as geothermal power and volcano energy.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I am pleased to recommend Senate approval of the Presidential nominations of Guy W. Fiske, William A. Vaughan, Rayburn Hanzlik, Robert C. Horton, and Dallas L. Peck.●

## LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SOVIET ACTIVITIES IN AFRICA

Mr. THURMOND. Mr. President, I rise to call to the attention of the Senate the Evans and Novak column in today's issue of the Washington Post newspaper entitled "Moscow's Designs on Africa."

Mr. President, this column brings to the public's attention the increased Soviet effort to bring down South Africa and Namibia. This effort is becoming a major military operation through supply of heavy arms to Angola and the participation of an estimated 6,000 Soviet, East German, and Cuban military advisers. Two Soviet advisers were killed in fighting there in August.

In contrast, little is heard in the United Nations or elsewhere, including the American press, about this high-powered drive to expand Communist control throughout Africa. However, the press seems to overflow with articles when the United States sends a few advisers to El Salvador in an effort to permit the Government there to stabilize the situation and to conduct free elections.

The Senate, the Congress, and the American press should highlight the dangers of Soviet expansionism in Africa. This is a mineral rich continent, and of the 37 minerals regarded as essential in a modern society, America imports more than 50 percent of 23 kinds, most of which come from Africa.

The importance of South Africa to our economic well-being is obvious. A House subcommittee which conducted a study on this subject found that if South Africa's mineral riches fell into Soviet hands "the Western world could be forced to its knees in 6 months."

For instance, South Africa produces 75 percent of the free world's manganese. There is no adequate substitute for manganese in steelmaking and the United States is practically 100 percent import dependent on South Africa's supply.

This area's mineral wealth not only supplies our economy, but many of these minerals are vital to our defense industry. If the United States were to be denied certain key minerals such as South Africa's platinum, chrome, or manganese resources the impact on production of defense weapon systems would be severe.

Mr. President, the Soviets have ample supplies of most of these minerals. It is obvious that their onslaught in Africa is directed at the deprival of precious metals and minerals to the West. They have made significant inroads, as today we have Marxist dominated governments in Angola, Libya, Mozambique, Ethiopia, Zambia, Zimbabwe—formerly Rhodesia—and the Central African Republic.

Mr. President, I urge that my colleagues read this article. We must support our friends in South Africa and elsewhere against Soviet expansionism. It is the right thing to do, and it serves our best interests to do so.

Mr. President, I ask unanimous consent that this article by Mr. Evans and Mr. Novak be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 18, 1981]

MOSCOW'S DESIGNS ON AFRICA

(By Rowland Evans and Robert Novak)

The death of two Russian officers in South Africa's raid against SWAPO military installations in southern Angola last month is evidence that Moscow seeks to transform black Africa guerrilla actions into a conventional war capability against South African-controlled Namibia and eventually South Africa itself.

Moscow has been an arms supplier for several years to guerrilla forces of the South West Africa People's Organization. SWAPO has used these arms from bases in southern Angola to strike against South Africa in the waning days of its rule in Namibia before that former German colony gets its independence.

The forbidding new element in Soviet plans: conventional warfare capability against South Africa by integrating SWAPO's guerrillas and forces of the Soviet-backed regime in Angola.

At the same time, the Russians seek to divert South Africa from its problems in pre-independence Namibia by opening up a second anti-South Africa front from Mozambique. Mozambique borders South Africa on the Indian Ocean, far east of Namibia.

The fact that two Soviet lieutenant colonels—named Kireev and Lamonavich—were killed in last month's South African raid against SWAPO guerrilla installations points to Soviet integration of SWAPO and Angolan forces. Soviet, Cuban and East German "advisers" have long been front-stage actors in the Angolan regime's stalemated civil war for control of all Angola; but they have never before been physically discovered in command posts of Namibia's hit-and-run guerrilla war against South Africa.

Additional evidence made available to us includes photographs showing Sam Nujoma, SWAPO's Soviet-trained "president," consorting with Angolan military leaders and Soviet or East European advisers near the Namibian border.

The Soviet strategy began to emerge two years ago. Confidential directives from Moscow stated that Angola must continue providing bases and aid to SWAPO despite the certainty of destructive South African reprisal raids.

To reach that objective, Moscow promised, and has now delivered, an extraordinary amount of conventional weapons. Three major radar and air-defense bases (destroyed in the raid) had been completed near the Namibian border and armed with SAM-3 and SAM-6 fixed anti-aircraft missiles. These were under the overall command of Soviet advisers, who employed East German regulars to man the missiles.

At least two of these SAM bases were close enough to the border to control air traffic deep into Namibia and threaten operations of the South African air force. They were part of the down payment to Angola's pro-Marxist regime (not recognized by the United States), pledged by Moscow to protect it from South African raids against SWAPO bases.

The down payment is escalating. Ineffective Cuban advisers are being replaced by crack Soviet and East German specialists. They direct SWAPO strategy for Namibia and strengthen the Angolan regime in its long civil war against anti-Marxist forces, headed by Jonas Savimbi and backed by South Africa.

The objective is to integrate anti-Western Soviet policies in Angola and South Africa-Namibia, building a conventional war capability to advance both objectives.

The Russians are now known to have armed the Angolan regime with an estimated 267 tanks, 298 armored cars, 550 artillery pieces and other arms. Weapons now going to Mozambique for use on the second front against South Africa are approaching similar quantities.

The Soviet design is strikingly clear; provide a conventional, not just guerrilla, war capability for its black African allies against white-ruled South Africa in hopes of locking up the greatest mineral storage house in the world and controlling oil traffic around the Horn.

Yet, curiously, all this passes unnoticed at the United Nations, even though Soviet and East German manpower in Angola and Mozambique now totals close to 6,000 military and civilian specialists.

It would tax world diplomacy to find a sharper example of that durable phenomenon known as the double standard. The United States is excoriated, even in Western Europe, for trying to arrange free elections in El Salvador and dispatching two score military advisers to strengthen the government there. The true nature of the Soviet buildup in southern Africa, perceived in the narrow focus of a righteous crusade against South African racism, is ignored. Yet its aim is to upset the world balance of power to the grave detriment of the West.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

## AGRICULTURE AND FOOD ACT OF 1981

The PRESIDING OFFICER. The clerk will state the pending business.

The legislative clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Senate resumed consideration of the bill.

UP AMENDMENT NO. 390

(Purpose: To make minor changes in the provisions relating to the Joint Council on Food and Agricultural Sciences to enable the Department of Agriculture to better carry out its science and education functions)

Mr. HELMS. Mr. President, I have a largely technical amendment, which will be agreed to. I send a copy of the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS), for himself and Mr. HUDDLESTON, proposes an unprinted amendment numbered 390.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 258, line 5, strike out "and".

On page 258, line 6, change the period to a semicolon and immediately thereafter insert the following: "and other public and private institutions, producers and representatives of the public who are interested in and have a potential to contribute, as determined by the Secretary, to the foundation of national policy in the food and agricultural sciences.".

On page 258, line 7, strike out all after the word "Secretary" through the end of line 8, and insert in lieu thereof a period.

On page 260, line 3, strike out the semicolon and the word "and", and insert in lieu thereof a period.

On page 260, strike out lines 4 and 5.

On page 260, strike out lines 6 through 8 and insert in lieu thereof the following:

"Each such report shall be submitted to the Secretary of Agriculture. Minority views, if timely".

Mr. HELMS. Mr. President, the Department of Agriculture has requested a few minor changes in title XIV of S. 884. These changes will allow the Department to carry out its science and education functions more effectively.

I have no objections to the request. I ask unanimous consent that the text of the letter from Secretary Block be reprinted, in full, in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, D.C., September 9, 1981.*

Hon. JESSE HELMS,
*Chairman, Committee on Agriculture, Nutrition, and Forestry, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: As you are well aware, I am a strong supporter of Agricultural Research and Extension programs which are authorized by Title XIV of the Food and Agriculture Act of 1977. You and your committee are to be commended for recognizing the importance of these programs and for preserving and strengthening them in the revised Title XIV, S. 884.

It is generally recognized that much of the success of our science and education system is dependent on a strong Federal/State partnership, and your committee has recognized that by adding language specifically reaffirming that partnership.

Overall, the changes proposed in S. 884 for Title XIV are in accord with the views of the Department of Agriculture, however, there are a few minor or technical changes that in my view will allow the Department to carry out its science and education functions more effectively.

First, I believe the Secretary should have more flexibility in making appointments to the Joint Council on Food and Agricultural Sciences. The language limits appointment to nominations made by specifically listed organizations and agencies, and I believe the Secretary should have the flexibility to insure the makeup of the Joint Council is such that it can best meet the advisory and coordination needs of the Department and the science and education system. I have recently voiced support for the Joint Council and will insure that its makeup does reflect the various interests in the science and education community.

A second minor change I would suggest is to delete the requirement that the Joint

Council reports be simultaneously submitted to the entities other than the Secretary. That requirement is unnecessary since reports of the Joint Council are available to all of the public and, moreover, the Secretary is required to transmit recommendations of the Joint Council to the Congress as part of the Secretary's annual report.

Finally, I would suggest that the language requiring the Joint Council in its reports to specify the "level of financial and other support needed" is in effect asking the Joint Council to prepare a Federal budget for science and education. This is far too much to ask of the Joint Council and would require more staff resources than would be available to accomplish the requirement. Furthermore, we have a process for developing the Federal budget, and there is ample opportunity for various interest groups to make input and voice their views before the Congress finally settles on an appropriation bill.

In closing, may I reaffirm overall support for Title XIV of S. 884 and reemphasize that the changes suggested are very minor in nature.

Sincerely,

JOHN R. BLOCK,
*Secretary.*

Mr. HELMS. Mr. President, this amendment would modify the provisions of S. 884 relating to the Joint Council to broaden the list of organizations and agencies from which the membership of the Joint Council can be selected to include other public and private institutions, producers, and representatives of the public who the Secretary determines are in a position to contribute to the foundation of national policy in food and agricultural sciences.

In addition, the amendment would delete the restriction in S. 884 that nominations for Council members can only be submitted by the organizations and agencies whose representatives are eligible to serve on the Council. The effect of these changes is to provide the Secretary with increased flexibility in making appointments to the Joint Council to allow for Council membership that can best meet the advisory and coordination needs of the Department and the science and education system.

This amendment would also provide that the annual report of the Joint Council is only required to be submitted to the Secretary of Agriculture. The effect of this change is to delete the requirement that the report also be submitted to Congress and to the constituent organizations of the Joint Council.

Finally, the amendment would delete the requirement that the Joint Council specify the level of financial and other support needed to carry out science and education programs as a feature of its annual report.

Mr. HUDDLESTON. Mr. President, the amendment is acceptable.

Mr. HELMS. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 390) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 391

(Purpose: To delete the requirement that actions under the Special Standby Export Subsidies Program be authorized by the dispute settlement procedures of the subsidies code of GATT)

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 391.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 240, strike out line 18 through line 6 on page 241 and insert in lieu thereof the following: "the United States; and

(c) fails to reach a mutually acceptable resolution through consultation with the foreign country or instrumentality concerned."

Mr. HELMS. Mr. President, this is really a technical amendment which the Department of Agriculture requested to strike clause (d) of subsection (b) of section 1203, of S. 884. This provision requires the President to seek authorization under the dispute settlement procedures of the general agreement on tariffs and trade (GATT) before the export subsidy authority could be implemented.

Specifically, section 1203(b)(d) states:

The Secretary shall implement the special standby export subsidy program formulated under subsection (a) of this section only after the President . . . is authorized under the dispute settlement procedures specified in the Agreement of Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade to undertake an export subsidy program to counter the export subsidies on agricultural commodities employed by the foreign country or instrumentality concerned: *Provided*, that the United States is obligated by international agreement to receive such authorization before undertaking measures to counter such export subsidies.

Mr. President, the reason that clause (d) was added to this provision of title XII of our bill was to preclude any argument that we might be in conflict with our international obligations as a result of being a member to the GATT, and signatory to the GATT subsidies code.

However, Mr. President, I wish to clarify for the benefit of the Senate that the subsidies code, specifically under article 16, allows subsidies for primary products, and agricultural products are primary products. It is for this reason alone that the Commission of the 10 nation European Economic Community signed the subsidies code. Had the EEC and other nations not been able to insert that language in the subsidies code, their export subsidies program for agricultural products would have been in violation.

Since the U.S. Government does not have a subsidies program but is permitted to both establish and implement one under the GATT subsidies code, then, Mr. President, I see no reason why this country must seek authorization under the GATT. Indeed other countries have not reduced or eliminated subsidy programs for agricultural commodities; nor have they been precluded from establishing them under the GATT subsidies code.

Therefore, Mr. President, I urge adoption of this amendment.

Mr. HUDDLESTON. Mr. President, we support the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 391) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 392

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Indiana (Mr. LUGAR) proposes an unprinted amendment numbered 392.

Mr. LUGAR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 138, beginning with line 1, strike out everything down through line 11 on page 197 and insert in lieu thereof the following:

TITLE III—WHEAT

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, section 107A of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 107A. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of wheat at such level as the Secretary determines to be appropriate taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(b)(1) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of wheat if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of wheat. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans and purchases authorized by subsection (a). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into

consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The farm program payment yield for each crop of wheat for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was previously established for the farm the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(3) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(f) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 302. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982 through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 303. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 304. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURE ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 305. Section 107 of the Agriculture Act of 1949 shall not be applicable to the 1982 through 1985 crops of wheat.

## TITLE IV—FEED GRAINS

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 401. Effective only for the 1982 through 1985 crops of feed grains, Section 105A of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 105A. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of corn at such level as the Secretary determines to be appropriate taking into consideration the cost of producing corn, supply and demand conditions, and world market prices for corn.

"(2) The Secretary shall make available to producers loans and purchases on each of the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of one or more of the crops of corn, barley, oats, rye, and grain sorghums if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of any of these feed grains. If a land diversion program is in effect for one or more of the crops of corn, barley, oats, rye, and grain sorghums, the Secretary is also authorized to require that producers participate in any such program as a condition of eligibility for loans and purchases authorized by subsection (a). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(2) The farm program payment yield for each crop of corn, barley, oats, rye, and grain sorghums for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for any of such feed grains was previously established for the farm, the Secretary is authorized to determine such yields as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(3) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(c) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(d) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(e) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(f) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURE ACT 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 102. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of feed grains.

## TITLE V—UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSION OF MARKETING QUOTAS, AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346 and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of upland cotton.

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 502. Effective only for the 1982 through 1985 crops of upland cotton, section 103(f) of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 103.(f) Notwithstanding any other provision of law—

"(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to producers nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (i) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during the three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (ii) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths determined for Middling one and three-thirty seconds inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average Northern Europe price determination of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9)): *Provided*, That in no event shall such loan level be less than 48 cents per pound. If for any crop the average Northern Europe price determined under clause (ii) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (i) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate not in excess of the average United States spot market price determined under clause (i) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the producer during the tenth month of the loan period for the cotton, be made available for an additional term of eight months: *Provided*, That such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six month period: *Provided, further*, That whenever the Secretary determines that the average price of Strict Low Middling one and one-sixteenth inch cotton (micronaire 3.5 through 4.9) in the designated United States spot markets for such cotton for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(A) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available;

"(B) If a special quota has been established under this subsection during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (A) of this subsection or the amount required to increase the supply to 130 per centum of the demand;

"(C) As used in clause (B) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four hundred and eighty-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established; and

"(D) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps an existing special quota period.

"(3)(A) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of upland cotton if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of upland cotton. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans authorized by subsection (1). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be taken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) The farm program payment yield for each crop of upland cotton for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for upland cotton was previously established for the farm, the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State or county program payment yields are established, the farm program payment yields shall balance to the national, State or county program payment yields.

"(C) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall file an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producers, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to alleviate a shortage in the supply of agricultural commodities.

"(4) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(5) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(6) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(7) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Effective only with respect to the period beginning August 1, 1982, and ending July 31, 1986, the tenth sentence of section 407 of the Agricultural Act of 1949 is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate of Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

SKIPROW PRACTICES

SEC. 504. Section 374(a) of the Agricultural Adjustment Act of 1938, as amended, is amended by striking out "1981" in the last sentence and inserting in lieu thereof "1985".

MISCELLANEOUS COTTON PROVISION

SEC. 505. Sections 103(a) and 203 of the Agriculture Act of 1949 (7 U.S.C. 1444 and 1446d) shall not be applicable to the 1982 through 1985 crops.

TITLE VI—RICE

LOAN RATES, LAND DIVERSION, AND PAYMENT YIELDS FOR THE 1982 THROUGH 1985 CROPS

SEC. 601. Effective only with respect to the 1982 through 1985 crops of rice, section 101(h) of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 101(h). Notwithstanding any other provision of law,

"(1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of rice at such level as the Secretary determines to be appropriate taking into consideration the cost of producing rice, supply and demand conditions, and world market prices for rice.

"(2)(A) The Secretary is authorized to conduct a land diversion program and make land diversion payments to producers of rice if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of rice. If a land diversion program is in effect under this subsection, the Secretary is also authorized to require that producers participate in such program as a condition of eligibility for loans and purchases authorized by subsection (1). Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversions to be undertaken by the producer and the productivity of the acreage diverted based upon the farm program payment yield established for the farm. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(B) The farm program payment yield for each crop of rice for which a land diversion program is in effect shall be the last yield which had been previously established for the farm, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for rice was previously established for the farm, the Secretary is authorized to determine such yield as the Secretary finds fair and equitable. In the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. In the event national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(C) The diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into pursuant to this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disasters or to alleviate a shortage in the supply of agricultural commodities.

"(3) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure.

"(4) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(5) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(6) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.".

SUSPENSION OF MARKETING QUOTAS AND OTHER PROVISIONS

SEC. 602. Sections 351, 352, 353, 354, 355, 356, and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of rice.

Mr. LUGAR. Mr. President, the amendment I have sent to the desk covers target prices in each of the four areas this legislation pertains to, specifically wheat, feed grains, rice, and cotton.

I have chosen to construct the amendment in this form in order that the general principle pertaining to the target price situation might be met en bloc. Likewise in the event that in the course of the debate on this amendment, there is further consideration of target prices, that also might be met en bloc, with some equity among the various commodities to be discussed.

Mr. President, the target price debate is an important one. We have talked throughout the debate on the general agricultural legislation about the expense of the bill. We have also talked about security for American farmers and for producers. Clearly the target price concept was constructed and, as a matter of fact, was adopted comprehensively the last time around in farm legislation because it offered a safety net for American farmers.

For the sake of illustration and at least as a short statement on the lay of the land, I want to discuss what target prices are, and why they may impact under some conditions upon the Federal Treasury for substantial outlays.

Target prices were established for wheat, feed grains, and upland cotton by the Agriculture and Consumer Protection Act of 1973, and they were extended by the Rice Protection Act of 1975 to that crop.

The committee's revived bill on this occasion for fiscal years 1982, 1983, 1984, and 1985 establishes minimum target prices for the commodities I have mentioned. The prices that are specified for each year may be adjusted upward but not downward by the Secretary of Agriculture, and that is an important distinction.

Presently, the legislation in front of us, given the modified committee bill, establishes a very specific set of target prices. I shall not review all of those at this point except to say, for example, that in the area of wheat a target price of $4.10 presently is in the bill for the year 1982. That would move 20 cents higher in 1983 to $4.30; 20 cents higher to $4.50 in 1984; and an additional 20 cents in 1985 to $4.70.

The current target price for the crop year we are now in is $3.81. That is a very substantial change over the course of this legislation, and it is not an academic point, Mr. President.

The estimates of the U.S. Department of Agriculture range all the way from $250 million to $500 million of expenditures to be made in this crop year on the basis of a very large wheat crop in our country, and sharply declining prices for wheat presently and, therefore, the $3.81 appears to be well above what the average prices received by wheat prices will be during the 5-month period which we are now in. That means payments are going to be made at the $3.81 level.

I shall have more to say about the extent of those payments, why there are payments being made, but I make the point, now that $3.81 is not an academic figure. It is a figure on which real money is going to be paid by the U.S. Treasury to each and every wheat farmer who applies, who has eligible wheat, and the crop is a very substantial one against which that deficiency payment will lie.

The target price mechanism works as follows: Whenever the national average price for a crop falls below the target price for a specified period a producer of that crop becomes eligible for a deficiency payment equal to his normal production multiplied by the payment rate.

Mr. President, let us take the example of wheat in this year, an actual one on which payments are going to be made. The target price is $3.81. If the market price in the field for wheat in this country over a 5-month period—which is the average of those sales around the country, cash sales at the mills—if that average figure comes to something less than $3.81, for example, let us say—and I certainly hope this will not be the case, and the distinguished Senator from Kansas is trying awfully hard by getting announcements made, and appropriately so, by the President of the United States to get the price up—if somehow or other it gets up over $3.81 we are all home free literally, no payment.

But, if, for example, the average should turn out to be $3.61 over this 5-month period of time, then the so-called

deficiency payment is 20 cents a bushel; $3.81, the target, minus $3.61, the actual 5-month average price, is 20 cents a bushel. That 20 cents a bushel would be paid to every eligible farmer who has had wheat produced this year. It does not make any difference whether the farmer sold the wheat, makes no difference what he sold the wheat for, whether he is storing it or what he is doing with it. If he has a certified field there in which his local committee has said there are $x$ acres of wheat in his normal production and his normal yield is such, he will receive a payment. There is a history there—let us say on my own farm, for example, where we have roughly 22 acres, as I recall, that are qualified. And let us say the average yield there had been 50 bushels. Why, we have 1,100 bushels certified there. And I could apply and receive, if we have a 20-cent payment, 20 cents times 1,100 bushels. And that is mine, regardless of what happened to the crop. I may have sold it already. And I may have sold it for more than $3.61. I may have used the futures market, if I was thoughtful about that, and had gotten well over $4 a long time ago for that crop.

But, Mr. President, the point is that the payments then will be made during the latter part of the fall of this year and, unfortunately, of course, they will impact against the fiscal 1982 budget. So we are dealing with the fiscal 1981 situation. We already have a wheat crop that has been planted, that has been harvested, and payments are about to go after the 5-month period that runs out.

I am tedious about the explanation of this because there are a good number of us who have these terms cast around—deficiency payments, target prices, and loan rates. And the loan rate comes in at this point because there is at least a cap on what the deficiency payment might be. It cannot be larger than the target price, minus the loan rate. That finally squeezes it into some shape.

But, in this particular case, the $3.61 would not be lower than the loan rate and that might be very close to where we end up. In fact, some farmers believe the deficiency payment would be more like 10 cents and some would opt for 15 cents. But we are looking at the totality of the wheat crop in this year—and it was a very sizable crop, about 2¾ billion bushels. So if, at a 10-cent level, you have 10 cents times that and at 20 cents you have 20 times that, and you are talking about real money. And this is how the USDA worked it up to a quarter of a billion to a half a billion on one crop, in one commodity that has already happened in America this year.

The problem, Mr. President, is that the future is not only an unknowable in this respect, but has all of the unpredictable aspects of American agriculture, leaving aside the debate we are having. For instance, the weather. We have no idea what the weather will be in 1983, 1984, or 1985. That probably has more to do with whether we shall have deficiency payments or whether we will have the big crop or not.

Of course, the Secretary of Agriculture is not totally defenseless against this proposition. If we are going to be very frank, the Secretary is saying the trade-off, if you are demanding to have target prices, is that, "As Secretary, I am going to use the authority I have under the law to bring about diversion of acreage from wheat." As a matter of fact, he already has said there will be a set-aside of 15 percent of each of our farms which are producing wheat and will not be able to produce wheat next year on those acres if we still want to qualify for the target prices.

Now, there are many people in American agriculture, who are very thoughtful about the wheat situation alone, that would say that 15 percent set aside—and just to be practical about it, that means, in this actual of the 20-acre field, more or less, that I have for wheat, 3 acres must be put on the shelf. I cannot grow beans on that acreage. I cannot grow corn on that acreage. As a matter of fact, I cannot do anything with it. It is literally put on the shelf.

And the Secretary would say, "Rightly so. We have too many acres planted with wheat. As a Congress, you have already voted that if you produce wheat in overabundance and the price goes down under supply and demand market conditions, you voted yourself so many cents per bushel below a target price. The only way the U.S. Treasury, or the USDA, or the President has a defense against this is to demand that you not produce so much."

Some economists would say 15 percent would not be enough because many of us in the farm business would be inclined to take the worst 15 percent that we have, not the most productive 15 percent. Already, as I have talked to people in the fertilizer business around this country, they are receiving very substantial new orders from farmers who suspect that if we proceed with target prices, we will not only have diversion of acreage in wheat but, very shortly, in feed grains also. Therefore, the prudent farmer will set aside those acres that are least productive and put a lot of fertilizer on what is left. Maybe prudent farmers will come up with almost the same production as they had before in which they used the whole back 40 but did not put so much nitrogen on it at that point.

In essence, we could have the worst of both worlds; that is, American agriculture tied up once again in all the measuring of the fields, the photographing, the flyovers, the haggle over one or two rows that must go in order to meet the local committee's inspection but, at the same time, have a very large crop and a very large liability.

Mr. President, in a nutshell, this is what the dilemma is with the so-called target price concept. The dilemma, I suppose, is compounded because, if a Senator were to ask me: "How do I know that any of these target prices will cost a dime?" Once again, we are dealing with the unknowable. Maybe there will be dilemmas abroad and exports take-off or whether that means we have crop failures in parts of this country, it may be that we shall never ever discuss these target prices again. They may even become irrelevant.

But I do not think we are in that condition, as I take a look at the ones in this bill, unless my amendment is passed. If, in fact, we are going to be making payments with target prices for wheat at $3.81 this year, to the tune of a quarter billion dollars to a half billion dollars, try to use our collective imagination to assess what we shall be doing when the target prices moves to $4.10, $4.30, $4.50, and $4.70 by the time we have come to the end of this particular legislative route.

(Mr. DURENBERGER assumed the chair.)

Mr. LUGAR. Mr. President, it would appear to me, if we had a situation even comparable in the slightest to our current situation in which the rolling average came out to something like $3.60—let us round it off to a dollar. Let us say the average this year comes out to $3.70.

By 1985 the deficiency payment would be $1 a bushel for the whole crop. If it turned out to be 2¾ million bushels, that becomes a very large sum of money for one crop in 1 year.

Mr. President, all of us have listened to debate on this floor in which Senators, in its broadest general terms, have talked about it will not cost this or it will not cost that or we are nibbling off $100 million there and trying for $1 billion here. As I tried to point out in my opening statement, we are dealing with target prices on uncontrollables; they are as uncontrollable as anything in the Federal budget. They are as uncontrollable as the weather, export demand, war and peace. They are ticking time bombs in the fiscal dilemma of the total budget of the U.S. budget, and, unfortunately, they are posed right now in this farm legislation.

When estimates are made about the cost of the original administration bill or S. 884, the vehicle that the Agriculture Committee sends to the floor, or the modified S. 884, or the so-called compromise, or even the figures that Secretary Block brought over to the committee that they apparently had before the committee compromise, the fact is that nobody has any idea as to what the liability is. At best, staff must try to take a ball park estimate, given the weather over many years, averaging out weather conditions, averaging out production conditions, trying to factor in if you do divert acres what that might do, taking into consideration if the wheat crop becomes very, very large that surely the demand for set-aside will be even more intense. In other words, all of the byplay backward and forward is lumped in and averaged out.

After all of that is concerned, essentially the administration comes to an estimate, I am now advised, that if the amendment I am suggesting were adopted approximately $1 billion of the current administration estimate would be lopped out in this bill. I emphasize that is not only a rubbery figure and has all

the problems of any other figure, but it is simply that no one else can come up with a better one. The administration has suggested that in its exposure, given the normal cycle of weather, wheat crops, rice and cotton in this particular amendment, we are talking about $1 billion, more or less, they would say. The administration would say, I believe, that if the administration's final compromise offer to the Agriculture Committee were adopted that might save $350 million as opposed to $1 billion that my amendment would save.

There are some Senators who would say, "Well, that is not a whole lot of money. We are dealing with a $4 billion bill." We started out with one that was the $1 billion, moving to the $2 billion category. But now a big wheat crop and a big corn crop, and other crops, have intervened.

Mr. President, as I tried to indicate in my opening statement, we are not debating this farm bill in a vacuum. The President of the United States during the very week we have been on this floor has met with his Cabinet and has met with the congressional leadership. There are stories about what they have discussed which have been spread over the pages of our Nation's newspapers and over the electronic media. They are talking about very difficult decisions that they have made and that they are going to ask us to make.

At some point, the poignancy of what I am discussing this morning will become only too clear when we begin to get into the defense budget, the budget dealing with human needs, into all of the hypothetical—and they will become actual—cuts in the Federal budget.

Mr. President, we are about to adopt a bill in which there are at least four uncontrollable entitlements moving onward for a 4-year period of time. This seems to me to be a philosophy that is highly dubious, a judgment shared by the administration in the original proposal that the administration submitted to us. It eliminated target prices.

It suggested that security for farmers in this country is very important and could be realized by the Secretary making purchases and offering loans, given the lay of the land of budgetary and economic conditions as he found them. That is the essence of the language and that is replete in this bill in the four places with which I am concerned today.

Second, through farmer-held reserves there is always the possibility for a sophisticated farmer to market what he has at different times and places that are most favorable.

Given the floor of loans that could be obtained by any farmer on his crops, given the futures markets, given farmer-held reserves, the safety net is sound.

Mr. President, I appreciate that for many farmers who have not been involved in farmer-held reserves, who maybe do not understand the loan situation any better than the target price, who have not used the futures markets, the argument will be made by some of my colleagues and others that the target prices paid this year directly to the wheat farmers by the Federal Government are a mighty good idea. As a matter of fact, a good number of people see security and ready income in this route. But I am hopeful that the wisdom of this body will collect itself around the proposition present, that the Secretary, given the power to offer loans, to make purchases, to guarantee the farmer-held reserves, to assist the farmers in their marketing plans, will have a sound safety net which allows our market system to work without excessive exposure of the Federal Treasury to uncontrollables that have now reached very substantial proportions.

Finally, Mr. President, for the sake of the record, I want to review the history of the estimates of the deficiency payments as we now take a look at this subject. These estimates come from the U.S. Department of Agriculture.

They estimate 1982 deficiency payments will be in the range of $615 million to $980 million. That is for the year we have now entered into, a range that is for the four crops we are talking about.

They add an additional $200 million that could be incurred for sorghum and barley if the Department did not open a farmer-owned reserve for feed grains. But they point out that it is very likely that the Department will open such a reserve and that would obviate that situation.

For the moment, the Department is optimistic that no expenditures would be expected for corn since the target price, $2.40, is the same as the loan rate. The price of corn has been moving down markedly, but mercifully it has not gotten into the $2.40 range. There is no deficiency payment until it reaches that situation.

For cotton, the 1982 deficiency payments, based on August crop reports, are estimated at $300 million to $400 million, with $325 million as the most likely estimate.

For wheat, as I have already mentioned, the USDA now sharpens its pencils and says $275 million to $500 million, with $350 million as the most likely estimate.

For rice, the range is $40 million to $80 million, but with the lower part of that range, $40 million, as the most likely.

Mr. President, those are substantial sums in the same 1982 budget that the President of the United States is talking about, that we shall be talking about. Those payments have to be made. They are no longer discretionary. The last farm bill guaranteed that those payments must be made. What I am saying now, Mr. President, is, having made the payments, which USDA now estimates at $615 million to $980 million for this fiscal year we are coming into, we cannot expose the Treasury of the United States to those sorts of uncontrollables for 4 years more.

We know what our experience is going to be this time and we simply have, at this point, to say that there is no compelling reason to offer incentives to produce where there is oversupply. There is no reason to offer a further safety net in target prices when there are loans, purchases, and farmer-held reserves by USDA.

Mr. President, I am very hopeful that Senators will consider this target price situation very carefully. It is, in my judgment, the last material way that we can substantially improve this farm bill and substantially improve its chances of being signed by our President and move into an era in which, clearly, market principles work, the Federal intrusion is lessened, and the uncontrollables, the ticking timebombs in the system, are taken out.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

WHY WE SHOULD KEEP THE TARGET PRICE CONCEPT

Mr. HUDDLESTON. Mr. President, the proposal to eliminate the target price concept from the Agriculture and Food Act is an ill-conceived idea. The target price concept is fundamental to achieving two goals: maintaining a market-oriented farm system and preserving an agricultural production system that can feed U.S. citizens.

The target price concept is not a new idea—it originated in the Agriculture and Consumer Protection Act of 1973, which established this support mechanism for wheat, feed grains, and upland cotton. The Rice Production Act of 1975 adopted the same mechanism for rice. The 1977 Food and Agriculture Act extended the target price programs for 4 years. Under existing law qualifying farmers are provided deficiency payments when national average market prices fall below target price levels. Target prices are set at levels determined by law to be adequate to meet the average cost of production—the target price will not be so high as to guarantee profits for all farmers.

The target price concept was established to accomplish several objectives:

First, moderate the effects of short-term price fluctuations on producers. The market determines the transaction prices for agricultural commodities, but producers are partially protected from ruinous, low prices for their commodities;

Second, free the Commodity Credit Corporation's nonrecourse loan program from its income support role and allow the loan program to serve as a marketing tool for farmers; and

Third, enhance the working of set-aside or diversion programs.

Mr. President, target prices have been effective in supporting and stabilizing farm income in the face of severe price fluctuations without having a significant detrimental impact on markets. The target price mechanism has been effectively substituted for less desirable alternative methods of income support, such as high loan rates, which can become a substitute for market pricing, excessively influence planting decisions, result in large Government-owned stocks, and damage the

competitive position of the United States in the international market.

Target prices, when coupled with acreage diversion during periods of temporary surpluses, provide the Secretary of Agriculture with an equitable method of controlling production and preventing price-depressing surplus stocks. Additionally, because the target price mechanism allows the market to operate without interference from loan levels, which often set a floor-to-market price, it can have a positive effect on the competitive position of the United States in world markets.

In order to receive target price protection, Mr. President, farmers must comply with requirements set by the Secretary of Agriculture to control the supply of farm products. Thus, the target price concept is an effective tool that the Secretary can use to balance commodity supply and demand within any given budget constraint. The Secretary can, in fact, insure against any deficiency payments through effective use of supply management.

We should seriously question whether the abolition of this policy tool is wise if we are serious about controlling inflation and reducing Federal deficits. The notion that target prices "expose the Federal Treasury to extraordinary and completely unpredictable costs" is simply wrong. The Secretary of Agriculture can encourage or discourage production very effectively with the discretionary tools he has.

Also, deficiency payments are not an endless flow from the Treasury. Farmers are limited in the amounts they may receive. In 1979, the maximum payment per farm was $45,000 for wheat, feed grains, and upland cotton, and $50,000 for rice. In 1980 and 1981, the maximum is $50,000 for all crops. In 1979, the average production expense was $50,844 per farm and, in 1981, production expenses per farm may be over $60,000.

Mr. President, I urge my colleagues to reject this amendment to weaken the Secretary's ability to effectively manage the farm programs. And if we should eliminate the concept of target prices, that is exactly what we would do.

Mr. President, I might add that no issue has been given greater consideration by the Committee on Agriculture, Nutrition, and Forestry in the Senate than the question of target prices. The proposal was made when the committee first began to consider the new farm bill, early in the year. It was made then by the administration on the question of eliminating target prices altogether. Through all of the markup sessions that the committee held, it was given serious consideration and the idea was rejected and target prices were maintained in the new bill.

More recently, when we came back after the August recess and began to revise the farm bill on the basis of new economic information that was available to us and new economic conditions throughout the land, when the question of reducing the target price levels and the loan levels and all other costs of the bill was under consideration, we again dealt with the question of target prices and whether or not we should go in a different direction.

But even the administration, Mr. President, which originally presented a proposal eliminating the target prices, did not do so in this case. So the agreement that came from the committee, that was agreed to by at least 10 members of the committee who participated in the discussions, maintains the target price concept.

The modified committee version that is before the Senate at the present time, of course, does maintain the target price concept. So I would say it is an issue that has been given very careful consideration after a series of hearings, a series of markup sessions by the Committee on Agriculture, on two different occasions since the farm bill was first drafted and first evolved early in the year.

It is the opinion of the majority of the Members of the Senate Committee on Agriculture that this concept ought to be maintained, that it is not an undue exposure of Federal expense, that it does provide some stability, that it does give some assurance to the agriculture producers of the country that they will have some fallback position. Not that they will make a profit. There is no guaranteed profit in this proposal or any other that is contained in this bill. There is no way to do that, of which I am aware. But they will be able perhaps to continue to be a productive part of the agriculture segment of our economy.

I believe it would have very drastic effects if we should now abandon the position taken by a majority of the members of the Committee on Agriculture in endorsing and supporting and working for the target price concept.

I urge that the amendment be defeated.

Mr. COCHRAN. Mr. President, I oppose the amendment offered by the distinguished Senator from Indiana (Mr. LUGAR). I do so out of a firm conviction that the inclusion of the target price concept in the bill reported by the Senate Agriculture Committee is an indispensable part of the effort that this Government should make to move farming toward profitability. This concept is necessary not simply to obligate the Government to make deficiency payments to farmers when market prices fall below the target prices set in the bill, but mainly to provide an incentive to insure that the Government recognizes a responsibility to assist in market development, in the use of tools that have been made available to the Department of Agriculture to reduce acreage, and in other alternative efforts that are available only to the Government and totally out of the hands of the farmer, to help stabilize supply and demand, and to help assure that market prices will remain above the target price levels set in the legislation.

This is not a concept that has just been thought up by the Senate Agriculture Committee. In 1973, Congress enacted legislation with the target price concept, together with an acreage reduction program, which were designed to work in harmony, to lessen the likelihood that there would be Government outlays directly to farmers.

We can look at the history of the target price mechanism, the amounts of money that have been required to be paid to farmers as deficiency payments since that time, and obtain a pretty good idea of whether or not the program has been successful. I believe the evidence is overwhelming that it has been a good concept; it has worked; it has not resulted during that period of time in the expenditure of great sums of money to farmers in the form of deficiency payments.

Prior to 1973, there were fewer tools available to the Department and to the Government to help assure that market prices were at reasonable levels that guaranteed adequate supplies, prevented farmers from going bankrupt when they had a bad crop year, and assured stable prices to consumers.

The reason why the target price concept has been successful is that target prices, first of all, provide income protection for farmers. This reduces the pressure to increase loan rates to levels where they interfere with our export markets.

This occurred, as a matter of fact, in the late 1960's, when cotton loans were increased to help improve farm income. Market prices were elevated, but the result was that USDA had to take over large stocks of cotton, which became very expensive to the Government and to consumers and depressed cotton prices for several years thereafter.

Second, target prices are used as an incentive to farmers to participate in an acreage reduction program when supplies become excessive. They are offered target price protection if they agree to reduce production by a specific percentage from last year's level. This is the set-aside program. The advantage of this type of program is that when farmers participate, supply is reduced and prices are thereby strengthened. In most cases, prices will increase above the target price level, so there are no deficiency payments. Thus, the cost to the Government is minimal.

If target prices are removed completely, the only acreage adjustment program would be a paid diversion under the amendment offered by the Senator from Indiana. This is a direct payment to farmers not to produce, and it is made regardless of the improvement in market prices. In other words, under the acreage reduction program with target price protection, Government cost is reduced when prices strengthen.

Third, target price payment exposure puts pressure on the administration to take actions to help strengthen prices when they fall below the target levels. As long as the market prices average above the target price levels, there are no deficiency payments.

When prices become depressed, as they are now, the Secretary will have at his disposal provisions in this legislation which will allow him to expand demand or reduce supply, in an effort to strengthen prices at the market. Therefore, a properly administered program, under the recommendation of our committee, will reduce or eliminate deficiency payments.

In fact, since target prices were included in the farm bill in 1973, there never has been a deficiency payment for cotton. In only 2 years have there been deficiency payments for rice and wheat, and only in 3 years for feedgrains. As has been mentioned, the only times that deficiency payments were made was when inadequate program decisions were made or when very unusual circumstances altered the impact of decisions made by the Department.

From this evidence, it is clear to this Senator that target prices play a very important and indispensable role in the farm program. If the program is administered properly and funds anticipated correctly, deficiency payments will be minimal or eliminated entirely. Traditionally, they have been an efficient way to encourage actions which strengthen market prices when they become depressed.

The Senator, in his statement in support of his amendment, mentioned some shortcomings of the target price system, such as that it exposes the Government to unlimited outlays of money to farmers for deficiency payments. The history of the program, however, has shown that in those few years in which payments have been made in certain commodity programs, the effective use of other methods and tools at the disposal of the Department could have minimized—and in some cases did minimize—those payments.

There is no reason to believe that the effective use of an acreage diversion program could have a dramatic impact to lessen the obligation for the Government to make deficiency payments.

They are only made when the market prices stay below the target price level.

Another argument that is used in support of the amendment pending before this body is that target prices are not an economic adjustment program and that they distort the allocation of resources. Target prices would distort allocation of resources if they were set at levels which guaranteed farmers a profit, but they are not.

The committee took great care after hearing testimony from farm organizations, economists, and citizens who are interested in the farm program, to set these levels below even the cost of production, so that a farmer is not, if he gets a deficiency payment, guaranteed a profit, nor is he even guaranteed his cost of production back. Only a percentage of that is paid.

What happens is that the farmer is provided with some price protection as a safety net, and the level at which these target prices in the legislation are set will not interfere with the ability of the market to allocate resources.

When deficiency payments are in effect the market is simply telling farmers and the Government that a further adjustment needs to be made in production patterns and in acreage reduction programs.

It also is asked, why do we need target prices? We have a grain reserve program and with a paid diversion program there is no need to have that safety net.

The fact of the matter is that only for feed grains and wheat is there a grain reserve program available. Cotton and rice commodities are not under the reserve program. It is not feasible to have them included in a grain reserve program. Rice is a perishable commodity for one thing. We found that it is not in the best interests of farmers for the Government to accumulate large stocks which could result if a loan rate is set too high or if the reserve program holds large quantities of stocks off the market for long periods of time.

What is apparent, though, is that the obligation of the Government to make payments to farmers is sure and certain with a grain reserve program.

There are payments made every year, as a matter of fact, to wheat and feed grain farmers who put their commodities in the reserve.

A look at some of the figures over the last few years indicates how expensive that program can become, but compared with the target price provision of the program it is obvious that the reserve program is more expensive.

Some who propose to do away with target prices never talk about these direct payments associated with grain reserves and the program administered now and included in this bill.

The Government pays 26 cents per bushel per year for grain in the farmer-held reserves. In 1978, $106 million in feed grain storage payments were made, and for wheat that same year $109 million. Payments are made every year.

Another argument that has been brought out is that commodities without reserves will have adequate protection through loans and an acreage reduction program. Of course, the grain reserve program does provide farmers with a loan and paid storage until the market price reaches the cost of production.

But cotton and rice farmers do not have any such program. This would create a major disparity then between the level of market protection provided the major commodities.

The effect actually would be that cotton and rice would be supported at 60 to 65 percent of their production cost, and corn and wheat farmers could enter the reserve program and be assured that they could sell at their full cost of production.

I agree that with proper acreage adjustment programs prices would be adequate, but it is budget exposure from target prices that forces the administration to carry out such programs.

It is worth noting that by proper implementation of acreage adjustment programs, market prices average above target price levels and that there are no deficiency payments.

One other aspect of this amendment troubles me very deeply, and that is the elimination, in effect, of the set-aside program and the substitution in its place, as recommended by the distinguished Senator from Indiana, of only a paid diversion program.

These are just words that describe an alternative available to the Secretary to help adjust the supply of commodities. And one says, "What is the big difference?"

A paid diversion program is a payment by the Government to farmers not to plant. It is a sure expense to the Government. It makes this Senator wonder whether or not the amendment really will, in the long run, save the Government money.

There is a strong and compelling argument that can be made that this amendment, if it is adopted by the Senate, will result, in the long run, in more cost to the Government than will the proposal that has been put together very carefully by the Committee on Agriculture.

One reason is that the set-aside program would be available under the committee recommendation and that it would not be available under the recommendation made by the Senator from Indiana.

The incentive for the farmer to set aside some of his production, his acreage, is the opportunity to have the benefit of the safety net provided by target prices.

There is no direct payment on the front end made to farmers to choose that acreage and set-aside from production to help hold down supplies or to try to bring supplies within the demand so that market prices are stable and more reasonable.

By taking away this mechanism and depriving the Secretary of the opportunity to impose a set-aside at no cost to the Government, serious damage indeed would be suffered by the farm programs that we have.

For those economy minded Senators who are worried about whether this amendment would be more cost effective and would result in these direct costs to the Government, it should be observed that there is a likelihood that in the long run, with the necessity of making paid diversion payments to farmers irrespective of eventual market prices, this amount could cost the Government a lot more money.

There would not be the incentive for the Government to do anything, even have a paid diversion.

Imagine this scenario, Mr. President. You are down there at the Cabinet or you are in there trying to get permission or approval to make a paid diversion in a certain commodity. The budget deficit is looming large. Some are saying it may be $60-plus billion this year instead of $47½ billion, as has previously been forecast. Imagine the opposition from the Director of the Office of Management and Budget, from the White House staff advisers to the President, and from other Cabinet members, to making a payment in the face of a large deficit at a time when a

commitment has been made to the American people to hold down spending.

The inclination, without the incentive for the Government to impose a set-aside or diversion program, would be to do nothing.

The end result could be that what we are exchanging here for the committee proposal that recognizes we need an incentive for the Government to take action under those circumstances is a statement to American farmers "You are on your own."

There are large crops in the forecast for wheat and feed grains. The prospects are that with market prices depressed there could be deficiency payments—there could be, not necessarily will be, but could be—in this crop year.

The incentive is for the Government to do something. Without the target price mechanism the incentive would be to do nothing. I do not think we can justify abandoning this tried and proven method of helping move farming toward profitability, guaranteeing farmers not a profit but the opportunity to make a profit, and guaranteeing them that the Government will be concerned and sensitive and will be obligated to use the power that is reposed only in the Government, that only the Government can use, to mandate a nationwide set-aside program or a paid diversion which will also be available under the bill from the committee to help expand our markets overseas, to help assure that farmers in this country have a chance to make sales overseas, to get rid of surpluses that are caused by overproduction here at home.

Mr. President, I think the evidence and the arguments available to support what the committee is recommending are overwhelming. We began considering the provisions proposed for this legislation several months ago. It is true the administration started off by saying, "We do not want target prices in the bill because it is abhorrent to our philosophy to make payments directly to farmers."

On the other hand, this amendment provides for a paid diversion which is a direct payment to farmers to guarantee that acreage is reduced irrespective of market prices and other factors. That money is gone, it is lost.

A look at the history of the program we now have and that has been refined and improved, in my judgment, by this committee, shows that it is an appropriate protection device, an income protection device, to guarantee that farmers are afforded the benefit of disaster assistance, in effect, not only for weather-related losses, losses to crops caused by disease or other factors such as that, but also to protect the farmer from a marketing disaster, which can be equally devastating.

The farmer does not have any control over what he can sell his commodity for. He does not have any control over market factors, over the international demand situation, but he can be offered some hope that the Government will use its powers to enhance his ability to make those sales of surplus production to help bring prices to a more reasonable and profitable level.

Because of what are, in this Senator's judgment, these compelling items of evidence, Mr. President, I urge the Senate to reject this amendment and to support the mechanism that has been crafted by the committee to try to afford income protection at minimum cost to the Government.

I yield the floor.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator from Montana.

Mr. MELCHER. Mr. President, what we have before us is an effort by the Senator from Indiana to delete the farmer's ability to have paid land diversion, if necessary. It is a concept we have discussed over and over. It has been during the last dozen years—I think it has been—a matter of debate on every bill.

There is another concept, and I think they both should be considered in tandem. If you are not going to have the target price because you want to avoid exposure to the Treasury, then you can look at the other side of the coin. What about loan rates? Why do we not establish loan rates as a mechanism for a floor price for a commodity? I think they ought to go together.

UP AMENDMENT NO. 393

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 393 to unprinted amendment numbered 392:

On page 1, line 10, of Lugar amendment UP 392 insert immediately after "world prices for wheat" a colon and the following: "*Provided*, That the level of support for each of the 1982 through 1985 crops shall not be less than $4.00 per bushel".

On page 6, line 11, insert immediately after "world market prices for corn" a colon and the following: "*Provided*, That the level of support for each of the 1982 through 1985 crops shall not be less than $2.80 per bushel".

Mr. MELCHER. Mr. President, I think we can look at this package in these two basic lights: One is that there would not be any target price and that the exposure to the Treasury because of the target price mechanism will be eliminated, as the Senator from Indiana suggests.

The other is a time-tested method we have used in the past of having loan rates at a level that was meaningful; not just leave it up to the discretion of the Secretary to set whatever prices he happened to think were the best, but to have him take into consideration where the loan rates should be, as the Senator from Indiana has drafted in his proposed amendment, and which reflect the administration's viewpoint.

But then, having taken all that into consideration, I suggest that we set a floor price of $4 per bushel for wheat. I suggest the floor price for corn, which triggers the loan price for all other feed grains, should not be less than $2.80. That still gives the Secretary of Agriculture a great deal of discretion.

I point out that the cost of production, as the Department finds, for wheat is substantially above $5 per bushel. I point out that the cost of production, as found by the Secretary of Agriculture, for corn is substantially above $2.80 per bushel. So what we are doing in setting the loan rates at those levels is setting a floor price. I think it is time for us to do that. It is time for us to have a floor price that is a little more meaningful than just relying on the discretion of the Secretary.

What is it going to cost out of the Treasury? There is always this bugaboo argument brought up, "Well, the loan rates would be too high and the Department of Agriculture would accumulate too much in surplus."

I do not think that is going to happen. Our best estimates a few months ago of what the price of wheat would be for 1982, for the 1982 crop, and beyond were substantially above $4. The same was true for corn. The estimates a couple of months ago of what the price in 1982 for the corn crop and beyond that would be were substantially above $2.80.

Well, we have been blessed this year with an abundant harvest, a very bountiful harvest, and now the current prices of wheat and feed grains, including corn, have gone down.

But we should not look at that as being what is going to be happening in 1982. There is a great world demand for both wheat, corn, and other feed grains. It is a demand that is brought about by the reverse of what we have had in the United States. Some other countries, including Russia, have had very big crop failures. If we balance out what the 1981 production is for wheat and feed grains, I think we will find that the world production is not all that much, is not all that bountiful. So I believe it is realistic to think that in 1982—and this is the first year we are dealing with in this proposed bill—we are going to see a substantial improvement in the current prices of wheat and feed grains. If that is true, as has been predicted by the Department as short a time ago as 60 days ago, well then there is no exposure to the Treasury for this amendment that I offer.

It is true that over the past several years 12 to 16 percent of either one of these crops, wheat or corn, has gone into the loan program. And people argue, "Well, that is an exposure to the Treasury." But mind you, it is simply a loan, a loan that is repaid within 9 months. It is repaid with interest. There is no exposure then. There is no permanent cost to the Treasury, no real cost to the Treasury when that happens.

Has it been happening in recent years? It certainly has. In the past several years, loan rates have been paid off. Some will argue that they have not only been paid off, but they have been paid off with a little bit of revenue for the Treasury; that they have actually made a little bit of money off of it.

Now I want to compare what the $4 wheat loan rate means to, say, $3.50, as is in the suggested loan rate for

wheat in the committee's bill. The issues facing our farmers and ranchers do not change very much. They either produce too much or produce too little.

Because our farmers produce in such abundance for domestic consumption, the commodity supply situation has a marginal effect on American consumers and purchasers of our farm commodities overseas, but it always has an enormous impact on the farm families who keep us the best fed Nation in the world.

Let me point out that of the 2.7 billion bushel crop of wheat produced this year in this country, we have to sell about 2 billion bushels abroad. Why? Because we are only going to use 700 million bushels for our domestic needs. That is about where we average year in and year out of what we use domestically here in the United States of the wheat crop that we produce.

As long as we sell abroad at less than the cost of production, we are hurting the wheat producers, the wheat producing States and the entire economy of the United States.

Are we selling too cheaply? Yes, we are. Is it the mechanism to correct that? Yes, the loan rate is a good mechanism to correct that. Why? Because this would become a floor price. The market just will not go below it.

Is that advantageous to everybody? It certainly is. Will it hurt consumers? It certainly will not. You will not find it in the difference in the cost of a loaf of bread. You will not find it in the difference in the cost of flour if the market is $4 as compared to $3.80 or $3.60 or $3.75. It is simply this: that most of the cost for the consumer is in the distribution costs, which includes transportation and the processing costs and the retailing costs.

So who gains on this if we have a slightly higher floor price for wheat? Well, the entire country gains.

What about our trading partners? Is this going to drive them off? No, it will not; not at all. Because in Japan—and we sell wheat to Japan every year—whatever price they pay for the wheat, they set the price to their millers which then is reflected into the cost to the consumers in Japan. The price Japan sets on American wheat, even though it only cost $4.50 a bushel delivered in Tokyo, and a lot of it currently is getting to Tokyo at less than that, even so the Japanese then set the cost to the miller at about $9.50 or $10 per bushel. And they do that to make it relative to the cost of other food commodities in Japan and to protect a very minute amount of wheat that is produced in that country.

Other countries do likewise. The price they pay us is one thing. The price they establish in their own country is another thing and it is always substantially higher.

What about the poor countries, the ones that really are hungry? Will this interfere with Public Law 480? No, it will not interfere with Public Law 480, which is food for peace. They will still have the opportunity to use that. We encourage that and the Congress itself encourages it. The basic farm legislation encourages it. We constantly remind the Secretary of Agriculture that this is one of the goals of this country, to make sure that food for peace is still operative.

The August index of farm prices went down, and that is of concern. That is of concern to me and it should be to every Senator. That means that the basic economy of this country has slipped somewhat. And because agriculture is so important to our basic economy, we better pay attention to it.

The August index of farm prices went down 2.1 percent between July and August, pushing the parity index down to 61 percent. Parity for wheat is $7.11 per bushel, yet the average national price in August was $3.63, only 51 percent of parity. That is very disturbing. We would like to make sure in this amendment that that minimum price is not at $3.63, as was the case in August, the average price, but the minimum price would be $4. That is low enough.

Prices for feedgrains and hay fell 8.2 percent during that month, between July and August, and corn prices dropped 32 cents a bushel. Hay, incidentally, went down $1.98 per ton. Soybean prices were off 47 cents a bushel, and cattle brought $1.40 less per hundredweight than they did in July.

Now there will be those that might want to argue, "Well, one way to help cattle or hog producers or poultry producers is to let feedgrains be low." Well, there are a lot of us around here yet, and a lot of people throughout the country that are in the livestock and poultry business, that believe that in the long run cheap feed means cheap hogs or cheap cattle or cheap poultry.

I would remind all of us that when it gets too cheap, those people go out of business because they cannot make a profit; their costs continue to rise. We still have this problem of high interest rates, which add to their costs.

Prices for every single agriculture commodity are lower right now than they were a year ago. In the space of just 1 month the Department of Agriculture adjusted downward its estimate of farm income by $2 billion; that is, dropping it from $24 billion to $22 billion. The expectation is that farm income will continue to go down.

I think there is a general assumption that farmers and ranchers will continue to produce no matter what the Government or the economy may do. But that could prove to be a false and a very dangerous assumption.

If hard-working people who operate our magnificent agricultural plant cannot make a profit from their labor—no matter how hard they try to maximize production—we cannot assume that they will continue to produce.

For the past several years, inflation has been devastating American agriculture. Since 1972, gross farm income has risen by 58 percent, but production costs have risen 115 percent. As a result, using constant 1967 dollars, net farm income has gone from $25.1 billion in 1971 to $6.7 billion in the first quarter, what we projected for the whole year, based on the first quarter.

During the first quarter of 1981, net farm and ranch income fell $4.2 billion from levels in the fourth quarter of 1980. In comparison, corporate income, because of inflation, rose 2 percent, or $4.2 billion.

The fact is that inflation and the increasing costs are just eating American agriculture alive.

The Department of Agriculture acknowledges that 1980 was not a good year for agricultural prices but they predicted a brighter day in 1981. We are not seeing that sunshine in the numbers for this year at all.

There are those who will contend that the 1980's are not the 1920's, and that is true. We are entering into a period in which the discussion of the world food supplies will not be on surpluses but instead we will be focusing on whether there is enough food to feed the world.

Famine already exists in portions of Africa, and there is a great potential for more hunger to develop in some of the Third World countries.

Notwithstanding this coming shift in world food supplies, in the next 2 years surpluses and depressed farm prices will continue to be a fact of life.

Now particularly with regard to wheat, 1981 and 1982 will be dominated by surpluses and low prices.

Are people eating less?

Of course not. Every year, millions more people are born into this world than die. These new people have to eat.

Using constant 1967 dollars, net farm income is the lowest that it has been in decades.

The Department of Agriculture tells us that in 1982, it will cost a farmer $5.32 to produce a bushel of wheat.

The loan rate for wheat in the committee bill is set at $3.50 for all 4 years of the bill. That is more than $2 below the cost of production.

And what is the fair, parity price going to be for wheat next year—the price that would assure producers of a reasonable return on their labor and investment? The fair price for American wheat next year will be $7.64.

The Department of Agriculture's own figures show that for 1982 through 1985, a 50-cent higher loan rate for wheat would be translated in the marketplace to a price at least 80 cents higher, and would result in an increase in the value of wheat production of up to $1 billion.

The same set of facts and figures apply equally to corn and feed grains.

Let us look at an argument that might be made against having some sort of floor prices for grains.

One might argue that, if that is going to be the case, even despite the fact that we have had such huge crops this year in wheat, corn, and other feed grains, that we do not need to worry about it, the marketplace will take care of it.

That is an argument I would like to believe is true. But even if it is true, we have to demonstrate that for 1982 there is going to be a floor price that reflects the costs that are always increasing.

Farmers and ranchers are no different than any other business or industry in this country. They have to have a line of credit. They have to be able to show to their banker or lending institution, whatever it might be, that there is reason to

believe that their business will be successful in the coming year, the year after, and the year after that.

What we are doing, then, in establishing the floor price for grains, if the world demand is so great that the market will operate much above that, is providing for these producers some optimum and providing for their financial backers, bankers and other lending institutions, that there is going to be a brighter price structure, but that whatever happens the floor price is there as a protection. It is important, it is very important.

Notwithstanding this coming shift in world food supplies, if indeed the predictions are correct that the number of people is increasing, that the world population is increasing, with the amount of grains produced worldwide being rather static we will be able to show that in the next 2 or 3 years surpluses and depressed farm prices will be correcting themselves.

To use a term that was used by President Reagan in addressing some of the basic social security programs and other social programs of this country, this is, in effect, a safety net.

I think it is economically sound to do that. I think it is particularly necessary to show that there will be a type of floor price in operation, though hopefully the markets will be much higher. But the floor price will be at a point where the markets will not fall below.

I do not mean to criticize the current administration, but the current surpluses that we are looking at right now have, realistically, lowered grain prices. Furthermore, because of the increase in the cost of money, it simply means that many countries cannot or will not buy from us. We have to address that problem, too.

We have to be able to assure ourselves that we will continue to sell substantial quantities of grains abroad. The low rates I suggested for the 1982 crops and subsequent crops for the life of this bill after that, will not interfere with world trade. Indeed, it will put us in a solid position. It will establish that we have done something to protect the continuation of producers, the continuation of grain supplies that will be available to our trading partners, and I think that is sound business.

I urge adoption of the amendment.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. Mr. President, I rise in support of the amendment offered by the Senator from Indiana. The artificially high prices encouraged by the farm bill must be reduced and the target price provisions removed. The elimination of target prices would prevent large deficiency payments and reduce the production of grains not demanded by the marketplace.

We have millions of tons put away in storage simply because the Government has had to buy that grain, because of the mandated loan program. That means production way beyond demand.

As in our previous deliberations on matters of import to our Nation's economic future, we must be cautious, we must be deliberate and we must be dedicated to seeing that our Nation's people benefit from our decisions.

We have made some difficult decisions in reducing Federal outlays. Reduction management is a most difficult task, the very nature of which runs counter to the American nature of building a great country.

We must divorce the innate drive to build a great nation from the expansion of a great-big government. They are not synonymous. Our reauthorization of the farm bill should be viewed as a means of further reducing the size, the role and the cost of Government to the American taxpayer so the Nation can indeed become great.

American agriculture is blessed with a truly competitive marketplace. Farmers in our country are fiercely independent entrepreneurs who have traditionally scorned the entrance of Government into the marketplace. Target prices, which can and do result in farmers receiving checks from the U.S. Treasury have no place in American agriculture. Grain farmers can survive in a free market environment and they must not look to the Federal Government to take the place of the free market.

Indeed, the highly competitive marketplace in which farmers participate can be, at times, brutal on the individual producer. A case can be made for the Government to play a limited, and let me emphasize, severely limited role in protecting farmers from the vagaries of the marketplace.

Remember, farmers are price takers, not price setters. Maintenance of the farmer-owned grain reserve program represents, in my mind, the correct extent to which Government should involve itself with the grain and feedgrain marketplace.

The farm bill which came out of the Agriculture, Nutrition, and Forestry Committee has been criticized as excessive and as having ignored the national priority of economic recovery.

We have long ago recognized that we must reduce, eliminate, and trim Government expenditures and stem the extent of Government intrusion into our lives and private institutions.

Agriculture is not sacred and the temporary pains of change must be felt here.

I would like to praise the American Farm Bureau Federation for their strong support of the President's economic recovery plan. They have been critical of the committee bill based on their convictions of reducing Government spending and keeping the Government out of the marketplace. Robert Delano, president of the Farm Bureau, put our current situation in the proper light when he said:

> It is an incongruous set of circumstances that finds a Washington establishment—obsessed with economic recovery and deregulation—yet willing to wreak havoc on the farm economy by putting the government back into the farming business in the biggest way since the 1950s.

As I previously noted, there exists a limited role for Government-sanctioned activities which provide for stable and orderly markets in the agricultural sector. I would like to briefly note the existence and operation of marketing orders dealing with specialty crops in California which have exerted a positive and constructive force on fruit and nut markets.

Federal marketing orders are authorized by the Agricultural Marketing Agreement Act of 1937 and were established to regulate the handling and marketing of domestically produced fresh vegetables, fresh and dried fruits, and nuts. Marketing orders may govern the quality of commodities, the quantity marketed, standardization of containers, research and development projects, unfair trade practices and statistical programs.

Their purpose is to establish and maintain orderly marketing conditions, to create greater stability in supply and prices, and to protect both the grower and the consumer.

We must keep a close eye on any activity of Government which involves itself with the marketplace and see that the role of Government is a positive force from both the producer and consumer perspectives.

For the most part, it can be said that marketing orders and volume control provisions continue to be an effective means for farmers to solve their own marketing problems.

At the same time, consumers gain the benefit of a stable, orderly supply of produce with fewer fluctuations in price, supply, and quality.

The administration of marketing orders, supported by handler assessments, costs the U.S. Government virtually nothing.

Finally, Mr. President, those specialty crops regulated by marketing orders have not sought the costly assistance of Government in the form of target prices, support prices, loan guarantees or other such programs.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I am going to move to lay the Melcher amendment on the table. Again, I do not believe that $4 a bushel is too much for wheat or that $2.80 is too much for corn or feed grains. I am not certain of the cost; we are trying to figure out what the cost would be. But I am certain that this is not acceptable to the administration.

If we assume a $4 loan rate and even interest at 12 percent, CCC interest, the redemption value at maturity would be $4.36 and you add about 20 cents for storage costs. The break-even price would be $4.66 for wheat.

That is what the farmer will need to obtain in order to cut the CCC loan and accrued interest and storage for 9 months. If the price received by the farmer is below the break-even level, the farmer would not receive the loan and CCC would take the commodity. So I guess if we want all the wheat in the country, this is the way to go about it, and corn, too.

The cash price for corn now is about $2.65. I hope that will increase as exports increase and we recover from the embargo imposed on January 4, 1980. But the problem is still there. I think the cash price for wheat now is about $3.65 or $3.67, somewhere in that neighborhood.

So, Mr. President, though I have no

quarrel with what the distinguished Senator, who is an expert in this area, wants to do, I also believe it would be in complete conflict with what the administration has in mind and we would end up with a lot of wheat in Government hands. We have a lot of wheat now. That is not the thrust of the program, to produce for the Government. That is our problem with the dairy subsidy. That is why they are in deep difficulty.

Mr. President, CBO indicates that $4.43 would be the break-even point and the Commodity Credit Corporation would take in about 300 million bushels from loan forfeitures at lower prices, which would cost about $1.3 billion. That is the Congressional Budget Office price-tag just on wheat. I do not know what it would be for corn.

Mr. President, I move to lay the amendment on the table and ask for the yeas and nays.

Mr. MELCHER. Mr. President, will the Senator withhold his motion for a moment?

Will the Senator yield for a question?

Mr. DOLE. Surely, Mr. President.

Mr. MELCHER. The cost that the Senator mentions, $1.2 billion——

Mr. DOLE. Three.

Mr. MELCHER. The cost, $1.3 billion. Is that CBO figures or Department figures?

Mr. DOLE. Congressional Budget Office figures.

Mr. MELCHER. That is somewhat higher than the Senator indicated might be the case, in his recitation of 12 percent interest and then storage costs.

Mr. DOLE. I am trying to get cost figures from the USDA. The amendment was handwritten and there is no printed amendment, so we have not had time to put together the USDA figures. I assume it is somewhere in the ballpark.

Mr. MELCHER Will the Senator yield for one further question?

Mr. DOLE. Yes.

Mr. MELCHER. How would that compare with what has also been proposed, with a $4.10 target price, in cost of wheat?

Mr. DOLE. I am not certain what the comparison might be on wheat. The cost of wheat, in the modified Senate proposal through 1986, is about $3.4 billion, an average of about $680 million a year. But I am not certain—I do not have the figures on how we would split that off. That would include any loan, any forfeitures, target price. I am not certain target prices are assumed.

I am now informed that the USDA indicates that the Senator's amendment would cost about $1.2 billion for wheat and $675 million for feed grains, or about $1.9 billion.

Mr. MELCHER. Mr. President, I wonder if the Senator would give me about 3 minutes before he makes the motion.

Mr. DOLE. Certainly.

Mr. MELCHER. I think what that demonstrates, Mr. President, is that we are talking about whether or not we go for the loan rates at a higher level or have target prices at some level. Let me point out that the target price concept means that perhaps all of the wheat that is raised, or a good portion of it, would be subject to Treasury exposure to pay whatever the deficiency payment is. The same is true of feed grains.

Does it mean that we have a higher loan rate, that these costs are going to be higher than the target price concept espoused by the Senator from Kansas? I do not think so, Mr. President. The Department has a set of figures, CBO has a set of figures. It is about a wash, one way or the other.

But there is a big difference in approaching it the way I would prefer to approach it, on loan rates. That grain that is sold abroad is sold at a higher price. If the result of the loan rate being higher means that the grain sold abroad, say, sells for 50 cents a bushel higher, that would mean that the economy of the United States would receive an additional $1 billion.

One billion dollars, Mr. President. That would do good for the economy of this country, it would generate tax income, it would help in our balance of payments. That is just on wheat.

If the difference in using the loan rate as a floor price rather than using target prices—as has been, after all, the basic discussion here—on corn sales and other feed grains results in an increase in the floor price and, therefore, the price received by our sales abroad, we are probably talking about another billion dollars generated for the U.S. economy, still holding our export sales at rather modest levels—I mean prices for export grains at rather modest levels. If the market works higher than that, fine, it would help the economy of the United States even more. We shall not sell ourselves out of the market, believe me, at these kinds of figures. We will still be in the world price market. They will still be asking for U.S. grain—corn, wheat, and other feed grains.

I thank the Senator from Kansas for withholding his motion.

Mr. DOLE. I thank the distinguished Senator from Montana. Certainly, in moving to table his amendment, I do it with respect for his interest, concern, and knowledge about the farm programs and his help to all of us on the Committee on Agriculture.

Mr. President, I move to table the Melcher amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the motion to table the amendment of the Senator from Montana. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. LEVIN), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 65, nays 23, as follows:

[Rollcall Vote No. 266 Leg.]

YEAS—65

| Cranston | Kennedy | Stafford |
| Dodd | Levin | Weicker |

So the motion to table the amendment (UP amendment No. 393) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 394

Mr. DOLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 394 to unprinted amendment numbered 392.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted by the Lugar UP 392, insert the following:

TITLE III—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, WHEAT ACREAGE REDUCTION PROGRAM AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, the Agricul-

tural Act of 1949 is amended by adding after section 107A the following new section:

"SEC. 107B. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of wheat at such level, not less than $3.50 per bushel, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(b)(1)(A) In addition, the Secretary shall make available to producers payments for each of the 1982 through 1985 crops of wheat in an amount computed as provided in this subsection. Payments for any such crop of wheat shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat.

"(B) The payment rate for wheat shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per bushel.

"(C) For the 1982 through 1985 crops of wheat, the established price shall not be less than $4.00 per bushel for the 1982 crop, $4.20 per bushel for the 1983 crop, $4.40 per bushel for the 1984 crop, and $4.60 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average cost of production per acre for the two years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds ncesssary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general arm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of wheat, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their wheat acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of wheat, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of wheat. The proclamation shall be made not later than August 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined. The wheat acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of wheat planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the proclamation of the national program acreage made not later than August 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of wheat planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for wheat, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to wheat if the Secretary determines that the total supply of wheat will, in the absence of such limitation, be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the wheat acreage base for each wheat-producing farm. Producers on a farm who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be

made for any year as the result of a limitation imposed by the Secretary under this paragraph shall be the acreage planted on the farm to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flax-seed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of wheat if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of wheat. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 302. Sections 379d, 379e, 379f, 379g, 379h, 3791, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982, through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 303. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 304. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 305. Section 107 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of wheat.

## TITLE IV—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, FEED GRAIN ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 401. Effective only for the 1982 through 1985 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105A the following new section:

"SEC. 105B. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchasers for each of the 1982 through 1985 crops of corn at such level, not less than $2.50 per bushel, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

"(2) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1)(A) The Secretary shall make available to producers payments for each of the 1982 through 1985 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, in an amount computed as provided in this subsection. Payments for any such crop of feed grains shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to such feed grains.

"(B) The payment rate for corn shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop, is less than the established price per bushel.

"(C) For the 1982 through 1985 crops of corn, the established price shall not be less than $2.70 per bushel for the 1982 crop, $2.85 per bushel for the 1983 crop, $3.00 per bushel for the 1984 crop, and $3.15 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The payment rate for grain sorghums, oats and, if designated by the Secretary, barley, shall be at such rates as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought,

flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of feed grains, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their feed grain acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of feed grains, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of feed grains. The proclamation shall be made not later than November 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined. The feed grain acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the proclamation of the national program acreage made not later than November 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to feed grains if the Secretary determines that the total supply of feed grains will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform precentage reduction to the feed grain acreage base for each feed grain-producing farm. Producers on a farm who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this paragraph shall be the acreage planted on the farm to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of one or more of the crops of corn, barley, oats, and grain sorghums if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of any of these feed grains. If a land diversion program is in effect for one or more of the crops of corn, barley, oats, and grain sorghums, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit

the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county of local community.

"(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe.

The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 402. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of feed grains.

## TITLE V—UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSION OF MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342, 1343, 1344, 1345, 1346, and 1377) shall not be applicable to upland cotton of the 1982 through 1985 crops.

LOAN RATES AND TARGET PRICES, DISASTER PAYMENTS, COTTON ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF UPLAND COTTON

SEC. 502. Effective only for the 1982 through 1985 crops of upland cotton, section 103 of the Agricultural Act of 1949 (7 U.S.C. 1444) is amended by adding at the end thereof the following new subsection:

"(g)(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to cooperators nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (A) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)). In no event shall such loan level be less than 55 cents per pound. If for any crop the average northern Europe price determined under clause (B) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (A) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the cooperator during the tenth month of the loan period for the cotton, be made available for an additional term of eight months, except that such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period. Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(i) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available.

"(ii) If a special quota has been established under this paragraph during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (i) of this subsection or the amount required to increase the supply to 130 per centum of the demand.

"(iii) As used in clause (ii) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four-hundred-and-eight-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established.

"(iv) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps an existing special quota period.

"(3) Notwithstanding any other provision of law, any upland cotton described in items 955.01 through 955.03 of part 3 of the appendix to the Tariff Schedules of the United States imported into the United States during the period of time a special quota established under this subsection is in effect shall be deemed to be an import under such special quota until the special quota is filled and any such cotton shall be free of duty.

"(4) Payments shall be made for each crop of upland cotton to the producers on each farm at a rate equal to the amount by which the higher of—

"(A) the average market price received by farmers for upland cotton during the calendar year which includes the first five months of the marketing year for such crops, as determined by the Secretary, or

"(B) the loan level determined under paragraph (1) of this subsection for such crop, is less than the established price per pound times in each case (i) the farm program acreage for cotton, determined in accordance with paragraph (8) of this subsection (but in no event on a greater acreage than the acreage actually planted to cotton for harvest), multiplied by (ii) the farm program payment yield for cotton determined in accordance with paragraph (9) of this subsection. For the 1982 through 1985 crops of upland cotton, the established price shall not be less than $0.71 per pound for the 1982 crop, $0.76 per pound for the 1983 crop, $0.81 per pound for the 1984 crop, and $0.86 per pound for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. The total quantity on which payments would otherwise be payable to a producer for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (5) of this subsection.

"(5)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of upland cotton, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of upland cotton, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of upland cotton, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their cotton acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of upland cotton, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(6) The Secretray shall establish for each of the 1982 through 1985 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation factor under paragraph (7) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall announce such revised national program acreage as soon as it has been made. The national program acreage shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres.

"(7) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor (not to exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(8) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the cotton acreage on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the announcement of the national program acreage made not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than for the preceding year, but the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(9) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available. Notwithstanding the foregoing provisions of this paragraph, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this paragraph. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(10)(A) Notwithstanding any other provision of this subsection, the Secretary may impose a limitation on the acreage planted to upland cotton if the Secretary determines that the total supply of upland cotton will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the upland cotton acreage base for each cotton producing farm. Producers on a farm who knowingly produce cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the acreage planted on the farm to upland cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of upland cotton if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of upland cotton. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in

accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contract. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community;

"(C) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(11) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency credited by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(12) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(13) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(14) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(15) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(16) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(17) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(18) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection.

"(19) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act.".

EXTENSION OF COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Section 603 of the Food and Agriculture Act of 1977 (91 Stat. 939) is amended by striking out "July 31, 1982" and inserting in lieu thereof "July 31, 1986".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. (a) Section 408(b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof a colon and the following: "*And provided further*, That for the 1982 through 1985 crops of upland cotton a cooperator shall be a producer on a farm who has limited the acreage planted in accordance with paragraph (10)(A) of section 103(g).".

(b) Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444 and 1446d) shall not be applicable to the 1982 through 1985 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1974) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRELIMINARY ALLOTMENTS FOR 1986 CROP OF UPLAND COTTON

SEC. 506. Section 606 of the Food and Agriculture Act of 1977 (7 U.S.C. 1342 note) is amended by striking out "1982" and inserting in lieu thereof "1986".

PRICE SUPPORT ADJUSTMENTS

SEC. 507. Section 403 of the Agricultural Act of 1949 (7 U.S.C. 1423) is amended by adding at the end thereof the following: "Beginning with the 1982 crop of upland cotton, the quality differences (premiums and discounts for grade, staple and micronaire) for the loan program shall be established by the Secretary by giving equal weight to (1) loan differences for the preceding crop and (2) the market differences for such crop in the nine designated United States spot markets. The Secretary shall establish a study committee of ten members, eight of whom shall be representatives of cotton producers, selected to equally represent each of the four major geographic regions which produce and market upland coton, and one of whom shall be a representative of cotton merchants and one of whom shall be a representative of the textile manufacturers. The committee shall study alternative methods of establishing values of premiums and discounts for grade, staple, and micronaire for the upland cotton loan program that will accurately represent true relative market values and reflect actual market demand for upland cotton produced in the United States. The committee shall submit the results of such study to the Secretary at the earliest practicable date together with such recommendations as the committee considers appropriate. The Secretary may, prior to the announcement of loan rate differences for the 1982 crop of upland cotton, review the procedures and criteria, including the recommendations made by the study committee and the formula provided for in the fifth sentence of this section, used for determining quality differences, including the loan differentials for grade staples, and micronaire for the upland cotton loan program and, on the basis of such review, revise such procedures and criteria to accurately reflect the actual market value of upland cotton produced in the United States.

## TITLE VI—RICE

REPEAL OF PROVISIONS RELATING TO NATIONAL ACREAGE ALLOTMENTS, ALLOCATIONS, APPORTIONMENT, MARKETING QUOTAS, AND PENALTIES

SEC. 607. (a) Effective beginning with the 1982 crop of rice, sections 352, 353, 354, 355, and 356, of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1352, 1353, 1354, 1355, and 1356,) are repealed.

(b) Effective beginning with the 1982 crop of rice, section 377 of such Act (7 U.S.C. 1377) shall not be applicable to rice acreage.

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, RICE ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF RICE

SEC. 602. Effective only for the 1982 through 1985 crops of rice, section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended by adding at the end a new subsection (i) as follows:

"(i) Notwithstanding any other provision of law—

"(1) For the 1982 through 1985 crops of rice, the established price shall not be less than $10.73 per hundredweight for the 1982 crop, $11.23 per hundredweight for the 1983 crop, $11.73 per hundredweight for the 1984 crop, and $12.23 per hundredweight for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(2) The Secretary shall make available, to cooperators in the several States of the United States, loans and purchases for each of the 1982 through 1985 crops of rice at a level that bears the same ratio to the loan level for the preceding year's crop as the established price for such crop bears to the established price for the preceding year's crop. If the Secretary determines that loans and purchases at such a level for any of the 1982 through 1985 crops would substantially discourage the exportation of rice and result in excessive stocks of rice in the United States, the Secretary may, notwithstanding the foregoing provisions of this paragraph, establish loans and purchases for any such crop at such level, not less than $8 per hundredweight, as the Secretary determines necessary to avoid such excessive stocks. The loan and purchase level for each of the 1983, 1984, and 1985 crops of rice shall be established on the basis of the loan and purchase level established for the preceding crop year before the application of the preceding sentence. The established price and the loan and purchase level for each crop shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

"(3) The Secretary shall make available to cooperators payments for each of the 1982 through 1985 crops of rice grown in the several States of the United States at a rate equal to the amount by which the established price for the crop of rice exceeds the higher of—

"(A) the national average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under paragraph (2) for such crop.

"(4) The payments for each such crop of rice shall be computed by multiplying (i) the payment rate by (ii) the farm program acreage for the crop by (iii) the yield established for the farm. In no event shall payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to rice. The yield for the

farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years. The actual yield shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the cooperators.

"(5) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (6) of this subsection.

"(6)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the cooperators on the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to cooperators at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of rice, cooperators on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their rice acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of rice, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(7)(A) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under subparagraph (B) of this paragraph if the Secretary determines a revision necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the rice acreage on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the annual proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than for the preceding year, but the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(8)(A) Notwithstanding any other provision of this subsection, the Secretary may impose a limitation on the acreage planted to rice if the Secretary determines that the total supply of rice will, in the absence of such limitation, be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the rice acreage base for each rice-producing farm. Producers on a farm who knowingly produce rice in excess of the permitted rice acreage for the farm shall be ineligible for rice loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the acreage planted on the farm to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to rice for harvest in the two crop years immediately preceding the year for which the determination is made. In determining the acreage planted to rice in any previous year for purposes of this subparagraph, the Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by (ii) the number of acres authorized to be planted to rice under the limitation imposed by the Secretary (hereinafter in this subsection referred to as the 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, caster beans, mustard seed, crambe, plantago, ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of rice if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of rice. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(C) The reduced acreage and the additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may,

by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(9) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(10) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(11) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(12) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this subsection.

"(13) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(14) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(15) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this subsection

DEFINITION OF COOPERATOR

SEC. 603. Effective only with respect to the 1982 through 1985 crops of rice, the third proviso in the first sentence of section 408 (b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended to read as follows: "*Provided further*, That for the 1982 through 1985 crops of rice, a cooperator shall be a producer on a farm who has reduced the acreage base planted to rice as required under section 101(1)(8) of this Act.".

Mr. DOLE. Mr. President, this amendment to the Lugar amendment is an effort that I hope will succeed to make certain that we are going to have a farm bill rather than passing something that will eventually be vetoed by the President.

In essence, what it does is to reduce the target prices for wheat and rice and a minor change in cotton and corn.

We are not talking about a great deal of money. I might add that there are some who think it is an exercise in futility to worry about $72 million a year or about $360 million over the next 5 years.

I have been urged by my colleagues on both sides to say, "Well, let us go ahead and pass it." In fact, many who have legislative experience, who have been in legislative bodies, say, "We know somebody is always talking about something, that something is going to be vetoed." I do not suggest that that is—this would be a substitute for the Lugar amendment. Let me say to sort of——

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. DOLE. I would be happy to yield.

Mr. HEFLIN. As I gather this is a rather sweeping amendment and includes a lot of items. The Senator mentioned disaster payments and other features. Is the Senator going to give us a full explanation of what is contained in the amendment?

Mr. DOLE. Yes; I will do the best I can I will say to the distinguished Senator from Alabama.

Let me first set the stage for this amendment. We are faced right now with an amendment that would knock out target prices altogether. I am not certain whether the distinguished Senator from Indiana has 51 votes, I do not know how many are in town today or whatever the majority might be, to knock out target prices. Some have suggested we ought to first try to table the Lugar amendment and then if we fail we offer this amendment.

I would assume Senator LUGAR, if we fail, would not be in a position or not be too willing at that point to try to compromise any differences.

It is my understanding that if, in fact, we can agree on this amendment the distinguished Senator from Indiana would not be totally satisfied, but would feel much better about the target price program, and I will ask him to comment on that later.

It is not a complicated amendment. Let us just take the wheat section. In the so-called modified Senate proposal for fiscal 1982 the cost would be $1.606 billion and the same is true in the amendment I just offered; in fiscal 1983 the difference would be $366 million in cost, and my amendment is $368 million. In the so-called modified Senate amendment the fiscal 1984 cost is the same. The fiscal 1985 cost is an addition of $42 million, the fiscal 1986 costs are an additional $43 million, so the entire period it is only $87 million for wheat.

Now, only $87 million, on the one hand, it seems that we should not be arguing about $87 million. On the other hand, $87 million distributed across to all the wheat producers in this country would not amount to much assistance to any one of those wheat producers.

The point the Senator from Kansas wishes to make is I believe, we can pass a farm bill, and I believe the bill we pass in the Senate will be the farm bill, maybe with some minor exceptions, some of the amendments, not the basic amendments, but some of the amendments which have been added, so I am willing to stand here as one of the conferees on this farm bill and say if we adopt this amendment there is no excuse, there is no reason—in fact we have a pledge from the administration from the top to the bottom, that the bill is going to be signed, even though it is in addition to the original bill submitted by the administration estimates of $1 billion to $1.5 billion.

Having been involved in farm legislation in the House and in the Senate for the past 20 years, and having seen different administrations trying to cope with farm legislation——

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. DOLE. May I finish my statement? I will be around all afternoon, so I will yield.

Mr. MELCHER. If I might just inquire whether the amendment will be available to look at?

Mr. DOLE. It will be available to look at—look at it, but not to read it. [Laughter.] No, we will try to get it. It reads like a novel.

Mr. MELCHER. I thank the Senator.

Mr. DOLE. So, we are talking about the wheat section, which is rather important to the State of Kansas, the Senator might add, of an average annual reduction of $17 million.

Now, $17 million in the wheat section, if it means the difference between a bill and no bill, let us not quarrel about it. Let us satisfy the administration's demands and lower the cost of that program.

I would say to those who say if it is only $17 million why worry about it? Well, if we are going to add about $360 million if we do not adopt this amendment, and again I would take the name of Senator GARN in vain, who is not present, who indicated to me how the administration feels about the HUD authorization bill, which he indicates is maybe $90 million, some say maybe $300 million, over the budget, that the President has made it very clear less than 3 days ago that he is going to veto anything that exceeds the administration's recommendations.

This Senator takes the President at his word. That is why it seems to me to be the best course to follow is to come to the floor in a responsible manner, cut the program back, put the genie back in the bottle, satisfy the budget requirement, satisfy the Secretary of Agriculture, the Office of Management and Budget, and the President of the United States, and get a farm bill.

If it means a loss to the wheat community of $72 million or $87 million over the next number of years, through fiscal 1986, that is just the price we pay for getting a farm bill. It is going to mean a lot more to farmers than if no farm bill is passed.

Let me move on to feed grains. In fiscal year 1982 there is no difference between my amendment and the so-called modified Senate coalition bill. In fiscal 1983 the amenment I have presented would reduce the cost by $71 million; in fiscal 1984 reduce the cost by $57 million; in fiscal 1985 by $12 million; and in fiscal 1986 by $1 million.

So I just suggest that in that case—in fact, I think the total, when you add up the pluses and minuses on feed grains, we are only talking about a $4 million difference. So I would say to the corn and feed grain producers that there is virtually no difference in the two proposals, because in fiscal 1984, the $57 million that my amendment would cost that much more and in fiscal 1985 it would cost $12 million more and in fiscal 1986 it would cost $1 million more, which is $70 million, as opposed to a cost in 1983 of $71 million. So that is the $1 million difference in the corn and feed grain sections. That is not a major sacrifice for

all the corn and feedgrain producers in this country. It will not even be noticed.

What about upland cotton? There is no difference at all between what I propose and the so-called modified Senate position. The only commodity, in addition to wheat, that there really is a difference in is rice. There is no difference in dairy and there is no difference in the other commodities.

In rice, the total difference between my amendment and the so-called modified Senate coalition position is $272 million. I am going to let the rice people address that, because I am not an expert on rice programs. So it is major in the sense that it is a reduction. It is a reduction, overall, of $360 million or, as I said earlier, an average of $72 million a year.

Now, I do not think that that is too great a price to pay to get a farm bill. I think I have stuck with the so-called coalition. As I said, it is so loose it is hard to locate. But I have stuck with the coalition on every vote, as far as this Senator knows.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. DOLE. Yes.

Mr. JOHNSTON. On rice, what is the percentage difference?

Mr. DOLE. On rice, the difference in what I have proposed and what they propose in fiscal 1982, there is no difference. It would cost an estimated $90 million in the so-called coalition approach and $90 million in my amendment. In fiscal 1983, there is a $35 million difference and in fiscal 1984, a $1 million difference.

Mr. JOHNSTON. That is based on a 25-cent difference?

Mr. DOLE. The 25-cent difference, the target price.

Mr. JOHNSTON. Twenty-five cents less?

Mr. DOLE. It is $10.73 in my amendment versus $10.98 in the so-called modified Senate proposal, a 25-cent difference, as opposed to the reduction in wheat, which started at $4.10 and we dropped it to $4.

I might say that wheat and rice really are the only two commodities that are affected by this amendment. But we believe that, based on what we have been able to do with tobacco, what we have been able to do with sugar and what we have been able to do with all the other programs, that everybody is fairly well satisfied now, except the person who has to sign the bill. I guess we do not have to satisfy the President totally, but when it comes to budget matters and figures, then I believe that we have an obligation to try to meet that request.

Mr. President, I know the Senator from Kentucky wishes to speak on this. I know the Senator from Mississippi, Senator COCHRAN, and perhaps Senator HEFLIN and others wish to speak on this proposal.

Mr. President, I yield the floor for the time being.

Mr. HUDDLESTON addressed the Chair.

The PRESIDING OFFICER (Mr. COHEN). The Senator from Kentucky.

Mr. HUDDLESTON. Let me inform the Senator from Kansas of the predicament that this amendment at this particular time and in this fashion places some of us in who felt we did the best we could possibly do in the Senate committee in arriving at the modified Senate version of the S. 884. We are now faced with the prospect of accepting either the Dole substitute or the Lugar proposal. And it does not seem to me it ought to be that way. We ought to deal with the Lugar question first, the question of whether or not we will continue the target price concept, and then there would be opportunity to deal with the question of what the actual target price levels ought to be.

Now, I know there is always a lot of concern about vetoes and who is going to accept the legislation and who is not. But I think most of us have been around here long enough to know that the threat of veto is not always carried out. There are a lot of things that would have to be taken into consideration, in my judgment, before a bill that comes as close as this one does in the present form to the budget objectives, before it would be vetoed.

First of all, there is the question of dairy price supports and the escalating clause that goes into effect in October. And without any bill at all we go back to the 1949 legislation. It presents some complications in administering it. So there are various considerations that will have to be brought into play, in my judgment. So I do not think we ought to rush to tear up what has been carefully worked out at this particular point.

Now we saw on this floor last night a very substantial effort by Members of various farm States to increase the target levels that are in the modified version of the Senate bill now. It was not successful. But it did indicate a very strong desire on the part of many people to increase those levels, a very strong concern about the levels now prevailing in the modified version.

So now to be faced with the decision of whether or not to even have to reduce those further or to be faced with the decision of eliminating the target price concept altogether is a difficult position for many of the Members to be in.

So I would have preferred that the Senator from Kansas would have allowed us to proceed with the orderly disposition of the Lugar proposals and again reestablish the Senate's belief, as I believe it would be, that we ought to continue with the target price concept and then, if necessary, to address the question of the level of those target prices.

Is there any disposition, I might ask my friend from Kansas, to proceed in that fashion rather than now be confronted with the either/or proposition of Lugar, no target prices, or of a greatly scaled-down target price schedule?

Mr. DOLE. I would say to my friend from Kentucky that we have been trying to determine which would be the best way to proceed. It seemed to me, on the one hand, we are gambling—let us just take wheat, for example, since I understand that better than the other commodities—we are gambling, at least I think there is some gamble, of whether we are going to gamble the whole program for 10 cents a bushel in target prices.

I conferred with the distinguished Senator from Indiana and he indicated that, though he does not like target prices at all, that if, in fact, we were within the recommendation of the administration, he would be—and he has not spoken to this himself, so I should not say anything without Senator LUGAR indicating what his intent would be—but that might satisfy him.

It seems to me that what we are talking about is 25 cents off a target price of rice, which was $10.73, and 10 cents off the target price for wheat, which was $4.10 to $4.

I might say to those wheat producers here that $4 is where we started in the committee in April. On April 28, the Senator from Kansas proposed target prices for wheat at $4, $4.20, $4.40, and $4.60.

Now we later had to raise that target price by 20 cents in order to secure enough votes on the committee to get the wheat section adopted. So I am not so certain we have really moved that far. We sort of moved back to where some of us thought we should have been last April.

If there is some better way to approach it, I will be very happy to discuss it with the Senator from Kentucky, or maybe the Senator from Indiana would like to speak.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. In truth, as the Senator from Kansas has expressed it, I believe that this would be a stronger bill without target prices at all. I think a large number of Americans feel that way and a good number of Senators. I have expressed the reason why—such as the uncontrollable features, and the fact that we are already under very heavy deficiency payments in fiscal 1982 regardless of what we do in the next 4 years. I have suggested $650 million up to $900 million already.

The Senator from Kansas and I have visited about this problem. We have visited with the Secretary of Agriculture about the problem. As a member of the President's Cabinet, he has been giving this a great deal of thought.

My position is, simply stated, that I believe the Senator from Kansas has offered a very constructive suggestion. I understand it will be supported by other members of the Agriculture Committee. They believe it to be a constructive suggestion. It is obviously constructive enough that, as I heard the Secretary of Agriculture, and as the Senator from Kansas said correctly, President Reagan will sign the bill in the event that the target price exposures are scaled down to the areas suggested by the Senator from Kansas.

In the event that occurs, I am prepared to support this legislation.

I would point out that, in the event it does not occur, I think the Senate has the amendment which I offered, which I am certain will satisfy the Secretary of Agriculture and the President.

The predicament is a very good one

because the Senate is going to win either way, American agriculture is going to win either way. It is not an either/or proposition.

My understanding is that if the Dole amendment is agreed to, the bill will get signed. My understanding is that if the Lugar amendment is agreed to, the bill will be signed. The parliamentary sequence is that Dole is a substitute for Lugar. If it is agreed to, that is the end of the ball game and we have a bill that is going to get signed. I appreciate that point, and I commend the Senator from Kansas for the words he has brought forth from the Secretary. I think it is important that at least we appreciate that either way we are going to end up with a bill that will have the approval of the administration.

I am hopeful that Members will listen carefully to all the details. Essentially, the proposal that the Senator from Kansas is making is precisely the proposal the Secretary of Agriculture made about 2 weeks ago, down to the penny. It is a proposal that the administration feels to be within the budgetary constraints, a very important point. I commend it to the attention of my colleagues.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABDNOR. I would like to say to my friend from Indiana that I have been a farmer all my life, and I spent several days recently at the South Dakota State Fair talking to farmers. I would say that there is similarity between the amendment of the Senator from Indiana and that of the Senator from Kansas, both will reduce farm income and I can also assure the Senator that the farmers of South Dakota are not a bit happy about S. 884 in the form it is at this time, and they will be extremely unhappy if we cut further with amendments.

The pending amendments leave us little choice. I can assure the Senate that the amendment of the Senator from Kansas is far preferable to the amendment of the Senator from Indiana.

Sometimes I wish I could offer a crash course in farm economics so that more people, including the administration, honestly understood the real economic bind that farmers are in today. I can assure everyone in this Chamber that there are no longer any inefficient operators operating our Nation's farms. They were weeded out long ago.

I heard one of my colleagues say yesterday that we have only 4.5 percent of our people in farming.

There is a new figure that has been out for a while now that shows only 2.6 percent of our population farm today, and they are presently receiving only 1 percent of the total income of this Nation.

Sometimes I think Washington, and I mean the administration, the House, and this body do not realize that in America a smaller portion of one's take-home pay is going for food than anywhere else in the world. We put 15 percent of our take-home pay into our food bill. That is a bargain. Little of that actually gets to the farmer. Most of it is absorbed in processing.

I often wonder if the economists in this country recognize that, because people spend only 15 percent of their take-home pay for food, that remaining income is invested in other areas of the economy. Other countries pay up to 40 percent of their take-home pay, but not so in America because of the great productivity our farmers are able to give to the people of this country. We are getting a bargain.

Mr. President, agriculture in this country is at the crossroads. In the next 10 years, if our farm population leaves at the same rate they are leaving now, farmers will represent possibly 1 percent of this country's population. From 1975 to 1980 we lost almost 182,000 farms in this country. Two thousand farmers per week have gone out of business since 1960. Average farm size increased from 175 acres in 1940 to 450 acres in 1979. Nonfarmers may own as much as 50 percent of the farmland.

We used to have a theory in agriculture that only the bad operators go out of business. They have been eliminated long ago and I submit we have the most efficient industry in the world today. We cannot afford to lose another operation.

Of the people who own ranch and farmland, only 25 percent are classified by the Department of Agriculture (USDA) as farmers. The agriculture system is probably the Nation's top industry with over $999 billion in assets. In 1979, the sale of food and fiber products amounted to $450 billion. USDA is projecting that U.S. agricultural exports will reach $46 billion this year, with a possible trade surplus of $28 billion—$28 billion dollars that goes to pay off our tremendous trade deficit, primarily caused by the import of petroleum products and automobiles. Agriculture exports pay for half of the cost of import oil. Now if you want to talk about agricultural subsidies and their cost to the economy, let us ask who is truly subsidizing whom?

Americans pay 15 percent of their net income for food products—the lowest in the world by far. Countries all over the world pay 2 and 3 times that amount. Again, let us ask who is subsidizing whom?

The agriculture system is probably the country's largest employer, with 10 million people directly or indirectly involved. The Bureau of Labor Statistics states that over the past 20 years:

> The rate of increase in farm workers productivity has averaged 75 percent greater than that of manufacturing workers. Agricultural production itself accounts for only 3.5 percent of the total U.S. gross national product; however, when all food and agricultural support industries are included, the agricultural system component of gross national product is boosted to an estimated 25 percent.

In past years, farmer costs of production ran from the upper 60's to over 90 percent of their gross income; now farmers are not even breaking even because of the tremendous increase in the costs of production, particularly the increased cost of petroleum products.

In 1979, farmers received $131.5 billion for their commodities. They turned right around and paid back to the economy $118.6 billion in production costs alone. According to the General Accounting Office—

> Typically, from 67 to 90 percent of the farmer's gross receipts go for direct production costs. That means that 25 to 35 cents of the farmer's 39 cents share of the consumer's retail food dollar is paid out in costs of production, leaving the farmer between 4 to 14 cents on the food dollar for personal items, income taxes, savings, and reinvestment, as well as retirement of the farm real estate debt.

In the last 10 years the dollar value of U.S. agricultural exports has more than quadrupled. According to USDA, the total domestic effect of agricultural exports on our business activity is about double the value of our export sales themselves.

Thus, exports of $46 billion could generate close to $92 billion in additional business activity here.

For all of this, how is the agricultural industry rewarded? With statements like, "farmers are too heavily subsidized" or "farmers have got it made." People scoff when they hear the words, "farmers are the backbone of the country," but they are the backbone of the country. Where would we be without them?

Mr. President, being a farmer myself, I realize just how bad the situation is on the farm today. My farm State colleagues also realize the seriousness of the situation. Agriculture is at the cross roads. Are we going to stand by and watch the family farm system go by the wayside?

In the Senate Agriculture Committee's report on the 1981 farm bill, we find some interesting statistics. In 1979, farms with gross receipts of $20,000 or less—57 percent of all U.S. farms—obtained only 7 percent of farm receipts. Most of their income came from nonfarm sources; 30 percent of these families had incomes below the poverty line. Farms with sales of $20,000 to $40,000—14 percent of all farms—received 8 percent of farm cash receipts and received 50 percent of their income from nonfarm sources. Farms earning more than $40,000—30 percent of all farms—received 85 percent of farm cash receipts. Of the farms earning over $40,000, those earning over $100,000, about 10 percent of all farms, received 60 percent of the farm receipts in that category.

The committee report points out, "not only has the farmer been put in a profit squeeze, but he is also deeper in debt." The Internal Revenue Service statistics show that in 1945 agriculture's taxable income was under $4 billion, with total assets worth $50 billion. Ten years later assets had doubled while taxable income remained under $4 billion. By 1977, farm assets had grown to $550 billion, yet farm income was about $1 billion less than it had been 22 years earlier. In 1960, real estate debt was $12 billion and nonreal estate debt reached $12.8 billion for a total debt of $24.8 billion. January 1 estimates show farm real estate debt at $92.2 billion, nonreal estate debt at $82.6 billion plus other miscellaneous debt at $5.7 billion for a total of $180.5 billion—a sixfold increase since 1960.

In 1979, net farm income was $31.2

billion. In 1980, however, it is estimated that net farm income will fall to $22 billion and probably further. The trend seems to be continuing in 1981 due to bad weather, soft commodity markets, especially in cattle receipts, and the strength of the U.S. dollar overseas which impacts our agricultural exports.

Mr. President, it is not "subsidies and protection" we are after, but fair and responsible policies in the best interests of a healthy and vibrant agriculture, which can continue to provide Americans and the world with the most wholesome quality food supply at any time in the history of man.

The 1981 farm bill which is before us makes some drastic changes. It will remove the first-year interest waiver on grain entering the farmer-held grain reserve, and the loan rates and target prices will be set at levels that are clearly inadequate.

Mr. President, my colleagues know I favor balancing the budget, but is this bill an overreaction to the need to limit Federal expenditures? Everything is being eliminated at once with no chance for adjustment. The Congressional Budget Office estimates that this farm bill package will cost about $7 billion over the 4-year period. That computes to about $1.75 billion per year. Again, may I remind my colleagues that last year alone, agricultural exports had a trade surplus of $20 billion.

Major cuts have been implemented in certain interest subsidies under FmHA. User fees are being implemented for Federal grain inspection. All of these costs must be picked up by the agricultural producer. At the same time the agriculture commodities are taking a beating at the marketplace. Major cuts are being made in REA and RTA, dairy programs, and disaster programs. We are cutting all these programs and heaping more expense at the same time.

The Office of Management and Budget has done an outstanding job of addressing the urgent need for greater fiscal responsibility, so this great country of ours can see its way through these tough economic times. However, I feel it is dangerous for OMB to dictate agricultural policy when their expertise does not lie in agriculture. These programs have been nickeled and dimed to death in a time when we literally have thousands of farmers in this country hanging on by a thread. We cannot set agricultural policy with dollars only in mind. We should understand the policies we are setting and the consequences of the programs, so we do not end up with unintended or undesired effects.

Mr. President, I do not wish to paint a picture of doom, but the picture is not bright and should not be portrayed to look bright.

The Agriculture Committee has done an admirable job of setting priorities in the farm bill under the tough budgetary restraints, and there are some bright spots in the bill in spite of the budget constraints.

The Soil Conservation Service provisions of the farm bill seem particularly strong, including some positive changes. In the past, any small watershed project costing over $1 million was required to have congressional approval. This bill will make that figure $5 million.

The SCS program will continue to offer technical and cost-sharing assistance to encourage conservation practices. The resource conservation and development program (R.C. & D.) will be extended and USDA will evaluate the program, with a report back to Congress by September 30, 1986. SCS will be authorized to recruit and train volunteers, and the Secretary will be given discretion to formulate a test program to determine the feasibility of reducing excessive sediment in existing reservoirs.

Earlier this year Senator JEPSEN introduced, with my cosponsorship, S. 569, the Soil and Water Conservation Incentives Act of 1981, a strong bill aimed at providing landowners a 10-percent investment tax credit for the expenses they incur in instituting and maintaining conservation measures on their operations. I believe this follows along quite well with the administration's idea of getting away from "direct subsidies" and I hope this measure can be enacted to assist farmers in dealing with our nationally serious soil and water conservation needs.

Wheat loan rates for 1982 are set at $3.50 and are to remain there for the duration of the bill. The target price is set at $4.20 and will go up 20 cents per year through 1985. The loan rate for corn is set at $2.65 and will stay at that level for the duration of the farm bill, while the target price is set at $2.90 for 1982, $3.05 for 1983, $3.20 for 1984, and $3.35 for 1985.

The Secretary will continue to set loans for feed grains in relation to the level set for corn.

Disaster payments will continue to be allowed for farmers who do not have access to Federal crop insurance. These payments can also be made if the Secretary determines that losses create an economic emergency or if Federal crop insurance payments are insufficient to alleviate the economic hardship.

The emergency feed program will be extended, along with authority for the special wheat grazing and haying program.

The committee voted to recapitalize the rural telephone bank for another 10 years at $30 million per year.

Export subsidies have been a major issue of late, and I am very pleased that the committee is recommending positive action on a special standby export subsidy program. This would counteract subsidy programs being used by foreign countries in third country markets. It will help to assure free and open access for our agricultural commodities in world markets and is identical in purpose to legislation I introduced in the House in the 96th Congress.

The agriculture embargo protection provision is a strong measure that there never again should be an embargo of agriculture products alone. In the event an embargo is placed on agriculture products only, loan levels will be raised to 100 percent of parity.

A set-aside program can be put into effect if USDA forecasts show that significant overproduction is imminent. Two other tools of production control are acreage diversion and acreage allotments programs which the Secretary can use at his discretion. At the present time, acreage allotments are used only in the rice program but can be extended to other commodities if the Secretary deems it necessary.

Finally, Mr. President, I would like to praise the Agriculture Committee for their efforts in setting priorities in the farm bill. No committee has ever had to work under more stringent budgetary guidelines. If I may restate something I said earlier, it is not "subsidies" and "protection" we are after, but fair and responsible policies in the best interests of a healthy and vibrant agriculture, which can continue to provide Americans and the world with the most wholesome quality food supply at any time in the history of man.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I have no illusions about what the probable result of this debate will be, but I would like to make a contribution as a freshman member of the Agriculture Committee and a freshman Member of this body regarding what has transpired throughout this year relative to our work on the farm bill in the Agriculture Committee.

For those Senators who have been paying close attention to what has happened here, it should be understood that the work product of all of this year in the Agriculture Committee was S. 884.

That is not what is before us here because, in the very closing moments before S. 884 came before us in this body, the administration came to us in the Agriculture Committee and said, "S. 884 is not acceptable to the administration."

As a consequence of that, all of us on that committee, Democrats and Republicans, worked earnestly for several days to achieve an accommodation that would be acceptable to the administration. By a loose-knit coalition, we were able to agree upon an amendment to S. 884, which was offered by the chairman and the ranking member here and has been the basic bill, as amended, that we have been discussing. As part of that, Mr. President, one of the things understood was that dairy could not be agreed to at all by the administration. You will recall that we had no provision in the bill on dairy and a number of rollcalls transpired on the second day regarding the question of dairy. That has been resolved in the favor of the administration.

I have no quarrel with that, Mr. President. That is part of the democratic process and the junior Senator from Illinois accepts that process always. But one of the fundamental things that we did was to achieve an accommodation on our differences between the administration and S. 884.

Now, Mr. President, let us examine that. What did S. 884 say on target prices? On wheat, it said $4.20 in 1982. The administration wanted $4. The loose-knit coalition came back with an agreement at $4.10.

On feedgrains, S. 884 said $2.80. The administration wanted $2.70. The agreed compromise was $2.75.

Let me say this, Mr. President: I have no quarrel with the administration's

right to come back at this late date and suggest that we have to have their figures or none. I do quarrel with the suggestion that my good friend, the Senator from Kansas, has the only solution. Let me say this, Mr. President: If we reject the amendment of the Senator from Kansas, we then revert to the amendment of the Senator from Indiana doing away with target prices. If we reject that, as we should, we come back to the basic bill.

The basic bill is substantially below what the Senate Committee on Agriculture did. It is a fair compromise. It was a compromise visited upon us in the first instance in the committee by the administration, which led us to believe that if we let dairy alone and fought it on the floor of the Senate, the rest of the basic commodities would be at least implicitly acceptable to the administration.

That is the point I make, Mr. President. If the administration's purpose were simply to have their bill, why did they not tell us that in the first instance? What was the sense of taking the time of good men and women for days to achieve an honorable compromise if, at the last moment, they were going to come to us in this body and say, it is all or nothing; is it the administration's or no view with respect to this legislation?

Why did this committee suffer all those meetings for months to achieve an agreement and then compromise that agreement downward to accomplish an accommodation with the administration, only to come here in the dying hours of this bill and be told the bottom line is the administration's view or nothing?

I ask my colleagues this: Is there anyone here, really, who believes that this bill will be vetoed? None. The bill will not be vetoed. We know that. Dairy has been resolved in favor of the administration. The administration is satisfied with peanuts. The administration made its deal on sugar and has to live with it.

Whom are we kidding, Mr. President? We are kidding no one. There is no one here who thinks that the administration will veto this bill and go back to the 1949 law, not one single, solitary person here who knows or believes that. My distinguished and beloved friend from Kansas, who makes such a great contribution in all matters, knows that.

This bill is not going to be vetoed, Mr. President. This is the final question of whether the administration has every single continental thing it wants in this bill. Why should it have that? This is an honorable compromise, made between honorable men and women on both sides. It is acceptable, it is fair.

I voted against target prices in the first place when my distinguished friend, the Senator from North Dakota (MARK ANDREWS) offered a higher loan rate. But the compromise was target prices and I lived with that.

When my distinguished friend, the Senator from Nebraska (Mr. ZORINSKY) came in here and wanted S. 884, I voted against it, with my distinguished ranking member from Kentucky, because we had an accommodation.

When my friend, the Senator from Montana, came in and wanted high loan rates, I voted against that, though that is what I would have wanted, because we had an accommodation.

But in the end, Mr. President, we have none.

Let me say to my friends here, this bill will not be vetoed. There is not one single thing the matter with this bill with reference to wheat or with reference to corn or with reference to any other commodity. The administration can live with it and we know it. I say, reject the amendment of my distinguished and honorable friend, the Senator from Kansas. Reject it.

I say then reject the amendment of my friend from Indiana. Reject it and come to the bill—the bill that we wrote, the bill that is fair, the bill that is an honorable compromise, the bill that is a fair accommodation. That is fair, that is justice. It is fair to the farmers. The administration will sign it and it is what we ought to do.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I have spent literally hundreds of hours trying to reach a farm bill that is fair to the farmer, yet in keeping with the overall philosophy of budget restraints and our quest for economic recovery. I might say that every other member of the Committee on Agriculture has spent a like period of time. I think it is fair to go back and follow the sequence of events, to follow the cooperation or lack of cooperation on the part of the Department of Agriculture in connection with the farm bill.

Originally, the Department of Agriculture came out with a program wherein they stated they were opposed to target prices, but were for increased loan rates. That was the original announcement, really, of a position by the Department of Agriculture, along with some other matters involved here. The Committee on Agriculture, I think, like any committee, has had leadership that has been bipartisan, with a sincere effort to reach an accommodation within budgetary restraints and yet to be fair to their constituents, the farmers, as well as the food and fiber consumers. We conducted extensive public hearings last spring and, as has been stated on this floor several times, there were 24 arduous markup sessions—24 separate sessions by which we were writing the bill.

The Department of Agriculture, during that writeup and markup, was asked to cooperate. They basically took a hands-off attitude in regard to working out a compromise at that stage, although they did respond to inquiries propounded to them during the markup sessions.

After those 24 sessions, about the end of April—I do not remember the exact date, but I would say it was approximately the 25th of April—the work product of the Agriculture Committee was finished and published.

The Department of Agriculture thereafter had ample time to consider and comment upon the work of the committee. If they did not want to take what we had agreed to at that time, they had full opportunity to offer their suggestions; and Senator HELMS and Senator HUDDLESTON, in my judgment, would have seriously considered anything that was stated to them by Department of Agriculture spokesmen.

Instead of doing something in the 3½ months after the committee completed its work on S. 884, we hear about the 1st of September, during the recess, what their position is going to be. Again, under a cooperative, bipartisan leadership approach, the administration position was considered, as every other matter was considered that has ever been asked to be considered by the committee; and I believe there has been outstanding fairness and an outstanding spirit of cooperation and a spirit of "Let's work the thing out within the committee," by the members of the committee. I am proud of the way they have worked together and cooperated with each other in connection with the farm legislation.

We returned here the Wednesday after Labor Day and immediately went into sessions to try to see if we could work out the administration's new and sudden proposals, in a spirit of cooperation and compromise.

We found that there was one major problem. We started, only 3 days before the farm bill was to be brought up, to attempt to work out a compromise. The dairy problem appeared to be the major problem. We saw that there was likely to be no compromise there. Reports came back that, basically, the compromises worked out in the Agriculture Committee, with the exception of dairy, were going to be satisfactory to the administration. Now, today, we find something different. There has been another shift in position by the administration.

The matter of trying to work out a compromise is give and take. There has been no give whatsoever on the part of the Department of Agriculture. They want to write the bill in its entirety. Should we do away with the Agriculture Committee of the U.S. Senate and substitute the executive branch to carry out the mission of the committee? That is what we are being asked to do in this instance and I find this situation to be disturbing.

We came to the floor this past Monday, a coalition had been formed to effect compromise, and as a result, substantial reductions were made in certain fields. We are pretty close to being within the new budgetary restraints that have been thrust upon us.

Now let us take some scenario events. Suppose the Dole substitute, which represents the administration's new position, is not adopted and we go back to the Lugar proposal. What do we find if the Lugar proposal is adopted, with no target prices? Then where is the administration's commitment of higher loan rates? Are you going to establish what those loan rates would be in the waning hours of this day if Senator LUGAR'S no target price amendment is adopted?

If the Lugar amendment is adopted, in my judgment, in order to be orderly and fair—fair to the administration, fair to

the farmers—the farm bill will have to come down, and we will have to move toward trying to find out what equitable loan rates should be.

In a legislative process, where you expect to have a studious approach, to substantive matters if the Lugar approach or the original administration approach, to be more precise, would be that there would be no target prices, we would have to sit down and calculate loan rates for the various commodities; and we have to calculate them in view of market changes, production figures, and other estimates that will need to be made in formulating a responsible farm bill. It cannot be done in the snap of a finger.

So I believe that here we have on one hand a proposition from the administration wherein there is no give, which I hope will be rejected. I hope the Lugar amendment will be rejected so that we may get back to a real, conscientious effort that was made not after 24 sessions of markup but was made after 27 when you include the meetings of last week. Those three additional sessions were after we came back from recess, after the Department of Agriculture held their proposal to their bosom for many, many months.

I believe that in a spirit of letting the legislative process work, letting the committee process work, the committee's position should be supported; and it should sound out that in the future, if the Department of Agriculture wants to have a part in writing a bill, the committee is always available to them and will always work with them, but they must come forth and do something themselves and not wait until the last minute. That, I say again, is the situation we find ourselves in today.

I believe there was an honest effort to have a workable coalition in connection with this bill.

If there is going to be a coalition of farm States in the future, the precedent that is set here today will affect the future of any farm coalition.

I respectfully urge the Members of the Senate to vote down the amendment offered by Senator DOLE and to vote down the amendment offered by Senator LUGAR and to go back to the studious, hardworking compromise, the 27-session markup, by which this bill came to the floor of the Senate.

Mr. DOLE. Mr. President, I believe other Senators wish to speak.

I understand the concern expressed by all Senators, but I want a coalition for success, not a coalition for failure. We put together coalitions—if there is a coalition, and there appears to be one now. This Senator has been part of it all through the peanut coalition, the tobacco coalition, and the sugar coalition. We do not raise tobacco, we do not raise sugar, we do not raise peanuts, but we do raise wheat.

I believe that the farmers of this country would rather sacrifice $72 million, or whatever the estimate was, and get a farm bill, than to talk about a coalition.

If I were talking about a crop that affected somebody else more than it did the Senator from Kansas, I certainly should be criticized. In this particular case, I probably will be criticized at home, but I understand that.

I do not know what a coalition is for. We have had farm coalitions as long as I have been in the Senate.

We generally had to come to grips with the administration, whatever the administration was, whether it was the Carter administration, the Ford administration, the Johnson administration, the Kennedy administration, the Nixon administration, or now the Reagan administration.

Coalitions of those who represent farmers are like coalitions that represent New England, the Southwest, or the Northwest. We have a tendency to maybe help too much and in the process strain the budget.

I have the greatest respect for everyone who has spoken, and I know they have much more legislative experience than this Senator. But I have been convinced of one thing since I have been here, and that is President Reagan means what he says. If in fact we want to come back, and I am not even going to mention the word, but if in fact he means what he says, we will be back.

I am from a wheat-producing State. Time is of the essence. We are planting wheat right now. We have a set-aside announced 2 weeks ago, much too late, but an effort to reduce some of the pressure on the market to increase market prices.

It did not do very much. It is only the intention because the Secretary does not have the authority for a set-aside. He does not have the authority to set out the guidelines until we pass this bill.

And the ground has been worked and the money has been spent on fertilizer, and the Kansas farmers, as much as they probably would like to hear this debate, would like to see a farm bill passed, whether it is $72 million more or less. Their real concern is not what percent of parity or how much target price but what we are going to do about interest rates and inflation.

We are not going to do much about either one of those unless we, also, are willing to live within the budget.

The President does not impose budgets. We have a Budget Committee in this Congress, and they have taught us all a little discipline. We do not like it. We fuss at the Budget Committee. But we know that when they speak, we have some obligation to stick within the budget.

So I say to my friend from Alabama and my friend from Illinois as far as corn and feed grains we are talking about $1 million difference between what I offer and what the administration would like to have. That would be I do not know how much when we divide that $1 million up with all the corn producers or the feed grain producers. As to cotton, there is no difference at all.

I am going to be a conferee, and I pledge to the Senator from Alabama and the Senator from Illinois that there is not going to be any change in what we have done in this Chamber as far as the basic commodities, whether it is peanuts, sugar, tobacco, or whatever. We have not made any change in tobacco.

As far as this Senator is concerned, I am going to vote with the ranking Democrat on the committee and the ranking Republican, the chairman of the committee, and I have the pledge as far as I can get the pledge that this is going to be what the administration is going to push.

So it seems to me that we are arguing about, yes, $360 million more or less, but we are also arguing about a $10 billion farm bill, and I would rather have a $10 billion farm bill than argue over $360 million.

Maybe some would rather just have the argument, and I do not necessarily speak for the administration. I have tried to cooperate with the coalition. But I never really found the coalition, to be very honest about it. I looked over some of the votes. I hope I have been true to the coalition except up to now and we are talking about crops that affect my State and affect the State of the Senator from Iowa, the State of the Senator from Indiana, and the State of the Senator from Arkansas, and I am going to yield because I know the Senator from Arkansas wishes to make a moderate statement in slight opposition to this amendment.

Mr. PRYOR. Mr. President, I thank the Senator from Kansas.

I wish to state to the Senator from Kansas that when I came to the Senate and became a member of the Committee on Agriculture, I wondered then why we wrote a farm bill only once every 4 years. I think after this week of debate and deliberation on the farm bill of 1981 all of us now recognize why only once in 4 years we deliberate such a controversial piece of legislation.

In fact, there may be only one or two members of the Committee on Agriculture that have gone through the writing of more than two of these bills.

So we can see that after time spent, tremendous numbers of hours, with 27 markup sessions, as the Senator from Illinois and the Senator from Alabama have so eloquently stated, we now find ourselves today at this point.

Mr. President, I wish to make one or two comments. I have not spoken thus far during this week's debate on the farm legislation.

But I wish to state that I generally subscribe to the viewpoints as expressed by the Senator from Illinois and by the Senator from Alabama as they have basically tried to lay the framework of history, of progress of how this bill has come from the administration to the committee and ultimately to this Chamber. I was going to go into some of that, but because they stated the point so clearly I find that unnecessary at this time.

I do say that I have attempted to be a part of that group of individuals, both in the committee and in this Chamber, who have tried to structure or to fashion a farm bill that would keep in mind the economy of the situation, the desire of the President not to have a piece of legislation that would have as the Agriculture

Department so eloquently states too much "exposure," and I have attempted throughout the history of this debate and throughout the entirety of 1981 to keep that one principle and that one goal in mind.

Mr. President, I do think it has come time for us in the Senate to generally accept what I believe to be a fair and yet I think a very modest proposal as it relates to the American farmer.

In fact, when I say "fair," I am not quite sure it is fair. I have my doubts about that. In fact, I came over Monday to make a speech on this piece of legislation and whoever had drafted that speech said, "I rise to express my unreserved and enthusiastic support for this bill," and I scratched out "unreserved and enthusiastic" because, as I listened to the debate, I saw the problems that were involved in this very, very complex and controversial piece of legislation. I must say that generally I support it, but I do not support it as it now stands without some reservation.

I certainly do not support this bill as it might be amended by Senator DOLE and also by Senator LUGAR. I am very hopeful that our colleagues will not see fit to support the Dole amendment or the Lugar amendment, especially as it relates to target prices.

Mr. President, I represent a rice State, and I know that the distinguished Presiding Officer, Senator COHEN, now presiding and in the Chair before the Senate, is from the State of Maine, and I do not think there is 1 acre of rice grown in the State of Maine.

In fact, I am not even certain that there is an acre of rice grown in the State of Alabama.

There may be a few acres grown in the State of Illinois.

I see my friend Senator BAUCUS from the State of Montana. I do not think there is any rice there.

I do not believe that Senator MATSUNAGA's State grows any rice in the State of Hawaii. I could be wrong.

Basically, there are five rice-producing States. They are the State of Arkansas, the State of Mississippi, the State of Louisiana, the State of Texas, and the State of California.

In this five-State area of the United States we grow enough rice to more than satisfy the consumption of the American needs and, therefore, a tremendous amount of our rice is exported, some of it through the Public Law 480 food for peace program.

I talked yesterday, Mr. President, by phone, yesterday morning, not necessarily to one of the biggest millers or rice producers we have throughout the State of Arkansas, but I called a man I thought would be a typical rice farmer.

In my discussions with him he told me that on Monday of this week he was forced to sell his rice at $4.60 per bushel.

I said, "Well, let me ask this question of you, sir: What were you selling your rice for this time last year?" He said, "Well, this time last year after the drought and after this and that I was selling my rice easily for $5.70 a bushel."

Well, Mr. President, my point is very simple. We see inflation continuing to rise; we see expenses continuing to be on the increase. Yet we see declining farm prices where we must see a coalition and a relationship of the U.S. Department of Agriculture and the people of this Nation who must at this time stand behind the farmers of America.

The average farmer in this country today is 58 years of age. Today it is almost beyond the realm of possibility for a young man or a young woman or a young farm family to start out within a free enterprise concept that we have and become farmers who can grow food or grow fiber for a profit. We must have a partnership relationship.

Mr. President, I sincerely believe that the compromise that has been fashioned, and I hope will be supported by this Senate, will be supported without the Dole amendment and certainly absent the amendment offered by the distinguished Senator from Indiana, Senator LUGAR.

That concludes my remarks today. I just want all the Members of this body to know that it has been a thorough pleasure working with the distinguished Senator from Kansas, the distinguished chairman from North Carolina, our ranking member, Senator HUDDLESTON of Kentucky, who has not missed, I think, one session of any of these markups.

I just hope we will continue working toward the adoption of the compromise we have fashioned.

I yield to the distinguished Senator from Mississippi.

Mr. COCHRAN. Mr. President, I think the Senate is about ready to vote. I want to make one or two points to clarify what happened with respect to the communication of the administration to the Senate and to the Senate Committee on Agriculture.

After the Senate Committee on Agriculture reported S. 884, the administration came back through the Secretary of Agriculture to say that the projected outlays were too high, not consistent with the economic recovery program of the administration, and that the President would likely veto this legislation if it were adopted in that form.

A bottom line was presented to the committee members by the Secretary of Agriculture containing target prices and loan rate figures which, it was said to the committee at that time, would be the acceptable level of projected outlays.

In response to that presentation our committee got together and decided we would try to come toward those figures and see if it would be possible to get agreement on those figures.

After much deliberation, discussion, and careful study, we came up with a counteroffer, in effect, to the administration containing the figures that were presented to the Senate in the committee amendment relating to these commodity programs.

Two days ago the Secretary of Agriculture came back and said, "Those figures are not close enough, they are not consistent with what the administration will accept on projected outlays."

The administration never agreed to go along with the committee compromise. They did reiterate that the earlier bottom line which was presented to the Senate committee was, in fact, the bottom line, and that it would be likely, although not certain, that the administration, the Executive, would veto the bill if it was not consistent with those earlier numbers.

After that presentation, looking at the bill and the other provisions contained in it, Mr. President, I wonder whether the Senate would really be wise in playing veto roulette with this legislation, gambling the structure of the legislation that has been crafted by the committee for $360 million?

This Senator frankly thinks it would be wiser, it would be more consistent with reason and wisdom, if the committee realized that we have received concessions and compromises from the administration on other key provisions in the structure of this bill, the target price concept being a good example, even though the Senator from Indiana is asking us to take that out of the bill and take out the set-aside program provisions. Those are provisions which this committee decided should be in the bill, and the administration has backed up, in effect, and said, "We won't recommend a veto if those provisions are in the bill." That is a triumph for the committee. It is a triumph for the farmers of this country, and to risk losing that on a veto of this legislation, and have to go back to ground zero, start all over again, rearguing those earlier differences of opinion, in my judgment, would not be justified.

We have a commitment from the Secretary of Agriculture to push for signing and approval by the administration of the bill if these projected outlays are brought down by $360 million.

I think we ought to go along with that. I do not want to, because we worked out what we thought would be the best possible approach, the best and lowest numbers we could accept, but that turns out not to be satisfactory.

We want inflation to come down, we want interest rates to come down, and I think it is more important to the farmers who are out there really trying to make a living, to do something about those problems, to keep target prices and the set-aside program in the bill, than it is to argue over $1 million in projected expenditures for a feed grains program. In the cotton section there is no difference in projected outlays. In rice, admittedly, there are substantial changes, and I regret that those changes are in there.

The point is if we are successful in helping the administration reduce interest rates and production costs, we will be doing more for the farmer than by providing high levels of anticipated subsidies, and farmers know that.

For every 1 percent reduction in the inflation rate or the cost of production there will be $1.5 billion more in net farm income for American farmers. That is what we are really talking about here. That is what this Senate, I think, is committed to do, and that is to try to give

the President's economic recovery program a chance to work.

I urge the Senate to support the Dole amendment.

Mr. HEFLIN. Mr. President, the Senator from Mississippi raises an interesting issue which he terms veto roulette. When do you play veto roulette? I am not an old hand, but it seems to me that if you get to the point of playing veto roulette it is in conference.

We have had chiseling in connection with the bill before us as with other legislative measures. You chisel away, you chisel away, you chisel away, and you chisel away in the Senate.

Then you go to the House and you play chiseling. You chisel away, you chisel away; and then you go to conference, and you go through the third battlefield of taking away or chiseling away, chiseling away.

It seems to me that the proper time for a battle between the legislative process and the real prospect of a veto is after the Senate and the House have resolved their differences.

We work under a bicameral system—this is not a unicameral legislative body—thus, the issue of veto roulette comes into play, it seems, after the two legislative bodies have completed their tasks and reached agreement.

I would also like to say that the prospect of a Presidential veto is a two-edged sword. There is no question that if the President vetoes S. 884, and there is no farm bill, you go back to the 1949 act. The 1949 act at a minimum will cost the Government $16 billion a year. In my judgment, the President will never veto with that type of outlay of taxpayer moneys as a strong possibility.

There is, of course, always the opportunity or possibility of writing another farm bill. At that time, market prices may have changed again, the fine-tuned Reagan program may not have worked, and there may be a third or a fourth or 87th or 89th Presidential request for further budget cuts.

So it seems to me, at this time, the proper thing to do is for those that are part of a farm coalition and have been a part of a farm coalition to stay in the traces, do not jump the traces. If you are going to get into the issue of this where there could be a possible Presidential veto of the bill now before us, consider the 1949 act, and consider the battlefield. The battlefield, in my judgment, we will know a lot more about it a little later on, we will be fighting a much more intelligent battle in the conference committee and in the approval of the conference reports than we will at this stage.

Mr. HUDDLESTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. HUDDLESTON. Mr. President, I do not want to restrict any debate on this particular issue or preclude any other Member from making any statement that he might want to make at this particular time. But I am preparing to move to table the amendment of the distinguished Senator from Indiana.

Mr. COCHRAN. Why do we not just have an up or down vote on Senator DOLE's amendment? Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, if I understand the intention of the Senator from Kentucky correctly, it would be his intention now to offer a motion to table the amendment offered by the distinguished Senator from Indiana (Mr. LUGAR). If such a motion is offered, Mr. President, it will be the intention of the Senator from Mississippi to vote yea, in view of my interpretation that that motion would be directed clearly to the amendment of the Senator from Indiana.

At the same time, it is this Senator's understanding that, if the motion to table is agreed to, it will carry the amendment offered by the Senator from Kansas with it. In such an event, it is the understanding of the Senator from Mississippi that the Senator from Kansas would then reoffer his amendment to the bill.

With that understanding, and with that explanation of the parliamentary situation as this Senator understands it, Mr. President, it will be my intention to vote "yea" on the motion of the Senator from Kentucky.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I am surprised, to say the least, by this turn of events, but on the other hand, I have to respond accordingly.

I appreciate the parliamentary situation stated by my colleague from Mississippi, who clearly wants to get to the Dole amendment and prefers not to vote on mine.

Mr. President, I want to be clearly understood as to where we are headed in this particular situation. I have indicated that the amendment by the Senator from Kansas, because it does come within the boundaries of what the President of the United States would sign, I think is a very important contribution. It is being offered in the nature of a substitute. Clearly, Senators feel embarrassed for a moment about the problem of voting on my amendment first, in the hope that somehow they will get to the Dole amendment.

Mr. President, let me suggest a way that we can relieve Senators from that predicament; namely, if we were to vote on the Dole amendment in one form or another first, we could have a clear indication of how we are proceeding with regard to the Dole amendment. That would not leave Senators in a position of confusion as to which amendment they were voting on.

So, Mr. President, with that in mind, I move to table the Dole amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Indiana (Mr. LUGAR) to table the amendment of the Senator from Kansas (Mr. DOLE) to the amendment of the Senator from Indiana (Mr. LUGAR). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Arkansas (Mr. BUMPERS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 42, nays 46, as follows:

[Rollcall Vote No. 267 Leg.]

YEAS—42

| | | |
|---|---|---|
| Baker | Ford | Mitchell |
| Baucus | Glenn | Nickles |
| Bentsen | Hart | Nunn |
| Biden | Heflin | Pressler |
| Boren | Helms | Proxmire |
| Burdick | Huddleston | Pryor |
| Byrd, Robert C. | Jackson | Randolph |
| Cannon | Johnston | Riegle |
| Chiles | Leahy | Roth |
| Dixon | Levin | Sarbanes |
| Durenberger | Mathias | Sasser |
| Eagleton | Matsunaga | Stennis |
| East | Melcher | Tsongas |
| Exon | Metzenbaum | Zorinsky |

NAYS—46

NOT VOTING—12

| | | |
|---|---|---|
| Bradley | Hollings | Murkowski |
| Bumpers | Inouye | Stafford |
| Cranston | Kennedy | Weicker |
| Dodd | Laxalt | Williams |

So the motion to lay on the table Mr. DOLE's amendment (UP No. 394) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUDDLESTON. Mr. President, I suggest that the Members of the Senate just disregard what has happened here on this last vote, because we now return to the issue we were debating just before the Senator from Indiana made the motion. At that time, I defined what the issues are here: First, to establish that the Senate believes that we ought to accept the target price concept; and, second, to make a determination as to what level those target prices ought to be.

Just before we voted, the distinguished Senator from Mississippi very clearly detailed exactly what the situation was. So, with that in mind, I move to lay upon the table the amendment by the distinguished Senator from Indiana (Mr. LUGAR). I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HUDDLESTON. Mr. President, before the vote is taken, I make this motion on behalf of and in conjunction with the distinguished manager of the bill and committee chairman, the distinguished Senator from North Carolina (Mr. HELMS).

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kentucky to lay the amendment of the Senator from Indiana on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Nevada (Mr. LAXALT), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Vermont (Mr. STAFFORD), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 45, nays 43, as follows:

[Rollcall Vote No. 268 Leg.]

YEAS—45

| | | |
|---|---|---|
| Abdnor | East | Levin |
| Andrews | Exon | Long |
| Baker | Ford | Matsunaga |
| Baucus | Glenn | Melcher |
| Bentsen | Grassley | Metzenbaum |

NOT VOTING—12

| | | |
|---|---|---|
| Bradley | Hollings | Murkowski |
| Bumpers | Inouye | Stafford |
| Cranston | Kennedy | Weicker |
| Dodd | Laxalt | Williams |

So the motion to table Mr. LUGAR's amendment (UP No. 392) was agreed to.

Mr. EXON. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 395

Mr. DOLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 395.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. MELCHER. Reserving the right to object, Mr. President, what is this?

Mr. DOLE. It is an amendment.

Mr. MELCHER. I object.

The PRESIDING OFFICER. There having been an objection lodged, the clerk will continue the reading of the amendment.

The assistant legislative clerk proceeded to read the amendment.

Mr. DOLE. Mr. President, I wonder if I might suggest to the Senator from Montana that it is the same amendment I offered and explained in detail about 2 hours ago and the Senator was very pleased with my explanation. [Laughter.]

Mr. MELCHER. With that full explanation, I have no objection. [Laughter.]

The PRESIDING OFFICER. The objection having been withdrawn, without objection, further reading of the amendment is dispensed with.

The amendment is as follows:

On page 138, striking line 1 through line 11 on page 197 and inserting in lieu thereof the following:

TITLE III—WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, WHEAT ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, the Agricultural Act of 1949 is amended by adding after section 107A the following new section:

"SEC. 107B. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of wheat at such level, not less than $3.50 per bushel, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

"(b)(1)(A) In addition, the Secretary shall make available to producers payments for each of the 1982 through 1985 crops of wheat in an amount computed as provided in this subsection. Payments for any such crop of wheat shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat.

"(B) The payment rate for wheat shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per bushel.

"(C) For the 1982 through 1985 crops of wheat, the established price shall not be less than $4.00 per bushel for the 1982 crop, $4.20 per bushel for the 1983 crop, $4.40 per bushel for the 1984 crop, and $4.60 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that because of

drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of wheat, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their wheat acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of wheat, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance programs; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of wheat. The proclamation shall be made not later than August 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the acreages as required to be determined. The farms for which individual farm program wheat acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of wheat planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the proclamation of the national program acreage made not later than August 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of wheat planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for wheat, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to wheat if the Secretary determines that the total supply of wheat will, in the absence of such limitation, be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the wheat acreage base for each wheat-producing farm. Producers on a farm who knowingly produce wheat in excess of the permitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this paragraph shall be the acreage planted on the farm to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of wheat if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of wheat. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 302. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982, through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 303. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 304. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 305. Section 107 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of wheat.

## TITLE IV—FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAYMENTS, FEED GRAIN ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 401. Effective only for the 1982 through 1985 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105A the following new section:

"SEC. 105B. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of corn at such level, not less than $2.50 per bushel, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

"(2) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act.

"(b)(1)(A) The Secretary shall make available to producers payments for each of the 1982 through 1985 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, in an amount computed as provided in this subsection. Payments for any such crop of feed grains shall be computed by mutiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to such feed grains.

"(B) The payment rate for corn shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop,

is less than the established price per bushel.

"(C) For the 1982 through 1985 crops of corn, the established price shall not be less than $2.70 per bushel for the 1982 crop, $2.85 per bushel for the 1983 crop, $3 per bushel for the 1984 crop, and $3.15 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The payment rate for grain sorghums, oats and, if designated by the Secretary, barley, shall be at such rates as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of feed grains, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their feed grain acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of feed grains, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers, taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c)(1) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of feed grains. The proclamation shall be made not later than November 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the

Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined. The feed grain acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the proclamation of the national program acreage made not later than November 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) the farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to feed grains if the Secretary determines that the total supply of feed grains will, in the absence of such limitation, be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the feed grain acreage base for each feed grain-producing farm. Producers on a farm who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this paragraph shall be the acreage planted on the farm to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of one or more of the crops of corn, barley, oats, and grain sorghums if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of any of these feed grains. If a land diversion program is in effect for one or more of the crops of corn, barley, oats, and grain sorghums, the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county of local community.

"(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(i) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 402. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of feed grains.

## TITLE V—UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSION OF MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342, 1343, 1344, 1345, 1346, and 1377) shall not be applicable to upland cotton of the 1982 through 1985 crops.

LOAN RATES AND TARGET PRICES, DISASTER PAYMENTS, COTTON ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF UPLAND COTTON

SEC. 502. Effective only for the 1982 through 1985 crops of upland cotton, section 103 of the Agricultural Act of 1949 (7 U.S.C. 1444) is amended by adding at the end thereof the following new subsection:

"(g)(1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to cooperators nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (A) 85 per centum of the

average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the five lowest priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between such average northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)). In no event shall such loan level be less than 55 cents per pound. If for any crop the average northern Europe price determined under clause (B) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (A) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the cooperator during the tenth month of the loan period for the cotton, be made available for an additional term of eight months, except that such request to extend the loan period shall not be approved in a month when the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period. Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(i) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available.

"(ii) If a special quota has been established under this paragraph during the preceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (i) of this subsection or the amount required to increase the supply to 130 per centum of the demand.

"(iii) As used in clause (ii) of this paragraph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (adjusted to four-hundred-and-eight-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established.

"(iv) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for entering cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps an existing special quota period.

"(3) Notwithstanding any other provision of law, any upland cotton described in items 955.01 through 955.03 of part 3 of the appendix to the Tariff Schedules of the United States imported into the United States during the period of time a special quota established under this subsection is in effect shall be deemed to be an import under such special quota until the special quota is filled and any such cotton shall be free of duty.

"(4) Payments shall be made for each crop of upland cotton to the producers on each farm at a rate equal to the amount by which the higher of—

"(A) the average market price received by farmers for upland cotton during the calendar year which includes the first five months of the marketing year for such crops, as determined by the Secretary, or

"(B) the loan level determined under paragraph (1) of this subsection for such crop,

is less than the established price per pound times in each case (i) the farm program acreage for cotton, determined in accordance with paragraph (8) of this subsection (but in no event on a greater acreage than the acreage actually planted to cotton for harvest), multiplied by (ii) the farm program payment yield for cotton determined in accordance with paragraph (9) of this subsection. For the 1982 through 1985 crops of upland cotton, the established price shall not be less than $0.71 per pound for the 1982 crop, $0.76 per pound for the 1983 crop, $0.81 per pound for the 1984 crop, and $0.86 per pound for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. The total quantity on which payments would otherwise be payable to a producer for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (5) of this subsection.

"(5)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of upland cotton, if the Secreary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of upland cotton, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33⅓ per centum of the established price for the crop for the deficiency in production below 75 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of upland cotton, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their cotton acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of upland cotton, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(6) The Secretary shall establish for each of the 1982 through 1985 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation factor under paragraph (7) of this subsection if the

Secretary determines it necessary based upon the latest information, and the Secretary shall announce such revised national program acreage as soon as it has been made. The national program acreage shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres.

"(7) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor (not to exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(8) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the cotton acreage on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the announcement of the national program acreage made not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than for the preceding year, but the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(9) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available. Notwithstanding the foregoing provisions of this paragraph, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this paragraph. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.
